DIRTY elevators, untidy offices, and unkempt premises do not attract business. Spring time is upon us in these central grain belt states and it will pay every country elevator operator, if he has not already done so, to put his house in order. By this we mean clean up the grounds, pile up bits of lumber and broken grain car doors, put in a good walk from the street to the office and elevator, gravel the roadway, spade up the ground around the elevator and plant grass seed, and keep the work floor and driveway swept up. You will be surprised at the benefits which will accrue by having your business surroundings presenting a tidy, neat appearance. You can do better work and your customers will find it a pleasure to come to do business with you.

THREE DOLLARS a year in the United States and Mexico; \$4.00 a year for Canada, \$5.00 United Kingdom, the Continent of Europe, Australia, and other countries in the Universal Postal Union. Less than a year at the same rate. Single copy 15 cents.

LETTERS from our readers are solicited on subjects of interest to those engaged in the grain and allied trades, news items, reports on crops, grain movement, new firms, contemplated improvements and cars leaving in transit.

THE ADVERTISING value of The Price Current-Grain Reporter as a medium for reaching the buying power of the grain, feed, seed, bean and hay industries is unquestioned. The character of advertisements in its columns testifies to the favorable opinion of and value received by our advertisers. If you would be classed with progressives, place your announcements in the trade's only weekly, which is always first to get the live, up-to-date news to its readers.

CHICAGO, APRIL 1, 1925.

GRAIN TRADE REVIEW

ADVANCES in the wheat market were not maintained the past week, as liquidation developed in the May, and prices declined sharply after an early bulge, made as the result of increasing complaints of dry weather, drought and abandoned acreage in the Southwest. There has been little export business of consequence in domestic wheat the past few days, although the sharp decline during the closing days of the week widened out the Chicago-Liverpool spread to a point where it looked as though some sales of domestic grain might be put through. To a large extent the fresh outside interest in the wheat market is going into the July delivery, which represents the new crop, and promises to fluctuate comparatively rapidly from now on as growing weather has been experienced over the greater part of the belt. There is a big territory in Texas, Oklahoma, Kansas and Nebraska where rains would be highly beneficial, and unless they are received the Government report to be given to the trade on April 9 will probably show a much lower condition than prevailed last year when it was 83. A local statistician had reports suggesting a condition of around 73, and every day that moisture fails to materialize, lowers the condition somewhat further. The condition at this time is regarded as about the lowest known, with one exception, since 1879. It is privately estimated that there has been a loss of 18 per cent in the total area seeded last fall, due to winter killing, equal to 7,500,000 acres, the second largest known. If this report proves to be correct, it will largely offset the effect of the prospective increase of nearly 14 per cent in spring wheat so that the total for the country of both winter and spring will show little change from that of last year. Usually weather markets are subjected to extremely erratic price movements, and bullish wheat on dry weather during the month of March has not proven very profitable in the past, and the trend of the market is regarded as depending largely on whether the dry areas get rain or not. Under no consideration can Texas secure a large crop of either wheat and oats as harvest should commence in the more advanced sections of that state in about 45 days, although the big belt will not start to harvest until sometime in June.

Visible Decreasing Rapidly.

The domestic visible supply has commenced to decrease at a fairly rapid rate, with local stocks being rapidly cut down, and the same is true at Omaha and Kansas City, with comparatively little wheat left unsold. On the other hand the Northwest has liberal stocks and supplies there are being cut into slowly, and it is estimated that Duluth has around 5,000,000 bus. spring wheat that could be secured. Some durum is believed to be sold there for export, and should a good foreign demand develop and take up the slack in the market represented by the Northwestern supplies it is probable that the May would tighten up materially, especially as the country is not selling at all freely on account of the press of field work. Spring wheat seeding is well under way in parts of South Dakota and Minnesota, and if weather conditions remain favorable for a week or so longer the bulk of the grain in the two states should be in the ground, which would be a decidedly early start as compared with some recent years. It is the early sown grain that usually returns the largest yield per acre. The same holds true of oats, and that grain is being put in rapidly in all sections where the ground is dry enough to work. Little change is noted the past week in the world's statistical position in wheat, although private cables intimate that an official revision will be made of the Argentine yield and also the probable surplus, and it is likely to show a larger total than first reported. Europe continues to absorb large quantities of wheat in the world's markets and clearances from Argentina the past week fell off materially. If there is to be any scarcity of wheat it will hardly develop until the tail end of the season.

Coarse Grains.

Liquidation was on in corn the past week with a sharp decline to around the lowest figures on the crop for the May with the September at a new low for the season. The continued slow domestic cash demand, which has been instrumental in causing a burdensome accumulation of supplies at primary points, showed no signs of improving the past week as far as Chicago was concerned, but in the Southwest and West there was a better call. Kansas City is shipping a fairly liberal quantity to Chicago and about half of the arrivals several days the past week were from other markets. The price of corn and hogs has widened out to a point where feeding operations are decidedly profitable. So far the Eastern demand for oats has not come up to expectations, and it now looks as though it would be almost impossible to dispose of the immense holding at terminal markets before the new crop is ready to move, which will be late in July. The price is lower than last year due to the large supplies of cash grain, and a liberal acreage is not wanted this season.

GRAIN MARKET SUMMARY.

Receipts of wheat, corn and oats at primary markets the past week, with comparisons, follow:

	Mar. 28, 1925.	Mar. 27, 1925.	Mar. 29, 1924.
Wheat	3,221,000	3,871,000	3,293,000
Corn	2,709,000	4,063,000	4,129,000
Oats	2,779,000	2,865,000	2,731,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1924-25.	1923-24.
Past week	8,709,000	10,153,000
Preceding week	10,799,000	13,079,000
Since July 1	896,429,000	842,708,000

Liquidation was on in May wheat the past week, some of the leading holders selling out their lines, and prices dropped sharply, the finish being on a moderate rally from the low point with net losses of 2½¢@11½¢, the latter on May, which sold at one time at only about ½¢ over May and was 16¼¢ over at the last. Liquidation was regarded as having been quite thorough at the last. Deferred deliveries closed about the low point as the result of reports of

rains over part of the dry belt late Saturday. The break failed to develop much export business, and even at the low prices foreigners were not interested to any great extent in the spring wheat.

Lowest prices on the present downturn were made for corn the past week, with September at a new low for the season. The market received good support on the extreme decline, especially when July went under \$1.12 and at the finish net losses were 5¼¢@6¾¢. Outside markets have been doing more or less cash business the past week, but sales from Chicago were small. Country movement has fallen off materially as field work is getting well under way.

Oats failed to break as much as corn the past week, liquidation with a few exceptions having put the market in a position to respond to any good buying. Cash interests were good buyers of May and sellers of the July at 1¼¢@2¢ difference, presumably changing over hedges. Seeding of the new crop is making rapid progress. Eastern demand is still relatively slow, but arrivals at terminal markets are small. Closing trades were 1½¢@1¾¢ lower. Rye was 3¼¢ higher for the May to ¼¢ lower for the September, the development of a large export business with around 5,000,000 bus. sold during the week, having considerable influence on the May. Range of prices the past week follows:

	High.	Low.	Mar. 28, 1925.	Mar. 21, 1925.	Mar. 29, 1924.
Wheat—					
May	\$1.71	\$1.55	\$1.57½	\$1.68½	\$1.01
July	1.50½	1.41	1.41½	1.44½	1.02½
Sept.	1.37½	1.31	1.31½	1.34½	1.03½
Corn—					
May	1.17½	1.07½	1.10½	1.16½	.76
July	1.20½	1.10½	1.13½	1.19½	.77½
Sept.	1.20	1.11½	1.13½	1.19½	.77½
Oats—					
May	.45½	.43	.44	.45½	.44½
July	.47½	.45	.46	.47½	.43½
Sept.	.47½	.45½	.46½	.47½	.40½
Rye—					
May	1.30½	1.20½	1.23½	1.19½	.65½
July	1.09½	1.12½	1.13½	1.12	.67½
Sept.	1.08	1.01½	1.02½	1.03

WHEAT STOCKS AND CONSUMPTION.

U. S. GRAIN IN CANADA.

The Canadian Bureau of Statistics reports the following amount of grain in store in Canada on Mar. 20:

	Mar. 20, 1925.	Mar. 13, 1925.
Wheat	1,389,119	1,303,784
Oats	1,704,343	1,710,343
Barley	271,911	307,146
Rye	3,490,818	3,726,638
Corn	1,113,491	1,161,665
Total, bus.	7,969,682	8,209,576

PROPOSED CHANGES IN LINSEED TARIFF.

ON page five of the Brief dated March 9, 1923, submitted to the United States Tariff Commission by the Bureau of Raw Materials for the American Vegetable & Fats Industries you will find the following:

Tariff on flaxseed as levied in Act of 1922, a bushel.....40c
 Freight rate on flaxseed from Winnipeg to Minneapolis which must be paid before flaxseed in Winnipeg could sell in the American market, a bushel14c

To anyone who is at all familiar with the Canadian markets these figures show conclusively that the compiler of the same is either knowingly or ignorantly basing his arguments on a wrong foundation.

It is a well-known fact that Winnipeg quotations on grain or flaxseed contemplate delivery in the elevators at Fort William or Port Arthur which are Lake Superior ports. Generally speaking the rates from Port Arthur or Fort William and Duluth to Eastern and Southern Lake ports are approximately the same.

In many instances the oil content of Canadian seed has been sufficiently greater than that of seed grown in the United States to warrant a premium being paid for the same. The rate of exchange also is a factor to be taken into consideration. Therefore, after taking into consideration the differences in oil value and the rate of exchange, if the duty differential of 40c exists between the Winnipeg and Duluth markets, it is apparent that the American flax grower is receiving full tariff protection.

The top close of the cash markets were posted on March 27 as follows:

Duluth2.78½
 Winnipeg2.36

These figures certainly speak for themselves.

The efforts now being made to secure a so-called compensatory duty on linseed oil claim necessary reductions from the present rate of approximately 24½c per gallon to as low as 14c per gallon, depending upon the position of the claimant. (Oil importers want a very low rate—the varied other interests, not quite so inclined to overlook the rights of the American farmer who produces flax.)

Under the tariff as it now stands the United States growers of flaxseed have marketed the largest crop they have ever grown at prices that showed a profit in growing the seed.

The linseed mills of the country have been actively engaged in crushing this home grown flaxseed, thereby giving employment to a large body of men.

During the years 1923 and 1924 under the operation of the present tariff law there has been imported 56,343,904 lbs., or 150,250 barrels of linseed oil. This is four times the production of any of the smaller mills in the country.

No matter how conscientious the theorist may be, we must admit that the "proof of the pudding is in the eating thereof." It must, therefore, be admitted that John B. Gordon's fine spun theories fall to pieces when confronted by actual conditions.

The importations of this huge amount of linseed oil, under the present tariff, must prove conclusively that the tariff on linseed oil is not unnecessarily high.

The flax raising farmers of the Northwest have not forgotten that during the life of the emergency tariff flaxseed sold in Minneapolis at \$1.40 per bushel. It is probably a fact also that large oil consumers in the West remember that during the life of the emergency tariff it was almost impossible to purchase linseed oil in the West in large quantities owing to the closing down of many of our American linseed mills.

Under the present tariff the United States has raised the largest crop of flaxseed in its history and the same has gone into consumption at satisfactory

prices to the farmer. The linseed mills have been running steadily giving employment to labor. Oil has been and is being imported steadily, proving that we have not a Chinese wall protection.

Why disturb a condition that seems to be entirely satisfactory to everybody concerned with the possible exception of pessimistic oil buyers who refused to purchase at low prices last fall, or disgruntled importers who would rather import oil than to have it manufactured in this country.

Without special reference to the above matter, Senator Curtis of Kansas, the Republican leader, was quoted Monday to the effect that the tariff laws should be let alone until 1926. He disapproves of any attempted revision in next Winter's session of Congress in spite of the strenuous demands of New England textile industries and other manufacturing groups who are clamoring for a tariff revision. Monday's news also refers to President Coolidge as desiring more time to elapse while world conditions are adjusting themselves before attempting another tariff revision.

This news may have no particular application on the linseed situation, excepting the fact that it refers to the demands for lower tariffs from "importing interests."

KARMONT WHEAT YIELDS GOOD.

Karmont winter wheat developed by the Moccasin Experiment Station of Montana appears to be the most promising winter wheat for many districts in this state, outyielding the common Turkey Red by an average of three bushels per acre at the experiment station. Farmers who have been growing it for two years on a commercial scale claim even higher yields. This variety of winter wheat is similar in appearance to the ordinary Turkey Red.

KELLOGG ELEVATOR BURNING.

In a recent issue, we chronicled the fire of the Kellogg Commission Co.'s elevator at Wheaton, Minn. The origin of this fire is unknown and it was discovered about 2 o'clock in the afternoon. In less than two hours, the structure, together with about 10,000 bushels of grain was completely burned with an estimated loss of \$15,000, partly covered by insurance. At one time it was thought that the town was in grave danger. A south wind was fanning the flames towards the Hanson Elevator adjoining the Kellogg Elevator on the north and it was feared that, should this elevator also catch fire, the flames would rapidly spread through the business section of the town. Through heroic efforts, however, the Hanson Elevator was saved. Ed. Anderson, who is manager of the Kellogg Commission Co., is of the opinion that the fire started from a spark from a passing freight locomotive that went through the town about noon. The accompanying picture shows the elevator burning, and its complete destruction.

Kellogg Elevator at Wheaton, Minn., Burning.

CO-OP. MARKETING BILL

The Indiana Bill Ably Discussed by a Competent Attorney.

A NUMBER of states have enacted co-operative marketing bills, which are both unfair to business and to the farmers themselves. We have the opportunity of presenting herewith the opinion of a prominent attorney on the Co-operative Marketing Bill, enacted into a law by the recent legislature of Indiana, Feb. 23, 1925. His opinion follows and is self explanatory.

You have asked my opinion as to the validity of Sections 24, 25 and 26 of the bill enacted by the recent legislature entitled "A Bill for an Act to authorize and provide for the incorporation, organization, management and control of non-profit, co-operative associations, to prescribe and define their powers, purposes, duties, liabilities and privileges, and to provide for the enforcement thereof, and declaring an emergency."

Section 24 provides a penalty in favor of a corporation organized under the Act against any person or any corporation whose officers or employees knowingly induce or attempt to induce any member or stockholder of such association to breach his marketing contract in the penal sum of \$100.00 with costs and attorney fees.

Section 25 provides a fine of \$100 to \$10,000, against any person or corporation maliciously spreading false reports about the finances or management of an organization under the Act, and a penalty of \$500 for each offense.

Section 26 provides a penalty of \$100 against any person, firm or corporation conducting a warehouse or elevator or other receiving place, or otherwise dealing in any agricultural products within the State of Indiana, who solicits or persuades, etc.

To say that the Act is an unusual one, and a very peculiar one, is putting it mildly, but whether those provisions of the act are constitutional and such as the legislature has authority to create under the constitution presents a different question. If it were not for the words in the Act "to provide for the enforcement thereof," I would come at once to the conclusion that the title is not sufficiently broad to cover the Sections above mentioned. Section 29, Article 4 of the Constitution provides "Every Act shall embrace but one subject and matters properly connected therewith, which subject shall be expressed in the title." Authorities say that the title should distinctly recite what the particular subject of the law is. The object of this provision of the Constitution is to prevent the enactment of laws under false and delusive titles, whereby measures are procured by the support of legislators who are deceived as to the character of the law. The provision is to prevent the conjunction in one act of two or more subjects having no legal connection. It is clear in this case that the attempt is to procure an enactment which is intended to be

of a special benefit to the farmers of the State, and to enable them, by combination and association, to control the price of their product without the intervention of middlemen. In other words, to do by co-operation their own marketing. This is clearly the subject of the bill.

One, at once, asks himself the question, why is it necessary that an especial provision be made in the Act for prevention by interference of other persons of contracts made by members of the association with the association. It is to be assumed by common law that if A procures B to breach his contract with C, that A is liable in damages to C for whatever measure of damages C sustains, and that is true whether the person inducing the breach be engaged in the same character of business or whether he be engaged in some other character of business.

One asks himself, is it necessary that these Sections be made a part of the law "to provide for the enforcement thereof." Reasoning from the various authorities, of which there is an almost innumerable number, I have come to the conclusion that these sections of the Act are unconstitutional and void because they are not matters properly connected with the title of the Act. Some authorities that throw light on this are:

Henderson, Auditor, vs. London & Lancaster Insurance Company, 135 Indiana 23.

State ex rel vs. Commercial Insurance Company, 158 Indiana, 680.

In the latter case on page 683 the Court says, "When the subject of the act in question, as disclosed by the title, is considered, there certainly is no obvious connection between such subjects and the matter or provisions embraced in Section 3, which attempts to confer the power or right upon the Auditor of State to examine the books and papers of insurance companies mentioned whenever, in his judgment, such examination is required for the interests of the policy holders."

Also in the case here in question, it seems to me, that there is no obvious connection between Section 24, 25 and 26, with the title of the Act. It seems to me that the legislators were readily lead to the enactment of these Sections in connection with the general act, for which law there is a general popular demand, and that these sections were attached to and made a part of the law because of that popular demand rather than because of the title of the Act warrants their enactment.

One cannot avoid in an examination of this question, it seems to me, inquiring whether the Act is not obnoxious to Section 23 and Article 1 of the Constitution of Indiana. This Act provides simply for the formation of corporations for certain purposes. The purposes are not unusual of themselves, or materially different from those that have long existed under the laws of the State.

All corporations and all members of corporations, as heretofore authorized by statute, have the full protection of the law generally applicable to citizens of the State, and why shall there be a special provision made by the legislature for the protection of these corporations and members of these corporations that are distinctly different, and which do not apply to corporations generally, and to members of corporations generally?

In my judgment it is a grave question whether the Act is not granting to those corporations and to members of these corporations, organized under the Act, rights which are not equally enjoyed by all citizens. It is not improbable that the Courts will hold that immunities and provisions are given by the Act to these corporations and to their members that do not equally belong to all citizens of the State.

It is my best judgment that the Courts will be compelled to hold these Sections of the Act are void.

Agricultural legislation for the next session of congress, will be drafted by the farmers themselves, according to Senator Capper of Kansas.

The Letter Box

Market in Healthy Condition.
Price Current-Grain Reporter: It seems to us that the drastic declines are over, the markets appearing in a healthy condition. Drought is becoming a serious factor here in Texas. Wheat export demand is very good. Mills are buying sparingly. We look for higher premiums.—*Transit Grain & Commission Co., Ft. Worth, Tex.*

Better Times This Year.
Price Current-Grain Reporter:—The weather is now fine and growing. We only need a good warm rain to bring the wheat out in great shape and pasturage also. On the whole the winter has been very favorable for farmers and no injury has been done that we know of. A large acreage of wheat was sowed last fall and we are in hopes that we shall have a big harvest in July.

The demand for flour is fair only. What we need is an export trade and we are in hopes that we shall have it before long.

We had a visit a day or two ago, from an old customer of ours from Glasgow, Scotland. He is still using Goshen Flour and we ship him a car of it occasionally.

We are of the opinion that we shall have better times this year, providing we have good crops. Farmers need help. Yours very truly.—*The Goshen Milling Company, Goshen, Ind., per F. E. Hawks, Pres.*

Wheat and Corn.
Price Current-Grain Reporter: Spring rains and several days of warm sunshine have been bringing the growing wheat along in good shape. There is a small amount of damage showing up on the high ground and some fields have a decidedly brown appearance; however, acreage plowed up will be small if we are favored with the right kind of growing weather.

The movement of corn from farmers' hands is practically nothing and it has been fully demonstrated that the producer has not yet decided to take the prices being offered at the present time for what he has left. This corn will likely be carried far into the summer unless prices advance.

Very little corn is being shipped by the elevators and while they have some on hand that will likely move before warm weather sets in, there is no rush to get it out at the present time. The demand is as small as we usually see it and the price is evidently not yet down to a point where it will induce consumption on a large scale. Undoubtedly more corn is being fed on the present favorable relationship between it and hogs as our hog population, though short, is not entirely depleted, but we are saving at a rapid rate with so little moving into consumptive channels and our short crop may yet prove sufficient.—*H. I. Baldwin & Co., Decatur, Ill.*

Wishes Information.
Price Current-Grain Reporter: A dealer has a contract with a mill making feeds for delivery as the dealer's needs develop up to a final shipping date. At this final shipping date, the mill contract gives the dealer the option of the balance of the contract or cancellation of the paper, the mill to get the difference between the market price or the purchase price if the market is lower, or the mill will carry ninety days with charges. This contract says not subject to cancellation.

On account of the market and trade conditions, the dealer wishes to cancel and liquidate part of his contract before final shipping date thereby saving, in his opinion, further losses. He asked the mill what the costs of such cancellation and liquidation would be. The mill delayed reply and when the reply was received, the mill did not cover the question asked, but went on to say

that the dealer would have to pay selling and other costs and urged more energetic retail methods. The mill accepts the question, but evades reply. As stated, the dealer has signified willingness to pay charges.

Meantime the market declined further and further. The mill does not set costs for liquidation until after several breaks, thirty days or more after the first request by the dealer. What is the dealer's position? Suppose the mill offers to liquidate or before liquidation and final shipping date of the contract? Because of the fact that the dealer had offered to liquidate before the market declined, has the dealer's offer of settlement a bearing on the contract? Could the mill force settlement after several breaks or at any time that they set or does the dealer's signified willingness to settle have a bearing?—*South-ern dealer.*

The above letter from one of our readers has a vital principle involved in business practice and trade ethics. We would be pleased to hear from any of our readers who are familiar with such a situation, giving us their views as to how this contract should be disposed of. All may write freely as no names will be divulged.—*EDITOR.*

CALIFORNIA DEALERS LARGE BUYERS.

One of the large wholesale and retail live wire dealers in commercial mixed feeds, grain and poultry supplies, is H. S. Park, owner and manager of the Park Feed Mill of Pomona, Calif. Mr. Park operates one of the few plants on the coast that resembles in outward appearance, the type of elevator used in the central grain belt. The plant is equipped to handle the raw grain and manufacture and process it for the retail and ranch trade. The equipment of the elevator includes a Richardson Automatic Scale, two Invincible double dustless receiving separators, a cracked corn grader, Fairbanks platform scales, and the power for operating the various machines is furnished by both Fairbanks and Westinghouse motors. Mr. Park is interested in civic affairs and is a candidate for mayor for this flourishing little city in the Spring elections. He is also an active member of the Rotary Club.

Another firm that does a large and profitable business is that of the Ontario Feed & Fuel Co. at Ontario. This plant is also equipped with machinery for handling and processing raw grain. The equipment includes a Robinson receiving separator, a Richardson automatic sacking scale, a Jay Bee grinder for corn meal, a store feed grinder, and Fairbanks platform scales.

Such firms as these are large buyers of corn, oats and barley and have to draw their supplies mostly from the inter-mountain and western half of the central grain belt of the country. The dairy and poultry business is an important factor in California, especially in Southern California, and to meet its needs, large quantities of grain must be brought in and processed.

GRAIN EXPORT VALUES.

According to the Department of Commerce the value of the exports of grain and grain products for the eight months' period ended February, 1925, is \$392,000,000 or \$209,000,000 more than for the same eight months of 1924. The principal gains were as follows: Wheat, \$171,000,000; rye, \$29,000,000; barley, \$15,000,000; oats, flour, and malt, approximately \$2,000,000 each. The losses suffered during this period as compared to the same eight months of a year ago were as follows: Corn, \$5,000,000; rice, \$3,000,000; oatmeal and rye flour, somewhat over \$1,000,000 each; cornmeal, \$131,000,000; hominy and grits, \$99,000.

The value of the exports of every feed product except screenings shipped during the past eight months was greater than that of the same period of last year. Nearly \$28,000,000 worth of feeds were exported during this period, a gain of \$16,000,000 when compared to the

same eight months of last year. Practically all of this gain was in the exports of oilcake and oilcake meal. The gain in the exports of cotton seed cake and cottonseed meal was over \$11,500,000; of linseed cake and meal, \$4,000,000. The exports of bran were over \$35,000 more than for the same period last year. The value of the prepared feeds exported was \$386,000, or a gain of \$151,000 over the corresponding period of 1924. There was a 50 per cent decrease in the value of screenings exported, the total amount being only \$89,000 as against \$178,000 last year.

The amount of wheat exported during the past eight months was greater than during the corresponding period of 1924 by 96,000,000 bushels; rye, 20,000,000; barley, 11,000,000; cottonseed cake, 308,000,000 pounds; cottonseed meal, 241,000,000 pounds; linseed cake, 139,000,000; prepared feeds, 9,000,000. On the other hand, the exports of the following commodities during the eight months just ended fall short of the same period last year: Corn, 7,500,000 bushels; wheat flour, 2,600,000 barrels; rice, 94,000,000 pounds; oatmeal, 55,000,000 pounds; hominy and grits, 9,000,000 pounds; rice flour, meal, and broken rice, 5,000,000 pounds; screenings, 2,000,000 pounds.

EXPORTS OF MEATS AND FATS.

Total of meats and fats exported during the eight months ended February, 1925, were correspondingly lower than for the eight months period ending February, 1924. The export value of meats for the eight month period ending February, 1925, amounting to 15.8 cents per pound was somewhat greater than the unit value of exports for the same period ending February 19, 1924, which reached 13.9 cents per pound. Similarly an advance in the market is indicated in the export value of fats and oils which for the eight month period ending February, 1925, averaged 14.45 cents per pound for the similar period ending February, 1924. Largest declines in exports were noted in the cases of bacon, hams and shoulders, and lard. Such declines are ascribed by the trade to better domestic demand and to relatively higher market levels. Exports in pounds, were as follows:

	Month of Feb., 1924.	1925.	8 months ending Feb., 1924.	1925.
Meats and meat products	98,258,129	62,433,075	738,250,086	476,080,997

INTERESTS ARE RELATED.

Regardless of the many theories that have been advanced for the betterment of agriculture through the avenues of legislation to create better marketing conditions, there has been developed from year to year a better business relationship between the country grain dealer and his customers, and today it is generally conceded that agricultural relief is certain, but plows, not congress, are to bring it. The grain dealers and the farmers will solve the problem—not the politicians. This improved relationship is being brought about largely because farmers and grain dealers of all kinds have come to realize that their interests are so closely related that the success or failure of either has a decided effect upon the other. Therefore, it was good business to thoroughly understand each others' problems and ambitions. Both private and co-operative grain dealers have strong state and national associations that afford an open forum for the discussion of all questions of vital interest to the grain business and agriculture, and it has been found through the activities of these associations that any body of business men, regardless of how widely their interests may be separated, can sit down and thresh out their dif-

ferences and arrive at a satisfactory settlement and a better understanding if they have the "will" to do so. They are finding the "way" to better business relationship in their endeavor to place their business as a whole on a higher plane by improving and bettering conditions surrounding it.

We are now living in an era of co-operation and co-ordination. Thus grain dealers are seeking to help themselves by helping others with whom they do business. They have the "will" to progress and the "way" to progress is to have others progress with them, and the natural way to progress is through closer relations and a better understanding with agriculture.—*V. E. B. in Our Paper.*

VISIBLE GRAIN SUPPLY.

The following table gives the stocks of grain in bushels in public and private warehouses at the principal ports and in transit by water on the dates named, with comparisons as compiled by the secretary of the Chicago Board of Trade for the week ending March 28 (000 omitted):

	In store at Wheat.	Corn.	Oats.	Rye.	Barley.
Baltimore	3,355	86	235	6,536	340

WHEAT STANDARDIZATION PLANS.

During the past year there has been considerable agitation to standardize wheat varieties in certain localities. Clinton County, Ohio, is making an intensive campaign to standardize, and the farm bureau has recently purchased a carload of Trumbull wheat for seed purposes. It has been found that of four standard varieties of wheat adapted to Clinton County, Trumbull and Fulhio wheats are the most productive. Owing to the fact that the Trumbull variety was in ample supply, this seed was chosen instead of Fulhio.

CHINCH BUGS WILL DO LESS DAMAGE.

Chinch bugs will probably not be a serious pest in Iowa next year, since there were comparatively few bugs this year and bad weather interfered with the laying of eggs last June and July. Considerable damage to corn and wheat was done by these pests in 1923. Last fall campaigns were organized in six counties for the burning of grass and trash along fence rows and other places to destroy the hibernating places of the bugs.

Legal, Traffic and Arbitration Decisions

COURT DECISIONS.

Broker entering into absolute and unconditional contract for principal is liable for damages resulting from cancellation without principal's consent, notwithstanding broker and his contractee act under rules of Board of Trade of which they are members. Broker, who as agent enters into absolute and unconditional contract for purchase and delivery of goods to his principal, and thereafter without principal's knowledge or consent releases seller is liable to principal for damages, and it is no defense in action to recover such damages that such parties and those with whom they contracted were members of a board of trade, and that cancellation of contracts was required by regulations of board, or that failure to cancel would constitute offense against board incurring severe penalties.

Difficulty or even impossibility of performances of contract for sale and delivery of grain is not defense to action for its breach, in absence of limitations of liability in such respect. That compliance with absolute and unconditional contract for purchase and delivery of grain would, by reason of exigencies of war demands, entail great hardship and become extremely difficult or even impossible of performance, is not defense to a suit for damages arising from such breach, where contract contains no limitation of liability in respect to such contingencies.

Purchaser of corn through broker, who ratified contract made subject to regulations of Board of Trade, held bound by contract, though not absolute and unconditional in accordance with instructions to broker. Plaintiff for whom, as undisclosed principal, corn was purchased by broker under contracts made subject to rules and regulations of Board of Trade of City of Chicago, who ratified and sued upon such contracts, though not absolute and unconditional in accordance with his original instructions, held bound by terms and conditions contained in them.

Contract for purchase of corn subject to rules and regulations of Board of Trade held not absolute and unconditional. Contracts for purchase of corn made by member of Chicago Board of Trade for undisclosed principal "subject to rules, regulations, and customs of the Board of Trade, * * * and the rules, regulations, and requirements of its board of directors and all amendments that are made thereto," held not absolute and unconditional as affecting broker's right to make settlement in accordance with regulations of board without consent of principal; the conditions being an integral part of it.

Resolution of directors of Chicago Board of Trade held admissible as affecting terms of contract in action against broker for damages for alleged unlawful settlement. In action by purchaser of corn against brokers, members of Chicago Board of Trade, who had negotiated such purchase, for damages for alleged unlawful release of persons from whom they had purchased such corn, where contract of purchase was made subject to regulations of Board of Trade and requirements of board of directors and amendments thereto, held that resolution of board fixing settlement price of contracts such as one involved was not only properly but necessarily admitted in evidence to establish true terms of contract.

Person notified that contract made for him has been made subject to certain rules and regulations may not avoid effect of such regulations by denying notice of knowledge of them. Purchaser of corn, notified by

his brokers that contracts made in his behalf were made in accordance with rules, regulations, by-laws, and requirements of Chicago Board of Trade, is charged with duty to ascertain such rules, regulations, etc., and cannot avoid their effect by denying notice or knowledge of them.

Broker making settlement of contract for undisclosed principal on basis fixed by resolution of Board of Trade subject to which contract was made held not liable to principal. Broker, member of Chicago Board of Trade, who had purchased corn for undisclosed principal under contract made subject to rules and regulations of Chicago Board of Trade, and to rules and requirements of its board of directors and amendments thereto, held not liable to such principal for unauthorized settlement of such contract on a basis fixed by resolution of board of directors in an effort to meet conditions arising out of the World War. *Thomson vs. Thomson* (Ill. Sup. Ct. N. E. Rep., 146-451).

TRANSPORTATION MATTERS.

Holds Demurrage Illegal.

A tentative report by Examiner Money of the Interstate Commerce Commission recommends a finding that demurrage charges collected on 175 carloads of grain, consigned to the Moore-Lawless Grain Co., at Leavenworth, Kansas, were illegal. Written notice, of the constructive placement of the cars, was not given, and the examiner says that the carrier having failed to give written notice of its inability to make delivery, there is no authority under the applicable tariff, for considering such cars as having been constructively placed.

Flaxseed Rate.

In a tentative report by Assistant Chief Examiner Berry, of the Interstate Commerce Commission, he says the commission should find that rates on flaxseed from New York harbor and Philadelphia were and are not unreasonable; that the rates to Toledo, prior to March 26, 1923, were not unreasonable, but that on and after that day, to July 1, 1923, rates from New York Harbor points to Toledo were unreasonable to the extent that they exceeded 78 per cent of the contemporaneous flaxseed rates to Chicago. He also says the commission should find that the flaxseed rate to Toledo should not exceed 78 per cent of the flaxseed rate to Chicago. The Midland Linseed Products Co., was the complainant in this case.

Live Stock to East St. Louis.

Examiner Money of the Interstate Commerce Commission, in a tentative report on the complaint of the St. Louis Live Stock Exchange, against the Wabash, involving rates on live stock from Wabash stations in Missouri, to National Stock Yards, East St. Louis, recommends that it be dismissed.

Tariffs Suspended.

The Interstate Commerce Commission, in investigation and suspension docket number 2361, has suspended from March 10 and later dates until July 8, tariffs which proposed to revise the rates on flax seed from North and South Dakota, and bordering points in Minnesota and Iowa, to western trunk line markets. The proposed tariffs carry both increases and decreases to such points as Chicago and Minneapolis.

New Complaints.

The Dewey Brothers Co., of Blanchester, Ohio, has filed a complaint with the I. C. C., alleging that the Hocking Valley et al., charged unreasonable rates on hay from Prospect and from Delaware, Ohio, to Waynesville, North Carolina.

The Chicago Live Stock Exchange,

and others have filed a complaint against the A. B. & A., and numerous other roads asking for through rates on live stock from Chicago to points in Alabama, Florida, Georgia and Tennessee.

The Independent Slaughterers' Traffic Association, et al., have filed a complaint against the New York Central, et al., alleging violation of sections 1 and 3 of the act, on shipments of live stock from points in more than a dozen states, to New York City and nearby points.

BROOM CORN MARKETS.

Nothing new has developed relating to the probable or intended broom corn acreage this season. It is too early to obtain other than opinions on the subject, these opinions at present are that the acreage will show a curtailment as compared to 1923 and 1924 and that cotton and corn will be planted more extensively in sections where these crops are competitors with broom corn and that kafir and maize will be planted more freely in districts where they come in competition with broom corn.

Reasons and figures have been presented to the growers by the farm and trade press, state and government bureaus, as to the fact that due to the size of the tonnage produced the past two years, that it would be to the grower's benefit to reduce the number of broom corn acres this season.

Activity in the field has been limited, field buying being done principally by resident dealers and brokers, as but few foreign buyers are at this time located at any of the primary points. The principal buying centers continue to be Lindsay, Oklahoma in the Standard district and Elkhart, Kansas in the Dwarf section, as these districts each hold the larger end of the available supply in growers' hands. In other intervening areas, scattered crops are held by growers with buyers taking same if

growers are willing to trade on a market value basis. This is the course pursued by buyers in the Lindsay and Elkhart sections as well. The amount of corn secured from first hands is limited, as growers in many cases continue to hold their crops above the market and are indifferent as to prices offered under \$100. The general spread of prices in the Dwarf districts ranges from \$65 to \$100 and a shade above, with odd crops of common run corn being secured under \$65, the bulk of corn obtained being taken from \$70 to \$75 to \$85 and \$90.

In the Lindsay standard district the spread is from around \$60 for poor spikey corn to \$135, the bulk of the better and available being taken around \$100.

No material change in the field marketing situation is anticipated for the near future as growers are turning their attention to farm work and may be more eager to do so, with the advent of a good supply of moisture.—*Broom Corn Review*.

SEED WHEAT MONEY REPAID.

Dividends covering 90 per cent of the money raised in the fall of 1923 to buy seed wheat for southwestern Kansas farmers have been paid by the Central Seed Wheat association.

In addition to the \$100,000 loaned to the farmers from funds subscribed by grain men and millers in Dodge City, Wichita and other Kansas towns, Kansas City, Mo., and Chicago, Ill., the Santa Fe railroad placed \$1,000,000 in banks and made the money available to the drouth-stricken farmers.

The contracts with the Central Seed Wheat association provided for a return of one-fifth of the crop grown from contributed seed. As the crop of 1924 proved successful, the farmers were well able to repay their benefactors. Only a few undertook to escape their obligations.

SUCCESSFUL SERVICE

Edwards Licensed Formula Service is backed by 30 years' experience and a thorough knowledge of feeding problems.

Let us inspect your plant, offer expert advice on manufacturing systems, supply tested formulas for quality feeds for poultry, hogs, dairy cows, calves and all animals.

We handle sales and advertising campaigns to develop your business.

75 MANUFACTURERS USE OUR FORMULAS

Early & Daniel Co., Cincinnati, Ohio
Wiedlocher & Sons, Springfield, Illinois
Transit Milling Co., Cincinnati, Ohio
Shawnee Milling Co., Shawnee, Oklahoma
and scores of others endorse our service

We can do for you what we have done for others.

COTTON NEWS

No Explanation Given.

Department of Agriculture officials decline to offer any explanation for the large amount of uncertificated cotton found to be in the New York market when the reclassification of stocks there was undertaken. Charges had been made during the recent session of Congress that inferior grades of cotton were being kept in New York for the purpose of depressing prices of spot cotton.

Final Figures.

The census bureau reports cotton ginned from the 1924 crop at 13,630,608 bales, as compared with 10,170,694 on the 1923 crop and 9,729,306 for 1922. This is final, but is subject to slight correction. Included in the total are 314,309 round bales and 4,319 bales of American-Egyptian cotton. There are also included 18,838 bales, which ginners estimated would be turned out after the March canvass. The average gross weight of bales was 499.6 lbs., against 498.5 on the previous crop and 501.7 two years ago.

The crop of 1924, expressed in 500-pound bales was 13,618,751 bales, against 10,139,671 in 1923 and 9,762,857 in 1922.

Boll Weevil.

In commenting on the problem of the boll weevil and the next harvest, the National Bank of Commerce in New York says:

"Weevil damage was comparatively unimportant last year over the greater part of the cotton belt solely because of a fortunate combination of weather and other natural conditions, and the record of past crops shows that light infestation in one year offers no promise for the following season. Thus far, factors determining the probabilities of weevil damage during the current season have favored the weevil and unless unusual weather conditions come to the rescue, the success of the coming crop east of the Mississippi River will depend primarily upon the vigor with which the fight against the weevil is prosecuted.

Cotton Shippers' Association Meeting.
The American Cotton Shippers' Association in its convention in New Orleans last week adopted a number of resolutions.

One resolution requested Liverpool and Havre to dispense with their present system and adopt instead the paid arbitrator system.

Another advised Havre that the American Cotton Shippers' Association desires that cotton not be weighed there until it is assembled. It seems they have a habit of weighing cotton in Havre bale by bale as it comes from the ship, when some of it is exceedingly dry.

Another resolution advised the Europeans that an indirect shipment is one carried on a ship which may touch one or more American ports and then one or more European ports before reaching the port of delivery. The direct shipment may be carried on a ship which may touch at one or more American ports, but which after leaving the last American port must sail direct to the port of shipment. This resolution particularly was for the information of Bremen cotton receivers.

The association also adopted a resolution declaring it to be unlawful for any member of the association to sell cotton subject to claim for internal damp.

BUSINESS ORGANIZATION AND FARM CO-OPERATION.

Representatives of chambers of commerce in the states of Arkansas, Colorado, Iowa, Kansas, Missouri, Nebraska, Oklahoma and Texas will gather at Kansas City on the 9th and 10th to discuss, under the auspices of the Chamber of Commerce of the U. S., methods by which business organizations can best co-operate with the farmers in their trade areas for the betterment of agriculture.

The first day of the meeting will be devoted to the consideration of problems of organization within the cham-

bers of commerce for carrying on co-operative agricultural work and their relations with local and state farmers organization, state agricultural colleges and departments. Systematic methods of planning and carrying out agricultural surveys, the general nature of the information to be procured and the effective application of the conclusions and recommendations to be drawn from it will constitute the main topic of discussion.

The second day of the conference will be given over to the consideration of larger problems of agriculture—agricultural credit, the marketing of farm products, agricultural legislation, crop and livestock improvement, the danger of hastily planned diversification campaigns, the farm labor supply, farm cost accounting, transportation of farm products, road improvement, fairs and exhibits and social, recreational and special merchandising activities designed by chambers of commerce for bringing people of the urban and rural districts into closer contact.

Are farmers intending to do all their farm work in the future with gasoline or electric power? That is what the latest figures on the horse situation in Ohio indicates. In 1920 the average age of farm horses in the state was 8.5

years. Today the average farm horse in the state is 11.2 years, in other words the average age of Ohio horses on the farms has increased three years in the last five. If a regular number of colts were produced each year there would be very little variation in the average age,

as young horses would take the place of the old ones and maintain the same ratio.

A New York interest figures that Russia has thus far purchased 25,000,000 bushels of grain—wheat, flour, and rye.

Globe Combination Auto Truck & Wagon Dump

SIMPLE - RELIABLE - PRACTICAL

MORE GLOBE DUMPS SOLD IN 1924 THAN OF ANY OTHER MANUFACTURE

- Can be installed in any driveway or on any scale.
- Dumps any size Truck, Wagon or Sled, all on one platform, into one pit hole.
- Cylinder can either be hung from scale or driveway or set on separate foundation.

Write for Blue Prints or further information

Also Manufacturers of Trapp all steel dump.

GLOBE MACHINERY AND SUPPLY CO.

Des Moines, Ia.

Make Big Money with this Grain Loader

The Boss Air Blast (Fordson Type) Portable Car Loader loads cars without scooping in a dirty, dusty car. Improves grades. Moves about under its own power. You can load grain on the other R. R. if you cannot get cars on your own line.

SOON PAYS FOR ITSELF

Send for blue print No. 12. It shows low cost plans for receiving, storing and shipping grain.

If your present elevator is not large enough this plan will solve your problem at low cost, and give you additional storage and shipping facilities.

WHEN ELEVATOR BURNS this plan makes for small stations with no fire risk. Handles loose grain, ear corn, pop corn, maize, kafir corn, cotton seed, etc.

TIME PAYMENTS. Sold on time payments if desired. Soon pays for itself. We also make stationary outfits for installation in country elevators to save scooping grain. Combination cleaners and car loaders. Write today for complete information. It will pay you. Hundreds in use.

Maroa Manufacturing Co., Dept. PC, Maroa, Ill.

Crop Reports

Compiled by GEO. A. WELLS

MARKETING CONDITIONS.

Marketing conditions from the country elevator viewpoint has not been very satisfactory during the 1924-25 crop year throughout the corn belt. With only 50% of a crop, basis feeding value, there has been no surplus corn above local requirements. The oats crop was good, in fact large in yield, but on account of the shortage in the corn crop the farmers fed a large quantity of oats and held a larger reserve. The grain dealers because of the opportunity to earn storage filled up their storage so that the merchandising turn-over of oats has not been very large on this crop.

It would be interesting to know the experiences of the country grain dealer in storing oats and as to whether or not they carried the oats under a hedge by selling the future and if they did, what was their experience. Are they carrying the oats under the hedge for delivery on the contract in May or has the hedge been removed as a speculative venture? THE PRICE CURRENT-GRAIN REPORTER would be glad to receive letters from country grain dealers on this subject giving their experience.

Crop Reports.

The general reports given below indicate that the condition of the winter wheat crop is generally spotted in all of the States and there will be much uncertainty in the estimates of final production by crop reporters and undoubtedly a wide range in the comparison of such estimates. There has been considerable damage throughout the States of Ohio, Indiana and Illinois by freezing and in the Southwest by drouth conditions.

The season is approximately normal throughout the entire winter wheat belt and the condition of the subsoil is favorable throughout the States of Ohio, Indiana, Illinois, "dry" in Missouri and Iowa and the Southwest although rains have been reported since these observations were taken, which will no doubt improve the condition.

The Report of the Department of Agriculture dated March 19th gives the "Intended plantings in 1925 in per cent of acreage grown for harvest 1924" as follows:

Spring wheat	113.9%
Corn	102.3%
Oats	105.6%

Such figures may of course be changed in actual operations according to the final judgment of the farmers at planting time.

The general reports are as follows:

INDIANA.

Markle, Ind. (7): The winter has been favorable for the growth of winter wheat, but a couple of freezes immediately after the snow went off has killed quite a little. Farmers are seeding the same in oats. The season is early. The subsoil condition is favorable for the growth of grain crops.

Monticello, Ind. (1): Wheat in good condition. Has wintered well. The season is about normal. Oats just beginning. A nice shower has put the growing wheat in good condition.

Winchester, Ind. (8): The winter has been unfavorable for wheat and the prospect is now that 50 per cent will be put in oats and what is left will represent more than 35 per cent of a good crop. The season is normal. The subsoil condition is favorable. Ground never worked up in better condition. Spring plowing done above average. Farmers sowing oats acreage larger than last year. Corn acreage larger than 1924. Hog feeding heavy. Ninety-five per cent of the corn crop fed or sold. Very few cattle on feed.

Frankfort, Ind. (2): Conditions are favorable for wheat and clover. Oats seeding just starting.

Rensselaer, Ind. (1): Conditions have been favorable for the wintering

of wheat. The season is normal. The subsoil condition is too dry for the growth of grain crops.

Marion, Ind. (5): About average condition of the winter wheat. Very little abandoned acreage. It is a little wet just now, but looks favorable.

Tipton, Ind. (5): Weather unfavorable for winter wheat. Our late freeze did much damage. Some farmers are now either plowing up the wheat or sowing oats with it for feed.

Wabash, Ind. (4): Winter was fairly favorable. Some damage. The season is about normal. Subsoil is now favorable.

Rushville, Ind. (8): Only since the last freeze has there been any bad and unfavorable wheat reports, but now it seems quite certain that the damage has been quite extensive in this locality and the reports are that much will be put in oats. The season is normal. The subsoil condition is normal.

Lawrenceburg, Ind. (9): Weather generally has been favorable for wheat. The season is early. Soil conditions fine for growth.

Bloomington, Ind. (3): Wheat has come through the winter in fine shape. Would say the season so far is normal. Soil conditions are exceedingly favorable and bringing wheat out in fine shape.

Angola, Ind. (7): The winter was favorable for the winter wheat. The season is normal here. The subsoil condition is favorable. Some plowing. No spring seeding done yet.

Winamac, Ind. (1): Condition of the winter wheat favorable. The season is early. The soil condition is good.

Jasper, Ind. (3): Winter wheat is in favorable condition. The season is normal. Subsoil condition very favorable.

Decatur, Ind. (7): Winter wheat looks spotted where snow did not cover. Tops at least are dead. Have not examined the roots. Season is about normal. Soil condition favorable.

OHIO.

Sidney, Ohio (2): Weather is now favorable to growth of winter wheat, but the indications are that about 12 per cent or most of the later sown will be abandoned. Soil is in splendid condition for seeding spring crops. Farmers are busy sowing large acreage of oats. Five per cent larger than normal year.

Lima, Ohio (1): Winter wheat has been injured some during past two weeks by night frosts. Farmers are busy now plowing for oats. Soil is in very favorable condition. Some oats have already been sown this week.

Blanchester, O. (3): Wheat in this country badly frozen out and much of it will be sown in oats. Season is normal to a little early. Soil condition is favorable.

Springfield, O. (2): Conditions have not been favorable for the winter wheat crop in this territory. A month ago we had a week of warm weather, followed by zero temperature, with no protection for the wheat, and reports from all through this territory indicate very serious damage. Subsoil is favorable.

Anna, O. (2): Winter wheat condition very bad. Tearing up for oats.

ILLINOIS.

Mt. Carroll, Ill. (4): Winter wheat coming out good. Color and fair stand. Field work started. Plowing sod but no seeding. Ground yet too wet. Freezing nights.

Ashton, Ill. (4): Condition of winter wheat good. Season is normal. Subsoil favorable except possible deficiency of moisture.

Wenona, Ill. (4): The winter condition has been favorable for the wheat crop. The subsoil condition is favorable for the growth of grain crops.

Authorized in States of Iowa, South Dakota, Nebraska, Kansas, Illinois, Ohio and Pennsylvania

Western Grain Dealers Mutual Fire Insurance Company

Hubbell Building

Des Moines, Iowa

LIGHTNING PROTECTION

If lightning rod protection could be installed on every grain elevator on which this Company carries insurance, it would not only affect a reduction of ten cents in the rate but also a reduction in fire losses paid by this Company. This would also affect a lower cost of the insurance which would be reflected to the policyholder in an increase in the dividend rates.

Odell, Ill. (7): No wheat sown. Season is normal. Soil is in good condition, but yet too wet for cultivation. A few days like the present will permit sowing oats.

Eureka, Ill. (1): The weather conditions have been favorable for the winter wheat crop. The season is normal. The subsoil condition is now favorable for grain crops.

Freeport, Ill. (4): Present condition of the winter wheat crop is favorable. We consider the season early; subsoil conditions favorable.

Nashville, Ill. (3): Outlook for wheat quite favorable. No abandonment. Plenty of moisture at this time. Oats about all seeded. Ground in good shape for quick germination.

Ashland, Ill. (5): Some complaint of winter killing of wheat, but generally the condition is good. Season is favorable.

Vermont, Ill. (2): Winter has been favorable with exception that some of the fields are spotted caused by heavy covering of ice. Generally wheat is looking good. The season is normal. Farmers getting fields in shape for oats seeding and spring farm work in general. Soil condition is favorable.

Sparta, Ill. (8): The winter has been favorable for the winter wheat. The season is normal. The subsoil condition is fine.

Highland, Ill. (6): Weather favorable for wheat. We hear complaints of some winter killing on low and flat fields. Season about normal. Subsoil condition favorable. Considerable oats seeded in past week.

Moulton, Ill. (8): The winter condition has been slightly unfavorable for the wintering of the wheat. The season is normal. The subsoil condition is normal. Wheat spotted. Late sown pieces will need very favorable weather.

Lexington, Ill. (5): Condition favorable for wheat. Season is normal. Subsoil condition is good.

MISSOURI.

Corning, Mo. (1): Winter condition has been favorable for the wheat crop and sufficient rain has fallen of late to make the soil moist and fine. The season is normal in this locality. Subsoil condition is favorable.

Higginsville, Mo. (1): Weather conditions were favorable for winter wheat crop. Wheat is very promising for a large crop at this time. The season is early. The subsoil condition is favorable for the growth of grain crops.

Chillicothe, Mo. (1): Conditions have been favorable for the wheat crop. The season is normal. The subsoil condition is now favorable for the growth of grain crops.

Springfield, Mo. (3): Weather has been favorable all winter for wheat and the crop is good. Weather is fine. Seems more like May than March. Subsoil condition good. Oats sown in fine shape and coming up good. Corn ground being prepared for planting.

Bethany, Mo. (1): Season normal. Wheat rows showing up green. Subsoil favorable. Need warm weather.

Harrisonville, Mo. (1): Wheat is favorable. Season is normal. Soil condition is good.

Paris, Mo. (5): Wheat has come through the winter in good condition, with no acreage abandoned. Is looking fine for the season of year and soil conditions could not be better.

Lamar, Mo. (3): The condition of the winter wheat is favorable. The season is early. The subsoil condition is very good.

IOWA.

Marcus, Iowa (1): Ground is unfavorable for wheat on account of thawing days and freezing nights. The season is getting late. The ground freezes nights and early mornings so that farmers' machinery can't do the work. The subsoil is getting dry. No rains all spring, and strong, windy weather drying out the soil. Corn being shipped in to cattle and hog feeds. This has never happened before. The stock wintering exceptionally well on account of being dry and cold the farmers have taken good care of them, which made stock gain.

Whitten, Iowa (4): No wheat raised. Conditions are about normal.

Tama, Iowa (5): The soil condition was unfavorable for the wintering of the wheat. Prospects for a normal season. Will need rain soon for top soil. Subsoil is unusually dry.

Indianola, Iowa (6): Wheat has wintered well. Season considerably earlier than last year. Plowing going on generally. Subsoil dry for this season of the year.

Randolph, Iowa (3): Wheat is about normal. Season is late. The subsoil is favorable for grain crops.

Corydon, Iowa (6): No winter wheat sown here. Season looks early. Farmers started sowing oats today. The subsoil is dry.

Jefferson, Iowa (5): No winter

HENRY RANG & CO.

Established 1862

Grain Merchants

CHICAGO MILWAUKEE
SIOUX CITY

wheat sown here. Season looks early. Farmers started sowing oats today. The subsoil is dry.

Jefferson, Iowa (5): No winter wheat here. Subsoil is very dry.

Wall Lake, Iowa (2): Winter has been favorable for winter wheat. The season is normal. Think subsoil has not any too much moisture.

Belmond, Iowa (4): No wheat in this locality. Indications are good for spring work. Farmers disking and plowing; the subsoil is in fine condition. Prospects look good for spring work.

Clarinda, Iowa (3): The winter wheat condition was favorable. The season is normal. Ground and weather fine for all farm work at this time.

Hamlin, Iowa (2): Weather has been favorable for the winter wheat. Season is about normal so far. It is pretty early yet to work in the field.

Onawa, Iowa (2): Conditions have been unfavorable for the wintering of the wheat. The season is normal. The subsoil condition is unfavorable for grain crops.

Osceola, Iowa (6): The winter was favorable for the wintering of wheat. The season is normal. The subsoil condition is unfavorable for grain crops. It is too dry.

New Sharon, Iowa (5): Winter wheat conditions favorable so far. Season is early. Subsoil is a little too dry to start into crop season. Some plowing of sod and it is turning up dry. Spring wheat is being sown this last week of March.

Williamsburg, Iowa (8): The weather during the past week has been very favorable. Seeding of small grain and grass seed on in general. No grain is moving from farms. Still shipping in corn. No winter wheat here.

Delphi, Iowa: The winter was very favorable for the winter wheat. The season is early. The subsoil is favorable to date for the grain crops.

MINNESOTA.

Eden Prairie, Minn. (6): Freezes every night so it is hard to say as to how this winter wheat will turn out. No rain or snow. Very dry at present.

Hutchinson, Minn. (6): Season is normal here. Soil condition is O. K. Subsoil dry. Deficient rain last fall. Not much snow this winter. Seeding started a little today.

Donnelly, Minn. (2): Not much winter wheat and what there was, was not protected with snow, as it should have been. Season is early so far. Just commenced seeding wheat today. Subsoil is favorable for the growth of grains.

Minnesota, Minn. (3): Winter wheat and rye in good shape. Subsoil in good shape. Spring wheat seeding is on in full blast. Soil in excellent condition for seeding. Going into the ground in the best shape that it has for a long period.

Prior Lake, Minn. (6): There has been considerable thawing and freezing, but effect cannot be told on winter wheat as yet. Season is about normal and soil is in good condition.

Warren, Minn. (1): Winter wheat just coming out of snow covering. No estimate of condition possible at this time.

London, Minn. (6): Winter wheat conditions are favorable. The weather is favorable for growing now. The season is normal. I think next week farmers will start seeding. Will be in good condition by that time for seeding. The subsoil is in good condition for growing grain. So far the weather is good and enough moisture in the ground.

MEN!

Write for FREE Booklet upon the Peerless System of Better Grain Bookkeeping Business Equipment Co. 120 South Jefferson Ave. Peoria, Illinois

NORTH DAKOTA.

Monango, No. Dak. (19): No winter wheat here.

Cavalier, No. Dak. (7): No winter wheat grown here. Winter rye in good condition. Plenty of moisture. Everything favorable.

Carrington, No. Dak. (5): No winter wheat raised here. Season is normal. The subsoil condition is favorable for the growth of grain crops.

SOUTH DAKOTA.

Mitchell, So. Dak. (8): No winter wheat here. The season is early. The subsoil condition is favorable for the growth of grain crops.

Bridgewater, So. Dak. (8): Winter wheat condition has been fairly favorable, but we have very little acreage in this territory. Season is about normal. Moisture will be needed soon after seeding for high winds have caused a very dry surface. Subsoil condition fairly favorable yet.

Canton, So. Dak. (9): Winter wheat came through in good shape. The season is early. The subsoil is favorable for the growth of grain crops.

Flandreau, So. Dak. (8): Winter wheat condition has been favorable. The season is normal to early. The subsoil condition is very favorable for the growth of grain crops.

NEBRASKA.

Nebraska City, Neb. (9): The winter condition of wheat has been unfavorable. Some is winter killed. The season is a little late. The subsoil condition is favorable now for grain crops.

Winnetoon, Neb. (7): What wheat there is here is looking good. The season is normal. The subsoil condition is favorable for the growth of grain crops.

Humphrey, Neb. (9): Winter wheat is coming good, but there was not much of it sowed. Soil in fine shape to start spring work in about a week.

Swanton, Neb. (9): Wheat does not look very good. Too dry in fall and winter. Abandoned acreage will be large.

Beatrice, Neb. (9): Wheat seems to have come through the winter in good shape. Have had plenty of moisture and conditions are now favorable. The season is normal. Subsoil is in good condition for the crops.

Neligh, Neb. (7): Condition seems O. K. Season is starting in early. Subsoil condition is favorable.

Oakland, Neb. (7): The winter conditions were quite favorable for the winter wheat. The season is normal. The subsoil condition is favorable for the growth of grain.

Roseland, Neb. (9): Winter wheat does not show up very good. Too early to tell how much will be abandoned. Need rain for wheat. Season is early.

Superior, Neb. (9): Winter conditions very unfavorable for wheat. No moisture and some winter killed. Season is about normal, but very dry. Wheat that looked like it might make something ten days ago has now been plowed up and the ground reseeded to other crops. Do not believe we will raise seed in this territory.

Harvard, Neb. (9): The winter here has been unfavorable for the wheat; have just examined twenty-seven different fields and a conservative estimate of the same runs from 50 to 90 per cent of the wheat dead, or an average of more than 60 per cent of the wheat crop is gone in this locality. Plenty of subsoil moisture at present; rains would not help at this time.

McCook, Neb. (6): Winter wheat condition is very favorable. No damage reports at this date. Indications are for an early spring. Both subsoil and surface conditions are satisfactory.

Central City, Neb. (9): Season is about normal. The subsoil is favorable. Can stand liberal spring rains. Condition to date good. Farmers busy in the fields plowing, cutting stalks, etc.

KANSAS.

Wichita, Kans. (6): Winter wheat is very spotted. The season is normal. Subsoil condition is favorable. Needing moisture.

Neodesha, Kans. (9): The condition of the wheat is favorable. The season is early, about ten days. The wheat looks fine. Subsoil condition favorable for the growth of crops.

Greensburg, Kans. (6): Some damage has developed owing to the severe winter and continued dry weather, which is deteriorating all spring crops in this territory. Barley and oats in bad shape and wheat going back each day and will continue until it rains. Immediate rain and favorable weather would insure us a fair crop.

Pleasanton, Kans. (8): The winter was favorable for the wheat. The subsoil condition is fine for the growth of grain.

Logan, Kans. (4): All wheat is a failure. Doubt if we get enough for fall seeding. Not enough rain or snow since fall planting to do the wheat any good.

Belleville, Kans. (4): Condition of wheat crop has been very unfavorable. Season is about normal. The subsoil condition is bad—too dry.

Concordia, Kans. (4): Conditions have been unfavorable for the wintering of the wheat. The season is late. The subsoil condition is favorable for the growth of grain.

Medicine Valley, Kans. (6): Winter conditions were favorable for the winter wheat. The season is early. The subsoil condition is favorable for the growth of crops.

Lyons, Kans. (5): Winter conditions generally unfavorable for winter wheat. Season about normal. Subsoil unfavorable.

Minneapolis, Kans. (4): The winter conditions have been unfavorable for winter wheat. The season is late. The subsoil is unfavorable for the crops.

Sedan, Kans. (9): Never had better prospects of winter wheat. Season is normal. The subsoil condition is favorable for the growth of grain. We have never had a better spring for the farmer.

Pittsburg, Kans. (9): The winter here has not been unfavorable for wheat. There is plenty of moisture. Wheat is coming out nicely. There is a good acreage of oats that has been sown.

Waldo, Kans. (5): The winter condition has been very unfavorable for wheat. The season is normal. There is plenty of moisture at present.

Wellington, Kans. (6): Winter wheat conditions up to the present

time have been favorable. The season seems to be normal and all other conditions have been favorable. Right now we are needing rain badly and the wheat is beginning to show the effects of the dry, windy weather we have been having. We are hoping that we will get rain soon so our crops will not be damaged.

Alta Vista, Kans. (8): Wheat does not look as good as it did the first of the month. Think that the high wind dried the ground out too fast. The season is normal. The subsoil is favorable.

Oberlin, Kans. (1): Wheat condition favorable. The season is normal. The subsoil is in excellent condition.

Hillsboro, Kans. (5): We estimate winter wheat crop about 3/5 per cent winter killed and balance of wheat crop is about 90 per cent of normal. We are needing rains. The season of the growing crop is normal. If we have favorable weather from now on we expect to raise an average crop in this vicinity.

OKLAHOMA.

Enid, Okla. (4): The winter has been favorable for the wintering of the wheat. The season is late. The surface needs rain. Subsoil is good.

Geary, Okla. (2): The winter conditions for wheat were very unfavorable. Short of moisture at all times. Season normal. Wheat appears to be late, due to making no growth on account lack of moisture. Subsoil condition very unfavorable. No subsoil moisture.

Marshall, Okla. (5): Winter condition has been favorable for wheat, the weather in March too dry and windy. Season early to normal for spring work and seeding purposes. The subsoil condition at present is unfavorable for growth of crops.

CANADIAN VISIBLE.

Canadian visible supply of wheat increased 1,170,000 bus.; oats, 657,000 bus.; rye, 122,000 bus.; barley, 380,000 bus. These statistics represent terminal stocks only.

	Mar. 28, 1925.	Mar. 21, 1925.	Mar. 29, 1924.
Wheat	39,827,000	37,717,000	51,071,000
Oats	18,825,000	18,295,000	9,519,000
Rye	2,272,000	2,235,000	1,772,000
Barley	7,486,000	7,402,000	2,111,000
Altoat—Wheat, 2,365,000 bus.; oats, 848,000; barley, 130,000; rye, 140,000.			

The secretary of agriculture says assurance has been given the American farmer that there will be no increase in fertilizer prices because of the combination of French and German potash producers.

Terminal Markets

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

Exports of grain for the week ending March 27 were: Wheat, 962,383 bus.; oats, 30,000 bus., and 360 tons feed.

S. High Levan and Austin Boyd, prominent grain and feed men of Lancaster, were on "change during the week renewing old acquaintances.

Receipts of flour and grain for the week ending March 28 were: Flour, 56,887 bbls.; wheat, 982,485 bus.; corn, 21,923 bus.; oats, 98,317 bus.; rye, 5,613 bus.

A. L. Bussenious and Ellis McMullin, popular grain merchants, are also noted among the arrivals from Miami, Fla., where they go every year to escape the cold weather here.

G. Percy Lemont, head of the grain and feed firm of E. K. Lemont & Son, has returned home with his wife and daughter from Pinehurst, N. C., where they spent the winter, as is their usual custom. Mr. Lemont is an enthusiastic golf player and every winter spends lots of time on the southern golf links.

The following out of town visitors were registered at the Commercial Exchange during the past week: Elmer Ellis, Indiana, Pa.; L. C. Newsome, Pittsburgh; Stanley R. Miller, Norfolk, Va.; C. V. Adams, Lancaster, Pa.; A. H. Dillon, Leavenworth, Kans.; E. I. Behler, Buffalo, W. P. Fisher, Seattle, Wash.; J. C. Haines, Millville, N. J.; J. L. Stetser, Woodstown, N. J.; W. J. Hassey, Price, Md.; C. W. Brick, Bordentown, N. J.; S. V. P. Quackenbush, Scranton, Pa.; A. M. Niggan, Vine-land, N. J.; T. F. Fritchey, Montreal, Canada; J. A. Hespender, York, Pa.

Philadelphia Flour Market.

Philadelphia, Mar. 28.—The flour market continues dull and unsettled in sympathy with wheat and prices are about 25c per bbl. lower. Buyers are purchasing as they need it to cover immediate wants and holders are obliged to make reasonable concessions to get the business. We quote per 196 lbs. packed in 140-lb. jute sacks: Soft winter straight, western, \$8.25@8.50; do nearby, \$8@8.50; hard winter straight, \$8.50@9; do short patent, \$9@9.50; spring first clear, \$8.25@8.50; do patent, \$8.50@9; do short patent, \$9.25@9.75; fancy spring and city mills patent family brands, \$10@10.75; rye flour, \$7.75@8.25 per bbl. in sacks, as to quality; buckwheat flour, \$4.25@4.50 per 98-lb. sack.

ST. JOSEPH, MO.

N. K. Thomas, Correspondent.

Geo. C. Clark, manager of the Clark Milling Co., St. Joseph, died March 26. He formerly ran a mill at Wathena, Kans., and a year or so ago established the Clark Milling Co., a small feed milling concern.

Under date of March 23 the Norton Grain Co., formerly a partnership, was organized as a corporation with the following officers: M. U. Norton, president; H. C. Gregory, vice-president; F. L. Driver, secretary-treasurer.

In a bulletin issued by the Bureau of Railway Economics, Washington, D. C., dealing with wheat rates from all states to milling centers, St. Joseph, with a milling capacity of 9,000 barrels of wheat flour per day, is rated as ninth in point of milling capacity. An increase of slightly over 2,000 barrels would put St. Joseph fourth, according to the figures published.

Wheat prices at St. Joseph show about 9c decline for the week ending March 28 on hard winters, and soft wheat is 2c to 3c higher. Offerings of hard wheat have been very scarce and practically no red wheat offered. Good mill demand for soft. Corn receipts moderate and demand depending upon the settled condition of prices. Values are about 3c to 6c lower for the week. Oats offerings small and demand good from industries; prices one-half to a cent up for the week.

Visitors on the St. Joseph Grain Exchange during the week ending March 28 included E. L. McNeal, Fairfax, Mo.; F. F. Chandler, Humboldt, Nebr.; Byron Engle, Sheridan, Mo.; Albert Johnson,

Maryville, Mo.; N. L. Pearce, Rosendale, Mo.; J. M. Witt, Stewartsville, Mo.; M. F. Flanagan, Beattie, Kans.; F. W. Keys, King City, Mo.; Jere Kimmel, Robinson, Kans.; I. B. Miller, Robinson, Kans.; J. F. Holman, Kansas City, Mo.; W. W. Windle, Salem, Nebr.; J. L. Bennett, Cameron, Mo.; J. E. Fritter, Kansas City, Mo.; J. D. Aherns, Corning, Mo.; E. E. Cottier, Mound City, Mo.; A. F. Moon, Plattsmouth, Nebr.; H. F. Payne, Gallatin, Mo.; Chas. Murrey, Colby, Kans.

MEMPHIS.

George Williamson, Correspondent.

B. T. Menard of Penick & Ford, New Orleans, was a visitor this week, interviewing the mixed feed trade.

John Cornatzar, general passenger agent of the Frisco System at St. Louis, was a visitor at the Merchants Exchange here Thursday.

G. M. Ross of the Ross Milling Co., Ottawa, Kans., was a visitor during the week and introduced at the Merchants Exchange by C. B. Stout.

K. D. Glover, for two years in charge of the local branch of the Red Star Milling Co. of Wichita, Kans., has been succeeded by E. W. Majors, who has been the company's representative in the Nashville territory. Mr. Glover will perhaps enter the export department of the company and is now at the home office.

Charles S. Kenney, for the past four years associated with the local branch of the Quaker Oats Co. in the capacity of traffic manager and buyer of the feed and

CHARLES S. KENNEY,
Memphis.

grain used in the mixed feed department, has resigned, effective May 1. He has been chosen to be general manager of John Wade & Sons, one of the oldest and largest of the local concerns engaged in the feed and grain business. Mr. Kenney is one of the younger members of the trade here but has risen rapidly and has been very active in the affairs of both the Merchants Exchange and the Memphis Grain and Hay Ass'n, only recently completing a term of one year as president of the latter.

Business continues very quiet as the consumer is buying only actual requirements and these seem less than anybody in the trade expected. Farming operations are well advanced and planting of corn has made fine progress. If an early start means anything the corn crop in this territory this season should be satisfactory, and acreage is said to be larger than usual because the need of feed is so great. Receipts of corn for the week were only 68 cars, as feeders are taking oats almost to the exclusion of the coarser grain because of the relative cheapness of the former. Cash quotation for No. 3 white or No. 3 yellow corn Saturday was \$1.12, while No. 3 mixed was quotable at \$1.02. Receipts of oats were 198 cars, and cash No. 3 white quotable at 51½¢@52¢. Buyers are not anticipating any requirements but there is steady demand because so little feed of any kind is on hand.

OKLAHOMA CITY, OKLA.

W. F. Kerr, Correspondent.

H. R. Rigsbee, feed and seed dealer of Cordell, Okla., plans to erect an additional building soon to take care of his increasing trade.

J. A. DeLarosa, manager of foreign sales for the Enid Milling Co., is off for a business tour of countries in Central and South America.

Among new members of the board of directors of the Enid Rotary Club is Cecil Munn, sales manager of the Southwest Wheat Growers Associated.

The Vici Feed & Milling Co., Vici, Okla., the Belt Mill & Grain Co., Oklahoma City, the Okmulgee Feed Co., Okmulgee, Okla., G. E. Harris, Erick, Okla., the Kelso Grain Co., Cherokee, Kans., and the Temple Cotton Oil Co., North Little Rock, Ark., recently made application for permits to sell milled feeds in Oklahoma.

R. M. Amerine, manager of the Blackwell Mill & Elevator Co. at Blackwell, is defendant in a suit for \$1,000 filed recently by H. C. Ferriman of that place involving a protest against Ferriman erecting oil storage tanks on his property there. Twenty-four others are defendants in a general damage action brought by Ferriman in which he asks for \$11,000.

The forthcoming April 1 report of the State Board of Agriculture will show that drought has done material damage to wheat, says J. A. Whitehurst, president of the board. He believes, however, that the damage will not be as heavy as it appears if rains come early in April. The report will show that cut worm damage has decreased in the northern part of the state.

Members in Oklahoma of the Grain Sorghum Growers Ass'n have been advised by President D. M. Ramsey of Amarillo that the annual meeting of the association will be held in Amarillo early in April. The association covers fifteen districts embracing sections of Oklahoma, Texas, Kansas, New Mexico and Colorado. The annual meeting of the Texas Wheat Growers Ass'n has been called by President L. Gough to meet in Amarillo May 11.

MILWAUKEE.

D. K. Steenburg, Correspondent.

Receipts of grain at Milwaukee for the week were 98 cars barley, 118 corn, 85 oats, 48 wheat, 5 rye, 1 flax, 5 miscellaneous; total, 360 cars, against 409 the week before, 396 a year ago and 749 in 1923.

Shipments of grain from Milwaukee for the week were 163,925 bu. oats, 187,025 corn, 45,360 barley, 45,375 wheat, 18,120 rye; total 459,805 bu., against 418,671 the preceding week and 751,630 a year ago.

The primary election which was to have been held at the Milwaukee Chamber of Commerce on Saturday was passed up this year as no more than two candidates were in the field for any one office. Final election will be held on April 6.

Edward LaBuddle, president of the LaBuddle Feed & Grain Co., was confined to his home, 5903 Washington boulevard, Milwaukee, with a severe cold for several days last week. Edward S. Terry of the Donahue-Stratton Co., Milwaukee, was also ill at his home for several days.

Unsettled markets continue and prices for wheat, oats and corn show further losses for the week. Movement was light and trade fair. Wheat closed 8@11c lower for the period, oats 2c, corn 5@7c, barley unchanged and rye 5c higher on account of good export acceptances at seaboard during the week.

Roy I. Campbell, who operates under his own name and is one of the most popular members of the Milwaukee Chamber of Commerce, was given an ovation when he returned to the floor on Saturday morning, March 28, after having been confined at his home seriously ill with pneumonia for a period of more than five weeks.

Milwaukee milling output last week consisted of 7,300 bbls. of wheat flour, as compared with 7,100 the previous week and 3,800 bbls. during the same week of 1924. Receipts of flour at Milwaukee for the period totaled 25,550 bbls., as compared with 32,430 in 1924 and shipments were 1,400 bbls. last week as compared with 13,610 bbls. in the same week of 1924.

W. S. Slugg, traveling representative with the LaBuddle Feed & Grain Co., Milwaukee, has started his two sons, Bill, Jr., and Hugh, taking boxing lessons from Ritchie Mitchell, the most popular boxer in the history of Milwaukee ring activities. Mr. Slugg says that he feels that his sons will be benefited by the training if they ever enter the grain field and join the "fight for business." A third son, Pat, will also receive boxing instructions as he grows older, Mr. Slugg said.

P. C. Kamm, president of the P. C. Kamm Co., Milwaukee, who accompanied by his wife spent the past nine weeks in Cuba and Florida, returned to his offices in the Chamber of Commerce building on Saturday, March 28. Mrs. Kamm, who was

The Rocky Mountain Grain Co.

DENVER, COLO.

Always in Market
All Grain

in poor health at the start of the trip, is reported to have been greatly benefited by the journey and her condition is considerably improved. Mr. Kamm, who is an old-time maltster, says that the Cuban beer is so good that it reminded him of the "good old Milwaukee product."

J. H. Berk of Chicago; Joseph Straub, Lomira, Wis.; Edward Smith of Madison, Wis.; T. J. Thompson of Osseo, Wis.; James Pick of West Bend, Wis.; R. Haverstick of Rock Island, Ill.; Calvin J. Jones of Mapleton, Wis.; Albert Angell, Jr., and W. C. Renstrom of Chicago; John Lichorason of Baltimore, Md.; K. B. Jeffris and George E. King of Janesville, Wis.; W. G. Kellogg of Minneapolis, Minn.; John Marx of Kewaskum, Wis., and Joseph Free of Columbus, Wis., were among callers at the Milwaukee Chamber of Commerce during the past week.

NEW YORK.

J. M. Nugent, Correspondent.

Walter Moore now represents M. D. Moore, ocean grain freight brokers, on the Produce Exchange floor.

During the past week the following gentlemen visited the floor of the New York Produce Exchange: Y. C. Mann of Buffalo, Edward Knighton and A. P. Watson, both of Philadelphia, G. W. Eddy of Boston, J. M. McCran of Kansas City, Elmer Hofstetter of Baltimore, J. F. Beason and C. M. Donahue, both of Montreal.

Toward the close of the week there was some improvement in the export demand for wheat and total sales in all positions amounted to about three to four million bushels. The major portion of this business consisted of Manitoba wheats. However, there was also a moderate portion of American hard winters, some Duluth spring wheats and some durums.

Flour Situation.

New York, March 28.—Decided weakness prevailed in the flour market throughout the week with reductions of about 50c per barrel on both spring and winter wheat grades. This movement was entirely in sympathy with wheat and mill agents here were complaining that it was hurting business, for actual underlying conditions have not changed.

Reports of a big business for Russia proved unfounded.

Spring patents were quoted at \$8.15@8.65; soft winter straights, \$8.15@8.50, and hard winter straights, \$8.15@8.50 per 196 lbs.

OMAHA.

Leigh Leslie, Correspondent.

J. L. Welsh, of the Butler-Welsh Grain Co., returned to his home in Omaha recently with Mrs. Welsh from Havana, Cuba, and Florida.

S. S. Carlisle, of the Carlisle-Burns Grain Co., who has been confined to an Omaha hospital for several weeks as the result of injuries sustained from being thrown from a horse, has gone to his old home in St. Louis to recuperate.

A. T. Everson, H. A. Dahlquist and C. W. Sheeley, representing the Minnesota State Grain Inspection Department, were in Omaha Wednesday looking into the Omaha Grain Exchange's laboratory for testing protein in wheat. The Minnesota State Grain Inspection Department is to install protein testing laboratories at Minneapolis and Duluth and, having been told by the United States Department of Agriculture of the excellent laboratory operated by the Omaha Grain Exchange, it sent its three representatives here to look into it. The Omaha Grain Exchange's laboratory was installed last September. It is electrically equipped and consists of sixty digesters and sixty stills, giving it a capacity of approximately 500 protein determinations daily. This excellent protein laboratory is under the supervision of the inspection department of the Omaha Grain Exchange, of which Harry R. Clark is chief. M. D. Mize, a graduate chemist, is in direct charge of it. Mr. Mize came here from Kansas City, where he had five years' experience in protein work in large flour mills.

Wheat Condition in Nebraska.

A. A. Fenske, of Fenske Brothers, elevator operators at Sunol, Nebr., writes: "I took a 150-mile drive through the country last Sunday and found wheat in very bad condition. I really believe that the crop has been damaged about 50%. It is badly in need of rain and worms are damaging it every day. A wind has been blowing

steadily for the last two weeks, and this has hurt the wheat more than anything else. If we do not get rain soon our winter wheat crop will not amount to much."

Eland C. Johnson, manager of the Farmers' Union at Mead, Nebr., writes: "Yesterday I was out driving and examined a large number of wheat fields, and I found many of them dead, while others were about 50% dead. Very little corn of this crop has been moved to market. Most of it has been used by local feeders. We have not shipped out of this station a single car of oats on this crop."

George M. LeCount, crop observer, said Saturday: "Through eastern Nebraska wheat is showing a little green, but it is thin. Some winter killing is apparent, especially on high north slopes. The crop is badly in need of rain. Unless rain comes soon, much of the wheat will die. Old corn is scarce."

A report from Clay Center, Nebr., says: "At least one-half to two-thirds of the winter wheat acreage in this district will be abandoned and put into other crops. It is the worst situation we have ever had; it's the result of the drouth last fall. The abandoned wheat acreage will be put into corn, oats and barley."

A report from Carleton, Nebr., says: "I went over the territory round about Carleton and as far east as Belvidere and I'm compelled to say that the winter wheat prospect is very poor. This wheat is doing just what it did in 1917: it responds neither to rain nor sunshine. There is less wheat in the fields now than there was two weeks ago. 50% of the acreage is gone now, and how much of the rest will make a stand will depend on the weather."

W. W. Kimberly, elevator operator at Paxton, Nebr., who was in Omaha a few days ago, said: "The condition of winter wheat from Kearney west to the Colorado line is excellent, and the prospect is for a big crop. But from Utica and Seward south to the Kansas line and on into Kansas the condition of the crop is very bad. Of course, it is too early yet to tell just what may develop, but just now the outlook for the crop in this territory is exceedingly unpromising."

B. W. Snow, the well known crop observer, said last Thursday: "The wheat acreage in Nebraska south of the Platte river shows heavy winter loss. A group of central and north central counties in Kansas, comprising a number of the big producing counties of the state, have suffered losses, practically the whole acreage having been abandoned in some counties."

In its mid-March report, the Division of Crop and Livestock Estimates, U. S. Department of Agriculture, says: "Very unfavorable reports on the condition of winter wheat are coming from the southwest part of Nebraska. The extent of the abandonment cannot be determined yet. Some reports indicate that it will be heavy."

CINCINNATI.

George Mosbacher, Correspondent.

The demand for oats was the best in several weeks and both retailers and shipping interests reported a larger trade. Receipts, though, were very small and elevator stocks were liberally drawn upon. Good seed stock sold at a premium of 3c to 4c over ordinary No. 2 white.

The weakness of wheat eased the corn market but light receipts and reduced elevator stocks caused both a good replacement and consumptive demand and prices were only 1c to 1½c lower. Millers and industries were active buyers of the moderate offerings. The small country movement was attributed to the spring farm operations.

The general betterment in the milling demand for wheat and the difficulty of obtaining good milling quality was also apparent in local conditions and sustaining to prices in spite of the severe option slump. Spot quotations, however, were largely nominal and more conjectural than usual owing to the absence of daily offerings or offers or bids. Shipments to mills out of elevators were much better and while mill orders were mostly for only one or two carlots, the business in the aggregate was of larger volume than for some time.

The Seventh Birthday.

The seventh birthday of the Grain and Hay Exchange as an independent business and financial institution, and its severance of relations with the Chamber of Commerce was celebrated with quiet dignity at a complimentary dinner tendered the membership by the board of directors at the Hotel Gibson Wednesday night. The object of the fete was also to bring about a closer relationship between the members and to strengthen the spirit of good fellowship and understanding, which already prevails among the trade. Practical and interesting addresses were delivered by the various officers of the exchange which were followed by a business meeting and discussions with recommendations for furthering the interests of the members.

President Frank L. Watkins reviewed the seven years' history of the exchange and its struggle for success, in part as follows: "To my mind, the change which is said to take place in the human body every seven years is an apt description of our organization insofar, of course, as its physical makeup is concerned. In looking about one finds the same institution, just as much so as those of us who were here seven years ago—we are changed, yet unchanged—the same, but different. Our organization has the same ideals and we have learned how to observe, promote

and live up to them. Our organization has gone forward as have its individual members. Problems have been met and solved.

"I can not refrain from commenting here upon the progress which has been made from an ethical standpoint among our members during the past seven years. That we have made even greater progress in this direction than in the financial is evident from the information in our archives. From year to year our committees have been called upon for less and less service in the arbitration and disposition of commercial disputes, to say nothing of the decrease in what are commonly termed 'misconduct' cases, both from within the organization and from persons who ship to and patronize this market. We have expended money to educate the country shippers and the southern consumers to the knowledge that ours is a court where they can get commercial justice without legal aid, and this activity has paid us generous dividends in the confidence reposed in us and resultant profitable and harmonious commercial relations. That we are witnessing this is proof of our ability to hold position with the most respected professions and is something that we must guard and maintain more zealously than anything we possess or hope to come in possession of."

PORTLAND, ORE.

J. D. Densmore, a feed dealer at Scio, was a recent visitor in the city.

F. C. Wendell, who for some time was connected with Shull, Armstrong & Co., grain and flour brokers, has taken over the firm.

O. C. Calderwood, traffic expert of the Washington state department of public works, attended the recent wool rate hearing in this city.

Frank Ryer, president of the Ryer Grain Co. of Portland, has returned from a six week's tour to Cuba via the Panama canal, Florida and the middle west.

Hugh Martin of Kerr, Gifford & Co. is on an extended trip and while away will visit in San Francisco, Los Angeles, New Orleans, Chattanooga and Chicago.

Herman Lind, formerly with Kerr, Gifford & Co. and now a grain buyer for Jones-Scott Co. of Walla Walla, was in Portland the other day on a very important mission. He arranged with a certain young lady for life partnership.

Percy Brown, who has been in charge of the Portland office of the Ryer Grain Co. during the absence of Frank Ryer, has returned to Seattle. Archie Ryer came down from Seattle over the week end to call on his brother Frank, who recently returned from Havana, Cuba.

Seth Mann, attorney and manager of the traffic bureau of the San Francisco Chamber of Commerce, headed a delegation of representatives of the wool industry and railroad companies who were in Portland last week attending a hearing before the Interstate Commerce Commission in the so-called Boston wool rate case.

Transit Hearing.

J. B. Campbell, Spokane member of the Interstate Commerce Commission, has been conducting a hearing in the city upon the suspended application of railways to increase traffic rates on wheat to be milled in transit. Railways serving the Pacific northwest applied to the commission for permission to add a milling-in-transit charge of 2½ cents per 100 pounds at intermediate points when products of the wheat are to be reshipped to California destinations. The application was suspended upon the appeal of millers of Washington, Montana, Idaho and Oregon. There are no milling-in-transit charges at present. In opposing the proposed rate, members of the North Pacific Milling Ass'n emphasized that the 2½-cent rate, if granted, would discriminate against millers of the northwest in the California market. They held that the rate would give a distinct advantage to millers of southern Idaho, Kansas, Utah and Nebraska. C. O. Bergan of the Spokane Merchants' Ass'n, emphasizing that the rate would be a discrimination against the northwest, said: "The same amount of work is required for a grain milled-in-transit in Omaha as is required for grain milled-in-transit in Seattle. Millers of the midwest do not and will not pay a milling-in-transit charge on Montana grain milled in Seattle and then shipped to California in the form of grain products such as flour."

Terminal receipts, in cars, were reported by the Merchants' Exchange for the season to March 26 as follows:

Portland—	Wht.	Bar.	Flr.	Crn.	Ots.	Hy.
1924-25.....	14,024	493	1,455	514	590	1,698

WINNIPEG.

Geo. H. Measham, Correspondent.

The weather during the past week has roused hopes of wheat seeding starting in average time. The snow is rapidly disappearing and water draining off the land. It is of course early to expect winter over but at present everything points to an early spring. No fear of spring floods need be felt with the snow gradually draining off as under present conditions.

Friday's market collapsed less under bear pressure than on lack of support. There was some heavy selling at times and the western Canada wheat pool was generally believed to have unloaded considerable wheat on the market. It was noticeable that on brief rally it took but little in the way of offerings to depress prices. Both wheat and flax lost nearly 10 cents a bushel. Oats were the steadiest being generally conceded as at a point where consumptive demand is developing.

The trade here is entirely of one opinion that the break in Chicago which later spread to this market was due to threats and fears of government interference with the freedom of trading on United States exchanges. The farmers' friends blame speculation for former drastic breaks. They may blame themselves for this last one. It is presumable, however, that Mr. Jardine will hardly investigate his department for having manipulated a 10-cent decline in wheat and heavy losses in corn and rye.

Saturday's market was very nervous and erratic within a narrow range but showed decided strength at the close, especially in oats and flax. There was undoubtedly heavy selling pressure at times but it was met by good buying attributed to New York exporters. All lines are considered to be pretty thoroughly liquidated and the general outcome of the change of hands of the last day or two has been to put all lines into strong hands.

Weather over the Canadian west at the week end is slated to turn colder with a probability of rains or snow flurries. In eastern Manitoba there is a lot of water on the land which does not point to early seeding especially if there should be further setbacks. Every day that spring work is delayed this season is important in view of the large acreage to be plowed.

Labor conditions for spring work appear to be satisfactory and indications are that farmers will be able to secure all the help they need at reasonable wages. Immigration apparently will be of moderate proportions but of a superior class of settlers. Trade in farm machinery reported to be fairly good but nothing to write home about. Business in farm lands which promised to be good earlier in the season has slowed down with the declines in grain prices. Real estate men state that had wheat maintained the \$2 level the demand would have been very keen.

NEW ORLEANS.

M. L. Davis, Correspondent.

John T. Gibbons of John T. Gibbons, Inc., is on a business visit to St. Louis.

Edmond Loeliger of the Gans Steamship Line, New York, is on a business visit to New Orleans.

J. De la Rosa of the Enid Milling Co., Enid, Okla., spent several days in New Orleans this week en route to Havana.

Hugh A. Martin, representing Kerr, Gifford & Co., Inc., of Portland, Ore., was here this week inspecting the port facilities.

Fred Langenberg of Langenberg Bros. Grain Co. of St. Louis, accompanied by Mrs. Langenberg, spent several days in New Orleans this week.

Standard blackstrap molasses is firm at 13c per gallon f. o. b. tank cars New Orleans; light blackstrap is quoted at 14c per gallon. Buying is on a hand-to-mouth basis.

Stocks in elevators as of today: Wheat, 1,878,000 bushels; corn, 361,000 bushels; oats, 266,000 bushels; rye, 20,000 bushels; barley, 2,000 bushels. Cars on track: Wheat, 145; corn, 18.

Sam Strachan, assistant general freight traffic manager of the B. & O. railroad, Baltimore, and C. H. Pumphrey, assistant general freight agent of the B. & O. at Louisville, Ky., are New Orleans visitors.

DULUTH.

S. J. Schulte, Correspondent.

The Duluth Board of Trade was well represented at the annual meeting of the Farmers-Dealers Grain Dealers' Association of North Dakota held at Bismarck during the last week. Grain men here expressed satisfaction with the conclusions reached at the gathering, feeling that the discussions held would lead to the adoption of more modern methods in some cases in operating interior elevators and in the handling of the farmers' grains. It is hoped that the suggestion regarding the establishing by the Minnesota inspection

department of a uniform inspection of wheat for protein will be carried through. The passage of resolution in the deep waterways to the ocean project was also thought a move in the right direction. The Duluth Board of Trade delegation to Bismarck was made up of the following: H. J. Atwood, Neil McCabe, Benjamin McCabe, W. B. Joyce, F. McCarthy, F. Thomas, Frank Falk, W. W. Bradbury, E. H. Woodruff, O. E. Harris, John M. Erickson and W. W. Bleacher.

Commission and elevator men here were interested in advices from Buffalo at the end of the last week that only 22 steamers are still holding storage grain down there as compared with 116 at the close of navigation last December. That is accepted as evidence of the good export trade put through during the last few weeks and specialists in foreign trade here are hope-

ful that it will pick up again as soon as foreigners feel satisfied that the grain markets in this country have steadied down after their recent show of acute weakness.

In spite of grain stocks in Duluth and Superior elevators aggregating nearly 32,000,000 bushels and some of the houses being nearly plugged up, so light has been the eastern inquiry that steamer chartering for opening of navigation shipments has been negligible. Some shippers have been offering 3½ cents a bushel for wheat and rye from the head of the lakes to Buffalo, but vessel men are sticking out for 3½ cents and no business has resulted. Some bookings of space for durum and spring wheat are looked for any day now, though.

Duluth commission men blame the latest slumps in the wheat market largely to the recent notice from Washington that the markets would be investigated for infractions of the future trading law. Said the manager of an elevator company in that connection, "The threat of government investigation of alleged manipulation charges has resulted in driving out the large speculators so that it now lacks the cushion to absorb any selling pressure that may develop from time to time. In starting in upon their inquiries regarding why prices of wheat and other food grains have failed to hold, they should take into account that growers over the country pocketed mil-

lions of dollars early in the winter when the market in spring wheat was pushed up to over the \$2 mark. Had it not been for the volume of buying by speculators, prices would never have advanced beyond \$1.50 in spite of all the reports regarding an acute world's shortage of supplies. The market is now repeating its course of two years ago when speculative buying dropped off after the passing of the McNary-Cap-per bill."

BOSTON.

Walter E. Fuller of the Eagle Roller Mills Co., is an applicant for membership in the Grain and Flour Exchange.

L. W. DePass, the secretary of the exchange, who was recently away from his office on account of illness, is again on the job.

W. P. Fisher of Seattle, W. S. Preyer of Buffalo and F. D. Peck of Troy, N. Y., visited the Grain and Flour Exchange recently.

W. E. Ashe of Buffalo and R. E. Jones of Wabasha, Minn., were recent visitors on the floor of the Grain and Flour Exchange.

William E. Hordy, a member of the grain firm of Rodney J. Hordy & Sons and of the Grain and Flour Exchange, died at his home in Arlington on March 18.

CHICAGO.

T. W. Hales of Hales & Hunter visited the Minneapolis office of that company recently.

Stein, Alstrin & Co. have leased ground floor space in the new Sherman Hotel building and will occupy it some time about May 1.

Kenneth B. Jeffries, secretary-treasurer, Frank H. Blodgett, Inc., Janesville, Wis., rye and buckwheat millers, was in Chicago last week calling on the trade.

John A. Eckert of Mendota, Ill., T. P. Brosnan of Thomson & McKinnon, and W. E. Richmond of Memphis have been elected to membership on the Board of Trade.

Plans are being made by quite a few of those who are to attend the annual meeting of the Millers' National Federation on April 16 and 17 to come by automobile.

V. M. Kolly, Crooks Terminal Warehouses, Chicago, left March 22 on a week's trip to Minneapolis and other northwestern points to call on the milling and feed trades.

Samuel P. Arnot, who has been a member of the Chicago Board of Trade for many years and is well and favorably known, has become a member of the firm of Clement, Curtis & Co., effective April 1. He will have charge of the grain and cotton department and will be floor manager on the board succeeding Tom O'Brien who has left to make his home in California. Mr. Arnot was formerly executive vice-president of the board.

Dr. Rudolf Patzig is in charge of the department of market information for Chas. Sincere & Co., 231 S. LaSalle street. As statistician of this house, Dr. Patzig offers both practical and elementary service to its customers. He is conversant with grain trade economics of several European countries and is a graduate of the State University of Heidelberg. More recently and for several years he has been active in Chicago grain trade circles and connected with the Agricultural News Service, Inc.

Trade Opinion.

We believe the technical position of the market has been improved materially and feel friendly to wheat on all setbacks, particularly July and September, which should be bought on re-actions which undoubtedly will occur, if rains are general where needed. Authentic reports of damage in Ohio and parts of Indiana should be given particular attention. We prefer the long side of September and July corn on recessions, believing that most of the drastic liquidation of corn is over.—J. J. Badenoch Co.

The unsettled condition of the market has done much to curtail trading. Liquidation has been very thorough apparently and the market is therefore in a much better position to respond to the influences of supply and demand. Exporters are finding difficulty in securing offers of wheat in the southwest via the Gulf. We believe wheat is entitled to a re-action and the market continues heavily oversold. We do not know how long it will require for this corn situation, and particularly the cash, to show improvement, but we are confident that it will shortly appear and that higher prices will be recorded. Oats largely parallels corn with little change in the cash situation which still remains heavy. With trade so light, it will require a decidedly stronger cash situation to attract new buying power.—Bartlett-Frazier Co.

The main feature of the past week in the grain situation is the rapid deterioration of the condition of the winter wheat. The probable abandonment, this year, based on the early returns is approximately 18 per cent or 7,500,000 acres and quantita-

tive interpretation of the early condition reports is 515,000,000 bushels or 75,000,000 less than was produced last year. Primary receipts of corn are light, but the shipping outlet has been disappointing. Oats prices have held fairly steady in the face of declines in corn. The large visible is decreasing rapidly and the country feeding of oats is heavy.—Clement, Curtis & Co.

In our opinion, the declines of recent weeks have placed values for wheat, corn and oats in a debatable position more in keeping with a sane recognition of influences and factors that govern world prices. It seemed almost certain that the wide and violent swings in prices of the past month will not soon be repeated unless there should come an extended period of very unfavorable weather and conditions that effect seeding and growth of the new crops. Rye will be dominated by the will and whim of the big owners, who have apparently recognized the error of their previous judgment. The most recent sales have not had much effect on the prices for futures or created speculative activity because offers and sales to the foreign buyers have not been made contingent upon prices of futures here, but chiefly at a flat price.—Pope & Eckhardt Co.

The forecast for unsettled weather southwest was the apparent reason for the weakness in July and September wheat but the nearby position led the decline and back of it all can be seen the working out of a gradual re-adjustment to a price level that will bring in a foreign demand for the new crop as well as the remaining surplus of old. The theory of ultimate scarcity is slowly but surely being dissipated. Elevator interests took advantage of the unusual discounts that recently obtained, to store grain for delivery purposes and at this writing there is no other visible outlet for it. Under the circumstances, longs in May, are confronted with the problem of accepting an article on delivery for which there is a poor distributing demand.—Thomson & McKinnon.

We will frankly admit that there was evidently more speculative open interest left in the market than we had thought. Another thing that must be considered is that when speculation has been over-done on one side it is almost invariably true that the pendulum swings too far the other way before the condition is corrected. We are paying the penalty now for over-speculation ninety days ago. Some of us who warned against this at the time on the theory that the cash demand was not following speculation were laughed at for our pains.—Cross, Roy, Eberhart & Harris.

MINNEAPOLIS.

H. A. Paul, Correspondent.

C. T. Stevenson is back from Palm Beach and other southern points.

M. R. Devaney of the Occident Elevator Co. left for California last Thursday.

D. D. Tenney of the Tenney Co. is back from two weeks spent in South Carolina.

H. H. King of the H. H. King Milling Co. returned this week from an eastern trip.

Carl Wehmann, secretary of the H. Wehmann Co., is up and around again after a short siege of tonsillitis.

F. C. Van Dusen of the Van Dusen-Harrington Co. has just returned from vacationing in Florida.

W. H. Sudduth of the Commander Milling Co. returned Saturday from a two months' pleasure jaunt through Europe.

Clarence Lee of the Quinn-Shepherdson Co. is wearing a big smile this week on account of the stork's visit on Thursday.

V. M. Kolly, representing the Crooks Terminal Warehouses, Chicago, was in Minneapolis last week, calling on flour and feed shippers.

A card was received this past week by Harry Miller of the Atwood Larson Co. from W. C. Avery of the Pillsbury Co. Mr. Avery was in Naples at the time that he wrote the card.

Clyde Burdick of the Washburn-Crosby Co. was greeting his many friends on the trading floor this week for the first time in several months. He has been confined to his home with pneumonia and other complications.

The Maney Brothers Mill & Elevator Co., Minneapolis, has been incorporated with \$100,000 capital stock, to handle flour, feed and kindred commodities. W. A. Maney is president and treasurer, and T. A. Maney vice-president and secretary.

Frank Jaffray of the Bartlett-Frazier Co. and his brother, Walter, of the Com-

**We Buy and Sell

mander Co., are spending a week or ten days in the east. They accompanied their father and mother to New York from which point the latter is sailing for Europe.

Cash Markets.

Wheat: The local cash market, with the exception of today showed a firm to strong tone throughout the week. Early in the week mill buyers, both local and interior, were competing sharply for the limited offerings and the wheat testing better than 13% protein was being snapped up readily. About mid-week, however, the mills dropped out of the market for the time being, refusing to bid up the market, but mixers stepped into the breach, saving the day for the commission men.

Shipping advices continue very light and the general opinion of the trade is that they will naturally continue thus for the balance of the crop year. There is no question but that the big bulk of the wheat has passed out of first hands and if the late estimate of 25,000,000 bushels of spring wheat in country elevators in the northwest is anywhere near accurate, receipts will be light of necessity.

There has been considerable question as to whether the mills will be forced to look to the local elevator stocks for supplies this spring and summer. Up to this week very little of this class of wheat has been worked to milling interests but on Wednesday of this week mill buyers were trying to pick up some round lots of elevator wheat which might mean the beginning of a fairly heavy movement from local houses to local and interior mills.

Today elevator stocks showed the following figures: this week, 13,098,844 bushels vs. 13,374,152 last week and 14,633,017 last year.

Based on today's sales, the cash market was as follows: No. 1 hard spring, 3@47c over May; No. 1 dark northern, 2@47c over, and No. 1 northern, 1@4c over. In the durum market: No. 1 amber, May, at 42c over; No. 1 mixed, 1c under at 40c over, and No. 1 durum, 1c under at 30c over.

Corn: Corn came in for a rather mixed demand during the week just past. Yellow was in good demand one day and mixed slow and conditions exactly the opposite the next. Taken all in all, the medium and low grade corn was slow sale throughout the week with the No. 3 holding its own nicely. Shipping sales were heavy early in the week going to a quarter of a million one day but slumping off toward the tail end of the week to almost nothing. Receipts are light, of course, due to the large percentage of high moisture content corn in the country, holders not caring to risk its shipment when we are right on the threshold of real spring weather.

Local stocks, made up today, total 1,191,955 bushels vs. 1,453,563 a week ago and 1,673,649 a year ago.

Today's sales showed the following ranges: Yellow—No. 3, 5@6c under Chicago May; No. 4, 10@14c under; No. 5, 15@20c under, and No. 6, 20@23c under. Mixed—No. 3, 12@14c under; No. 4, 16@19c under; No. 5, 19@21c under, and No. 6, 23@25c under.

Oats: The past week in the oats market was featured by an exceptionally slow demand for the thin and discolored stuff. Nobody seemed to want oats of that kind but there was a fair to good request for the choice quality right through the week. Shipping sales totaled around a half million bushels for the week. Local elevator stocks show 21,339,702 bushels vs. 21,705,168 last week and 4,800,928 a year ago. Today's range of sales showed No. 3 whites at 1/4@1 1/4c over the May option and No. 4, 1@2 1/4c less.

DENVER, COLO.

F. R. Houlton, Correspondent.

Receipts of Grain at Denver the last week were 95 cars.

C. E. Williams of the Crescent flour mills of Denver will leave shortly for the millers' meeting at Kansas City and then make a further trip to St. Louis, Chicago and immediate territory.

J. K. Mullen, president of the Colorado Milling & Elevator Co., recently lost his wife. Mrs. Mullen was buried Thursday morning from the Immaculate Conception Cathedral at Denver and all the grain firms and the exchange as well as the mills throughout the territory closed out of respect for Mr. Mullen's loss. The funeral was one of the largest ever held in Denver. In the death of Mrs. Mullen the poor and needy institutions of the city have lost a warm and generous friend.

ST. LOUIS.

Julius Cohn, president of the National Feed Co., is back from a vacation trip in the south.

L. Busch Faust of the Chesterfield (Mo.) Farmers' Elevator Co. is an applicant for membership in the Merchants' Exchange.

Shipments of wheat out of St. Louis via the barge line continue to be heavy, ten barges carrying more than 600,000 bushels being the record for just one week recently.

The new officers of the St. Louis Millers' Club, elected at the 25th annual convention held in this city last week are A. V. Imbs, president; R. H. Leonhardt, vice-president; F. E. Eichler, secretary-treasurer, and Samuel Plant, E. T. Stanard, L. A. Valler, Christian Bernet, G. S. Milnor, C.

KANSAS CITY.

T. J. Tanner, Correspondent.

Roger Scribner, secretary of the Shannon Grain Co. of Kansas City, died Monday in Lincoln, Neb. He was not active in the company. His age was 69 years.

E. J. Smiley, secretary of the Kansas Grain Dealers' Ass'n, is credited with an estimate that 2,500,000 acres of wheat will be abandoned in Kansas, even if rains come freely.

Among the week's visitors at the Board of Trade were C. E. Tyler, St. Paul, Minn.; G. Miller, Los Angeles, Cal.; C. E. Jones, Hutchinson, Kan.; C. H. Bolt, Wichita, Kan., and R. J. Lamshire, Springfield, Mo.

J. J. Wilson of Moran, Kan., retiring chief of the Kansas Grain Inspection Department, may remain in Kansas City after his term expires, April 1. W. B. Dalton of St. George, the new chief, and his assistant, F. M. Fink of Salina, were guests at the Board of Trade Thursday.

Damage amounting to several thousand dollars was sustained by the Shellabarger Mill & Elevator Co., Salina, Kan., March 25, when sparks from a passing locomotive set fire to a four-story mill structure which was being remodeled. The main part of the company's plant escaped injury.

Assuming that Kansas will have a wheat crop of considerable proportions, regardless of the present dubious outlook in some parts of the state, officials are taking steps to provide harvest hands. Jesse Greenleaf, member of the Kansas Public Service Commission, will go to Chicago April 7 for a conference with the railroads relative to a reduced fare for harvest hands from outside the state to the distributing centers in the wheat belt.

Allen Logan, chairman of the committee authorized to procure a bronze tablet for the Kansas City Board of Trade commemorating the exchange members who fought or died in the world war, is negotiating with eastern art producers for the manufacture of the tablet. Other members of the committee are looking up the records to find how many names are eligible to be recorded. The tablet will cost \$700. It will be mounted in the trading hall.

Sigmund Steeg, Hamburg agent for the Hoyland Flour Mills Co. of Kansas City, spent several days of the week here as the guest of George W. Hoyland. A banquet tendered Mr. Steeg by Mr. Hoyland at the Hotel Muehlebach Friday night was attended by 21 local millers. He said Germany would be a good buyer of American wheat and rye during the rest of the season. With reference to European crops he admitted apprehension on account of wet weather and field pests.

H. G. Miller of the Fuller Grain Co. made the following report after a trip in Colorado, Nebraska and Kansas: "All of the wheat in Colorado is in good shape. Western and northern Nebraska also are in good condition. Northwestern Kansas, as far east as Norton, Hoxie and Grainfield, is in splendid condition. East of Utica to Hoisington the crop is very much spotted and damage from winter killing varies from 10 to 25 per cent. The barley acreage will be enormous, probably a record for Kansas, due to the large abandonment of wheat. A much larger acreage of corn is also indicated."

Weevil Fumigation Successful.

sive grain fumigant proved highly successful. In both open and closed bins full dosages of the fumigant killed every weevil, as shown by examination of samples afterward. Box car tests made previously had demonstrated that the fumigant was sufficiently effective to insure the passage of grain through state and federal inspection.

In the Kansas City experiment the fumigant process lasted 48 hours. About 40 pounds of the chemical were used per 1,000 bus. of wheat. In some instances the fumes had to penetrate 60 feet of grain.

While the new fumigant is slightly more expensive than carbon bi-sulphide, it is more economical in the sense that it can be safely applied in bins, whereas the carbon bi-sulphide is so explosive that its use generally is limited to isolated cars. The federal chemical, it is said, leaves no

residual odor and exerts no deleterious effect on the grain.

Fifteen superintendents of Kansas City elevators and various grain men witnessed the tests, which were under the direction of Dr. R. T. Cotton of the Bureau of Entomology and Dr. R. C. Roark of the insecticide and fungicide board of the United States Department of Agriculture. E. L. Morris, federal grain supervisor in Kansas City, and M. C. Fears, head of the Missouri Grain Inspection Department, were present. The fumigant employed was manufactured by the United States Industrial Chemical Co. of Baltimore.

by local mills. Country elevator men showed a reluctance to shipping in stocks on hand, which probably were bought at a higher level. The market followed the trend of futures and sagged most of the week. High-protein samples were well taken from day to day and elevator men were fair buyers of ordinary kinds, but offerings were often too light to make a market. There were heavy withdrawals from store to fill old milling and export sales. Stocks decreased 892,000 bus., to 6,339,000, as compared with 11,080,000 a year ago. Hard and dark wheat comprised most of the arrivals. This grain closed 2@10c lower on the week, with No. 1 at \$1.51@1.72, No. 2 at \$1.51@1.72, No. 3 at \$1.50@1.71, and No. 4 at \$1.48@1.70. There were so few cars of soft wheat on sale that mills

took several cars out of store. This variety held up better than other sorts, developing a premium. Final prices were 2c lower to 5c higher than on the previous Saturday, as follows: No. 1, \$1.73@1.77; No. 2, \$1.73@1.77; No. 3, \$1.70@1.73; No. 4, \$1.61@1.69. Showers in the southwest during the week were light and scattered, with more rain in Texas than elsewhere, and temperatures were mild and springlike. Crop advices included many adverse comments, and there was great apprehension as to acreage abandonment. In north central Kansas, southeastern Nebraska, western Oklahoma and most of Texas there is a poor outlook but moisture from now onward would help the situation generally. Some authorities are fearful that, owing to inadequate rainfall in March, April will show a similar deficiency, which would be disastrous. The increased acreage is one of the consoling features.

Corn—Receipts, 249 cars, against 284 a week ago and 114 a year ago. Early in the week there was a spurt in the shipping demand, with some sales southward, but most of the corn that went out was taken by Chicago to build up the quality of stocks there, which may be intended for May delivery. Manufacturers of corn meal and chop say there is too much corn yet

in the south to warrant good buying, and that a normal southern demand is unlikely before May. Weaker hogs were a sentimental adversity to the nearby feeding request and the weakness of wheat was effective. Carlots closed 3½¢ down, with No. 2 white at 1.02½¢@1.03, No. 3 at 98c@1.02, No. 2 mixed at \$1.00½¢@1.01, No. 3 at 99c@1.00, No. 2 yellow at 1.05¢@1.07, and No. 3 at 1.03¢@1.05. Shipments from store reduced the local stocks 295,000 bus., to 7,556,000, against 2,052,000 last year. Weather conditions favored preparation of much ground for planting and reports indicated that, including part of the abandoned wheat acreage, the new area of corn would show a big increase.

Oats—Receipts, 54 cars, against 34 a week ago and 56 a year ago. The percentage of oats in consignments was light, as many cars had been bought to arrive. There was a fair local feeding demand and elevator interests took 227,000 bus., reducing the stocks to 1,702,000, as compared with 624,000 last year. White oats closed 1c lower to 1c higher, with choice samples showing the gain. Red seed oats were quiet and unchanged. Final prices were: No. 2 white, 47¢@49½¢; No. 3, 46¢@46½¢; No. 2 red, 48¢; No. 3, 46¢. According to country reports, good progress has been made in seeding, but the crop is in almost general need of rain.

Kafir and Milo—Receipts, 61 cars, against 47 a week ago and 59 a year ago. Though shipments from store were liberal, cutting the local stocks down 40,000 bus., to 428,000, fresh offerings met a slow demand, owing to reported heavy supplies in the hands of feed manufacturers and a moderate trade in mixed feeds. Arrivals included about equal parts of kafir and milo. The market felt the influence of weakness in wheat and corn. At the close kafir was 12¢@17c per cwt. lower than a week ago, with No. 2 white at \$1.58@1.59, No. 3 at \$1.55@1.58, and No. 4 at \$1.50@1.55. Milo lost 12¢@17c, No. 2 finishing at \$1.92@1.93, No. 3 at \$1.92, and No. 4 at \$1.88@1.90.

PEORIA, ILL.

L. L. Eckard, Correspondent.

Winter wheat in this section is in need of rain, the soil in many places is reported very dry. The sowing of oats is in full swing and the soil is in good shape for this work.

The movement of oats from Peoria and surrounding elevators to St. Louis and Southern markets has been quite extensive the past week and some of the grain dealers are of the opinion that they are fairly well cleaned out.

Cash corn receipts for Saturday were rather liberal compared with the past few days with 51 cars. Prices were quoted unchanged. Local industries were in the market and cleaned up all offerings. No. 4 yellow, \$1.00 to \$1.02; No. 5 yellow, 97c to 98½¢; No. 5 mixed, 97c; sample, 88c.

Corn from the Northwest territory continues to arrive at this market in good sized amounts and is finding a good demand from local industries, the Corn Products Co. being the largest buyer of this kind of corn. A very small per cent of the Peoria receipts are Illinois corn and offerings to arrive are extremely light.

Northwest territory billing—No. 5 yellow, 97c; No. 4 mixed, \$1.00; No. 5 mixed, 97c to 97½¢; No. 6 mixed, 94½¢.

Oats receipts were 4 cars. No sales were reported and market was inactive.

Live stock men at the local yards report the run of hogs extremely light the past week and many of them are inclined to believe that the hogs are not in the country. Reports from the new yard at Springfield indicates the volume of business there is about as expected.

Hog prices at the local yards were quoted steady with a very light run. Good truck hogs sold around \$13.40. There was only one carload on the market which also sold at \$13.40.

Light hogs, \$12.50 to \$13.40; med., \$13.25 to \$13.45; heavies, \$13.35 to \$13.50; packers, \$12.50 to \$12.75.

Cattle and calves were reported steady with the best veal calves selling at \$11.00 down. Receipts were very light.

Grain receipts and shipments for week ending Saturday, March 28, as compared with same week last year as reported by the Secretary of the Peoria Board of Trade:

	1925.	1924.
Receipts—

James Stewart & Co. of Chicago are to be the builders.

A large addition to the Buffalo elevator capacity of the Washburn-Crosby Co. has been planned. The new elevator will have a capacity of 1,200,000 bushels, thus giving that company total wheat storage facilities here amounting to 5,000,000 bushels.

Net income of the Buffalo grain elevators for the crop year ending April 1, next, is estimated at \$3,212,000, including charges of \$2,880,000 for elevating grain, \$432,000 for handling and \$300,000 for storage. It is estimated 288,000,000 bus. of grain will be handled before the crop year ends.

WAGON LOADS RECEIVED
A book for the use of country grain buyers in keeping a record of grain received from farmers.
Its column headings are: Month, Day, Name, Kind, Gross and Tare, Net Pounds, Bushels, Pounds, Price, Dollars, Cents and Remarks.
The book, 9 1/2 x 12 inches, 160 pages, 20 lines to each page, giving room for recording 3,200 loads, is printed on Linen Ledger Paper and is well bound in strong board covers with leather back and corners. Order form 80. Price, \$1.75.

FORT WORTH, TEXAS.
G. E. Blewett, Correspondent.

Weather.

Drought continues unbroken over entire state except in extreme southwest corner in Rio Grande Valley where some rains occurred this week.

Wheat and oats are daily deteriorating account of lack of moisture and the crop prospects are daily becoming more remote and with each succeeding day of drought the yield is lessened.

If Texas produces 8 million wheat it will be a great surprise to those who are in close touch with the situation and should sufficient rains be received in the next ten days it is extremely doubtful if the state could produce more wheat than this.

Oats are also suffering and it is believed the state will not produce enough oats to replace those sown for seed unless the Panhandle section which is now planting should receive ideal growing conditions, in which event they could raise some oats.

This means that the early movement of wheat and oats will be delayed this year as those sections normally producing the early crops will not have any this year above their immediate needs. Corn planting has been delayed and those intending to plant corn will now have to turn their land to other crops as the drought discourages any attempt to seed their acres to corn at this late date, so Texas will not produce over one-fourth of the corn raised last year.

Grass is also being affected by the drought and cattlemen are being hit very severely by lack of pasturage, forcing them to buy more feed than they anticipated or else market their stuff under weight.

Old settlers in Texas cannot recall such a prolonged drought at this season of the year, as formerly the droughts have come in the summer and fall months but never before has a winter gone by with such little moisture falling.

slow sale as stocks are rather heavy of mixed and demand disappointing. Prices as a rule are working closer to Kansas City basis and it is expected that inasmuch as interior offers are very light that purchase will be made from the terminal markets in the near future. Basis delivered Texas Group 1 points today's (March 28) values: No. 2 white corn, \$1.19; No. 2 yellow, \$1.21; No. 2 mixed, \$1.13.

Oats.

Receipts have been rather light and offers slow, resulting in a sharp advance in premiums on white oats with a good demand and large volume of trading consummated the past week. Texas red oats are very hard to obtain and prices are now at a greater premium over white oats than at any time on this crop. March 28 values: No. 3 white oats, Group 1, 56@56 1/2 c, while No. 3 red oats are selling at prices equal to 62c, Group 1.

Milo and Kafir.

Receipts have been very slow and country offers quiet as farmers refuse to sell until some chances are seen of making another crop. Demand is steady and prices have shown some recovery with still better prices expected as California and eastern markets are inquiring for quotations on milo and kafir.

March 28 values, basis delivered Texas common or Group 3 points, or 25c cwt. less f. o. b. common points, are as follows: No. 3 or better yellow milo, \$1.97@2; No. 3 or better white kafir, \$1.85.

CAIRO, ILL.

Halliday Elevator Company
CAIRO, ILL.
Grain Dealers

Business.

Business is reflecting the drought conditions and merchants as well as bankers are proceeding very cautiously in making new loans or advancements at this time. Mills also report very slow flour demand and sales are rather unusually slow with most of the mills confining their business to immediate shipments. Flour is being quoted at \$9.30 basis high patent or \$9.80 extra high patent delivered Texas common or Group 3 points.

Wheat.

Receipts of wheat have been very slow the past week and country offerings have also diminished to almost nothing and while the demand is also quiet there has been sufficient business to materially reduce elevator stocks here, especially of hard and dark hard wheat. Premiums on these have advanced sharply and it is expected these will widen as the demand increases. Wheat is now being sold on a basis of Kansas City cash prices. Mixed soft wheat is rather slow and premiums have not advanced as much as they have on hard. Mills seem plentifully supplied on this variety at this time. Today (March 28) close of markets the following prices prevail here, basis delivered Texas common or Texas Group 3 points: No. 1 soft red wheat, \$1.80; No. 1 mixed wheat, 80% soft red, \$1.75; No. 1 dark hard wheat, \$1.76; No. 1 hard wheat, \$1.73; No. 1 durum or mixed, 75% durum, \$1.73.

Corn.

Corn receipts have been extremely light the past week and while demand has been slow it has been sufficiently heavy to cause a sharp advance in premiums over the options, especially on No. 2 white corn. Elevator stocks have been materially reduced and with a continued demand for white corn that is expected these premiums will in all probability make further advances. Yellow corn is also some better with higher premiums but mixed is rather

BALTIMORE.
Robert C. Neu, Correspondent.

Henry A. Lederer, member of the firm of Lederer Bros., who is making a tour of the world, was in China last week.

The annual auction sale for choice of grain sample tables on the floor of the Baltimore Chamber of Commerce will take place on Monday, April 6.

The receipts of water-borne corn in the Baltimore market so far this season amount to 45,000 bushels, compared with 212,000 bushels arrived up to the corresponding time last year.

Lewis Blaustein, prominent in the flour trade of this market, will remove his office

early in April to No. 1215 American building where he will continue in the flour business under the style of General Flour Co.

Out-of-town visitors on the floor of the Baltimore Chamber of Commerce last week were Wm. Cracken of Philadelphia, E. B. Sutherland and N. W. Paterson of Fort William, Ont., Thos. C. Bowling, miller of Charleston, W. Va., V. M. Harris and A. B. Clark of Kansas.

At the annual meeting and dinner of the Baltimore Flour Club, held on the evening of March 25 at Hotel Rennert, this city, the following officers were re-elected for another year: President, J. Ross Myers; vice-president, Walter A. Frey; treasurer, Stanley G. Erdman; secretary, Charles Minnigerode.

Hammond, Snyder & Co., Inc., grain receivers, exporters and forwarders of this market, announce that at a special meeting of the board of directors of this corporation held at its office, 319 Chamber of

Commerce building, March 25, the resignation of John W. Hampel as assistant treasurer was accepted, to take effect immediately.

Schedules of the liabilities and assets of the Malco Milling Co., of Hampstead, Md., which was adjudicated an involuntary bankrupt on Feb. 28, were filed last week in the United States district court, this city, by George W. Albaugh and Guy W. Steele, who were named as receivers for the company several months ago by the circuit court for Carroll county, Md. They show liabilities of \$117,719.82 and nominal assets of \$161,228.21. Of the liabilities, \$114,972.82 is unsecured. Among the assets are real estate valued at \$73,720.67 and milling machinery valued at \$68,792.38.

The annual dinner and ladies' night, given by the Baltimore Flour Club, J. Ross Myers, president, at the Hotel Rennert, on the evening of March 25, was a distinct success. Covers were laid for 65, and the out-of-town guests included B. H. Wunder,

former president of the New York Flour Club, and Stewart Unkles, president of the Flour Club of Philadelphia. The principal address of the evening was delivered by Hon. J. Frank Supplee, Jr., United States commissioner at this port. The vocal selections rendered by a male quartette were of high order and popular songs sung by the entire assemblage further enlivened the dinner. Favors were distributed among the ladies present and dancing followed until midnight.

LOS ANGELES, CALIF.

C. G. White, Correspondent.

W. M. Wilber, who for the past four years has been manager of the Dairymen's Feed & Supply Co., resigned the 1st of March to enter the grain and hay business for himself. Howard C. Warren will succeed Mr. Wilber as manager. Mr. Wilber has been connected with the grain trade in Los Angeles for the past 15 years and has a wide acquaintance with both the

grain dealers and farmers in California and his many friends will be pleased to learn that he has opened an office under his name at 342 I. W. Hellman building and is now in a position to handle hay, grains and millfeed in any quantity.

W. A. Wheeler and Mr. Barr of the agricultural department, Washington, D. C., spent several days in the city last week in conference with the bean and hay dealers, working out the preliminary steps to establish federal grades on hay and dry beans.

James F. Mackenzie, federal supervisor of San Francisco, and M. Arnold of the state agricultural office, Sacramento, Calif., and Mr. Whitlock and Mr. Bates of the federal supervisor's office, Portland, Ore., were in the city for several days last week making an inspection of the sampling and grading equipment used by the inspection department of the Los Angeles Grain Exchange.

Southern California's prosperity during 1924 was greater than ever before and the district showed an increased production of income, a tremendous growth in population and a liberal supply of money in circulation. This is indicated from the number of full paid returns reporting income earned during the year that were filed between Jan. 1 and March 15 at the Los Angeles office of the internal revenue bureau.

Cash Markets.

The market at this terminal during the past week has been very quiet with very little change in price on grain and grain products. The arrivals, however, have been below normal and but few cars on track at the close of the week.

No. 3 yellow corn, board terms, is being offered at \$2.40 per cwt. with bid of \$2.36, while spot is being offered at \$2.43; No. 2 white kafir is being offered at \$2.20 per cwt. No. 2 feed barley for April delivery shows a sharp decline over a week ago, now being offered at \$1.70; No. 2 western red wheat, sacked, spot, is being offered at \$3.20 per cwt.

The hay receipts for the week were 153 cars. Alfalfa market is very unsteady. No. 1 is quoted at \$22 per ton; No. 2 at \$20; No. 1 barley hay, Arizona grown, \$27; No. 1 oat hay, \$25; No. 1 oat hay, California grown, \$32. The demand for all hay is very light. The ground feed receipts were 19 cars. Millrun is now selling for \$36; Kansas bran, \$34; alfalfa meal, medium ground, \$32; molasses alfalfa, \$29; cottonseed meal, \$45; beet pulp, \$46.50; rolled barley, \$46.

INCREASE IN CROP AREA.

Growth of agriculture since 1920 has added 7,623,490 acres of land to the area under field crops in Manitoba, Saskatchewan and Alberta, according to a bulletin issued by the department of agriculture. This was an increase of 211 per cent over the land under cultivation in this area in 1900.

Between 1921 and 1924, the bulletin shows, the number of cattle, sheep and swine in the prairie provinces have increased 119 per cent. At the same time the population has gained 47.3 per cent, the railway mileage 107 per cent, hydro electric installation 909 per cent, automobile manufacturers 57 per cent. Egg production has almost doubled since 1920 and the output of factory butter has increased 50 per cent.

On the farm acreage added since 1920, the report estimates, the prairie provinces could feed all the people of Canada with wheat, potatoes and all other vegetables, or it could supply the total demand for wheat of London, New York, Paris and Berlin. It could grow all the rye, flaxseed and buckwheat Canada now produces.

While Canada leads other nations of the world in the increase of its crop areas, the 37,808,894 acres under crop last year amounted to only one-fifth of the 167,000,000 acres of cultivable land in the prairie provinces, Western Canada, the bulletin estimates, could support a farm population of 25,000,000.

WORLD GRAIN CENTER.

One result of the recent English conference, under the leadership of Sir Auckland Geddes, investigating food prices in that country, was the confident prediction that Great Britain, if she so desired, could become the grain center of the world.

The plan, as laid down by J. H. Thorburn, an economic expert, comprises the following features:

1. The construction of a system of granaries and elevators at English sea-ports and to link these up with the great elevator systems of Canada, other British dominions, and possibly the Argentine.

2. Appointment of a board of grain commissioners, non-political, to be composed of experienced merchants and shippers, to take complete charge of the entire British wheat industry.

3. Creation of a system of grain certificates for use as legal wheat tender.

4. Government ownership and operation not only of the elevators, but of the whole industry.

Thorburn says his system will concentrate in England much of the world's wheat store, will give England what she has always desperately needed, a permanent wheat supply, and will inevitably serve to give Britain control of the world's wheat price.

A survey of farm real estate trading just completed by E. M. Fisher, director of education and research of the farm land division of the National Real Estate Board, on the basis of reports from thirty-one states and two Canadian provinces, shows 42 per cent increase in farm sales in 1924 over 1923. The number of acres sold in 1924 increased 44 per cent and prices showed an advance of 65 per cent, indicating also an increase in the valuation of agricultural lands.

The Lithuanian government has imposed a duty of 0.10 lit (one lit—10c)—per kilo on rye (now free), to become effective July 1, 1925. Trade Commissioner C. J. Mayer reports to the Department of Commerce. At the same time the duty on flour (0.45 lit per kilo since Jan. 1, 1925), has been increased to 0.90 lit per kilo. The duty on wheat (0.30 per kilo since Jan. 1), has not been increased.

Sir Joseph Flavelle, through the Royal Society of Canada, is arranging to present a gold medal to Charles Saunders for his discovery and development of "Marquis" wheat.

Security from Lightning Losses

The Mutual Fire Prevention Bureau names lightning as one of the two chief causes of elevator fires during 1924.

Take heed and protect yourself now. Insist on Underwriters' Laboratories Master Label installation. Small in cost in proportion to fixed investment, it assures your insurance reduction.

Fire protection is not available to most grain elevators. Stop this greatest of fire menaces. Saving on insurance pays for a Security System in a few years.

We are manufacturers and installers of Underwriters' Laboratories approved lightning conductor systems for grain elevators, warehouses, factories, smoke stacks and other large structures. Write for specifications and information on how to prevent lightning losses.

Total	184	23	72	278	98

CHICAGO BARLEY PRICES.

Following is the daily range of quotations for spot malting barley quotations at Chicago:

Mar. 23.....	\$0.78@0.96	Mar. 26.....	\$0.80@0.95
Mar. 24.....	.80@.95	Mar. 27.....	.85@1.00
Mar. 25.....	.80@.95	Mar. 28.....	.82@1.00

Receipts of barley at Chicago for week ending March 28, 1925, were 102,000 bus., compared with 171,000 bus. same week 1924; shipments, respectively, 38,000 bus. and 54,000 bus.

EXPORTS OF BARLEY.

The exports of barley (bus.) from principal United States ports, as reported by the Chief of the Bureau of Statistics of the Department of Commerce for each month, for years named, were as follows:

Mos.	1925.	1924.	1923.	1922.
Jan.	1,522,000	299,000	661,000	385,000
Feb.	881,000	613,000	1,194,000	463,853
Mar.	969,000	1,012,000	836,000
Apr.	706,000	708,000	1,002,000
May	448,000	365,000	1,015,000
June	513,000	362,000	1,153,000
July	1,054,000	816,000	2,519,000
Aug.	1,396,000	2,571,000	2,085,000
Sept.	1,955,000	2,054,000	3,671,000
Oct.	5,315,000	1,425,000	2,940,000
Nov.	2,709,000	264,000	1,563,000
Dec.	1,744,000	382,000	762,000
Yr.	17,721,000	11,814,000	18,394,853

BARLEY MARKETS.

MILWAUKEE.—Malting demand was strong in the Milwaukee market last week but offerings of choice grain were small and quotations closed unchanged for the week. Shippers were not especially active and low grades and black oats mixtures were hard to move. Receipts were 98 cars as compared with 98 the previous week and 75 for the same week of 1924. Choice to fancy, 48 to 50 lb. test, quotable at 94@96c; fair to good, 44 to 47 lb. test, 85@93c; light weight, 40 to 43 lb. test, 80@91c; feed, 70@83c. Iowa quoted 80@95c, as to quality; Wisconsin, 80@96c; Minnesota, 80@95c; Dakota, 80@93c; feed and rejected, 70@82c.

FT. WORTH.—Receipts rather light and offers are slow. Demand steady and prices are about unchanged with 4 or better barley worth about 83c group 1.

DULUTH.—Though receipts were in better volume here during the last week the great bulk of them were on sale so that trade was held down to small proportions. Dealers were in the market for odd cars from time to cover their needs. Receipts aggregated 22 cars, and closing prices are unchanged at from 67 to 88c.

MINNEAPOLIS.—Fluctuation in the futures was closely reflected in the cash market for barley during the past week. Feeding quality was generally slow sale but the scant offerings of malting grades were snapped up eagerly. Quite a little being picked up for seed during the past week. Local stocks total 2,188,635 bus. vs. 2,149,846 last week and 619,834 a year ago. Today's range of sales was from 68@83c.

KANSAS CITY.—Affected by weakness in corn and kafirs, the local barley market declined 2@4c per bushel this week. No. 3 closed at 86@91c and No. 4 at 84@88c. Receipts were only 2 cars. About 4,000 bus. were shipped from store, leaving stocks of 6,000. A light demand from poultry-feed interests was reported. Advices from western regions in Kansas and Nebraska and also from Colorado indicated the planting of an in-

creased acreage, largely in wheat fields to be plowed up on account of winter killing and drouth.

CHICAGO—Choice unchanged; other grades 2@3c lower. Better demand at the decline, with fair sales at 64@87c. Local receipts for week, 102,000 bu.; last year, 171,000 bu.; shipments, 28,000 bu.; last year, 54,000 bu. Malting—82c@91, according to quality; feeding and mixing, 64@88c; screenings, 38@64c. Local inspection, 10 cars.

RYE MARKETS

RECEIPTS OF RYE.

Carload receipts of rye at the principal primary markets in the Central West for the week ending March 28:

	Mpls.	Dul.	Chi.	Win.	Mil.
March 23.....	7	15	3	3	2
March 24.....	13	1	7	10	1
March 25.....	6	8	2	9	..
March 26.....	10	..	1	10	..
March 27.....	6	15	1	7	..
March 28.....	7	6	1	6	2
Total	49	45	15	45	5

RYE SPOT QUOTATIONS.

Closing outside prices for rye of No. 2 quality cash for the week ending Mar. 28 were:

	Mpls.	Dul.	Chi.	Win.	Mil.
Mar. 23	\$1.21	1.22½	1.25	1.26½	1.20
Mar. 24	1.18	1.19½	1.25	1.22¾	1.23
Mar. 25	1.22	1.23½	1.26¾	1.28½	1.26
Mar. 26	1.19½	1.21½	1.23	1.25	1.26
Mar. 27	1.16	1.17½	1.20½	1.21½	1.25
Mar. 28	1.17	1.17½	1.20½	1.22½	1.20

CHICAGO RYE FUTURES.

Following is the range of future prices for rye for the week ending Mar. 28:

	Mar.	May.	July.	Sept.
23	1.20½@1.28½	1.12½@1.18½	1.03	@1.07
24	1.25½@1.30	1.15½@1.19	1.04	@1.06½
25	1.24½@1.30½	1.13½@1.19½	1.03½	@1.08
26	1.26	@1.30½	1.16½@1.19½	1.01½@1.07½
27	1.21	@1.28½	1.13	@1.18
28	1.22	@1.24½	1.12½@1.14½	1.01½@1.03½

Receipts of rye at Chicago for the week of Mar. 28, 1925, were 12,000 bus. vs. 47,000 bus. same week of 1924; shipments were 3,000 bus. vs. 6,000 bus. same week of 1924.

EXPORTS OF RYE.

The exports of rye from all United States ports, as reported by the Chief of the Bureau of Statistics of the Department of Commerce for each month, for years named, were as follows, not including rye flour:

Mos.	1925.	1924.	1923.	1922.
Jan.	1,187,000	200,000	3,449,000	129,000
Feb.	912,000	137,000	5,974,000	1,194,249
Mar.	299,000	1,361,000	903,000
Apr.	2,077,000	2,219,000	3,898,000
May	1,924,000	4,611,000	5,433,000
June	3,708,000	3,877,000	4,953,000
July	1,306,000	3,328,000	2,789,000
Aug.	1,469,000	1,741,000	4,610,000
Sept.	11,563,000	2,558,000	11,130,000
Oct.	10,852,000	455,000	2,197,000
Nov.	1,297,000	755,000	5,431,000
Dec.	832,000	522,000	3,763,000
Yr.	35,664,000	30,850,000	46,460,249

RYE MARKETS.

MILWAUKEE.—Demand for rye was good in the Milwaukee market last week, but receipts were light. Practically all the operators were seeking grain for shipping purposes. Offerings were chiefly offgrade with high moisture content and discounts were liberal. Considerable Wisconsin sold on a forward shipping basis. Dry was scarce and wanted. For the week prices closed 5c higher and receipts were five cars as compared with eight the preceding week and eleven in 1924. Market closed at \$1.19½@1.20½ for No. 2, inside for Wisconsin, ranging at 3@4c under May price.

MINNEAPOLIS.—There was not much of anything to be said for the local cash rye market this week except that the customary slow demand for poor stuff was present, with mills taking only the choice quality. The latter interests were beginning to show interest in elevator offerings of good rye this week, which was about the most encouraging occurrence in the rye market for some time past. Today's sales were made in a range of 1@4c over May for the No. 1 and 1c under at 3½c over for the No.

2. Local stocks total 1,024,246 bus. vs. 1,112,490 a week ago and 7,968,671 a year ago.

DULUTH.—Operators in the rye market were furnished valid excuses for heart failure during the last week. As was the case in wheat prices covered a wide range, but as a result of fresh export inquiries good recoveries were made from the low spots set. Receipts were light. Closing spot prices were 3½c up at \$1.17½.

NEW YORK.—The export trade in rye during the week was featured by the heavy buying in Russia and Germany. Total transactions were estimated around five to six million bushels, the bulk of which is believed to be for Russia. Scandinavia also bought some lots, amounting to around ½ million bushels.

CHICAGO—Reports from New York are that brokers there have been buying rye and rye flour since the middle of February for Russia. Close estimates of the aggregate tonnage of rye and rye flour thus taken out of the Atlantic range markets are not easily obtainable, with some unfilled requirements still outstanding, but specialists in the rye trade state that the total thus far arranged for Russian consumption is not less than 300,000 quarters, or about 60,000 tons.

Market closed ½c lower to ¾c higher for futures and no sales of car lots reported. Trade was moderately large and the market fairly active. There was a good class of buying by cash and commission houses, suggesting further liberal export business. Seaboard reported that 1,500,000 bu. had been taken for export since late yesterday. Offerings were light and scattered. Car lots were in fair demand at 2½c under May for No. 2. Offerings light. Local inspection, none. Seaboard clearances, 35,000 bu.

Beans and Potatoes

STOCKS LOW.

EDEN, MICH. — Bean stocks are very low in this section. Demand is very light. It looks now as if a normal acreage would be planted this season as farmers seem satisfied with returns from last year's bean crop.—C. A. Davis.

BEAN CROP SHORT.

PENN YAN, N. Y.—The beans principally raised in this locality are red kidneys. There are practically none left in the hands of the farmers. The crop was short and a very large portion has been distributed. On account of the high price, there is little prospect of much going for export from this time on; but with the small quantity there is left, even on a domestic basis, we look for higher prices; particularly as canners cannot substitute any other variety.—A. L. Bailey, president.

BEANS AND POTATOES.

Quotations follow for bids of good quality condition beans and potatoes sacked, per cwt., unless otherwise specified, as of week of March 28:

Beans—	
Chicago —	Light, scattered supplies of white and red beans on the market. Quality of same highly satisfactory and they are having a fair movement at steady prices. Per 100 lbs.—Spot navy beans, Mich., fancy, \$6.25; red kidney, fair stock, \$10; large, dark, extra quality, \$10.50.
Boston—	Dry beans—Pea, h.-p., 100 lbs., \$6.75@7; Calif. small white, 100 lbs., \$8@8.25; yelloweyes, h.-p., 100 lbs., \$6.50@7.25; red kidney, h.-p., 100 lbs., \$8.50; lima, dried, cwt., \$14.

San Francisco—Large white, cwt., \$7.25; small white, cwt., \$8.25; pink, cwt., \$8.50; limas, \$15; blackeye, \$10.75; Mexican red, cwt., \$8.75; red kidney, cwt., \$11.25; bayo, cwt., \$8; cranberry, cwt., \$8.50.

New York — Market showed but little change in the leading varieties, trade continuing quiet and feeling generally easy. Pea beans offered freely at \$6.50 and that price reported shaded. Red kidneys held generally at \$10.25, with that price top. White kidneys very slow sale and unchanged. California limas tended to decline, with most business at \$14.50. Black eye peas and splits easy. Domestic, 100 lbs.—Marrow, \$9.75@10; pea, choice, hand picked, \$6.35@6.50; pea, screened and prime, \$6@6.25; red kidney, \$10.25; white kidney, \$9; lima, Cal., \$14.50. Imported, 100 lbs.—Marrow, \$9@9.25; white kidney, \$8.25@8.50. Lima, Mad.—1924-25, \$12.75; 1923-24, \$11.75@12.25; 1922-23, \$9.50. Lima, Europe—Large, \$11.75; medium, \$11.25; small, \$10.50. Lentils—Chile, \$7.25@7.50; Russia, giant, \$8; average, \$6.25@6.50. Peas, domestic, 100 lbs.—Blackeye, \$11; yellow split, \$6.25@6.50; green split, \$7.75@8. Imported, 100 lbs.—Green, Japan, \$6.50@6.75; Holland, \$5.75@6; yellow split, \$5.50@6; green split, \$7.75@8. Chick, Mex.—Imperial, \$12@12.50; monster, \$11@11.50; large, \$9.50@10; small, \$7.50. Chick, Alg.—Large, \$7.50@8.

Potatoes—

Chicago—There was a fair trade and prices were unchanged. Demand was largely to fill urgent orders and the better grades were slightly favored. Buyers were also fairly well disposed toward the ordinary quality, while the poor kinds were slow. Bulk offerings were specially slow to sell. Wis. sacks sold at 90c@91.15 and bulk at 85c@91. Idaho russets sold at \$2.50@2.55. Red Rivers sold at \$1.10@1.20. Bulk, per 100 lbs., Wis., dustys, \$1.10@1.15; ordinary and poor, 80c@1.05; round white, sks., Wisconsin, \$1.05@1.15; ordinary and poor, 90c@91. Idaho russets, \$2.25@2.50; Ohio, Red Rivers, \$1@1.15. New potatoes—Are increasing; demand is fair. Barrels, Florida. Spaulding Rose, \$10.50; No. 2, \$8.50; No. 3, \$6.50; boxes, \$3.75; old, boxes, Idaho, repacked, \$2.25@2.50. Sweet potatoes—Arrivals moderate; fair demand noted. Bushels, Illinois, Jerseys, \$2.50; Illinois, Nancy Halls, \$2.25; soft and poor, \$1.50; hampers, Tenn., Nancy Halls, \$2.50@2.75; Illinois, \$2.25@2.50; Jerseys, eastern, kiln dried, \$3.25; ordinary, \$2.50@2.75; Illinois, Jersey, large hampers, \$2.50; do, small hampers, \$2; Delaware, \$3.

New York—Receipts yesterday included at Pennsylvania Railroad pier 29, 3 cars Florida barrel and 1 car Virginia barrel potatoes, 1 car Delaware basket yams. New Potatoes, Fla., bbl.—No. 1, \$10@12; No. 2, best, \$6.25@7.50; No. 3, \$2@3.50. Bermuda, bbl.—No. 1, \$15@16; No. 2, \$12@13.50; No. 3, \$6@7.50; Cuba, crate, \$3@3.25. Old Potatoes, Me., bulk—180 lbs., \$1.90@2.40; carlots, cwt., \$1.10@1.20; 165-lb. sk., \$1.80@2.25; 150-lb. sk., \$1.65@2. State, bulk—180-lb. sk., \$1.85@2.10; 165-lb. sk., \$1.75@1.90; 150-lb. sk., \$1.50@1.75. L. I., bulk—180 lbs., \$3.10@3.40; 165 lbs., \$3.10@3.25; 150-lb. sk., \$1.50@3.15; 3-bu. sks., \$2.40@2.50; Jy., bsk., \$1@1.50. Bermuda, bbl.—No. 1, \$14; No. 2, \$10@11; No. 3, \$6. Virginia, bbl.—No. 1, \$3.50@4; No. 2, \$2.50@2.75. Sweet Potatoes—Jy., bsk., 75c@8.25; Del. and Md., bsk., 75c@8.50. Yame—Del., bsk., \$1.75; Ga., bbl., \$3.75@4.

CANADIAN GRAIN IN U. S.

The following table exhibits the quantities of bonded grain in the United States reported last week compared with previous week and one year ago:

	Mar. 28, 1925.	Mar. 21, 1925.	Mar. 29, 1924.
Wheat	7,749,000	9,699,000	9,176,000
Oats	679,000	640,000	1,239,000
Rye	652,000	869,000
Barley	663,000	813,000	172,000

BUCKWHEAT MARKETS.

MILWAUKEE.—Current buckwheat quotations in the Milwaukee market on Saturday, Mar. 28, were: Silver hull, \$2.10@2.15; Japanese, \$2.20@2.25.

MINNEAPOLIS—Japanese, spot, \$2.10; silver hull, spot, \$2; mixed, spot, \$2.

BUFFALO—Nominal quotations at \$2.30.

St. Louis—Quoted at \$2.20 per 100 lbs. nominal.

CHICAGO—Fancy Jap, \$2.25@2.35, and fancy silver hull, \$2.10@2.20, with dirty seed less.

News of the Country Grain Trade

ARKANSAS.

Pine Bluff, Ark.—J. M. Prislowsky has taken over the interest of his partner, Paul M. Lorinc, in the Farmers Cash Feed Store. It will be known as the Farmers Grocery, Feed and Hay Store. Mr. Lorinc will deal in carload lots of hay.

CALIFORNIA.

Newhall, Cal.—The Newhall Feed Store, maintained by Lee Carson and A. B. Thatcher, has moved into larger quarters.

Hynes, Cal.—The Consumers Feed & Fuel Co. of Long Beach, composed of H. L. Frantz, D. E. H. M. and E. M. Sheller, will immediately start the erection of a large warehouse, moving their business here from Long Beach.

CANADA.

Moose Jaw, Sask.—The mill of the International Milling Co. suffered slight damage by fire originating in an elevator leg.

Vancouver, B. C.—A copra and soya bean crushing plant, which will cost close to \$100,000, will be established here which will supply most of the Canadian demand for cattle feed made from copra or beans, which is reported to amount to about 600 tons a month.

COLORADO.

Farmers (Greeley p. o.), Colo.—Moser & Parker will rebuild the brick warehouse which was lost through fire.

FLORIDA.

Clearwater, Fla.—J. C. Craig of Montgomery, Ala., purchased the business of the Clearwater Feed & Supply Co.

IDAHO.

Craigmont, Ida.—C. H. Greve, grain dealer, died at the age of 57.

Hansen, Ida.—Frank Kennedy is succeeded by H. L. Walker as manager of the H. L. W. Farmers Grain & Mfg. Co.

ILLINOIS.

Eureka, Ill.—Joseph Liman, Jr., succeeds B. J. Kaufman, manager of the Farmers Elevator Co., who has resigned.

Mattoon, Ill.—J. S. Ashbrook Co. has added an expert miller, Frank Onion of East St. Louis, as superintendent of the milling department.

Centralla, Ill.—The Rasche Flour & Feed Co. of Carbondale and Zeigler will open a distributing business, handling flour and poultry and stock feeds.

Elkhart, Ill.—Mrs. Sarah A. Havey has purchased from Mrs. Harriet Conover her \$6,000 interest in the Elkhart Elevator, formerly owned jointly by E. B. Conover and James Havey.

Marseilles, Ill.—Wm. T. Kasten, now manager of the Verona Farmers Elevator Co., will succeed O. P. Clark as manager of the Farmers Elevator Co. here, effective some time before June 1.

Springfield, Ill.—Eighteen thousand Illinois manufacturers, through their association, are opposing a bill affecting grain elevators, warehouses and flour mills now pending in the state senate, as the Denver business license, providing for the assessment of millions of dollars annually in license fees.

INDIANA.

Jamestown, Ind.—The Newton Busenbark Elevator Co. has begun the razing of its old flour mill.

Oakland City, Ind.—The Mangrum feed and seed business has been purchased by Raymond C. Kell.

Hobbs, Ind.—The Hobbs Grain Co. contemplates the addition of two stories to their feed shed this summer.

New Waverly, Ind.—The Farmers Elevator Co. has filed certificate for final dissolution. Fire destroyed its plant some time ago.

Lincoln, Ind.—The roof and cupola of the Lincoln Elevator Co. elevator was blown off by the windstorm that swept through Indiana and Illinois.

Owensville, Ind.—Fred Gauntt & Co. is the new name for the dissolved Harmon-Wallace Mfg. Co. which will be operated as an elevator only, having discontinued grinding flour.

IOWA.

Orchard, Ia.—The Farmers Supply Co. will level its elevator.

Center Point, Ia.—L. J. Dennis will put a new roof on his elevator.

Morse, Ia.—The Morse Lumber & Grain Co. will build a new elevator this year.

West Chester, Ia.—H. W. Luers may cover his elevator with galvanized iron.

Melbourne, Ia.—The Melbourne Lumber Co. will put a new roof on its elevator.

Burnside, Ia.—F. E. Norstrum is considering building a new corn crib this year.

Nemaha, Ia.—The Nemaha Farmers Elevator Co. will install new dump and scales.

Industry, Ia.—The Industry Elevator Co. is considering the idea of installing a truck dump.

Auburn, Ia.—The Farmers Elevator has been sold to Wemmott Bros. who will operate same.

Williamsburg, Ia.—Harris & Son are figuring on buying a corn cracker for poultry feed.

Humboldt, Ia.—The Farmers Co-op. Ass'n has just installed a new attrition mill for feed grinding.

Taintor, Ia.—The Taintor & Partridge Co-op. Shipping Ass'n will rebuild its elevator to replace one that burned last fall.

Gilman, Ia.—The stockholders of the Farmers Elevator Co. have extended the corporation's charter for another 20 years.

Reasnor (Newton p. o.), Ia.—The Deniston & Partridge Co. will put on new roof and install lightning rods on its elevator.

Durant, Ia.—Fred Denkmann, formerly a partner, has purchased his brother Ed's interest in Denkmann Bros., operating the Durant elevator.

Moulton, Ia.—R. B. Carson is going to tear down his elevator this spring. There has not been a car of grain shipped from this station in 10 years.

Hamburg, Ia.—Good Bros. Seed & Grain Co. are going to build a new elevator this year. They now have elevators at Hamburg, Payne, Percival, McPaul, Bartlett and Riverton, Ia.

Eagle Grove, Ia.—The following directors were elected by the Farmers Co-op. Elevator Co.: Newton Bawn, M. K. Frey, M. D. Braden, W. A. Evans, F. H. Allen, August Kluckholm, Nuel, W. J. Hagie, Florence.

Rake, Ia.—The Lincoln Co-op. Elevator Co. will replace their elevator which was recently destroyed by fire with a 25,000-bu. electrically operated house to be ready May 1. Machinery, which includes a pneumatic dump, has not as yet been purchased.

Pomeroy, Ia.—The T. E. Ibberson Co. will erect a new 30,000-bushel all ironclad elevator for the Farmers Co-op. Elevator Co. The old elevator will be wrecked. A Fairbanks dump scale will be installed in the driveway, fitted with a Strong-Scott dump, 2,500-bushel Richardson automatic scale, a Beryl backstop in the head, Fairbanks enclosed type motors for power and an Ibberson bin alarm.

KANSAS.

Cullison, Kans.—The Dickhut Co. will ironclad their 20,000 bushel elevator here this spring.

Zenda, Kans.—The Zenda Farmers Elevator Co. are repairing their elevator and installing a new dump.

Hutchinson, Kans.—The elevator of the Collingwood-Moore Grain Co. was slightly damaged by windstorm.

Hoyt, Kans.—The contract for the new house to be built for F. W. Hall & Son has been awarded the Federal Engineering Co.

Whiting, Kans.—The Farmers Elevator Co. has installed a new rope drive and a Fairbanks-Morse latest type "Y" Diesel engine.

Salina, Kans.—F. M. Pink, formerly inspector in charge of the Salina state grain inspection office, has been promoted to first assistant chief grain inspector with headquarters in Kansas City. He will assist W. B. Dalton, state grain inspector.

Ford, Kans.—A. F. Roberts will erect a new elevator for the Ford Co-op. Exchange which will be of ironclad frame construction and have 25,000 bushels capacity. Specifications include two 10-h.p. Fairbanks-Morse ballbearing fully enclosed electric motors, a double Kewanee truck dump and a Richardson automatic scale.

KENTUCKY.

Eminence, Ky.—The Eminence Mfg. Co., formerly operated privately by J. C. Dunavent, has been incorporated for \$200,000.

Lexington, Ky.—The J. Cush & Co. grain mill was threatened by fire of unknown origin which damaged \$15,000 worth of property.

Kansas City, Missouri

MICHIGAN.

Elmdale, Mich.—The Produce Co., a Lansing concern, has purchased the Elmsdale elevator.

Tecumseh, Mich.—Wm. Hayden Mfg. Co. is installing a new sifter and reflooring the entire mill.

Grand Rapids, Mich.—A. F. Brown & Sons, Inc., has filed articles of incorporation; capital, \$100,000, \$35,000 subscribed, \$40,000 paid in.

MINNESOTA.

Alpha, Minn.—The Alpha Grain Co. are building new coal sheds.

Amiret, Minn.—The Farmers Elevator Co. will rebuild their elevator.

Wells, Minn.—The Wells Farmers Elevator Co. are painting their elevator.

Clements, Minn.—The Clements Grain & Coal Co. will install new truck dump.

Jackson, Minn.—The Farmers Co-op. Ass'n are building some new coal sheds.

New Ulm, Minn.—The Farmers Elevator Co. are going to build a 60-foot coal shed.

Hanley Falls, Minn.—The Farmers Elevator Co. may install a double leg in their elevator.

Elmore, Minn.—The Farmers Elevator Co. are installing lightning rods and painting the elevator.

Delhi, Minn.—The Farmers Grain & Fuel Co. are putting in a new foundation, legs and dump scales.

Raymond, Minn.—The Raymond Farmers Elevator Co. are giving their elevator a general repairing.

Simpson, Minn.—The L. D. Harris and the Farmers Elevator Co. elevators are under lease by Lietz Bros.

Brown Valley, Minn.—Wm. H. Jensen is considering a truck dump, scale and general repairs on his elevator.

Hadley, Minn.—The Hadley Farmers Elevator Co. are changing from chain to belt drive and are painting elevator.

Brownston, Minn.—The Farmers Co-op. Elevator Co. are installing truck dump and adding three bins to their elevator.

Montevideo, Minn.—The Montevideo Co-operative Elevator & Trading Co. are contemplating installing a new grain cleaner.

Echols, Minn.—The Echols Farmers Elevator Co., R. W. Somers, manager, reports that they will install a new gasoline engine and truck dump.

Blue Earth, Minn.—A new Howe scale and Strong-Scott dump with new sled attachment will be installed in the Farmers Elevator Co. elevator.

Barium, Minn.—The Farmers Co-op. Co. will repair its elevator this summer and install a corn cracker and cleaner to manufacture cleaned corn.

Vesta, Minn.—A new Strong-Scott dump will be installed in the Vesta Grain & Fuel Co. elevator by T. E. Ibberson Co., who will also make other changes.

Belgrade, Minn.—Clifford Lybeck succeeds Jim Butkofski as manager of the Merchants & Farmers Elevator following resignation of Mr. Butkofski because of failing health.

DeGraff, Minn.—On March 24, the Cargill elevator was completely destroyed by fire with a loss of grain estimated at 25,000 bushels. The conflagration started in the pit and shot upward through the shaft.

Sleepy Eye, Minn.—Two Howe 10-ton scales and two Strong-Scott dumps are included in the new Edw. F. Berkner elevator which is now in operation. Power

is furnished by Fairbanks enclosed ball-bearing type motors. The elevator has six legs.

Hancock, Minn.—T. E. Ibberson Co. has the contract for the erection of a new 30,000-bushel elevator for W. L. Johnson. It will have two legs, motor power, Howe scales with Strong-Scott dump in driveway and a 2,000-bushel Richardson automatic scale.

MISSOURI.

Dexter, Mo.—The Sikes-McMullin Grain Co. elevator was damaged by windstorm.

Mendon, Mo.—C. O. White, formerly manager of the Farmers Grain & Supply Co., whose elevator he purchased, is operating personally under the name of C. O. White. He will improve and increase the capacity of the plant.

Hunnell, Mo.—The stockholders of the Hunnell Farmers Elevator Co. at their annual meeting re-elected the following directors: Joseph Fry, Omer Jones, S. R. Orr, C. A. McClintic, Andrew Easdale, F. M. Davis and J. C. Moss. The report of A. L. Vaughn showed business during 1924 amounted to \$240,291.83.

Mexico, Mo.—The Producers Grain Co., closed on March 1 because of financial difficulties, will be reorganized, refinanced and open for business about April 1. Approximately \$12,000 has been raised which will be used to pay off the debts and more money will be needed for capital. Those interested in the reorganization are Jim Crawford, Clarence Berry, Dwight Carpenter and the members of the board of directors: J. J. Bexner, W. A. Shrout, Reed Burke, Charles Pease, N. F. Moore, J. A. Botts and C. H. Shoup.

MONTANA.

Kalispell, Mont.—Phil Bruyer and Mrs. Helen Berry have formed a partnership and leased the B. F. Berry elevator, which they will operate as the B. & B. Elevator, conducting a grain, milling and feed business.

Forsyth, Mont.—Gale D. Whitney has acquired an interest in the Yellowstone Elevator Co. which operates here, at Ingoman, Sumatra and near Colstrip. A. R. Thurston will continue as head.

NEBRASKA.

Waco, Neb.—J. M. Hart has taken over the Shannon Grain Co.

Nora, Neb.—The Farmers Union Ass'n are adding a 10-h.p. motor.

Gilead, Neb.—The Gilead Grain Co. installed new legs at the elevator.

Friend, Neb.—The Acme Mill & Elevator Co. will install new truck dump.

Brock, Neb.—The J. E. Clark Grain Co. will cover its elevator with galvanized iron.

Loup City, Neb.—E. G. Taylor Grain Co. are reshingling and painting their elevator.

Muscot, Neb.—J. M. Grace & Co. will possibly remodel their elevator this year.

Trenton, Neb.—A new elevator was just completed here and is owned and operated by Krotter & Wellett.

Exeter, Neb.—The Exeter Elevator Co. will overhaul and repair the two elevators owned by the company.

Bradshaw, Neb.—The Gilbert Grain Co. elevator was sold to P. F. Stenberg who takes possession May 5.

Merna, Neb.—The Farmers Grain & Supply Co. are installing new hopper scale and repairing the elevator in general.

Doniphan, Neb.—The stockholders of the Doniphan Grain Co. have elected the following directors: T. S. Hackler, C. M. Carlson and R. L. Marsh. The following offi-

Glenville, Nebr.—The Farmers Grain,
Coal and Live Stock Co. are installing a
Hall distributor and will build a warehouse.

Lexington, Nebr.—The Nielson elevator is
now owned by the Lexington Mill & Ele-
vator Co. who will use it for corn and oats
exclusively.

Lexington, Nebr.—The Lexington Mill &
Elevator Co. has installed a new automatic
scale of 10 bus. capacity and a new 10-ton
Fairbanks truck scale.

Diller, Nebr.—The Shea Equity Ex-
change, I. R. Andrews manager, reports
that they are installing a new elevator leg,
boot, head, belts and cups.

Lincoln, Nebr.—A petition in the federal
court was filed by twelve Polk county
farmers asking that the Farmers Grain &
Stock Co. of Polk be declared bankrupt.

NEW YORK.

Holley, N. Y.—Fire totally destroyed the
warehouse of Henry Harrison Co., Inc.

NORTH DAKOTA.

Walhalla, N. D.—Lee & Son have in-
stalled a Strong-Scott air dump, also a
10-ton Howe scale.

Grand Forks, N. D.—T. A. Swigum has
been appointed sales manager of the state
mill and elevator by Governor A. G. Sorlie,
succeeding C. H. Van Vorhes.

Drayton, N. D.—The Andrews Grain Co.
elevator was purchased by the board of di-
rectors of the Farmers Interstate Elevator
Co. for \$6,500. Manager Blackseth will
commence buying grain at once.

Bismarck, N. D.—The following officers
were elected by the Farmers Grain Deal-
ers' Ass'n: R. F. Gunkelman, Fargo, presi-
dent; S. A. Garber, Fortuna, vice-presi-
dent; and P. A. Lee, Grand Forks, sec-
retary.

OHIO.

Utica, O.—Fire caused by lightning de-
stroyed the elevator and feed warehouse of
Geo. Branstool. Loss covered by insurance.

Edgerton, O.—The Edgerton Elevator Co.
has installed a McMillin wagon and truck
dump and is enlarging its office and adding
two bins.

Monroeville, O.—Fire destroyed the grain
elevator and storehouse of J. P. Easton,
causing a loss in stocks and buildings esti-
mated at \$100,000 with \$87,000 insurance.

OKLAHOMA.

Nowata, Okla.—The Whitford Grain Co.
will repair their elevator and change to
electric power in June.

Oklahoma City, Okla.—The Oklahoma
City Mill & Elevator Co. has placed con-
tract for additional equipment.

Minco, Okla.—E. C. Wegener Grain Co.
has built a new feed and flour house, a
new cob house, and installed a Kewanee
truck lift, a 25-h.p. Fairbanks Morse motor
and Jay Bee mill.

Oklahoma City, Okla.—The Hardeman-
King Co. has increased its capital stock
from \$150,000 to \$200,000 to deal in grain,
feed and flour. Incorporators: T. B. C.
T., and R. B. Hardeman.

OREGON.

Portland, Ore.—A dust explosion in the
Kerr, Gifford & Co., Inc., warehouse re-
sulted in a small loss.

SOUTH DAKOTA.

Crocker, S. D.—The Farmers Elevator Co.
is painting its elevator.

Lane, S. D.—The Lane Farmers Co. will
put lightning rod on their elevator.

Astoria, S. D.—The Astoria Farmers Ele-
vator Co. will install two air lift dumps.

Lake Preston, S. D.—The Co-operative
Elevator Co. will install a new truck dump.

Wallace, S. D.—The Wallace Farmers
Elevator Co. are installing a new truck
dump.

Warner, S. D.—The Warner Co-op.
Elev. Co. will install new scale and dump
for trucks.

Big Stone City, S. D.—Gold & Co.'s eleva-
tor which burned some time ago will not
be rebuilt.

Redfield, S. D.—Elmer Heitman states
that a new truck dump will be installed in
his elevator.

Selby, S. D.—The Selby Equity Union
Exchange is installing new truck dump,
scale and pan.

Dallas, S. D.—The Farmers Co-op. Ass'n
is going to put galvanized iron sides and
roof on elevator.

Crocker, S. D.—The Great Western Grain
Co. will install a new truck dump and scale
and have general repairs made to the
elevator.

Kampeska, S. D.—The Farmers Elevator
Co., Jake Jerde, manager, reports that it
will install a new truck dump and build a
new coal shed this spring.

Rockham, S. D.—A new truck dump will
be installed in the Atlas elevator by T. E.
Ibberson Co. here and at Hitchcock, Clark,
Frankfort, Raymond and Cavour.

Turton, S. D.—The Farmers Elevator Co.,
H. O. Ewing, manager, states that it will
install a new leg, dump scales and change
from gasoline power to electric power.

Redfield, S. D.—A new 10-ton Howe scale
equipped with a Strong-Scott dump will be
installed in the elevator of H. W. Speight
by T. E. Ibberson Co. The elevator will
also be painted.

TENNESSEE.

Nashville, Tenn.—John A. Tyner & Son
will rebuild their elevator and warehouse,
known as the River & Rail Whse. & Ele-
vator Co., which burned recently. The
warehouse floor space accommodated 100-
000 bushels of sacked grain and the ca-
pacity of the elevator was 50,000 bushels.

TEXAS.

Longview, Tex.—The D. R. Richardson
Grain Co. has added considerable floor
space.

Plainview, Tex.—Jeffus & Deloach Grain
Co. is decreasing capital from \$10,000 to
\$5,000.

Amarillo, Tex.—The Panhandle Grain
Dealers Ass'n will hold a convention here
on May 18th.

McKinney, Tex.—The Collin County Mill
& Elevator Co.'s plant will be enlarged
by a new 75x125 ft. brick veneer ware-
house.

Amarillo, Tex.—Members of the Ameri-
can Grain Exchange met recently for the
purpose of incorporating into a non-profit
sharing organization. H. L. Kearns was
elected president; Lester Stone, vice-presi-
dent; J. N. Beasley, secretary-treasurer.

WASHINGTON.

Hartline, Wash.—Mr. Bens, representing
the Seattle Grain Co. here, has been suc-
ceeded by John Cohager.

Pullman, Wash.—Equipment is being in-
stalled by the Kelley-Hughes Grain Co. for
sampling and testing grain.

Seattle, Wash.—Petition for bankruptcy
has been filed by Frank S. Warner, feed
and hay broker, with liabilities listed at
\$3,290 and assets \$1,865.

Spokane, Wash.—L. R. Davis, grain deal-
er of St. John, has been appointed chief
deputy grain inspector for this district under
the Dept. of Agriculture, following the
resignation of T. W. Amos.

Endicott, Wash.—C. W. McFarland, pro-
prietor of the Colfax Grain & Feed Co., and
his son L. W. McFarland, have engaged in
the grocery business here and will also
deal in a full line of mill feed.

LIGHTNING Strikes Elevators

Shinn-Flat Lightning Rods are particularly adapt-
ed to protect Grain Elevators. Cable is braided in
Flat form, providing for expansion and contraction
when elevators are loaded or empty. Your liberal dis-
count on fire insurance warrants this investment.

Shinn-Flat

Stops Lightning Losses

We Specialize

experts familiar with good, permanent work.

Shall we equip YOUR elevator when in your dis-
trict? Write us.

W. C. SHINN MFG. COMPANY

156 Whiting Street, Chicago, Illinois

Olympia, Wash.—The Department of Pub-
lic Works has entered a new complaint
against the Pacific Coast Elevator Co. in
an attempt to collect interest on refunds
for excess warehouse charges due.

WISCONSIN.

Menomonee Falls, Wis.—F. W. Schunk
will discontinue the business of the Me-
nomonee Falls Grain & Supply Co., which
he recently purchased.

Hillsboro, Wis.—Two tons of medium red
clover seed was stolen from the warehouse
of The Vernon County Mfg. Co. The seed
was valued at \$1,500.

FAMINE REDUCES RUSSIAN EXPORTS.

Official soviet trade delegations of
Russia report that arrivals of Russian
grain in Reval and Riga, which a month
ago amounted to 2,000 tons daily, have
now decreased to 100 tons daily. The
soviet government at present faces the
possibility of being unable to export the
2,500,000 tons which M. Krassin has
been promising the European market,
since Russia will have barely enough
grain to feed the population this com-
ing winter.

NATIONAL GRANGE ON CROP PRODUCTION.

"Producing crops in accordance with
the consumption demands of the nation
is the only way in which to place the
agricultural industry upon a sound busi-
ness basis," was declared to be the policy
of the National Grange in convention at
Atlantic City, N. J. Louis J. Taber, mas-
ter of the Grange, spoke in favor of the
McNary-Haugen bill.

FRENCH BREAD PRICE DOWN.

"Excelsior" gives a prominent opera-
tor in the cereal market as authority
for the statement that the price of
bread in France, which now is at the
record peak, though still lower than
that in any other country, is about to
drop, and drop fast.

Consequently, according to this

authority, there will be no need to apply
the special measures voted by the Cham-
ber of Deputies and now pending before
the Senate, and if the value of the franc
increases little by little France will
eventually get full wheat supply at a
lower price than any other country in
the world.

OATS IN PRIMARY MARKETS.

Receipts of oats last week at 14 pri-
mary markets, compared with the cor-
responding week last year and also for
the period beginning Aug. 1 to Mar. 28
(final 000 omitted):

MILWAUKEE SEEDS.

Movement of timothy seed and clover seed at Milwaukee as reported for THE PRICE CURRENT-GRAIN REPORTER by H. A. Plumb, secretary of the Chamber of Commerce, for week ending Mar. 28, 1925:

	Receipts, lbs.		Shipments, lbs.	
	Tim.	Clov.	Tim.	Clov.
1925.....	95,640	73,070	87,512	105,310
1924.....	274,700	44,200	222,600	235,144

TOLEDO SEED PRICES.

The following table shows the range of prices for seed on the Toledo market for cash and the futures of clover, alsike and timothy for the week ending Mar. 28:

	Range for wk.		Close	
	High.	Low.	Mar. 21.	Mar. 14.
Clover—				
Cash	\$17.00	\$16.50	\$16.50	\$17.00
March	17.00	16.50	16.50	17.00
Oct.	13.50	13.50	13.25	13.50
Alsike—				
Cash	14.00	13.75	14.00	13.75
March	14.00	13.75	14.00	13.75
Aug.	12.00	12.00	12.00	12.00
Timothy—				
Cash	2.90	2.80	2.80	2.90
March	2.90	2.80	2.80	2.90
May	3.00	2.90	2.90	3.00
Sept.	3.30	3.20	3.25	3.30

CHICAGO SEED MOVEMENT.

Following is a statement of receipts and shipments of grass seeds at Chicago for the week ending Mar. 28, previous week, same week of 1924 and for the season to date, starting July 1 of the years indicated (amounts stated in pounds, 000 omitted):

	Timothy.		Clover.		Other.	
	Rcts.	Shpts.	Rcts.	Shpts.	Rcts.	Shpts.
Week ...	245	417	311	315	78	212
Prev. wk.	453	638	136	103	422	133
1924	332	841	455	350	334	658
1924-25	33,617	23,847	9,684	4,903	15,001	15,152
1923-24	29,983	17,307	9,039	6,386	21,476	11,339
1922-23	29,967	27,243	9,622	7,738	22,173	5,788

Timothy—Offerings of country seed increasing. Buyers submitting steady bids and some business pending. Weather favorable for seeding in some

Field and Grass Seeds

sections. Good country inquiry. Fair country run \$5.25@5.50 per 100 lbs., good country run about \$5.70@5.80, high grades \$5.85@5.90, choice \$6.00 and fancy at \$6.25@6.50.

Alfalfa Seed—Firm. Recleaned country lots \$21.00@22.00 per 10 lbs.

Clover Seed—Unchanged. Demand light. Country lots \$20.00@22.75 for 100 lbs., good \$23.50@24.50, choice \$25.00@26.00, fancy \$27.00@28.00 and Mammoth \$23.00@28.50, according to quality.

Flax Seed—Weak. No. 1 Northwest-ern closed at \$2.81½@2.83½ nominal.

Alsike—Good demand and prices firm. Fair country lots \$14.50@15.50 per 100 lbs. Good seed \$16.00@17.50, choice \$18.50@19.50 and fancy at \$20.00@21.50.

ent buyers. Millet seed is not plentiful. Though the demand is restricted by high prices, the market holds steady. Dealers are asking \$4@5 per cwt. for German; \$3@3.50 for common; \$2.75@3.25 for Siberian, and \$2.50@3 for the hog variety. No shortage of Sudan seed is in sight. The country still has some to market. Kansas City houses are offering to sell recleaned seed at \$5@6.50 per cwt.

Trade in cow peas and soybeans has not fairly started. Dealers say the country has not sold freely at any time on the last crop. Cow peas are quoted in a distributing way at \$4@5 per bus. Soy beans are held at \$2 to \$3.50, according to variety.

Grain sorghum acreage in Texas may be increased 20 per cent this year, according to reports received by the Department of Agriculture. In Oklahoma the increase may be 6 per cent. It is probable that increase of 10 to 20 per cent will be shown in Colorado, New Mexico and Arizona. No forecast is made as to the Kansas acreage.

SEED RECEIPTS AT TOLEDO.

Following is a statement of seed receipts and shipments at Toledo in bags for week ending Mar. 28 and season to date and comparisons, also stocks, etc., as compiled by C. A. King & Co.:

	Receipts.		Shipments.

ST. LOUIS SEED MARKET.

Quote Timothy—Average country seed at \$5.50 to \$5.60 (bright clean seed worth more); low-grade, weedy and dark at \$2 to \$4.50; clover—fairly clean to high grade clean seed at \$23 to \$25; heavily to slightly weedy lots at \$38 to \$20—screenings and tailings less; alsike at \$15 to \$20; alfalfa at \$16 to \$20; red-top at \$11.50 to \$11.80 for clean seed—chaff at \$2 to \$10; German millet at \$4; white wonder at \$3.50; hog millet at \$2.05 bulk basis.

Stock Peas—Quote whippoorwill at \$3.60 to \$4 and new era and mixed at \$3.25 to \$3.30 per bu. on basis of latest sales.

Sorghum Cane Seed—Last sale black amber at \$1.55 per 100 lbs.

KANSAS CITY SEED MARKET.

KANSAS CITY, March 28. As buyers' needs of grass seeds were filled some time ago, there is a light demand for blue grass, clover and timothy, but the season is very favorable for sowing and this is causing a fair run of "filling-in" business. Alfalfa has a good tone, as this seed, like red and sweet clover and alsike, is being planted with oats for soil improving purposes. Timothy is the slowest of the grass seeds. It is plentiful and cheap. Wholesale prices are little changed from those of a week ago, as follows, per cwt., sacked: Blue grass, \$17@28; timothy, \$5.50@7; red clover, \$25@34; sweet clover, \$10@14; alsike, \$17@22; alfalfa, \$16@22.50.

Dullness and weakness continue to feature the market for cane seed, as receipts are still coming freely, even surprising some of the most experienced handlers. It is evident that country holders have realized that no bull market is possible this year, and they are unloading. Prices of low grades in the open market are as low as \$1.20 per cwt., but general quotations are: Red top, \$1.25@1.35; orange, \$1.25@1.35; black amber, \$1.15@1.30. Recleaned seed in the wholesale market is held at about 50 cents over these prices. Sowing demand southward and southeastward is moderate and feed-mixers are indiffer-

WEEKLY LINSEED REVIEW.

NEW YORK, March 30.—United Kingdom: The linseed situation in the United Kingdom during the past week was weak with freer offerings of Indian seed, but crushers displayed no disposition to purchase. Some private estimates make the Indian crop of seed larger, and exporters' supplies now greater than last year.

Linseed oil was generally depressed, but this article appeared to be meeting with a better consumptive demand at the decline.

Cotton oil remains quiet and generally inactive.

India: Shipments of linseed during the past week amounted to 256,000 bushels compared with 172,000 bushels the week previous.

Argentina: Clearances of linseed from this country continue small, being less than ½ million bushels weekly. Port stocks have also decreased and are now much below average. Port stocks now amount to about 3¼ million bushels compared with almost 6½ million bushels at this time a year ago. The new crop of linseed has not turned out as well as the Government estimated. Markets were generally depressed most of the week, but closed slightly steadier at the decline.

DULUTH FLAXSEED MARKET.

DULUTH, MINN., March 28.—After holding steady up till Friday in the face of unsettlement in the general market, flaxseed prices receded sharply. The outpouring of selling orders on Friday found no buying power to absorb them, and prices fell over 10 cents during the session. On the net result of the six days' operations, spot seed dropped 5¢ @8¢ cents and in the other futures declines of 7¢@9 cents were registered.

Receipts of seed from the country were negligible, amounting to only 24,893 bushels and with shipments of 35,850 bushels, stocks remaining in elevators were 421,000 bushels.

Traders generally were inclined to play a waiting game in order to allow the marketing, and the linseed oil market situations to unfold. Some of the authorities in the market were inclined to chirp up a bit pointing to the heavy falling off in the movement of Argentine seed to this country as compared with a year ago. It was noted that shipments from down there this way were only a bagatelle last week and that the amount of seed on passage this way is now comparatively moderate. That development is leading to the assumption that Eastern crushers will depend to a greater extent upon domestic supplies during the next few weeks.

KNICKERBOCKER

"MADE-RIGHT"

Sample Cases, Bags, Portfolios, etc., for cereals, seeds, feeds, package goods—anything—everything.

Vial cases in varying sizes for fine products.

Cases with plain cardboard, aluminum or transparent top boxes for grains, mixed feeds, seeds, cereals, etc.

Cabin bags, combination bag portfolio, portfolio sample cases.

"Let's do some trading together"

than had been thought likely up till recently.

Dealers have been drawing attention with some satisfaction to the gradual melting away of supplies carried in elevators here, the aggregate dropping nearly 600,000 bushels from their total shortly after the close of navigation. In that connection holders reported that they have orders standing for nearby shipment that will account for a large proportion of the seed now in store here. It is claimed furthermore that a portion of the Canadian seed in store at Fort William and in interior elevators over their West may be shipped to Liverpool as their prices are now close to a competitive basis with Buenos Aires. Specialists in the market now figure that only a small amount of flaxseed over seed requirements remains in growers' hands through the Northwest. A recent government forecast placing the acreage likely to be seeded to flax this spring has attracted attention. Dealers however regard that estimate as premature, as they contend that the outcome will depend upon general conditions and the acreage left over after the completion of other seeding operations.

Closing prices of flaxseed on the Duluth market on Saturday as compared with the previous Saturday and the same period last year were:

BANKERS BUY CAR ALFALFA SEED.

That the alfalfa acreage in the vicinity of Thief River Falls, Minn., will be increased this spring is a certainty, the carload of 30,000 pounds of certified Grimm alfalfa seed purchased by bankers of Pennington and eastern Marshall counties for distribution among farmers having arrived. The seed was shipped from Blackfoot, Ida., and was purchased from the Idaho Grimm Alfalfa Seed Growers' Association. A number of farmers were on hand to receive their allotment when the car arrived, while the greater proportion will be distributed through the banks. The

Feedstuffs

Emil Steer is erecting a new feed
mill at Green, Ia., that will have a ca-
pacity of five tons of feed per hour.

The Hinshaw Grain Co. has added a
new 50-h.p. attrition mill, new grinding
bins, elevators and conveyors, Fair-
banks Truck Scales, wagon hoist, and a
new office.

An up-to-date feed grinding plant will
be installed by G. W. Potts who has
leased the elevator formerly operated by
the United States Elevator Co. at Ab-
sarokey, Mont.

last few thousand tons of the season's
crush in Texas.

The drought is gaining serious pro-
portions in Texas and all adjoining
states. Rain in two or three weeks
would save some of the grain, but the
acreage is very short and as a rule
stands are poor.

These conditions will cause an enor-
mous acreage increase to be planted to
cotton.—C. A. Meroney.

OIL MEAL MARKET.

There has been no change in the oil
meal market. Demand has been fairly
good for this season of the year, buyers
taking on only one and two carlots as
they need it, but the mills operating in
Chicago have sold a large proportion of
their April production that there is no
urgency on the part of crushers to sell.
It is, in fact, difficult to get rush ship-
ment on either fine ground or peasize
meal, in fact peasize shipments are in
many cases running from ten days to
two weeks late.

While the Minneapolis market is rela-
tively steady the conditions up there
are not quite as tight as they are in
Chicago. However, Buffalo and coastal
mills seem to have a fair amount of
stuff to offer and there is a little more
pressure in the Eastern markets. It is
our feeling that oil meal is pretty well
pegged at current prices for some little
time.—The Bertley Bulletin, Chicago,
March 28.

SALT ESSENTIAL

"Salt to suit" is one of the most com-
mon phrases used in food recipes. Were
the world deprived of good salt for a
month the result in loss of health, vigor
and temperament would soon be evi-
dent, both in the human and animal
kingdoms. Because salt is so cheap
and so ordinary in everyday life we
often forget its importance. But when
such vital things as water, air and salt
are taken away all other plant and an-
imal foods remaining would not serve
their purposes so well.

Feeders have simply regarded salt as
an appetizer—something to make live
stock drink more water or cause it to
consume unpalatable rations. Recent-
ly, however, salt is becoming recognized
for what it contributes to nutrition, di-
gestion and production. In the stomach
it causes the formation of hydrochloric
acid—an indispensable factor to food
digestion. Salt is a mineral food, and
the basis of some of the best known
mineral feeds and compounds. In choos-
ing salt for feeding purposes it is well
to use discretion and foresight, because
cheap, lumpy, dirty salt is as subject to
criticism as inferior feeds of any kind.

Live stock use salt in varying
amounts, differing in their demands ac-
cording to body weight, condition, pro-
duction and species. A dairy cow will
use about one and one-quarter ounces a
day. Yearlings and two-year-old beef
steers may lick an ounce daily of good
salt. Hogs need much less salt, prob-
ably a quarter to a third of an ounce
daily. An ounce of salt is fair allotment
for working horses. A half ounce daily
is a fair index of salt requirements
for sheep, but sheep will not lick block
salt like cattle. Mixing a pound of high-
grade salt with every 100 pounds of
dry grain feed is a good plan to make
sure that animals are not deprived of
this essential.

CORN FEEDS.

The recent price situation in corn by-
products, giving such feed ingredients a
distinct advantage in comparison with
straight corn justifies a further re-
minder to our trade of the following of-
ficial description of certain by-products
as defined by the Association of Feed
Control officials at their October, 1924,

meeting. Starch corn oil cake is the product obtained in the wet milling process of the manufacture of corn starch, corn syrup and other corn products. Corn oil meal is ground corn oil cake. Corn germ meal is the corn germ and other parts of the corn kernel obtained in the dry milling process of the manufacture of corn meal, corn grits, hominy feed and other corn products. Corn germ meal is ground corn germ cake.

NEW YORK OATS MARKET.

Oats receipts 250,000 bushels bonded, 86,000 bushels domestic. Values were more or less affected by the declines of other grains, though the net decline was small. Light receipts at the principal primary markets resulted in a further advance in premiums and the present movement should insure further liberal weekly decreases in the visible supply. There were occasional sales of Canadian oats for export, but bids for American oats remained below a working basis. Distributors report only a very light business in the Eastern territory, while spot sales were in small volume, dealers supplying their needs mainly with Duluth 36-lb. 3 white oats, now at Buffalo, at prices considerably below those current for all-rail oats in the local market.—L. W. Forbell & Co.

THE FEED MARKETS.

BOSTON.
Boston, Mar. 28.—Millfeed: Prompt shipment, per ton: Spring bran, \$29@29.50; winter bran, \$30@31; middlings, \$29.50@35; mixed feed, \$33@39.50; red dog, \$46; gluten feed, \$40.95; gluten meal, \$48.70; hominy feed, \$41.50; stock feed, \$44; oat hulls, re-ground, \$15; cottonseed meal, \$43.50@48; linseed meal, \$44@44.50.
Oats—All rail, fancy, 40 lbs., 61@62c; fancy, 38 lbs., 59@60c; regular, 38 lbs., 58@59c; regular, 35 lbs., 57@58c; regular, 34 lbs., 56@57c.

MILWAUKEE.
Milwaukee, Mar. 28.—Millfeed quotations closed unchanged for the week in the Milwaukee market, but all operators were reported to be offering concessions to move stocks and the tendency was decidedly downward. Predictions were the market would start falling during the present week and continue in decline for some time. Some of the farmers are reported to have out their cattle out in the pasture and all are reported to still have large stocks of hay on hand. Quotations on Saturday, March 28, were: Winter bran, \$26.20@26.70; spring bran, \$25.50; standard middlings, \$25.50@26; flour middlings, \$30.50@31.50; red dog, \$37.50@38.50; rye feed, \$26@26.50; linseed oil meal, \$42@42.50; cottonseed meal, \$38.50@43.50; hominy feed, \$37@38; oat feed, \$36@37; gluten feed, 30 days, \$33.80; in 100-lb. sacks, carlots, f. o. b. Milwaukee.

CINCINNATI.
Cincinnati, March 28.—There was little improvement in the demand for mill feeds and declines of 50c@1 per ton were reported for all brands, with middlings barely steady and tending lower. Little increase was reported in the production as the demand for flour was slower, but mills generally reported ample supplies of all by-products. Quotations represent 100-lb. sacks: Soft winter wheat bran, \$29.50@30; hard winter wheat bran, \$29@29.50; spring wheat bran, \$29@29.50; standard middlings, \$29.50@30; soft wheat middlings, \$35@35.50; gray hard middlings, \$35@35.50; mixed feed, \$33@33.50; No. 1 alfalfa meal, \$29; hominy feed, \$37@37.50.

BALTIMORE.
Baltimore, Mar. 28.—Prices on wheat feeds continue in buyers' favor, due to the fact that the supply is in excess of present trade wants, and the demand is only of a limited jobbing character. Hominy feed is about unchanged from last week's range. Gluten feed in ample supply for present limited needs in this line. Alfalfa meal steady, with a fair movement. Dried beet pulp unchanged. Quotations follow: Spring wheat bran, per ton, 100-lb. sacks, \$30@30.50; Western middlings, per ton, 100-lb. sacks, \$30.50@31; hominy feed, per ton, \$45@46; gluten feed, per ton, \$38.50@39; alfalfa meal, per ton, \$30@31; dried beet pulp, per ton, \$37.50@38.

MEMPHIS.
Memphis, Mar. 28.—Millfeed prices are steady to firm, but demand is slack. Wheat bran is quotable at \$28 and gray shorts at \$4.50@35, but business has been very quiet and offerings of many cars would break prices. Cottonseed meal is firmer and of-

ferings not large. Quote 36 per cent at \$34, with 41 per cent at \$36.50 and 43 at \$38.50. Hulls are quiet at \$8 for loose. Alfalfa meal is easier and No. 1 is quoted anywhere from \$26.50@28.

NEW YORK.
New York, Mar. 28.—Weakness featured both city and Western feeds, with prices at the close of the week fully a dollar per ton lower. Despite this reaction there were resale lots offering cheaper here. Consumers are being supplied by contract material bought around \$4 per ton higher.
City bran is quoted at \$28.50, middlings \$29.50 and red dog \$45, while Western bran rules at \$28@28.50, middlings \$29@29.25 and red dog \$45@45.50 per ton.

PHILADELPHIA.
Philadelphia, Mar. 28.—The market for feedstuffs is dull and lower under a light demand and ample supplies which cause more pressure to sell. Quotations are for carlots in 100-lb. sacks at cost per ton: Soft winter bran, \$30.50@31; winter middlings, \$35@36; spring bran, Western shipment, \$27.50@29; standard wheat middlings, W. S., \$29@32; flour middlings, W. S., \$37.50@41; red dog, W. S., \$44@45; low grade flour, W. S., \$50@51; rye middlings, W. S., \$29@30; reground oats feed, \$13@24; fine yellow hominy, W. S., \$39@40; fine white hominy, W. S., \$40@44; cottonseed meal, 36% protein, W. S., \$42@42.50; cottonseed meal, 41% protein, W. S., \$44.50@45.

DULUTH.
Duluth, Mar. 28.—Trade in feeds was slow during the last week, interest being light in every quarter. Jobbers showed a disposition to hold down their buying to a minimum in view of the unsettlement in the grain markets. Millfeeds are unchanged but ground feeds declined from \$1.25@2.50. Closing prices per ton follow: Bran, \$24.50; shorts, \$25.50; Boston mixed, \$25.50; red dog, \$38; flour middlings, \$31; ground oats, \$27.50; No. 1 ground feed, \$35.75; No. 2 ground feed, \$33.75; No. 3 ground feed, \$31.75; cracked corn, \$40; coarse corn meal, \$40.

MINNEAPOLIS.
Minneapolis, Mar. 28.—Today saw the end of what has probably been the slowest and most uneventful week in the local millfeed trade's history. Eastern wants are being supplied from Buffalo at prices so far out of line with Minneapolis figures that there is no apparent relation between them. Nearby territory does not seem interested in their customary mixed car lots that they should be and in consequence both the mills and the jobbing interests have little to report.
The saving grace of the entire situation is the fact that the output is so very low that there is no difficulty placing it. There was some bran bought back last week and the one previous also, but as far as could be learned, nothing of this kind happened this week.
Weekly shipments total 9,744 tons vs. 12,502 last week and 14,127 a year ago.
Asking prices today were as follows: Standard bran, \$23.50; pure bran, \$24; standard middlings, \$23.50; red dog, \$36@40; flour middlings, \$28.50@29; oil meal is quiet at around \$40.

CORN IN PRIMARY MARKETS.

Receipts of corn last week at 14 primary markets, compared with the corresponding week last year and also for the period beginning Nov. 1 to Mar. 28 (final 000 omitted):

	Mar. 28, 1925.	Mar. 29, 1924.	Mar. 28, 1924.	Mar. 29, 1923.

Shipments	2,900	3,332	67,541	88,259

The Italian foodstuffs commissioner, in agreement with manufacturers of flour products and representatives of the various prefects, has decided to reduce the price of the best quality of flour from 242 to 230 lire per 100 pounds, the new price being effective March 26. The second quality of flour will be reduced from 226 to 215 lire per 100 pounds, the price of bread being reduced accordingly. The value of the lire at current exchange rates is about 4.07c.

FEEDSTUFF SITUATION.

The potential condition of the feed market is actually unchanged from the week previous. Feed for immediate shipment is not plentifully offered though apparently sufficient is available to take care of buyers' requirements. Most of the sellers' interest existing is for April-May but buyers are not inclined to purchase other than what they need for their immediate requirements. Buyers admit that feed is cheap comparing relative values for other commodities but unless they have use for it and can turn it over at a profit, there is no incentive in loading up.

MINNEAPOLIS.—Bran, \$23.50; standard middlings, \$23.50; flour middlings, \$29; red dog, \$36 to \$37.

CHICAGO.—Bran, \$26.10; standard middlings, \$26.10; flour middlings, \$31.60; red dog, \$38.60 to \$39.60.

KANSAS CITY.—Bran, \$24; gray shorts, \$28.

ST. LOUIS.—Bran, \$26.40; gray shorts, \$30.40.

ALFALFA MEAL.

Situation unchanged with prices slightly lower. Second-hand bag basis, Choice, \$27; No. 1, \$26; No. 2, \$22.50. Fine ground grades, \$3@4 a ton premium.

REGROUND OAT FEED.—Marking time with a checkered demand. Considerable sellers' interest. Nominally quoted reground, \$7; unground oat hulls, \$8.50.

HOMINY FEED.—The supply is in excess of the demand with radical discounts offered where shipping instructions are necessary. From the west nominally quoted sack basis, white, \$39; yellow, \$37.50. In bulk, where available, \$1.50@2 per ton less.

LINSEED OIL MEAL.—Supply and demand fairly well balanced at the present time. Mills appear to have sufficient shipping instructions to carry them along without forcing sales. Nominally quoted sack basis, Chicago, \$40. In bulk, \$2@2.50 a ton less.

DRIED BUTTERMILK.—Demand is very good and market in good shape. Less than car lot shipments moving very rapidly. Baby chick raisers are buying heavily just now and are expected to absorb the entire production for some weeks. Quotations are as follows:

Creamery in carlots at 6½¢ per lb. and L. C. L. up to 7½¢.

COTTONSEED MEAL.—There has been no change in this market, demand continuing slow and prices are easy. A large cotton crop, but with a present reduction in meal production has given the market a somewhat better tone and a clean-up is looked for before the new crop. Meal is nominally quoted for 43 per cent protein, Chicago basis, at \$42.50.

GLUTEN FEED.—Demand is better, and orders being placed are for immediate shipment. Quotations follow: Gluten feed in bulk \$31 a ton, sacked \$33.80; gluten meal of 40 per cent protein \$41.80 in sacks, \$39 in bulk.

PACKERS' PRODUCTS.—Demand is slackening somewhat but at the lowered prices all packers' products are moving in fair volume. Prices are as follows: Meat scraps in carlots f.o.b. Chicago, \$55@60 a ton; 60 per cent protein digester tankage, \$50; raw bone meal, \$50.

CHARCOAL.—Seasonable demand at a price basis f.o.b. Chicago; Milwaukee carlots, \$33@38 per ton, depending upon size of charcoal. Less than carlots, \$35 @50 per ton, standard units of 50-lb. burlap bags (for the finest grades, paper lined) in 13-ton minimum cars.

CANADA WANTS WHEAT PRICE PEACE.

A special message from Winnipeg to the *New York Journal of Commerce*, says:

"In the most irregular market which the Manitoba wheat trade has suffered from since the establishment of the Grain Exchange here twenty years ago, the general price level of that commodity from March 13 to 18 accomplished more than half of a 60¢ break. It can also be stated on authority that since March 18 there has been some buying by the export crowd of Nos. 2 and 3 Northern wheat to meet shipping requirements. For the preceding two months and more such export trade as

was reported was confined to a little No. 4, more No. 5 and a fair amount of No. 6, with the total of these lower grades far below comparable figures of the season for many years back.

The grain trade faces the hard task of working off a larger visible, counting Canadian stocks on the American side, than anyone expected to see in a selling market which is likely any morning to open up or down from 3¢ to 7¢, and a Liverpool buying market, betraying the same bewildering sense of values. Montreal and St. John report good inquiry for grain berth for May; there are charter inquiries at Montreal, and the Canadian grade trade generally hopes for a steadier price line, and a merchant's chance to clean up inventories.

The Inter-Ocean Press dispatch from Liverpool, that the wheat pool had hurriedly offered 40,000,000 bushels for shipment was immediately recognized as a loud echo from certain comment two days before from Ottawa correspondents as to the position of the wheat pool. The wheat pool is equipped with liberal lines of credit in which practically all the chartered banks of Canada share; its advances to farmers have not exceeded \$1.35 a bushel in any instance; bankers interested in the account are unaware of any unprotected wheat in its hands. The trade recognizes that the pool has merely shared in the common lifelessness of legitimate business, and the story is branded as too obviously absurd to invite another bear raid. The trade wants a price peace, let the chips at Ottawa or Washington fall which way they may."

According to a report to the Department of Commerce, farming is Spain's first industry, the income from cereal and vegetable crops ranking first with a total annual yield of 4,501,000,000 pesetas.

Don't let your subscription lapse: you may lose valuable numbers.

CASH PRICES FOR GRAIN.

CHICAGO, ILL.

Alfalfa Department

LITTLE ALFALFA RAISED.

WISCONSIN RAPIDS, WIS.—There is very little alfalfa raised in this immediate vicinity, although the farmers are beginning to try to raise it. It has been tried out here for a number of years, but with very little success, so the amount that is raised right around here would not be enough to be considered.—McKercher & Rossier.

ALFALFA PROFITABLE.

SEBEWAING, MICH.—Farmers who have started to grow alfalfa, however, find it very profitable for various reasons. They have less acres of hay to cut, since they can cut at least two crops of alfalfa. Another good thing they find with alfalfa, is that when fed to their horses and their stock in the winter time it takes the place of ordinary hay and grain.—J. C. Liken & Company. By G. C. Marotzhe.

ALFALFA MEAL MARKET.

KANSAS CITY, March 28.—Believing the market to be pounding on the bottom, local manufacturers of alfalfa meal this week made but one concession in prices. No. 1 meal sold \$1 a ton lower, while other grades were held steady. Carlot quotations were: Choice, \$27@28; No. 1, 23@24; No. 2, \$19@20; No. 3, \$18@18.50. Not only was the demand light but shipping directions on old orders were very slow, with some cancellations. The market seemed to be suffering from sympathy with recent weakness of grain. Advices from St. Louis were pessimistic. Colorado mills offered lightly.

In poultry, horse and cattle feeds local manufacturers of grain-molasses feeds had a good trade. There were a few orders for dairy, hog and pig feeds. Some grades of horse feeds were \$2 a ton lower, while others were \$1 higher. Alfalfa-molasses feeds were unchanged to \$1 lower. Scratch poultry feeds went up \$1.50@2, but mash poultry feeds were unchanged to \$1 down. Other feeds were unchanged. The general market for carlots was as follows, per ton: Dairy feeds, \$36@37; cattle, \$39@45; hog, 45@51; pig, \$70; horse and mule, \$30@42.50; alfalfa-molasses, \$26.50@33; scratch poultry, \$48@54; mash poultry, \$50@77.

ALFALFA GRADE HEARINGS.

The following was received from Mr. W. A. Wheeler, in charge of the Hay, Feed & Seed Division, Department of Agriculture, Washington, D. C., who with E. C. Parker is making a trip through the West, holding hay hearings in all important hay producing territories.

Hearings on alfalfa hay grades at Los Angeles and San Francisco were attended by dealers from the two cities and from several shipping points in California. Representatives from the State Department of Agriculture and the Agricultural College were also present. Representatives from the Nevada Agricultural College and the Nevada Farm Bureau attended the San Francisco hearing.

The California dealers generally are not favorable to the use of any hay grades, preferring to handle hay on description and by personal contact with the producers and the consumers.

The representatives from Nevada and some of the California growers expressed themselves as being in full accord with Federal grades and Federal inspection.

The proposed grades met with general favor at these meetings, although the sentiment was expressed at San Francisco that a higher green color stand-

ard for grade number one would be preferable for California.

The statement was made that the alfalfa grades were much better than anyone thought it possible to make definite grades for alfalfa hay.

An effort is to be made by some of the growers to have the State Department of Agriculture make a thorough study of hay marketing in California in order that any service work to be conducted may be planned with full knowledge of the local conditions of hay production and marketing.

Hearing at Ogden, Utah, attended by very representative groups of growers, dealers and consumers. They expressed a unanimous approval of both Federal grades and inspection and by vote requested the State Department of Agriculture to adopt grades as soon as recommended by the Federal Department and to establish a joint Federal state hay inspection service.

BOOKS RECEIVED.

We acknowledge receipt of the 67th annual report of the trade and commerce of Chicago as compiled by J. J. Fones, Sec'y of the Board of Trade of the city of Chicago, for the year ending Dec. 31, 1924. As usual, this book is replete with statistical data and other information covering the activities in flour, grain, provisions, live stock, seeds, hides, wool and lumber.

COAST GRAIN PRICES.

Quotations on grain, reported by grain exchanges on the Pacific Coast as of Mar. 26, are as follows:

Portland, Mar. 26.—Merchants' Exchange quotations:

RELIABLE

Standard Blue Flame

HOVER

Various Sizes

"Footproof and Safe"

Has newest improvements. Saves time, money and trouble. Nothing to wear out. Chicks grow faster and stronger. Built of galvanized steel. Special burners give steady flow of oil and even flame. Our 1923 style is perfection itself.

Reliable Coal Burning Brooder

Built of strongly bolted, heavy gray cast iron. Will last a lifetime. Greater coal capacity. Burns hard or soft coal. Has two double disc wafers which control heat regulation. Has self-ventilating canopy. Specially designed fire bowl keeps grate clean. Used by largest poultrymen.

Reliable Standard Incubators

50 to 1100 Eggs

THE LEADER OF THEM ALL! Every Incubator proves Reliable reputation. There is a Reliable incubator built especially for your needs. Write us your requirements, and ask for Poultryman's Guide; it's Free.

NOTICE!

MILLS AND ELEVATORS

The U. S. Department of Agriculture recently recommended a new mixture for killing WEEVIL in grain, stating that the mixture was Non-Inflammable and Non-Explosive and could be used without injury to man—at the same time leaving NO ODOR or TASTE in the grain.

"TETRI-CIDE"

For your convenience we are placing on the market the above mixture ready for use, in 30 and 50 gallon Drums, at \$2.25 and \$1.95 per gallon respectively, F. O. B. shipping point. The drums are charged extra at \$6 each, but returnable for full credit within 90 days. Our name and trade-mark for this mixture is "TETRI-CIDE."

For a General Non-Poisonous and Non-Explosive Insecticide for killing moths and spraying for insects generally in mills and warehouses, we recommend

S-O-S LIQUID GAS

Fr. Allowed

55-gallon drums @ \$3.25 gallon

30-gallon drums @ \$3.50 gallon

10-gallon cans @ \$3.75 gallon

No extra charge for containers.

Hay Department

HAY BUSINESS STAGNANT.

EVANSVILLE, IND.—The hay condition in our territory is in a state of stagnation and will result in the largest carry over that we have had in ten years. Hay cannot be moved to net the farmer \$10.00 a ton, however price is not the object, there are no markets to consume the hay and irrespective of prices it must be carried over.—*Independent Hay & Grain Co. Manager Jno. K. Jennings.*

HAY MARKET REVIEW.

The weekly review of the Department of Agriculture—Low grades were practically unsalable at many markets and the demand was centered on the light offerings of top grades. Receipts were ample for the slack demand, although country offerings at some markets fell off with the opening of farm work. Considerably more timothy and prairie hay remain to be marketed than at this time a year ago although the movement of alfalfa was held about normal, according to reports received from a large number of shippers. About 55 per cent of the marketable surplus of timothy had moved up to March 15 compared with 70 per cent in 1924 and 65 per cent in 1923, while about 5 per cent more prairie remained to be marketed than on March 15 last week. An unusually slow movement is reported from Michigan where only 40 per cent of the timothy has been shipped. Approximately 80 per cent of the alfalfa surplus had been disposed of against 75 per cent on March 15 in 1924 and 85 per cent in 1923. An increased amount was available for market from the record 1924 hay crop and the open winter tended to reduce the demand although more liberal feeding of low priced hay largely offset the decreased number of animals.

Dealers' stocks in consuming areas were normal but only a fair volume of trade was expected as the supply of local hays, chiefly Johnson grass, Bermuda grass, peanut and heavin hay in the South and timothy and mixed hay in Eastern states and New England seemed adequate. Timothy was moving chiefly to teamsters, lumber camps and mines, although some was being ab-

sorbed by Southern farms. Practically none was purchased for deferred shipment. Alfalfa was being taken by dairies and stock farms and shipments of alfalfa from Ohio, Michigan and New York were competing with alfalfa from the Middlewest along with the Atlantic seaboard. The quality of the Eastern alfalfa is only fair but the lower freight charges enable it to be offered at lower prices. Much of the alfalfa in the mountain states was fed locally as high freight rates made its shipment unprofitable.

GRAIN ELEVATORS SHIP HAY.

Albert Miller & Co., of Chicago is writing the grain elevator trade as follows:

"It is reliably reported that at least 50 per cent, and in some states more of the 1924 tame hay crop is still on the farms. The 1924 crop has moved very slowly from the farm to the markets for the simple reason that the local country dealer has been unable to handle it profitably. A good many farmers are therefore sending their hay direct to market or else sending it through the elevators or dealers they patronize who ship it for them and make a small charge for the service. In other words the producer receives the full proceeds from the sale of his hay less this small charge.

We are receiving a large number of direct shipments this season.

We have federal hay inspection on this market and when a sale of a car of hay is made the Government Inspector issues a certificate showing the grade of the hay. We issue market reports showing just what such grade of hay sells for each day, and all sales must come within the quotations.

It will not be long before we will have grass and if the producer is to dispose of his last year's crop of hay it is necessary that a market soon be found for it. You can aid the producer in your territory by either instructing him how to ship his hay himself or by shipping it for him."

KANSAS CITY HAY NOTES.

T. J. Tanner, Correspondent.

Idaho farmers had 440,000 tons of hay left on March 1. This is 20 per cent of the 1924 crop. A year ago the reserves were 870,000 tons.

Letters received by North & Co. from Mississippi indicate that financial conditions in that state are a restriction on the buying of hay. Too often the case is one in which the banker has to be consulted before a dealer can order a

Hay, Grain, Millfeed, Alfalfa Meal
Live Stock Exchange Kansas City, Mo.

car or the consumer lay in a supply for seasonable needs.

Newton C. Campbell, president of the Kansas City Hay Dealers' Association, was sick several days this week. Mr. Campbell sometimes feels the effects of an explosion of which he was a victim several years ago.

Clint Ross, a live stock dealer at the stock yards, who has 100 acres of alfalfa hay on his 307-acre farm at Lenape, Kan., said Thursday that he never saw a finer crop prospect. Lenape is in eastern Kansas.

"Present receipts of alfalfa hay would not be burdensome if the demand was adequate," said D. B. Tilson of Dyer & Co., one day this week. "Buying is limited, even of good hay, and there is such an excess of poor stuff that whole market is weighed down."

J. M. Hale of J. M. Hale & Co., who has been inquiring into the nature of the Southern demand for hay, says the planters have let up in buying, pending the starting of the cotton crop. This applies particularly to brown alfalfa and all kinds of prairie. The best demand is for green and strictly sound hay, which is wanted in the cities.

HAY MARKETS.

PORTLAND, ORE.

Mar. 26.—Buying prices f. o. b. Portland: Alfalfa, \$18.50@19 ton; valley timothy, \$19 @20; eastern Oregon timothy, \$22@22.50; clover, \$15.50@16; oats, \$19@20; oats and vetch hay, \$18.50@19.50; straw, \$7.50@8.

NEW YORK.

Mar. 26.—The New York Hay Exchange Ass'n has issued the following weekly report, with latest quotations:

	Hay.	Straw.
Receipts for week, tons	647	35
Receipts last week	304	71
Receipts from Sept. 1.....	36,040	720

The situation here is very quiet. Receipts have been moderate, but with demand abnormally light sales have been difficult to effect and values throughout have ruled about steady. There is only a moderate quantity of hay on hand and no excessive supply of any quality, but there is a general inactivity throughout the trade and sales cannot be forced.

Strictly No. 1 timothy in both large and small sizes is extremely scarce and this quality sells readily, but with that exception the disposition seems to be extremely slow. Navigation on the Hudson river resumed this week, the first boat containing hay arrived Wednesday with a liberal supply. Straw continues inactive with values nominal. New invoices moderate.

Federal grade quotations for large bales follow: Timothy—No. 1, \$25@26; No. 2, \$22@24; No. 3, \$19@21. Light clover mixed—No. 1, \$22@24; No. 2, \$20@21; No. 3, \$17@18. Medium clover mixed—No. 1, \$20@21; No. 2, \$17@18. Light grass mixed—No. 1, \$22@24; No. 2, \$20@21; No. 3, \$17@18. Heavy grass mixed—No. 1, \$17@18.

MILWAUKEE.

Mar. 28.—In response to inactive demand and the fact that stocks of hay are still reported to be large, hay quotations, which have been largely nominal all winter, declined 50c@1 in the Milwaukee market last week. Current prices, per ton, are: No. 1 timothy, \$14@15; No. 2 timothy, \$12@13; No. 1 mixed, \$13@13.50; No. 2 clover mixed, \$11@12; sample hay, \$6@8; marsh feeding, \$10; packing, \$9; rye straw, \$9@10; oat straw, \$9@10.

CINCINNATI.

Mar. 30.—Receipts of hay were smaller than a week ago, but medium and common quality again constituted the bulk of the arrivals, and as a result the market on most days was rather dull and draggy. Limited shipping orders and indifference of buyers for local consumption was depressing early, but the decreasing country movement, which was attributed to spring farming activities, kept the market fairly steady, and somewhat influenced the price of clover mixed to a higher basis. The demand for mixtures was rather unusual and offerings regardless of grade were shown a preference over timothy and clover. The entire line, however, was on a firmer basis at the close owing to an anticipated further falling off in receipts and shipping interests who feared they would not acquire sufficient hay to fill orders were reported as having withdrawn the lower prices quoted to the South and interior made earlier in the week. Good alfalfa was in better demand, but prices unchanged, and oats and wheat straw unsalable. Timothy—No. 1, \$18@18.50; No. 2, \$16@16.50; No. 3, \$13@15; threshed, \$8.50@10.50; no grade, \$8@10. No. 1 heavy clover mixed, \$16@16.50; No. 1 light clover mixed,

NORTHERN
HAY & FEED CO. N
02 Corn Exchange Minneapolis Minn.
HAY Shippers
Write for Quotations
WESTERN UPLAND ALFALFA AND TIMOTHY

\$16.50@17. Clover mixed—No. 1, \$16.50@17; No. 2, \$13@15.50; no grade, \$10@11. Clover—No. 1, \$16@16.50; No. 2, \$12@15; no grade, \$8@10. Second cutting alfalfa—No. 1, \$21.50@23.50; No. 2, \$17.50@19.50. First cutting alfalfa—No. 1, \$15.50@16.50; No. 2, \$13@15. Sound sample grassy hay, \$9.50@11. Straw—Wheat, \$8.50@9.50; oats, \$8@9; rye, \$13@14.

PITTSBURGH.

Mar. 28.—Country loadings have been very moderate this week and receipts of the better grades of timothy and choice clover mixed hay have been extremely light and improved demand can be reported for these grades and prices are slightly better.

The lower grades, especially No. 2 clover and No. 2 heavy clover mixed hay, remain very dull; in fact, it is almost unsalable and shippers will do well by keeping these grades away from this market for the present. Quotations: Timothy—No. 1, \$20@20.50; standard, \$17.50@18; No. 2, \$15@16; No. 3, \$12.50@14. No. 1 H. C. mixed, \$16.50@17; No. 1 L. C. mixed, \$16@16.50. Clover mixed—No. 1, \$16.50@17; No. 2, \$12@14. Clover—No. 1, \$16.50@17; No. 2, \$11@14.

Straw receipts remain moderate, but are ample for the light demand and prices remain unchanged. Quotations: No. 1 wheat straw, \$11.50@12; No. 2, \$11@11.50; No. 1 oat straw, \$11@11.50; No. 2, \$10.50@11; No. 1 rye straw, \$12.50@13; No. 2, \$11.50@12.

MEMPHIS.

Mar. 28.—Receipts of hay for the week were 82 cars, but demand continues moderate. There is some little improvement, but stocks here are large and low grades are still very slow. The trade is expecting quite an increase in the amount of alfalfa hay handled through this market in competitive territory as soon as the new rates go into effect next month, as the rates will remove the advantage which Kansas City has had over this market from points in Kansas. Quotations: Timothy, one, \$22; standard, \$20@21; two, \$18.50@19. Alfalfa, one, \$26.50@27; standard, \$24@25; two, \$19@19.50.

BALTIMORE.

Mar. 28.—With the supply of hay rather in excess of present limited trade wants, and in addition to fair car receipts, with arrivals by motor trucks from nearby running free, the general market is in buyers' favor and the limited business going on being confined to the better grades of timothy and light clover mixed. Poor to ordinary grades are a perfect drug on the market. Straw of all descriptions in ample supply, since there is only a limited jobbing demand heard for No. 1 wheat and oat blocks. Quotations follow: No. 2 timothy, \$19@19.50; No. 3, \$16@17.50; No. 1 light clover mixed, \$18@18.50; No. 1 clover mixed, \$17.50@18; No. 2, \$16@17. Straw—No. 1 straight rye, \$18.50@19; No. 1 wheat, \$15.50@16; No. 1 oat, \$15.50@16.

PHILADELPHIA.

Mar. 28.—Baled hay and straw: There is very little if any change to note in this market since our last report. Hay is quiet but steady, with moderate offerings, and straw is in small supply and fair request at former prices. Hay, federal grades: Timothy—No. 1, nominal; No. 2, \$18@19; No. 3, \$16@17; sample, \$10@15. Light clover mixed—No. 1, \$18@19; No. 2, \$16@17; No. 3, \$12@14. Medium clover mixed—No. 1, \$16@17; No. 2, \$13@15. Heavy clover mixed—No. 1, \$15@16. Light clover mixed—No. 1, \$17@18. Straw—Straight rye, \$15@15.50; wheat, \$15@15.50; oat, \$14@14.50.

DULUTH.

Mar. 28.—Hay dealers on this market complained of progressive dullness during the last week. Jobbers were light buyers, and with demand from loggers over for the season, the trade found it difficult to place the small current receipts on the market. Closing prices per ton are unchanged, as follows: Timothy—No. 1, \$16; No. 2, \$14. Mixed timothy—No. 1, \$15; No. 2, \$12. Prairie—No. 1, \$16; No. 2, \$14; No. 3, \$12. Midland—No. 1, \$10; No. 2, \$8. Straw—Rye, \$9; oat, \$8.

KANSAS CITY.

Mar. 28.—Despite a further slight decrease in alfalfa offerings total receipts of hay this week increased 43 cars. The aggregate offerings were 639 cars, as compared with 453 a year ago. Alfalfa receipts were 435 cars, or 5 less than a week ago. They formed the bulk of the movement. Most of the arrivals graded from standard down. There was a good southern city demand for green and all of the better qualities sold readily, but intense dullness prevailed in lower grades and damaged hay. The entire market was weakened by the stagnation of inferior qualities. Prices broke the first day and there was very little recovery. The close showed net losses of 50c@1 a ton. Prairie offerings exhibited an expansion of 24 cars, swelling to 139. Upper grades were not plentiful and they were well taken most of the time. Demand for medium and low grades was very light, with cars hanging over from day to day. Still the prices generally were unchanged.

Total receipts of timothy, clover mixed and clover were 65 cars. This exceeded the previous week's arrivals by 14 cars.

no urgency in the demand. Most of the offerings were timothy, which ruled weak and slow.

Three cars of straw came in, but they had been sold ahead. The previous week's price was maintained.

Carlots of hay and straw are quoted as follows per ton, f. o. b. Kansas City:

Alfalfa—Select dairy, \$24@28; choice, \$21.50@23.50; No. 1, \$18@21; standard, \$14.50@17.50; No. 2, \$11@14; No. 3, \$6@10.50.

Prairie—No. 1, \$10.50@11.50; No. 2, \$9.50@10; No. 3, \$6.50@9; packing, \$5@6.

Timothy—No. 1, \$15@15.50; standard, \$14@14.50; No. 2, \$12.50@13.50; No. 3, \$10@12.

Clover mixed—Light, \$15@15.50; No. 1, \$13.50@14.50; No. 2, \$10@13.

Clover—No. 1, \$12@14.50; No. 2, \$7@11.50.

Straw—Wheat, \$7.

ST. LOUIS, MO.

March 30.—The receipts of hay continue to be light on both sides of the river. There is quite an active demand for the choice qualities of timothy as well as very light clover mixed. All medium grades continue to be dull and hard to place. No change in values.

Clover—Under light demand. High grades selling fairly well. Medium grades neglected and extremely low prices taken in order to move.

Alfalfa—Choice qualities in fair demand. Medium and lower grades hard to place.

Prairie—Choice qualities will sell to advantage. Other grades neglected and difficult to place.

Straw—Steady.

No. 1 timothy, \$21@22; standard timothy, \$19@20; No. 2 timothy, \$15@16; No. 3 and sample, \$10@12; No. 1 clover mixed, \$17@18; No. 2 clover mixed, \$13@14; heavy mixed, \$14@16; No. 1 clover, \$16@17; No. 2 clover, \$12@13; threshed hay, \$9@10; choice alfalfa, \$24@26; No. 1 alfalfa, \$22@24; standard alfalfa, \$16@18; No. 2 alfalfa, \$13@15; No. 1 prairie, \$14@15; No. 2 prairie, \$11@13; rye straw, \$9@10; wheat straw, \$8.50@9.50.

CHICAGO HAY NOTES.

Market is very firm for all good grades of hay and a few cars could probably be placed at considerably above top quotations. Fair and common hay selling better at firm prices. Country loading below normal. Unless they increase, prices are likely to work higher. No prairie or marsh hay here and some inquiry for all kinds. Considerable demand for top quality alfalfa and an urgent demand for all kinds of straw with prices firm.—*Bridge & Leonard.*

There is a good trade in hay and all desirable offerings bring good prices and sell readily. Heavy mixed hay, discolored hay and hay that is damaged, is hard to move. Straw is selling readily.—*Albert Miller & Co.*

The light offerings of the past few days are having a good effect on the better grades of tame hay, that is, No. 2 and higher grades, but the No. 3, and no grade hay is as dull as ever. Prairie hay is very quiet except good soft packing. Rye straw is in better demand. We advise shipment of No. 2 and better grades of timothy hay.—*Walters Brothers.*

CHICAGO GRAIN STOCKS.

Wheat stocks in all positions in Chicago decreased 532,000 bus. last week and oats 715,000 bus. Corn increased 85,000 bus., rye 25,000 bus., and barley 2,000 bus. Details follow, last three figures omitted, except in the totals:

	Public.	Private.	Total.*	Last yr.
Wheat	654	3,221	3,875,000	15,424,000
Corn	4,680	8,585	13,265,000	6,606,000
Oats	6,400	11,438	19,557,000	4,439,000
Rye	2,047	271	3,209,000	1,820,000
Barley	194	194,000	223,000	

*Includes 342,000 bu. wheat, 1,284,000 bu. corn, 1,513,000 bu. oats and 81,000 bu. rye afloat.

THE FLORIDA WHEAT CROP.

This country is full of surprises. Who would have thought that Palm Beach and Miami, Florida, could raise enough wheat in a couple of weeks to supply a world's shortage and get the blooming stuff in all markets, you might say, over night? It is reported that some in the trade have asked for a Federal Appeal on that Florida wheat, but I doubt if they will get very far as I understand the stuff's all unloaded. Besides, most of it was hot air and none of our leading law makers have ever opposed the free and unlimited use of this commodity, either for domestic purposes or otherwise. Now with the Florida crop disposed of and the Army and Navy looking

ing for short sellers of wheat, as well as bootleggers and other low violators, and with so many bad crop reports coming in from the Southwest, looks like July wheat will stand some buying.—*B. C. Christopher & Co., Tod Sloan, Kansas City, Mo.*

QUAKER OATS CAPITAL CHANGES.

Quaker Oats will next month put into effect capital changes authorized by stockholders recently. Four shares of stock will be issued in exchange for each share of \$100 par value common stock outstanding, this action making the securities more readily available for trading purposes and less subject to violent fluctuations.

The exchange of no par shares for the \$100 par value common will be made on or after April 10, according to a decision reached by the executive committee. After this exchange the company will have outstanding \$18,000,000 of \$100 par preferred stock and 450,000 shares of no par value common.

COMING CONVENTIONS.

April 16-17.—Millers' National Federation, Edgewater Beach Hotel, Chicago.

April 21-22.—Western Grain Dealers' Ass'n, Des Moines, Ia.

May 5-6.—Illinois Grain Dealers' Ass'n, Peoria, Ill.

May 7.—Missouri Grain Dealers' Ass'n, St. Louis.

May 7-9.—American Feed Manufacturers' Ass'n, New Orleans, La., Roosevelt Hotel.

May 19-20.—Oklahoma Grain Dealers' Ass'n, Oklahoma City, Okla.

May 21-22.—Kansas Grain Dealers' Association, Wichita, Kans.

May 22-23.—Texas Grain Dealers' Ass'n, Ft. Worth, Tex.

June 9-11.—Am. Seed Trade Ass'n, Los Angeles.

June 17-18.—Ohio Grain Dealers' Ass'n, Toledo, Ohio.

June 22 and 23.—Wholesale Grass Seed Dealers Ass'n, Drake Hotel, Chicago.

June 25-26.—Midsummer meeting of the Indiana Grain Dealers' Assn. Meeting place to be selected later at some place in Northern Indiana.

July 28, 29, 30.—National Hay Association, Cedar Point, Ohio.

August 20-21.—New York State Hay and Grain Dealers' Association, Syracuse, N. Y. Hotel Onondago.

Oct. 12-14, 1925.—Grain Dealers' National Ass'n, Hotel Muehlebach, Kansas City, Mo.

Oct. 12-14, 1925.—U. S. Feed Distributors' Ass'n, Kansas City, Mo.

INCREASED WORLD WHEAT ACREAGES.

Revisions of the winter wheat acreage in India and some of the European countries, together with a new estimate for Esthonia received by the Department of Agriculture bring the total acreage of 16 countries reported to date up to 124,465,000 acres compared with 120,748,000 acres for the same countries last year, an increase of 3,717,000 acres.

The increase is attributed mostly to the larger acreages reported for the United States, India, France, and Italy, which more than compensates for the small reductions in some of the countries of less importance. Countries of the Northern Hemisphere, outside of Russia and China, for which estimates are still lacking, are Germany, Hungary, Yugoslavia and the countries of North Africa.

The second estimate of the Indian wheat acreage just received by the department is 32,057,000 acres against 30,840,000 acres estimated on the same date last year and 31,178,000 acres the final estimate.

Conditions in India have been generally favorable, but recently there have been reports of strong dry winds which may adversely effect the outturn of the

crop now nearing maturity. In the United Provinces some wind damage is reported, otherwise crop conditions are favorable. In the Punjab rain is needed and crops have been injured by frost and wind.

AMERICAN GRAIN EXPORTS.

The Department of Commerce reported the following exports of grain from the principal ports of the United States to foreign countries during the week ending March 21, 1925, (unu omitted):

Articles and countries.	Week ending		July 1, 1924, to Mar. 21, 1925.
	Mar. 21, 1925.	Mar. 22, 1925.	
Barley	128	220	17,174
To United Kingdom	83	83	7,979
Other Europe	128	137	8,067
Other countries	17	100	1,128
Corn	124	848	5,529
Oats	93	2	4,855
Rye	546	...	30,965
Wheat	2,036	240	167,194
To Italy	753	108	22,557
United Kingdom	305	75	35,652
Other Europe	1,015	16	53,036
Canada	48,614
Other countries	13	41	7,335
Total U. S.	2,977	1,310	225,717
Canadian in transit:			
Barley	204	171	10,566
Oats	216	181	9,432
Rye	24	181	3,013
Wheat	2,005	2,665	44,434
Total Canadian.	2,449	3,201	67,445

*Including via Pacific ports this week: Wheat, 37,000 bus.; flour, 44,700 bbls.

FUTURE TRANSACTIONS AT CHICAGO.

The volume of sales for future delivery on the Chicago Board of Trade for the days indicated, subject to corrections of minor importance, as reported by J. W. T. Duvel, Grain Exchange Supervisor, were as follows (last three 000 omitted):

1925—	Wheat.	Corn.	Oats.	Rye.	Total.
Mar. 2.	93,571	34,669	10,955	6,263	145,458
Mar. 3.	65,021	19,539	4,660	2,178	91,398
Mar. 4.	100,195	33,068	6,630	3,362	144,255

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912.

Of Price Current-Grain Reporter, published weekly at Chicago, Ill., for Oct. 1, 1924.

State of Illinois, County of Cook—ss.

Before me, a notary public in and for the State and county aforesaid, personally appeared J. Carver Strong, who, having been duly sworn according to law, deposes and says that he is the business manager of the Price Current-Grain Reporter, and that the following is, to the best of his knowledge and belief, a true statement of the ownership, management (and if a daily paper, the circulation), etc., of the aforesaid publication for the date shown in the above caption, required by the Act of August 24, 1912, embodied in section 443. Postal Laws and Regulations, printed on the reverse of this form, to-wit:

1. That the names and addresses of the

PARSON'S COMMISSION CO.

American Bale Ties

To conform with the rules of the National Hay Association, hay must be well baled. The use of American Bale Ties accomplishes this. A broken wire on a bale of hay condemns the hay. Broken bales cost more than Bale Ties.

OTHER USES

For baling Excelsior, Shavings, Rags, and Paper. For bundling Barrel Heading and Staves.

No other form of wire has to stand more strain and abuse. Bale Tie Wire must be made in the highest perfection possible. American Bale Ties meet every requirement for which they are intended.

Complete descriptive catalog sent free for the asking.

Provisions, Etc.

RECEIPTS, TWENTY MARKETS.

Combined receipts of cattle, hogs and sheep at the seven leading Western markets and thirteen other points for the week, with comparisons:

	Cattle.	Hogs.	Sheep.	All kinds.
Past week	242,000	587,000	282,000	1,111,000
Prev. wk.	240,000	663,000	260,000	1,163,000
1924	216,000	865,000	236,000	1,317,000
1923	214,000	910,000	265,000	1,389,000
1922	209,000	575,000	232,000	1,016,000

Combined receipts at the twenty markets for 1925 to date, with comparisons, as compiled by the *Drovers' Journal*:

	Cattle.	Hogs.	Sheep.	All kinds.
1925	2,969,000	10,832,000	3,351,000	17,152,000
1924	2,951,000	12,466,000	3,297,000	18,714,000
1923	2,993,000	11,449,000	3,407,000	17,849,000
1922	2,856,000	8,673,000	3,276,000	14,805,000

CHICAGO PROVISION REVIEW.

CHICAGO, March 30.—It is in between the seasons in the provision trade and the business is spotted. High prices for pork products, both fresh and cured, have curtailed consumption and turned many buyers into the buying of the cheaper and medium grades of beef which have also advanced. Hogs have advanced sharply the past two months and quality has improved, yet prices for the live hogs are above a parity for the cured product and a local packer says there is a loss of \$2@2.50 per head in packing.

As to the future supplies of hogs, a few of the leading packers expect that there will be enough for all demands, although they will be lighter than those of the past two years, as there are fewer hogs in the country, yet enough for all home consumption and leave a comfortable exportable surplus.

Trade in pure lard is said to be the worst in years, as one packer puts it, while others have a fair business. Substitutes are 5c per lb. cheaper than lard,

while a year ago they were about the same prices. This has affected the sale and consumption of pure lard. Output of the latter has decreased, but accumulations of stocks at Chicago are large as outside packers are shipping their surplus to this market. Packers are predicting a stabilizing of hog values for some months to come at around \$13@13.50 in the country.

Liquidation of lard and meats by speculators was on a large scale during the week, the weakness in hogs and corn encouraging selling. Lower prices were made and at the close lard futures were off 55@62½c, short ribs \$1.15@1.37½, dry salted bellies \$1.10@1.25. Prices for the week follow:

	Close	Mar. 28, 1925.	Mar. 21, 1925.	Mar. 29, 1924.

ST. MARY'S OIL ENGINE COMPANY,
St. Charles, Mo.

GAS ENGINE—25 H.P. Howe, gas or kerosene, in excellent condition. We are installing electric power. **THE ODELL GRAIN & COAL CO.,** Odell, Illinois.

MILLS FOR SALE.

FOR SALE OR EXCHANGE—Valuable East Tennessee modern water power, 40 bbls. flour, 400 bu. meal and feed mill. Good water power and a market for all products with a well established trade. Situated near town of 8,000 on good pike road. A bargain on liberal terms to suit buyer. Good reason for selling. Write "**B. M. C.,**" Box 37, care Price Current-Grain Reporter, 309 S. LaSalle St., Chicago.

MACHINERY BARGAINS.

WE OFFER you a select list of elevator and seed equipment, in new and used machinery. Write for our bargain prices. **STANDARD MILL SUPPLY CO.,** 501 Waldheim Bldg., Kansas City, Mo.

PLANT FOR RENT.

FOR RENT—Our plant which we operated as a feed store for 40 years and until October 1, 1924. 1923 sales \$175,000.00. **CONKLIN AND CUMMINGS, Goshen, N. Y.**

SEEDS FOR SALE.

1925 SEED CORN—Early Yellow Dent; Yellow Murdock; Silver King; Minnesota 13; the good kinds; \$3.50 bu., including sacks. As usual, orders coming fast. Agents wanted. Established 1891. **GEO. A. GERMAIN, Winnebago, Minn.**

SEED CORN—Twenty years' experience as breeders and growers of high yielding seed corn. All grown from disease free seed. Germination perfect. Carlots or less. Write for catalog and prices. We can please you. **W. H. BOEKER & SON, Petersburg, Ill.**

CASH CONTRACT OATS.

Following is the monthly range of cash contract oats (No. 2 white and better) at Chicago for a series of years:

BUSINESS AND TRADE CONDITIONS

THE celebrated Ides of March and the attendant fears, worries and activities of the Roman forum had nothing on the New York and Chicago stock market or American Grain Exchanges during the month of March. First-page position in the newspapers treated the wild markets in a reasonably fair and considerate manner. Business sentiment was not particularly disturbed and official circles wisely placed the entire disturbance in a class of natural proceedings, excepting the government's investigation of the grain markets which is now drawing to a close.

Business statistics continue to register marked stability and do not satisfactorily explain the action of the stock market. Any discussion of inflation which is heard on the street is simply idle gossip. The money market is seasonal and regular. Credit is ample for all business requirements and manufactured lines, car loadings, bank clearances and the employment situation, are generally satisfactory. March customarily brings the peak of the money market for the Spring season and April shows an easing off. The summer months do not ordinarily require new financing of large proportions, and so October will probably be the next peak money month.

In analyzing these several factors, well posted financial houses believe that the recent behavior of the stock market is not properly in line with the business cycle.

Herbert Hoover, discussing this subject last week, is quoted to the effect that we need have no apprehension of a business slump. He considers the recent downward stock market as an unfortunate result of undue speculation, and not a dependable barometer of business conditions. He points to the stability of the commodities back of those securities which have been fluctuating so violently and the fact that such commodities are being produced, distributed and consumed in an entirely satisfactory manner.

Financial Statements

The almost unbelievable magnitude of American business has been given publicity recently in connection with the financial statements of such concerns as The Ford Motor Co., Dodge Motor Car Co., The International Harvester Co., The Quaker Oats Co., and many other typical American industries. It is rather difficult to conceive of any business, even though it may be the manufacture of jitneys, which is so enormous that net profits of one million dollars are earned every three days.

In viewing the farm market through the eyes of the directors of the International Harvester Co., we find as they say:

That the period of agricultural depression, which was so markedly reflected in the adverse condition of the farm operating equipment industry, has passed, and we look forward to a period of more satisfactory times for the American farmer and for the manufacturers supplying his needs of labor saving farm equipment.

The company's financial statement for 1924 showed earnings of \$8.82 per share on the common stock. A growing volume of farm machinery business is developing in foreign lands to which the directors report refers in part as follows:

The sales in foreign countries, together with sales of products other than farm equipment in the United States, namely: motor trucks, twine, steel, etc., represented almost two-thirds of the total business of the company, and produced a like proportion of the operating earnings.

The Packing Industry

The *Chicago Journal of Commerce*, editorially discussing the live stock and meat packing industry, reviews their affairs of the past several years in a particularly capable editorial as follows:

In the middle west the distress of three great packing companies during the post-war years was the result of the fact that the packing industry was more peculiarly susceptible than almost any other industry to reactions from war conditions.

First, the packing industry was deeply involved in foreign trade. The disturbance of foreign plants and the decline of foreign commerce cost the industry dear.

Second, like other industries, the packing industry was susceptible to the great general business reaction of 1921.

Third, the packing industry is peculiarly sensitive to the distresses of agriculture. During most of the time

SHORT ON CONFIDENCE

WITH an estimated carry over the smallest in years and with prospects for winter wheat indicating a crop approximately a hundred million bushels less than recent ones, the thing the market seems to be the shortest on just now is confidence.

The high prices of recent weeks had a tendency to lessen world consumption and rain throughout the west improved crop outlook very materially, but it should take factors more controlling than these to cause the constant and persistent downward tendency in prices, amounting in the case of May wheat on the Chicago market, to 61½ cents during the month of March.

Quite a good many traders are taking refuge behind the statement that world figures are badly off.

since the war, agriculture has been passing through a trying period, which had its inevitable effect on the packers.

Fourth, even in normal times the packing industry is in a position far more trying than that occupied by the average industry. It stands directly between the producer and the consumer. The producer feels its presence. So does the consumer. The packing industry buys directly from the farmer, who has public sympathy with him, and in addition has aid from a variety of governmental agencies. The packing industry sells almost to the door of the ultimate consumer, who is the average citizen and average voter, and who may guide his vote according to his satisfaction or dissatisfaction with the cost of living. If prices are low, the packing industry suffers from the hostility of the farmer. If prices are high, it suffers from the hostility of the general public. Often it suffers from both these hostilities simultaneously.

Always in danger from this or that force in public opinion, the packing industry was in addition hard hit by conditions arising from the war. But the period of distress is apparently over now. The last of the packer problems seems solved.

Creditors of Wilson & Co. have postponed collection of their claims. The securities have been rearranged so as to appreciably reduce the fixed obligations. Creditors and security owners have made sacrifices which may be permanent or for which, if fortune runs their way, they may be compensated in the future. The company is amply provided with working capital.

Railroad Mergers

As in other lines, the consolidation of certain railroad groups seems to be in order. Our readers may recall reference here to this trend in many business lines, satisfactorily explained by the natural turn of affairs, business expansion, the removal of subsidies, and possibly the desire or influence of the Government towards this end.

In the East, The Pennsylvania & Reading and other competitive railroads are seeking means of consolidation and the Van Sweringen merger of the Nickel Plate and four other major railroad properties has been on the fire for months. The Interstate Commerce Commission has approved intervention against the latter plan which is also opposed by several of the Eastern short lines and all the big carriers including the New York Central, the Baltimore and Ohio, the Pennsylvania, and others. It is pointed out that the merger is not in conformity with the commission plan, leaving out the interests of the weaker roads which is in violation of the spirit of the law, intended to place the various railroad systems on something like an equal basis.

In the West, a consolidation of the Chicago & Alton and the Missouri, Kansas and Texas railroad systems is in the making. A total capitalization of \$300,000,000 is involved and the plan would lift from receivership the former road, which has been in effect since August 30, 1922, in spite of a remarkably profitable farming and industrial area through which its rails run. The gossip of the street has credited the Alton difficulties with over-watered stock of which there may be some doubt.

At any event, the year 1925 will likely be a notable one in the readjustment of the capital structure of American railroads, the scaling down of fixed liabilities and the more secure position of these great servants of the country in the security market.

Farm Production

The Department of Agriculture continues to officially discuss and to disburse appropriations, intended to offset the very considerable alleged drift of farming towards over-production. Much of this has always seemed to us a rank waste of the taxpayers' money, in either arriving at quite obvious conclusions which everyone has always known or conclusions which were so impractical that they could be of little value. We are reminded in this connection of the enormous expenditure during the Wilson war administration through sending Government representatives all over the country to show housewives how to make cottage cheese.

If it were not for the self-assumed importance of farm leaders who very naturally justify their job at every opportunity, city folks would not so very generally feel that Mr. Farmer was in a class of his own as far as lack of brains is concerned.

The fundamental laws of supply and demand, in our judgment will restrict unwise acreage devoted to unprofitable crops and encourage the wider and heavier seeding of profitable crops. The Bureau of Crop Estimates and other worthwhile functions of the Department of Agriculture furnish much of practical daily value to the farmer, but as a surplus grain country, able in the long run to market our exportable grain among foreign buyers at considerable profit, it seems to us a rather precarious undertaking for the Department to broadcast the information that too much wheat, for instance, will be produced within our borders for any given year.

We do not recall that the Government has been notably successful even in publishing acreage, yields,

and similar information, let alone endeavoring to forecast before wheat is planted, how much it will be worth in foreign markets at harvest time.

Secretary Jardine Speaks

Farm and business leaders of the West have been watching the news columns closely in connection with the public statements of Secretary of Agriculture, Jardine. It is presumed that he has so far satisfactorily filled the high duties of his office, showing a broad and proper grasp of fundamental details, on which the success of a surplus agricultural country, such as ours, so largely depends. His viewpoint is further illustrated in the following reference to the farmers' affairs:

The farmer does not seek legislation to fix prices or to regulate details. He knows that legislation cannot annul economic laws. The only legislation he wants is legislation that will assist him in getting reasonable credit on sound security—credit adapted to the peculiar nature of his business, which because of turnover and other factors cannot be treated in the same way as other lines of business; legislation that will help him build up machinery for marketing his products successfully; legislation that will put him on a par with other business men. The farmer wants legislation not as a foundation, but as a shock absorber.

Rather a large job, to cover so much ground through proposed laws which shall accomplish all that he has outlined and at the same time protect the other business fabric of the nation. His method of starting the ball rolling will be interesting indeed.

Everyone Takes a Hand

A frequent and deserving cause for complaint, relating to the activities of our law-making bodies concerns the great multiplicity of the laws proposed and an apparently unnecessarily large number enacted.

Our system of popular election places a burden of activity upon the chosen few who enter our state and national houses of Government. Every member so elected has the right to introduce legislation and very few, feeling that they must be publicly busy at something, fail to take advantage of the opportunity. Their efforts do not recognize usually the earlier similar bills introduced and defeated, under identical circumstances, then as now. Occasional effort is made to change this plan of law making so that a properly constituted and intelligent body of lawyers, acquainted with the present statutes and reasonably conversant with the needs of the people, could draft such laws as may be necessary. Such commissions would, of course, be politically in sympathy with the governing administration but that is no disadvantage to a plan of this description, and the results would be somewhat in line with the most desirable lack of confusion and avoidance of repetition of introducing proposed laws as accomplished in many foreign governments.

Russian Agriculture

There is food for thought in the news advices of last week concerning the marked change under way in Russia, wherein outside capital is invited and the failure of the Soviet control admitted. In the market pages of this issue of the PRICE CURRENT-GRAIN REPORTER appear items concerning the purchase of cash grain for Russian account, a strange situation indeed in a great grange country where the production of wheat and other cereals is climatically favored.

If we may rely upon the present news, it but further proves the anticipated complete failure of Governmental control and the very proper change over to private operation of Russia's industries and her farm lands. The manufacturers of farming machinery have for some time referred to the growing demand from foreign distributors and if Russia carries the present plan to the proper conclusion, we may expect a large seeding of wheat and the resumption of her proper place as a surplus country on the next crop.

The Soviet leaders have now yielded to the inevitable, by permitting state trusts and co-operative organizations to sell goods to private traders, and by sharply reducing taxes on private business. They have yielded to the inevitable, by retreating somewhat, although they may seek to turn back later, to recover the territory they have retreated from. But eventually they will have to yield to the inevitable by abandoning the communist doctrines altogether.

WILL THEY WORK THAT WAY

WORD from Washington last week was to the effect that the Secretary of Agriculture had assured American farmers that there would be no increase in fertilizer prices because of the combination of French and German potash producers.

We have all been previously assured that combinations of farmers in this country for the purpose of marketing all of their crops, will not mean an increase in price to the ultimate consumer and we are all anxious to see how both problems work out.

THE BOND OF SYMPATHY

THE spontaneity with which the appeal for help for the tornado stricken sections is being met is simply another of the many wonderful examples of the bond of human sympathy so typical of the people of the United States.

It is sometimes said a person's sympathy is in direct proportion to the distance he is from the seat of trouble, but that is by no means true, insofar as the American people are concerned.

Again and again an almost unprecedented response has been made to calls for help, even when those calls came from the other side of the world.

Things of that kind cannot help but make a man proud to be called an American citizen and cause him to want to smite "Red" propaganda with all of his power.

BALANCED PRODUCTION

IN a recent interview, former governor Frank O. Lowden of Illinois says the weakness of agriculture is in its total failure to adjust agricultural production to effective demand, and that balanced agriculture is the great need.

In the same interview he points out that weather conditions (largely uncontrollable) were responsible for a 1924 corn crop which was 20 percent less than in 1923, while these same weather conditions resulted in the production of 100,000,000 pounds more of butter.

With such uncertainties ever present, we confess our inability to see how a balance can be figured so as to make farming invariably profitable so long as so many farmers continue to depend upon just one kind of grain for their success.

The financial salvation of many storekeepers depends upon the wide range of the commodities they have for sale, coupled with the fact that when they find they have a surplus of some specific article they use real merchandising methods to dispose of it.

FARMERS AND SPECULATION

THE New York Journal of Commerce, in a recent editorial, makes the following comment on grain prices, and the investigation concerning the recent slump which has been ordered by the Department of Agriculture:

"When speculative operations, not to say manipulation of grain prices, were sending prices skyrocketing to levels never before known in this country, except in the highly abnormal war or early post-war days, there was no complaint from the farmers. If they had the slightest objection to the efforts of the hated speculators to boost wheat prices they certainly did not voice them so that the general public heard anything of them. On the contrary, there was every evidence that the results that were being obtained in the Chicago futures market were highly pleasing to the rural communities.

"The attitude of mind in agricultural districts and among the friends of the farmers in Washington appears, however, to be undergoing a rapid change now that the more or less inevitable results of such extreme manipulation are making themselves felt. Speculators who had done so much for the farmer and on paper for themselves have been endeavoring to cash in on their gains in view of the fact that prices had reached a point where it was useless to attempt to drive them much further. The natural outcome is a softness in grain prices which fully matches the strength that had previously existed. The Department of Agriculture, which had looked complacently upon unwarranted advances, becomes suddenly convinced that there must be something rotten in the state of Denmark and orders an investigation.

"Now there is or ought to be reason in all things. If

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures from various statistical exhibits appearing weekly in detail in "The Price Current-Grain Reporter," these figures representing the past week, the preceding week and corresponding time last year, here assembled for ready reference:

	Apr. 4, 1925.	Mar. 28, 1925.	Apr. 5, 1924.
Wheat—

speculation is inherently wrong or if it is inimical to the best interests of the farmer it is as much or more so when prices are being run by strong-arm methods to heights they can hardly hope to maintain as when the inevitable break comes. If the farmer is glad to accept the 'benefit' that comes to him or is alleged to come to him from bullish operations he must be prepared to accept the losses, if any, that are his when artificially stimulated values collapse."

MOST FIRES ARE SMALL AT FIRST

DURING the progress of a very serious lumber yard fire, recently, one spectator was heard to say that it was 30 minutes from the time the fire was discovered, before a single stream of water was turned on and that when first seen, half a dozen buckets of water would have put it out.

Practically every fire is small in the beginning and a few fire extinguishers or barrels of water, located in strategic positions about a mill or elevator, may be of more service during the first five or ten minutes, than the best equipped fire department in the world, especially if the latter does not swing into action for a half an hour.

Of course if the fire extinguishers are allowed to become useless through age, or the barrels are not kept filled with water, or the necessary buckets are not where they should be, some one is either careless or indifferent and will fail to heed our oft repeated words of warning about fires.

The way to be sure about this inside fire protection is to provide a regular schedule of dates for complete inspection and then see to it that the schedule is followed.

If you would be classed with progressives, place your announcements in the trade's only weekly, which is always first to get the live, up-to-date news to its readers.

CHICAGO, APRIL 8, 1925.

GRAIN TRADE REVIEW

GRAIN values continue to decline, a breaking of the drought in parts of the Southwest with a noticeable lack of confidence on the part of buyers resulting in declines that carried values down to the lowest prices in some months with all deliveries of oats and the deferred futures of corn to a new low on the crop, while September wheat also sold at a new low. The rains in the Southwest were quite heavy at some points and scant at others, so that while the outlook in many sections will probably be reported as better in the immediate future, others will be sending in dry weather claims shortly unless further moisture is secured. The private crop estimates were generally pessimistic, showing a condition ranging from 73 to 75, with a loss in acreage considerably above the average. The December condition was 81, and last year it was 83c. It is almost impossible to give accurate estimates as to the loss in acreage at this season, but even with the rains it is very probable that the loss will be above the average of 10 per cent of the area seeded last fall. One report placed the loss at 7,618,000 acres. Estimating the crop at the present time is hazardous, especially as the actual loss in acreage is not known. For this reason the trade is inclined to go slow in bulling wheat on a crop scare in March. The outstanding feature in the wheat trade for some weeks past has been the lack of confidence shown on the part of buyers, and at times rumors of financial difficulties either at home or abroad have helped to bring about declines. There has been somewhat of an orgy of these rumors of late, and while a few small continental houses or speculators have failed there has been no untoward developments in this country, Canada or the United Kingdom and there is no reason for alarm, as a break of nearly 66c in wheat would certainly have disclosed any trouble long before this, especially as the stock market has also been declining as has cotton.

Scare Period Near.
With the real crop scare period rapidly approaching, it is expected that the wheat market will be subjected to violent price changes. The May delivery has worked closer to the July, and if there is anything real bullish in the world's situation either at present or in the future, it should be reflected in

the nearby delivery. Closing out of large spreads between May and the July helped to cause the bad decline in the former which at one time went to around 8c over the July. The leading bulls have generally sold out completely and are doing nothing at the present time after having let immense profits get away from them. The general statistical position remains unchanged, and supplies on ocean passage have commenced to decrease due to a marked falling off in clearances from Argentina. This promises to lighten the load the speculative element has been carrying into near futures, but at the moment a large number of cargoes are arriving abroad and seeking buyers, so that the weight of the cash grain is heavy. The domestic visible is steadily decreasing and after the opening of lake navigation it would not be surprising if there was a fairly rapid disappearance such as usually comes at that season of the year. Navigation is expected to open April 10 to 15, much depending on weather conditions.

Seeding of the spring wheat crop in the American Northwest is well under way, weather conditions being generally very favorable and a start has also been made in Canada, about the earliest known. Owing to the early start it would not be surprising if there was a decided increase in the area both sides of the international line. In Montana considerable winter wheat area was lost, and much of it will probably be resown to the spring variety. Foreign crop outlook is rather spotted. North Africa has had fairly good rains and the situation in that section is better, and even the Indian wheat is turning out better than expected with new grain now moving. Exports from that country for the 1925-26 season will probably not be large, latest private estimates as to the surplus being around 14,000,000 or about half of what it was the previous year.

Coarse Grains.
Liquidation was on in corn and oats the past week, the burdensome supplies, combined with a slow cash demand, being the depressing influences. May corn sold under \$1 for the first time in eight months, and a sustained call from the East is necessary, if advances are to be maintained, despite the vast improvement in the price ratio as compared with hogs. Whereas there was a heavy loss in feeding operations a short time ago, the situation has been reversed and corn is now selling at a big discount under hogs which promises to increase farm consumption. Number of breeding sows on farms, as privately estimated, is about 14 per cent less than last season.

The large accumulation of winter shelled corn at primary markets has started to decrease, but the supply is still very large, and as far as known there is very little grain sold to go out at the opening of navigation. As far as oats are concerned, it is simply a case of too large a stock to be readily disposed of before the new crop is available. Seeding has made rapid progress even in the more northern sections of the main belt, and the rains which fell the latter part of the week were decidedly beneficial in many sections.

GRAIN MARKET SUMMARY.

Receipts of wheat, corn and oats at primary markets the past week, with comparisons, follow:

	Apr. 4, 1925.	Mar. 28, 1925.	Apr. 5, 1924.
Wheat	2,901,000	3,221,000	2,283,000
Corn	3,496,000	2,709,000	2,971,000
Oats	2,862,000	2,779,000	2,547,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1924-25.	1923-24.
Past week	9,259,000	7,801,000
Preceding week	8,709,000	10,153,000
Since July 1	905,688,000	850,509,000

All deliveries of wheat sold at a new low on the present downturn the past week, and while rallying from the low point finished with net losses of 5@

14½c, the latter on May, which at the inside figure showed 69½c under the high made on January 28. Liquidation was on and there was a noticeable lack of support and also confidence. The latter feature was quite pronounced, and prices dropped sharply on only moderate selling. Despite the bad break, foreigners took little interest in cash grain and sales abroad were small. Rains fell over parts of the Southwest and furnished much needed moisture, while other sections still remain dry.

July and September corn sold at a new low on the crop the past week, with May in new ground since last July. Liquidation was on and all deliveries sold under \$1 for the first time. A strong rally came toward the last on a good class of buying and short covering, but the finish was 12½@15c lower as compared with a week ago. The cash demand improved as the result of the decline, but is not yet brisk. An erratic market is generally expected until the large accumulation at terminal markets starts to decrease rapidly, or some new factor develops.

All deliveries of oats broke to a new low on the crop the past week due to heavy liquidation, and the finish was at net losses of 4½@5½c. The large stocks at terminal markets and limited support helped along the decline. Cash interests bought May and sold the July at 2c difference. May and July are selling lower than they were at this season last year. Rains over the Southwest were beneficial for the new crop. Rye was weak and sharply lower with the deferred deliveries at a new low for the season and closing trades were 8¼@11½c lower. Range of prices the past week follows:

	High.	Low.	Apr. 4, 1925.	Mar. 28, 1925.	Apr. 5, 1924.
Wheat	\$1.58½	\$1.36½	\$1.43	\$1.57½	\$1.03½
May	1.42½	1.27½	1.33½	1.41½	1.04½
July	1.33½	1.23	1.26½	1.31½	1.05½
Sept.					
Corn					
May	1.10½	.91½	.95½	1.10½	.78½
July	1.14½	.95½	.99½	1.13½	.79½
Sept.	1.14½	.97½	1.00½	1.13½	.79½
Oats					
May	.44½	.35½	.38½	.44	.46½
July	.46	.37½	.40½	.46	.44½
Sept.	.46	.39½	.41½	.46½	.40½
Rye					
May	1.23½	1.06½	1.12	1.23½	.66½
July	1.13½	.99½	1.04½	1.13½	.67½
Sept.	1.02½	.91½	.94½	1.02½	

WHEAT STOCKS AND CONSUMPTION.

Statement of the movement of wheat and consumption in 14 primary markets, compared for three years:

	1924-25.	1923-24.	1922-23.
Stocks at July 1	30,500,000	23,278,000	10,789,000
Receipts to Apr. 4	462,596,000	304,708,000	379,784,000
Shipments to Apr. 4	338,576,000	159,004,000	227,297,000
Stocks on Apr. 4	42,447,000	53,007,000	38,244,000
Consumption to Apr. 4	112,073,000	115,975,000	125,032,000

CORN STOCKS AND CONSUMPTION.

Statement of the movement of corn, and consumption in 14 primary markets, compared for three years:

	1924-25.	1923-24.	1922-23.
Stocks at Nov. 1	5,473,000	782,000	5,340,000
Receipts to Apr. 4	132,545,000	169,394,000	163,744,000
Shipments to Apr. 4	60,773,000	91,433,000	86,006,000
Stocks on Apr. 4	29,266,000	20,780,000	22,645,000
Consumption to Apr. 4	47,979,000	57,963,000	60,433,000

OATS STOCKS AND CONSUMPTION.

Statement of the movement of oats, and consumption in 14 primary markets, compared for three years:

	1924-25.	1923-24.	1922-23.
Stocks at Aug. 1	1,768,000	4,192,000	36,667,000
Receipts to Apr. 4	214,691,000	177,908,000	179,053,000
Shipments to Apr. 4	121,782,000	130,944,000	142,809,000
Stocks on Apr. 4	55,014,000	13,541,000	20,360,000
Consumption to Apr. 4	39,663,000	37,615,000	52,551,000

WHEAT IN PRIMARY MARKETS.

Receipts of wheat the past week at 14 primary markets, compared with the corresponding week last year and also for the period beginning July 1 to Apr. 4 (000 omitted):

	Apr. 4, 1925.	Apr. 5, 1924.	Apr. 4, 1923-25.	Apr. 5, 1923-24.
Chicago	157	166	65,359	47,155
Sioux City	20	7	1,772	1,307
Milwaukee	41	11	8,285	2,062
Minneapolis	1,070	1,030	93,582	92,676
Duluth	548	288	99,391	33,474
St. Louis	450	247	38,990	28,190

WORLD'S WHEAT EXPORTS.

Exports of wheat last week compared with the previous week and a year ago, as reported by the Broomhall service and forwarded to this paper:

	Apr. 4, 1925.	Mar. 28, 1925.	Apr. 5, 1924.
American	6,094,000	6,775,000	5,352,000
Argentine	2,893,000	2,457,000	6,565,000
Australian	4,616,000	5,368,000	3,040,000
Indian		224,000	8,000
Russian			
Others		192,000	32,000
Total	13,603,000	15,016,000	14,997,000

Of the above total wheat from America there cleared in the form of flour 2,000,000 bus.

The total export of wheat since Aug. 1, the commencement of the European crop year, compared for three years:

	1924-25.	1923-24.	1922-23.
American	326,613,000	316,113,000	328,603,000
Argentine	79,122,000	101,017,000	85,507,000
Australian	79,384,000	51,946,000	33,048,000
Indian	29,344,000	5,872,000	7,620,000
Russian	328,000	25,944,000	
Others	2,736,000	13,780,000	5,207,000
Total	534,527,000	514,672,000	460,088,000
Season		753,195,000	662,698,000

WORLD'S CORN EXPORTS.

Exports of corn last week, compared with the previous week and a year ago, as reported by the Broomhall service and forwarded to this paper:

	Apr. 4, 1925.	Mar. 28, 1925.	Apr. 5, 1924.
American	16,000	16,000	583,000
Argentine	516,000	404,000	376,000
African			230,000
Russian			
Others	994,000	365,000	1,244,000
Total	1,526,000	785,000	2,433,000

Exports of corn since Nov. 1, 1924, compared with last year and year before:

	1924-25.	1923-24.	1922-23.
American	451,000	9,577,000	38,136,000
Argentine	45,912,000	20,480,000	56,176,000
African	1,343,000	4,744,000	230,000
Russian	2,576,000	2,369,000	
Others	15,969,000	18,273,000	1,374,000
Total	66,251,000	55,443,000	96,166,000
Season		229,932,000	205,235,000

WORLD'S OATS EXPORTS.

Exports of oats last week, compared with the previous week a year ago, as reported to the Broomhall service and forwarded to this paper:

	Apr. 4, 1925.	Mar. 28, 1925.	Apr. 5, 1924.
American	228,000	545,000	276,000
Argentine	1,512,000	546,000	931,000
Others			
Total	1,740,000	1,091,000	1,207,000

Exports of oats since Aug. 1, 1924, and comparisons for three years:

	1924-25.	1923-24.	1922-23.
American	17,390,000	15,025,000	26,347,000
Argentine	36,213,000	25,027,000	18,129,000
Russian		180,000	
Others	1,714,000	920,000	3,690,000

Season		67,500,000	65,765,000

U. S. GRAIN IN CANADA.

The Canadian Bureau of Statistics reports the following amount of grain in store in Canada on Mar. 27:

	Mar. 27, 1925.	Mar. 20, 1925.
Wheat	1,227,148	1,389,119
Oats	1,700,343	1,704,343
Barley	257,411	271,911
Rye	3,373,200	3,490,818
Corn	1,076,100	1,113,491
Total, bus.	7,634,202	7,969,682

NORTH DAKOTA GRAIN DEALERS MEET

Hundreds of Elevator Men Present—Much Enthusiasm Displayed and Much Constructive Work Accomplished.

THE annual convention of the North Dakota Farmers Grain Dealers' Association, which met at Bismarck, N. Dak., on March 24-25 and 26, was one of the most enthusiastic and successful ever held by that organization.

The convention was called to order on Tuesday afternoon by President R. F. Gunkelman of Fargo and the afternoon session was largely taken up by an address of welcome by F. L. Conklin, president of the Bismarck Association of Commerce, a response and the annual address of the president, the report of the secretary and the financial report.

Governor Sorlie gave an exceedingly interesting and instructive address at the evening session on Tuesday, urging upon his hearers that they use their efforts to have more spring wheat and less durum planted and both he and President Gunkelman decried the effort to make the farmer rich by legislation.

Others on the program included B. L. Ewing, manager Farmers' Elevator Co., Doland, S. Dak.; J. P. Larson, secretary Farmers Grain Dealers' Association of Iowa; John N. Hagan, supervisor of grades, weights and measures of Bismarck; E. W. Fiedler, chairman Wisconsin Warehouse Commission; W. C. Kendall, of the American Railway Association; J. W. Shorthill, secretary Farmers' National Grain Dealers' Association; J. A. Wyman, president Commission Merchants' Association, Minneapolis; Frank Milhollan, chairman of the Board of Railroad Commissioners of North Dakota, and L. B. Waldron of the North Dakota Agricultural College.

President's Address.

President Gunkelman's address is in part as follows:

"Today we are here as delegates to the fourteenth annual convention of the North Dakota Farmers Grain Dealers Association. We are here for a definite purpose. To review work done in the past, speak of achievements accomplished, look into the future, and gather inspiration for the problems just ahead.

"One year ago when we met in Fargo we were confronted with a different situation than we are facing today. Europe then was gradually drifting toward economic chaos. With more men under arms than at any time save during the World War, it seemed there was little hope of averting complete disaster. At the same time in this country there was unrest and discontent. Radicalism was gaining ground and unsound political theories had a large following. In this state we were in the midst of a great depression. Thousands of farmers were facing bankruptcy and ruin. Our elevators had just passed through trying times. A period that left many wrecks of well-established business enterprises. The hope for better things on the part of the grain man was almost destroyed by threatened legislation. Politicians had seized on the plight of the farmer and were announcing proposed measures which would have been serious in their far-reaching effects, as far as our business would have been concerned.

"Today we see a great change, a change for the better. Europe, through the acceptance of an American plan, is fast recovering from its depression and stabilizing its economic system. To this country and especially to the wheat grower this change means a market for the product of our farms at profitable prices. The farmer benefits directly, but all lines of business feel the stimulus.

"Today there is a tendency on the part of the American people to get down to work, and to cultivate habits of thrift and sobriety. There is increasing evidence that the American farmer is becoming slow to follow the leadership of a radical minority.

"The past year saw the introduction

of uneconomic and socialistic legislation, proposed by self-seeking politicians and supported by impractical theorists. Legislation that would have destroyed the open market we today enjoy. Through the efforts of the grain trade and through the co-operation of leaders in agriculture, this legislation has been disposed of to the satisfaction of the great majority of farmers, who today recognize the great service rendered by the grain trade in winning this battle. The farmer today is reaping the benefit from the defeat of such legislation.

Legislative Trading.

"Recently there adjourned in this state a legislature, of whose record the state can hardly be proud. It seemed to me more of a trading place than a law-making body. In this, a purely agricultural state, it should not be necessary for our organization to maintain at considerable expense a legislative committee, to protest against measures detrimental to our business, or to lobby for measures needed to protect our customers, and the owners of our business. However, we were unable to secure the passage of a warehouse act to control and supervise the handling of grain. Our organization represents 50,000 farmers, owners of the largest single industry save farming itself, within the state. Still certain members of our legislature introduced legislation tending to give unfair advantages to certain interests, that have found that they cannot compete with the service and marketing agencies now afforded the farmers through our local elevators.

"Perhaps we as grain dealers have been at fault. Through lack of an educational program, we have failed to give our farmer customers the means of acquainting themselves with all angles of the grain business. We should explain to the farmer the working of the great marketing machine we use in selling the grain we buy. The farmer should know that here in America we have today a marketing organization exacting the smallest margin between producer and consumer, exacted in any country by any trade. We have given to the producer an open market where buyer and seller meet. Where they can buy or sell in any quantity, for any delivery, at any time. Where the producer can get cash for his product when it is delivered. Where contracts are enforced and safeguarded, in such a way that it has been easy to establish credit. Where grading and weighing are done under state authority, and checked so there is little chance for error or dishonesty. We are not saying that there is no chance for improvement in this system; to the contrary, it is the belief that improvements can and will be made. By doing away with duplication of effort in selling and distribution, waste can be eliminated and savings affected for the producer. We need to study and introduce more efficient operation of country elevators. Transportation can be simplified and perfected, thereby reducing freight charges. The use of waterways where available and the digging of a Great Lakes-St. Lawrence deep waterway should have our support.

"Let us bring about changes in our marketing system after careful study on the part of men familiar with marketing and not through politicians who are self-seeking. In fact, changes and improvements are constantly going on.

Course in Elevator Management.

"There is today a great need for the establishment of a course in elevator management and elevator accounting, grain grading and the study of propagation of varieties of grain. Such a course should be established at our agricultural college. Let our educational institutions in this state follow the example of the University of Washington. Let them make a study of the only successful marketing organization handling farm products within the state. Help our organization perfect better and more efficient handling methods; help create new uses for the products we handle; create and cultivate new markets for these products and train young men for

positions in elevator management. We will pledge our co-operation to such an effort.

"Our legislators, both state and national, seemed to have gained the impression that the passing of laws may be a cure for any economic ills we may be suffering from. They establish bureaus and commissions and add additional burdens on the already overburdened citizenship, instead of abolishing existing bureaus and freeing business from the shackles of too heavy taxation. What we need is qualitative instead of quantitative legislation. The great English historian Buckle in his 'History of Civilization' said that for five hundred years all advance in legislation has been made by repealing laws and we are heartily in accord with this statement.

"Just a few words as to the work performed by the Association the past year. I will not go into detail as our secretary will give you a complete report of our activities.

"Early last summer we helped in making a survey of the car needs for North Dakota. This information forwarded to the American Railway Association was used as a basis for demands on eastern roads for cars. These cars were furnished almost 100 per cent where needed. In fact, the service given by the railroads was such that our terminals were unable to unload the grain fast enough. There was then established a terminal committee; part of the Northwest Regional Advisory Board. Mr. Lee, our secretary, was in charge at Grand Forks. The establishment of this committee alone saved the situation. Without the work they performed we would have seen one of the worst tie-ups of transportation we have ever experienced, together with a resulting disastrous break in the market. As it was, the flow of grain was not interrupted to any great extent. Prices were maintained and terminals were enabled to function. Our association does not take credit for this performance, but through the co-operation of our organization with other organizations and with the Northwest Regional Advisory Board, this happy solution was brought about. Without an organization such as ours, this would have been impossible and resultant losses to grain dealers would have been heavy. Perhaps only those close to the situation can comprehend the far reaching effects a tieup of traffic would have had on the Northwest, and I am sure that the grain dealers of this state owe a vote of thanks to the Northwest Regional Advisory Board and to our association for the way in which the situation was handled.

"During the session of the state legislature we had a committee in touch with the situation at all times. We failed to secure the passage of a warehouse law, but we expect to put on a campaign of education in the state so we may have the full co-operation of all farmers, producers and grain men two years from now in securing the passage of a warehouse act; an act that will be fair to all interests; safeguard ticket holders and sanely regulate our warehouses. It is just as necessary to regulate our public warehouses and have adequate supervision over them as it is to examine our state banks at regular intervals. Fair regulation and supervision will be welcomed by the operators and the owners.

Closer Co-operation Urged.

"I would suggest that we have a closer co-operation between managers, directors and stockholders of the various elevators. Such co-operation between the manager and his patrons will eventually make stronger local organizations and tend to head off interest in new and untried marketing agencies. In other words, the local elevators' slogan should be 'Service to Stockholders, Patrons and to the Community.' It should be the policy of every elevator board to see that the business of the company is conducted in a business-like way. Grain should be bought on a fair margin of profit. Profits should be carried into a reserve fund until sufficient

surplus is built up so that the company may finance itself and be financially independent. Speculation in grain should be discouraged and a merchandising instead of a speculative business conducted. It is not necessary to maintain and operate elevators if you wish to speculate. The present fiscal year should prove a profitable one for the elevators of this state as good crops were the rule and most elevators had sufficient volume to insure a profit if grain was properly handled. If you have competitors at your station, do not get the idea that you can put them out of business and handle all of the grain. Such a policy sometimes reacts with sad results. Buy your grain at a margin of profit or let your competitor handle it. If he handles enough grain at a loss you will soon have easier competition. Watch the markets carefully; keep selling as you buy; keep expenses down to a minimum; clean your grain before shipping; tend to your own business and not your competitors; give service to your customers and you will have little to fear as to the outcome at the end of your fiscal year. On such a policy are built all successful elevator organizations."

Resolutions Adopted.

Among the resolutions adopted was one favoring a uniform system of inspection of wheat as to protein content, by the Minnesota inspection department; one favoring the buying and selling of binder twine, through the association and one favoring the St. Lawrence deep waterway.

Secretary's Report.

The secretary, in his report, outlined in detail the work done by the association during the year, emphasizing particularly the importance of taking increased interest in the association and in the work done by the Northwest Regional Advisory Board. He also explained in detail the attitude of the Farmers' Grain Dealers National Association toward the Grain Marketing Co., and reported an active membership of 399.

Election of Officers.

R. F. Gunkelman of Fargo was re-elected president, S. A. Garber of Fortuna was elected vice-president and P. A. Lee of Grand Forks was re-elected secretary. Directors elected were S. A. Garber, Fortuna, director at large; A. M. Thompson, Cogswell, first district; J. R. Maddock, Maddock, second district; J. S. Stevens, Falkirk, third district.

Four cities are making a fight for the 1926 convention. Fargo, Minot, Grand Forks and Jamestown issued invitations to the convention and the place will be decided later.

VISIBLE GRAIN SUPPLY.

The following table gives the stocks of grain in bushels in public and private warehouses at the principal ports and in transit by water on the dates named, with comparisons as compiled by the secretary of the Chicago Board of Trade for the week ending April 4 (000 omitted):

	In store at	Wheat	Corn	Oats	Rye	Barley
Baltimore	3,666	86	232	6,256	316

JARDINE OUTLINES POLICY.

J. C. HUSTED.

JOHN C. HUSTED, formerly president of the C. A. King & Co., Toledo, O., became associated with the Bartlett-Frazier Co. of Chicago on March 31, according to announcement made recently. He was the writer of the famous King market letter after the death of Frank I. King in 1921 and gained an enviable reputation for his statistics and grain reviews. Mr. Husted is thoroughly acquainted with world crop statistics and

has a very clever style in his market writings. He is well known throughout the trade and should prove a valuable addition to the brilliant array of talent in the world's largest grain market. His Toledo friends are sorry to see him go but believe the opportunity to be with such a well known firm will be much to his advantage and wish him well. Mr. Husted will leave his family in Toledo for the present and later make Chicago his permanent home.

built is sound. While it is true that production in agriculture is not as fully under control as in industry, yet it is clear that the policies and methods followed by farmers will profoundly influence their earnings.

"Like the manufacturer the farmer must study his market and adjust his production to the demands of the consumer. He must adopt the most efficient methods of farming which yield him maximum net returns for his capital and labor. He must improve and standardize the quality of his product in order to command the best market prices. And he must market his products in the most efficient way.

"The spread between prices paid to producers and prices paid by consumers has become excessively wide and should be reduced for the benefit of both producer and consumer. Coöperative marketing associations efficiently operated will be helpful in eliminating waste in the marketing process and in adjusting and standardizing agricultural production.

"Farming is a highly competitive business. The efficient farmer will succeed; the inefficient farmer will ultimately fail. Sound business methods applied to farming will increase and stabilize the farm income and elevate the standard of living on the farm. A well-balanced and efficient agriculture which supplies an even and dependable flow of products for which there is an effective demand will benefit both producer and consumer."

GALVESTON EXPORTS FOR MARCH.

Total wheat from Galveston for March, 1925, were 1,590,133 bushels, and the total since July 1, 1924, were 31,679,817. No wheat was exported through Galveston during March, 1924, and the total for the 1923-24 season to April 1, 1924, was 5,105,000 bushels.

There were no exports of corn, barley or rye through the port during March of this year, but 68,751 bushels of rye have been loaded that have not been cleared. During March, 1924, exports of rye amounted to 46,714 bushels.

The Letter Box

Need Rain.

Price Current-Grain Reporter: We are needing rain badly through this part of the country although there has been the advantage of having favorable weather for spring work on the farms and if we could have some good warm rains, the crops would start off in great shape.—George A. Wells, Sec'y, Des Moines, Ia.

Now with Cargill.

Price Current-Grain Reporter: I will, within the next few days, join the organization of the Cargill Grain Co. at Buffalo.

This company, as you know, deal extensively in all grains and do a considerable volume of trade through their Buffalo office.—F. J. Shonhart, Buffalo, N. Y.

Crop Report.

Price Current-Grain Reporter: The wheat over the south and central part of Kansas, needs rain, it is too early to estimate the amount of winter killed, would judge that about 15 per cent is winter killed, a good rain is needed all over Kansas.

There are lots of hogs in Kansas, more than a person would think, for almost every farmer has hogs on his place that will be ready for market within 30, 60 and 90 days.

I understand that some parts of Kansas they shipped out too much corn and are shipping in corn.—A. F. Koch, Hutchinson, Kan.

Meeting Dates Changed.

Price Current-Grain Reporter: On the 17th instant I advised you that we would be compelled to change the date of our annual meeting from Wednesday and Thursday, June 24 and 25, to Wednesday and Thursday, June 17 and 18.

It now transpires that the Toledo Chamber of Commerce had allotted the dates of June 17 and 18 to another as-

sociation, therefore, we will have to make another change.

Inasmuch as the Indiana Association will hold their meeting June 25 and 26 it will be necessary for us to set a date that will not conflict, therefore, we have decided to hold the meeting Tuesday and Wednesday, June 23 and 24, at Toledo.

Notices will be sent out in due time; in the mean time the trade journals should make mention of the change of dates.—J. W. McCord, Secretary, Ohio Grain Dealers' Ass'n, Columbus, O.

Mark Up Your Calendar.

Price Current-Grain Reporter: Our 11th annual convention will be held in St. Louis, Mo., May 7, 1925. Headquarters, American Annex Hotel. There will be a morning and afternoon session and they will be confined to strictly business discussions. If anyone receiving this notice wants any particular subject discussed, we will be pleased to include it in our program and will get someone well informed on the subject to lead the discussion. Mark the date on your calendar now, and bring your competitor with you. Everybody's welcome.—D. L. Boyer, Secretary, Missouri Grain Dealers' Ass'n.

Wheat and Oats.

Price Current-Grain Reporter: Growing wheat is making progress and as the season advances damaged spots are showing up more prominently; however, these are not numerous and most of the reports we receive are favorable. A good rain would be welcome as the surface soil is getting dry.

The recent decline has stopped all selling of corn by producers and elevator owners tell us the farmers are not even asking for prices at the present time. Occasionally some tired dealer disposes of a little corn he had on hand, but the movement is very light. The offerings even though small are equal to the demand that shows up, but it is not likely that any buyer will take on more than actual requirements on a market that declines several cents each day. A more stable market at most any level would likely improve the demand.

A moderate amount of corn held by dealers will not be shipped as long as there is no danger of it getting out of condition in their elevator and that in farmers' hands will likely be carried for some time. Financial conditions are better and banks do not seem inclined to force sales of grain. Many hogs that would have been rushed to market as soon as possible will now be fed to a good weight.—H. I. Baldwin & Co., Decatur, Ill.

RECENT FIRES.

The seed and grain warehouse of D. I. Bushnell & Co., at Main and Plum streets, St. Louis, was destroyed with a loss to building and contents, amounting to \$250,000.

A four-story frame building, used by the Shellabarger Mill and Elevator Co. at Salina, Kans., to house its barley roller mills and packing machinery, was destroyed by fire last week and a large stock of wheat in an adjoining warehouse was damaged. The loss is approximately \$100,000.

Fire in the hay barn of the Pecos Feed Store at San Antonio, Tex., caused a \$40,000 loss.

The Gallatin Valley elevator at Coffee Creek, Mont., burned entailing a loss of about \$20,000. About 6,000 bushels of wheat were in the burned structure.

The elevator of Jordan & Baird at Logansport, Ind., was destroyed last week causing a loss of about \$15,000. About 500 bushels of corn, some oats, some feeds and a quantity of fertilizer were stored in the building.

The plant of the Juniata Milling Co. at Juniata, Neb., was destroyed last week involving a loss of around \$20,000.

About 2,500,000 farmers are members of coöperative marketing associations throughout the country, a survey of the Bureau of Agricultural Economics shows.

THE DENVER GRAIN ASSOCIATION.

THE activities of the Denver Grain Association have shown a good, steady growth and the market is well equipped to weigh and inspect all grain arriving. The year just closing was the most successful in the history of the exchange due to the fact that Denver is becoming more and more recognized as a natural Western market for grain produced in Western Nebraska and Eastern Colorado; also, the freight rate structures have been re-arranged favorably which permits a free movement of grain West bound on a competitive basis. A fourteen per cent increase in the receipts of grain was noted during the past year as compared with

he has been directing operations of his eleven elevators located on the main line and high line of the C. B. & Q. Railroad in Nebraska and Colorado.

C. B. Rader was re-elected secretary and traffic commissioner, a position he has held for a number of years and has been instrumental in not only building up the activities of the Denver Grain Exchange but also is responsible for the changes in freight structures which are favorable to Denver and places this market on a competitive basis with other markets.

While Denver has a number of prosperous mills and elevators, still this market should have more storage capacity and it would seem logical that some grain man with vision could invest money profitably in the building of a large terminal elevator at this point.

Other officers elected to serve the exchange for the coming year: Robert Quest of the F. C. Ayres Mercantile Co. who was elected First Vice President; H. D. Williams of the Farmers Flour Mills at Berthoud, elected Second Vice President, and F. R. Holton of the Holton Grain Co. was elected Treasurer.

CROP REPORTS.

Bucyrus, O.: The wintering condition has been favorable for the wintering of the winter wheat crop. The season is early. The subsoil condition is favorable.

Riggston, Ill.: Wheat has made no growth but think it is alive. The season is early. Soil seems in good condition for growth of the wheat. Just start-

able. High winds damaging wheat. General rains must come soon.

Kingfisher, Okla.: The winter condition has been very dry for the wintering of the winter wheat. No rain this spring. Wheat holding fairly well except in some places where there has been winter killing.

WESTERN GRAIN DEALERS TO MEET AT DES MOINES.

The annual convention of the Western Grain Dealers' Ass'n will be held at Des Moines, Ia., on April 21 and 22 with headquarters at the Ft. Des Moines Hotel. This promises to be a well attended and interesting meeting. A well arranged program will be presented and the two days' subjects will be of interest to all.

PROGRAM.

Headquarters, Fort Des Moines Hotel. Tuesday, 10 A. M.

Reception and Community Singing. President's Address—J. H. Murrell, Jr., Cedar Rapids, Iowa. Secretary-Treasurer's Report — Geo. A. Wells, Des Moines, Iowa.

Tuesday, 1:30 P. M. Community Singing. "The Grain Dealers' National Association"—F. G. Horner, President, Lawrenceville, Ill.

"Railroads"—Representation Western Railways Committee on Public Relations. "Railroad Elevator Site Leases"—Hon. J. H. Henderson, Des Moines, Iowa Commerce Council, State of Iowa. "The Grain Futures Act" (Hedging, Storage and Carrying Charges)—J. H. Mehl, Chicago, Ill., Grain Exchange Supervisor. General Discussion.

Tuesday, 6:30 P. M. Banquet—Hotel Fort Des Moines. Music.

"Business Ethics"—Dr. C. F. Tacursh, Iowa City, Iowa, Department of Philosophy and Psychology, State University of Iowa. Entertainment.

Wednesday, 9:30 A. M. Community Singing. General Discussion—

Cost of Operating a Country Elevator. What Is a Reasonable Buying Margin? Feed Grinding and Side Lines. Use of Radio by Country Grain Dealers. Improvement in Fire Hazards.

FUTURE TRANSACTIONS AT CHICAGO.

The volume of sales for future delivery on the Chicago Board of Trade for the days indicated, subject to corrections of minor importance, as reported by J. W. T. Duvel, Grain Exchange Supervisor, were as follows (last three 000 omitted):

1925—	Wheat.	Corn.	Oats.	Rye.	Total.
Mar. 2...	93,571	34,669	10,955	6,263	145,458

COAST GRAIN PRICES.

Quotations on grain, reported by grain exchanges on the Pacific Coast as of April 2, are as follows:

Portland, Apr. 2.—Merchants' Exchange, noon session:

	April.	May.
Wheat—		
Hard white.....	\$1.60	\$1.60
Soft white.....	1.59	1.61
Western white.....	1.59	1.60
Hard winter.....	1.56	1.62
Northern spring.....	1.56	1.56
Western red.....	1.49	1.57
B. B. bluestem.....	2.00	2.10

Corn—No. 3 E. Y. shipm't. 42.00 45.50 42.00 45.50
Millrun, standard. 28.50 32.00 29.50 32.50
Bags—Spot, 10½¢ bid; July, 11½¢ bid, 12¼¢ asked; domestic, 11½¢ bid, 12¼¢ asked.

Flour—City delivery prices: Family patent, \$10.20 per bbl.; family pastry, \$8.70; whole wheat, \$8.20; Graham, \$8; bakers' hard wheat, 98s, \$9.60; bakers' bluestem patents, 98s, \$9.70; bakers' pastry, 98s, \$8.50.

Millfeed—City delivery prices: Millrun, \$38 ton; middlings, \$50; scratch feed, \$67; rolled barley, \$53; cracked corn, \$57; rolled oats, \$51.

Seattle, Apr. 1.—Prompt bid quotations on the Seattle Grain Exchange today follows:

Oats—No. 2 white feed, \$33 a ton. Corn—No. 3 yellow, \$42.50 a ton. Wheat—Soft white, \$1.52 a bu.; western white, \$1.52; hard winter, \$1.52; western red, \$1.50; northern spring, \$1.52; Big Bend bluestem, \$1.80.

Yesterday's car receipts—Wheat, 5 cars; corn, 2 cars; oats, 2 cars; flour, 8 cars.

San Francisco, Apr. 2.—The grain price record book of the Grain Exchange carries the following as latest quotations:

Barley—Feed, \$1.90@1.95; shipping, nominal. Wheat—Feed, \$3.10@3.15; milling, nominal.

Oats—Red feed, \$2@2.10. Mill Feeds—Shorts, \$39@41; middlings, \$50@52; millrun, \$38@41; bran, \$35@41.

Following are the corn quotations of the last 24 hours:

Corn—California white Egyptian, \$2.90; eastern No. 2 kafir, \$2.15@2.20; eastern No. 2 milo, \$2.30@2.40; No. 2 eastern yellow, \$2.31½; No. 3 eastern yellow, \$2.25½.

INLAND EMPIRE.

Colfax, Wash., Apr. 1.—White, \$1.27; red, \$1.25; barley and oats, \$38.

Dayton, Wash., Apr. 1.—Club, \$1.28; red, \$1.25.

Odessa, Wash., Apr. 1.—Bart and bluestem, \$1.70; turkey red, \$1.40; marquis and fortyfold, \$1.32; club and Jones five, \$1.30.

Walla Walla, Wash., Apr. 1.—Bluestem, \$1.60; club, \$1.45; turkey red, \$1.35.

Pullman, Wash., Apr. 1.—Red, \$1.27; white, \$1.30.

Davenport, Wash., Apr. 1.—Hard white, \$1.60; bluestem, \$1.50; marquis, \$1.25; club, \$1.25; fortyfold, \$1.25.

Lewiston, Idaho, Apr. 1.—Red, \$1.31; white, No. 1, \$1.34.

MR. PATTEN IS BULLISH.

"It looks to me as if all markets have swung to extremes in their reversal of the situation that existed in January and February. Trade now appears to be as pessimistic as it was optimistic at that time.

In wheat I am of the opinion that foreign buyers have used this market of late in which to hedge their holdings of wheat in store and afloat everywhere and that this has put an undue pressure on the market. I am still of the opinion that wheat supplies are so closely balanced as to require close figuring to carry both this country and the world through until the next crop is ready to move. While the prospect for the new crop at this time is fairly good, it is not yet made and the trade should not lose sight of the fact that there are possibilities of accidents yet ahead of the crop which might entirely change the situation."

ABNORMAL?

A correspondent refers to "our recent abnormal grain markets." They were unusual but were they abnormal? Were they not in fact just what the circumstances made them? Can we correctly call such effects abnormal merely because the same combination of circumstances is a rare or unusual thing? Any market which is restricted by arbitrary rules as to volume of buying or selling or fluctuation is abnormal even if it fluctuates only a fraction of a cent a day. But we can hardly call any open and untrammelled market abnormal no matter how unusual it may be, for it is the result of freedom of action by all interests concerned in it.—The National Stockman & Farmer.

O. M. KELLOGG.
President Denver Grain Exchange.

the year previous, with a four per cent increase in outbound movement which indicates a healthy growth of the Denver market. The following table shows the activities for the year ending Feb. 28th.

Statement showing number of cars inspected and weighed, special samples and reinspections during year ending Feb. 28, 1925.

At the annual stockholders meeting of the Denver Grain Exchange Ass'n held March 9th, officers for the coming year were elected as chronicled in a previous issue. O. M. Kellogg of the O. M. Kellogg Grain Co. was elected President. Mr. Kellogg, whose picture appears herewith, is a familiar figure in the grain trade and is widely known in Nebraska and Colorado among the producers, elevator operators, and mills. He was born in Iowa but later settled in Western Nebraska at Stratton in the year 1890, and has seen that section of the country develop from a prairie wilderness into one of the best grain producing areas in the United States and he had the privilege of taking part in its phenomenal growth. In 1898, he entered the grain business with his uncle and formed what was then known as the Kellogg Grain Co. After seven years, he purchased his uncle's interest and founded the O. M. Kellogg Grain Co. with headquarters at Stratton, Nebr. For three generations, his family has been engaged in the buying and selling of grain. In 1917, Mr. Kellogg moved his headquarters to Denver from which point

Sec'y Denver Grain Exchange.

ing to sow oats. Sowing clover seed in full blast.

Salisbury, Mo.: Winter wheat is favorable. The season is normal. The subsoil condition is favorable. Wheat south of and east of us is not so good.

Marionville, Mo.: The winter condition has been favorable for the winter wheat crop, but is needing moisture at present. The season is normal. The subsoil is favorable in a general way but moisture could be better.

Guthrie Center, Ia.: The winter has been favorable for the winter wheat. The season is about normal. The subsoil condition is favorable for starting of the spring crops.

Hull, Ia.: Ground is very dry and only a fair amount of subsoil moisture. Farmers not selling a bushel on decline. Feeders are anxious to buy but cannot at present prices. Pig crop is favorable. Some reporting very large average litters. Present hog price encourages feeding.

Junction City, Kans.: Winter conditions in this immediate vicinity generally favorable. Season normal. Condition subsoil favorable.

Ashland, Kans.: The winter condition is unfavorable of late. Too much wind and insufficient rains. The season is normal. The subsoil is unfavor-

LATE ELEVATOR NEWS.

Fire Losses.

Crete, Ill.—The elevator of William Werner was damaged by fire on March 28.

Frankfort, Ind.—On March 31 the Sims Milling Co. sustained a small loss from fire which was caused by a hot bearing or foreign matter in the rolls.

Lake Bruce, Ind.—The elevator of Jordan & Baird was totally destroyed by fire on March 28.

West Plains, Mo.—The main building and machinery of the Pease Moore Milling Co. were damaged by fire on March 27.

Juniata, Nebr.—Fire of unknown origin totally destroyed the mill of the Juniata Milling Co. on March 27.

Wichita Falls, Tex.—The hay barn of the Wichita Feed & Fuel Co. was totally destroyed by fire on March 31.

Tornado Damages.

Harper, Kans.—Harper Milling Co., mill, damage slight.

Valley Center, Kans.—Valley Center Farmers' Co-operative Mercantile & Elevator Co., small damage to office.

Winfield, Kans.—Consolidated Flour Mill's Co., mill, small damage loss.

Carrier, Okla.—Enid Milling Co., elevator, damage small.

Nash, Okla.—Enid Milling Co., elevator, damage small.

reaction makes me depressed and gives me a sinking feeling, I know the market will decline. If I feel sort of buoyed up and optimistic, then I know prices are going up. I can't really explain it but it works."

AMERICAN GRAIN EXPORTS.

The Department of Commerce reported the following exports of grain from the principal ports of the United States to foreign countries during the week ending March 28, 1925 (000 omitted):

Articles and countries.	Week ending Mar. 28, 1925.	Mar. 29, 1924.	July 1, 1924, to Mar. 28, 1925.
Barley	324	33	17,498
To United Kingdom		33	7,979
Other Europe	324		8,391
Other countries			1,128
Corn	107	600	5,636
Oats	170	1	5,025
Rye	251	69	31,216
Wheat	*859	952	168,053
To Italy	153	150	22,710
United Kingdom	407	109	36,059
Other Europe	282		53,318
Canada			48,614
Other countries	17	693	7,352
Total U. S.	1,711	1,655	227,428
Canadian in transit:			
Barley	74	17	10,640

Wheat	1,164	930	45,598
Total Canadian	1,796	1,213	69,241
*Including via Pacific ports this week:			
Flour, 38,100 bbls.			

NEW CORN BULLETIN.

The Agricultural Experiment Station of the University of Illinois has just issued its bulletin No. 259 on the cultivation of corn.

In its summary are found the following statements: "Weedy corn probably suffers more from a lack of nutrients than from a moisture deficiency in this climate." "The growth of weeds should be prevented in so far as possible by shallow rather than deep cultivation." The need for cultivation seems to be no greater in dry than in wet years; however on heavy soils which check badly, cultivation may be necessary in order

to fill the large cracks and thus stop the loss of moisture from the deeper strata."

ANNUAL REPORT ISSUED.

The forty-second annual report of the New Orleans Board of Trade showing the remarkable activity of that organization during the year 1924, has just been issued.

This report shows that while there was a net loss of 30 in membership during the year, the business done in practically all of the board's numerous lines of activity was greater than during 1923.

CHICAGO GRAIN STOCKS.

Wheat stocks in all positions in Chicago decreased 117,000 bu. last week, oats 953,000 bu. and rye 6,000 bu. Corn increased 536,000 bu. and barley 38,000 bu. Details follow, last three ciphers omitted, except in the totals:

	Public.	Private.	Total.*	Last yr.
Wheat ...	581	3,519	4,100,000	15,087,000
Corn ...	4,991	8,810	15,085,000	6,163,000
Oats ...	6,421	10,670	18,604,000	4,040,000
Rye ...	2,057	255	2,393,000	1,849,000
Barley ...	232	232	232,000	174,000
*Includes 1,284,000 bu. corn afloat, 1,513,000 bu. oats and 81,000 bu. rye afloat.				

CANADIAN VISIBLE.

Canadian visible supply of wheat increased 1,170,000 bus.; oats, 657,000 bus.; rye, 122,000 bus.; barley, 380,000 bus. These statistics represent terminal stocks only.

	Apr. 4, 1925.	Mar. 28, 1925.	Apr. 5, 1924.
Wheat	40,988,000	39,827,000	50,958,000
Oats	19,606,000	18,325,000	9,852,000
Rye	2,193,000	2,272,000	1,750,000
Barley	7,686,000	7,486,000	2,166,000
Afloat—Wheat, 890,000 bus.; oats, 132,000; rye, 140,000.			

CORN IN PRIMARY MARKETS.

Receipts of corn last week at 14 primary markets, compared with the corresponding week last year and also for the period beginning Nov. 1 to Apr. 4 (final 000 omitted):

	Apr. 4, 1925.	Apr. 5, 1924.	Apr. 4, 1924-25.	Apr. 5, 1923-24.
Chicago	1,315	724	47,734	55,211
Sioux City	29	78	2,993	5,338

Shipments	3,783	3,196	121,782	130,944

SOME FORECASTER.

An interesting story is going the rounds regarding Miss Audrey Erickson, daughter of Ed. Erickson, a grain dealer at Canby, Minn., as a grain market forecaster. The story states that a complete check since November has been kept on Miss Erickson's market forecasts and only three times has she failed in predicting the market's trend. She is a pupil at the local high school and states here forecasting is done through concentrating her mind upon the market. In commenting upon it, Miss Erickson is quoted as saying, "If my

CASH PRICES FOR GRAIN

Following is a statement of the weekly range of cash prices for grain as mentioned in the leading markets of the country for week ending April 4:

WHEAT—CHICAGO, ST. LOUIS, KAN. CITY, OMAHA, MILWAUKEE, M'POLIS.

No. 2 red	160 @ 175				
No. 3 red	155 @ 165				
No. 2 hard	140 @ 160	142 @ 147	139 @ 152	137 @ 146	
No. 3 hard		138 @ 149		136½ @ 144	
No. 1 north					132½ @ 156½
No. 2 north					129½ @ 154½

CORN—PEORIA.

No. 2 mixed	91 @ 104	89½ @ 99	86 @ 98		
No. 3 mixed	95 @ 106	90 @ 100	89 @ 98½	85 @ 94	
No. 4 mixed	88 @ 103	88 @ 101			
No. 2 yellow	100½ @ 113		92½ @ 106		
No. 3 yellow	96 @ 110	90 @ 104	90 @ 100	96 @ 109¾	
No. 4 yellow	88 @ 105½	88 @ 100		90½ @ 102	92 @ 102
No. 2 white	98 @ 104	94½ @ 103			
No. 3 white	96½ @ 107	97 @ 103	92½ @ 101		
No. 4 white	88 @ 104½				

OATS—

No. 2 white	43 @ 47½	45 @ 50			
No. 3 white	36½ @ 45½	42½ @ 48½	42 @ 45	40 @ 44	41 @ 45
Rye				110 @ 118½	
Barley	70 @ 85			82 @ 90	

Minneapolis: Corn—No. 3 yellow, 84½c @ \$1.01½; No. 4 yellow, 77½c @ 97½c; No. 3 mixed, 78½c @ 95½c. Oats—No. 2 white, 35½c @ 40½c; No. 3 white, 34c @ 39½c; No. 4 white, 31¼c @ 38½c. Rye—\$1.00c @ 1.17½. Barley—62c @ 83c. Flaxseed—\$2.67½ @ 2.77½.

This week Price Current-Grain Reporter offers its subscribers a cross-word puzzle in which some trade words are used. This is an easy puzzle.

No prizes are offered for solving this puzzle, but the name and address of every person who sends a correct solution to The Price Current-Grain Reporter by letter will be printed by us in the next available issue.

If the returns indicate that our readers are interested, the puzzles will be continued.

We will pay our readers \$5.00 for each cross-word puzzle sent in which is used.

Any person who submits a puzzle is requested to include in it several words relating to grain seeds or feed or grain elevator equipment. Names or parts of names of companies may be used, or names of men living or deceased who have been prominent in the grain trade.

Puzzles should be eleven to thirteen spaces apart. A complete drawing is not necessary, only a sketch showing half-inch spaces properly numbered with the solution written in accompanied by a list of definitions of the words.

Address each letter to PUZZLE EDITOR, Price Current-Grain Reporter, 309 S. La Salle St., Chicago, Ill.

DEFINITIONS.

HORIZONTAL.

1—A sorghum.

2—Behold.

3—Metal in its native state.

4—Doctors (abbr.).

5—A conjunction.

6—An ill-bred person.

7—Twenty-four hours.

8—To make a mistake.

9—A rubber belting advertised in The Price Current-Grain Reporter.

10—A manufacturer of an electric motor.

11—A story.

12—The front part of a ship.

13—You (poetically).

14—A continent (abbr.).

15—Periods of time.

VERTICAL.

16—Period of time (abbr.).

17—Free on board (abbr.).

18—Cured grass.

19—To scatter seed.

20—A beverage.

21—A part of the verb "to be."

22—A female sheep.

23—A river in Italy.

24—A fairy.

25—All right.

26—To yield.

27—Southern state (abbr.).

28—Brand of corn cutter advertised in The Price Current-Grain Reporter.

29—Found at the beach.

30—A measure (plural).

24—By.

25—A lyric song.

27—Instruments used in elevators to produce currents of air.

29—What a cow chews.

30—To piece out.

32—Half of an em.

33—Man's name (abbr.).

THE SOLUTION.

The answers to the cross-word puzzle appearing in the March 25th issue appear in the cut herewith:

N	O	R	T	H	A	K	O	T	A

Legal, Traffic and Arbitration Decisions

COURT DECISIONS.

Liability for delay in furnishing cars is based on "negligence." Duty of carrier to furnish freight cars promptly is not absolute, and liability for so doing is based on "negligence" are failure to exercise ordinary care or reasonable diligence.

Burden of proof necessary to excuse delay in furnishing freight cars because of abnormal operative conditions, stated. In excusing delay in furnishing freight cars burden is on carrier to prove not only existence of abnormal operative conditions, such as could not have been reasonably anticipated and avoided, but also that delay was caused solely by such conditions.

Evidence held insufficient to excuse delay in furnishing freight cars. In action against railroad company for delay in furnishing freight cars, evidence as to number of cars in shop for repairs held insufficient to excuse delay.

Failure to show distribution of cars was not discriminatory, or did not cause delay, held fatal to right to directed verdict on ground of excuse. In action against railroad company for delay in furnishing cars, failure to show that distribution of available cars among its several divisions was not discriminatory against division in question, or that delay was not due to any such failure on its part, was fatal to defendant's right to directed verdict on ground that delay was excusable.

Railroad in possession and control of less than two-thirds cattle cars, not without fault as matter of law for delay in furnishing cars. In action against railroad company for delay in furnishing cattle cars, though defendant owned sufficient cars where it had in its possession and under its immediate control less than two-thirds number of its cars, defendant was not without fault, as matter of law.

Railroad not excused for delay in supplying cars because they were not returned promptly though it complained to agent. Where interstate railroads employed agent to look up and return cars engaged in interstate commerce, fact that defendant's cars were not returned promptly though it had complained to such agent, did not excuse its delay in furnishing cars to shipper, as it could not shift its responsibilities to its own agent.

Facts necessary to enable carrier to avoid responsibility for unusual delay in furnishing shipping facilities, stated. To avoid responsibility to shipper for unusual delay in furnishing shipping facilities, carrier must show ownership of sufficient equipment to

meet ordinary demands promptly, and lack of negligence in permitting such equipment to be unavailable for such use.—McCord vs. L. & N. R. Co. (Ken. Ct. of App. S. W. Rep. 267-766).

TRANSPORTATION MATTERS.

Export Grain Rates.

The Interstate Commerce Commission in the complaint of Julius W. Jockusch et al., against the G. C. & S. F. et al., has found that the aggregate of the line haul rates and switching charges at Galveston on export grain, from central and western states, were unreasonable and awarded reparation to such of the complainants as may establish their right to receive it.

Nashville Grain Rates.

Examiner Woodrow of the I. C. C., has recommended the dismissal of the complaint of the Traffic Bureau of Nashville against the L. & N., et al., on the finding that local and reshipping rates on grain and grain products from Ohio and Mississippi river crossings to Nashville are not unreasonable nor unduly prejudicial.

Transit Charge Not Unreasonable.

Examiner Mooney of the I. C. C., recommends the dismissal of the complaint of the Moore-Lawless Grain Co., against the Missouri Pacific, having found that charges assessed on wheat from Kansas City to various points, and given transit at Leavenworth, Kans., and Marshall and Sweet Springs, Mo., were not unreasonable, unjustly discriminating or unduly prejudicial.

Railroad Legislation.

A total of 271 bills and resolutions affecting the railroads were introduced in the 68th Congress which adjourned on March 4, 1925. Of this number five were enacted into law, three in the first session and two in the second. The remaining 266 died upon adjournment.

The records show that 251 of the 271 bills were introduced in the first session of Congress and twenty in the second. The three bills which passed in the first session were:

1. An act extending from two to three years the time in which a shipper may begin action for the recovery of any overcharges by a railroad company.

2. An act authorizing the Interstate Commerce Commission to employ not to exceed 65 locomotive-boiler inspectors. Prior to this act the commission had been limited to 50 inspectors.

3. An act creating the Inland Waterways Corporation to take over from the Secretary of War the operation of canal-boat and inland waterway services which were turned over to him on the termination of federal control.

The Inland Waterways Corporation is to have \$5,000,000 capital, the stock being entirely subscribed by the government. The Secretary of War acts as the head of the corporation. If he thinks it desirable to discontinue the operation of any part of these services he must so report to Congress. No member of the board shall be an officer, director or employee of any railroad.

The two measures passed in the second session of Congress were:

1. The Hoch-Smith resolution entitled "Declaring agriculture to be the basic industry in the country and for other purposes." This resolution was based on the assumption that agricultural products pay too high a rate as compared with their value, and that perhaps manufactured articles pay rates too low as compared with their value. In fact the resolution is a direction to the commission to ascertain whether or not this is true; and, if true, to make readjustments accordingly. The resolution was signed by the President on Jan. 30, 1925.

2. A measure designed to aid in the successful prosecution of persons illegally breaking the seals of railroad cars.

Organize Traffic Committee.

The Feed Manufacturers' Traffic Committee, whose membership consists of traffic managers of the various feed manufacturers, has been organized in Kansas City. Officers are: Chairman, S. T. Henson, traffic manager, the

Southard Feed and Milling Company; secretary, L. N. Conyers, traffic manager, North Kansas City division, Arcady Farms Milling Company; treasurer, W. L. Bridges, president, the Western Grain and Milling Association; directors, R. N. Steinacker, traffic manager, the Tarkio Molasses Feed Company, and F. H. Nesmith, traffic manager, Kansas City branch, the Ralston Purina Company.

New Complaints.

Mann Brothers Co., of Buffalo, N. Y., have filed a complaint against the L. L. & W. et al., alleging unreasonable rates on flaxseed from New York harbor points to Buffalo. Spencer Kellogg & Co., have filed a similar complaint against the N. Y. C. et al., and Archer-Daniels-Midland Co. have filed a similar complaint against the Erie et al., as to rates from Edgewater, N. J., to Buffalo.

Security from Lightning Losses

The Mutual Fire Prevention Bureau names lightning as one of the two chief causes of elevator fires during 1924.

Take heed and protect yourself now. Insist on Underwriters' Laboratories Master Label installation. Small in cost in proportion to fixed investment, it assures your insurance reduction.

Fire protection is not available to most grain elevators. Stop this greatest of fire menaces. Saving on insurance pays for a Security System in a few years.

We are manufacturers and installers of Underwriters' Laboratories approved lightning conductor systems for grain elevators, warehouses, factories, smoke stacks and other large structures. Write for specifications and information on how to prevent lightning losses.

BARLEY MARKETS.

MILWAUKEE — Demand for malting grades was very limited in the Milwaukee market last week and black oats mixtures and other inferior grades were not wanted at all as prices declined 5@6c for the period. Receipts were very light or the decline might have been greater. Receipts were 64 cars as compared with 98 cars a week ago and 88 in 1924. Choice to fancy, 48 to 50 lb. test, quotable at 89@91c; fair to good, 44 to 47 lb. test, 78@88c; light weight, 40 to 43 lb. test, 73@85c; feed, 65@80c. Iowa quoted 75@90c, as to quality; Wisconsin, 75@91c; Minnesota, 75@90c; Dakota, 75@89c; feed and rejected, 65@80c.

DULUTH—Barley trade was draggy during the last week and weakness was shown, reflecting breaks in the markets in wheat and other grains. Feeders were out for small lots at times but when severe price recessions came about in other grains, they backed away. Receipts during the week were 18 cars, and quotations closed from 3 to 7c off at from 64c to 81c.

KANSAS CITY—Two cars of barley constituted the week's receipts. Sales were filled chiefly from store. Dealers reported a fair demand, but on the basis of a decline of 10@11c per bushel. The recession was in reflection of developments in the corn market. No. 3 closed at 76@81c and No. 4 at 73@77c. Stocks fell 4,000 bus. to 1,000. New acreage in Kansas is said to be the largest in several years, if not a high record.

MINNEAPOLIS—The break in other grains was bad for the cash barley and with the exception of the regular demand for barley of malting quality, the market was inclined to be slow all through the week. Thin and oaty stuff

did not seem to be wanted at all. Feed barley slow sale. Local stocks total 2,182,702 bu., vs. 2,188,635 bu. last week and 488,856 last year. Today's range of sales ran from 64@79c.

PORTLAND, ORE.—This market is the duller of the coarse grain markets. Not a car came on the Portland market the past week, and from the interest shown in barley, nothing can be expected for some time to come. More interest is being shown in new crop California barley right now. Conditions are reported excellent in that state for the growing crop. Ample rainfall, with seasonable weather is bringing all crops in that state along in good shape. Neither bid nor asking prices have been put on the Exchange board for several days, indicating the position of barley in this market.

CHICAGO.—Offerings light and demand good. Feeling better and Saturday's full prices paid for the few cars sold. Receipts practically all on to arrive sales. Exports were larger at 150,000 bu. Last week they amounted to 365,000 bu., against 82,000 bu. last year. Visible decreased 49,000 bu.; last year decreased 278,000 bu.; total, 3,766,000 bu.; last year, 1,302,000 bu. Local stocks increased 36,000 bu.; total, 230,000 bu.; last year, 147,000 bu.; malting, 75@90c; feeding and mixing, 70@83c; screenings, 35@63c. Local inspection, 24 cars. Shipping sales, 1,500 bu.

RYE MARKETS

CHICAGO RYE FUTURES.

Following is the range of future prices for rye for the week ending April 4:

	Mar.	May.	July.	Sept.
30 1.13 1/2@1.23 1/4	1.04	@1.13 1/4	.96	@1.02 3/4
31 1.11 @1.20	1.02	@1.11	.95	@1.00 1/4
Apr. 1 1.20 1/2@1.23 1/4	1.10	@1.13 1/2	1.00	@1.02 1/4
2 1.14 1/2@1.19 1/2	1.05 3/4	@1.10	.95 3/4	@.99
3 1.06 1/2@1.16 1/2	.99 3/4	@1.07 1/2	.91 1/4	@.96 1/2
4 1.08 @1.13 1/4	1.01 3/4	@1.06 3/4	.93	@.96 1/2

Receipts of rye at Chicago for the week of Apr. 4, 1925, were 10,000 bus. vs. 3,000 bus. same week of 1924; shipments were 14,000 bus. vs. 10,000 bus. same week of 1924.

RYE SPOT QUOTATIONS.

Closing outside prices for rye of No. 2 quality cash for the week ending April 4, were:

	Mpls.	Dul.	Chi.	Win.	Mil.
Mar. 30\$1.08 1/4	\$1.09 1/2	\$1.13	\$1.13 1/2	\$1.20	
Mar. 31 1.12	1.14 1/2	1.18	1.18	1.14

Jan.	1.51 1/2	.89 1/2	1.11	1.73	2.41

RYE MARKET.

MINNEAPOLIS—Offerings of this cereal were generally light from road sources through the week but elevators offered some stuff out of store, which prevented any boosting of premiums. Shippers were after rye on one or two days but seemed to have their fill early, taking only around 10,000 bushels altogether. Mills were bidding for the choice quality right along but were not a bit interested in other than that. Local stocks total 966,649 bushels tonight, vs. 1,024,246 last week, and 7,950,784 a year ago. Today's range of sales showed No. 1 rye quoted at 3@4c over the May and No. 2 at 2@3 1/2c over the option.

MILWAUKEE—Only three cars of rye were received in the Milwaukee market last week and prices were therefore largely nominal throughout the period. The first part of the week quotations were very uneasy and showed declines but things improved the last few days and the total decline for the week was 10c per bu. Receipts were three cars as compared with five the previous week and three in 1924. Considerable Wisconsin sold on a forward shipping basis. Dry and choice was scarce and in request. Market closed at \$1.09@1.10 for No. 2, inside for Wisconsin, ranging at 2@3c under May price.

NEW YORK—Export business in rye during the past week was again active with further good sales reported to Russia and also to Germany. It develops that during the last couple of weeks about six to seven million bushels of rye were sold f. o. b. Baltimore. This rye was held by a Western party.

DULUTH—The market in rye came under persistent selling pressure during the last week, resulting in prices receding in chunks at times and the cutting of the market structure down to the lowest level in several months. Fair export trade was claimed to have been worked with foreigners coming in on the breaks. Confidence in the final outcome of the market struggle was said to have been destroyed for the time being. Closing prices of spot rye were 10 3/4 cents off at \$1.07 1/4.

CHICAGO.—Rye closed 2 1/2@4c higher for futures and firm for car lots. Trade was of moderate volume, still the market was fairly active. There was a good class of buying by commission houses and prominent locals. Strength in wheat was an influential factor. Considerable pressure from the Northwest, but failed to check advance. Nothing reported sold for export. Visible supply decreased 2,076,000 bu. to 19,878,000 bu.; last year, 21,798,000 bu. Local stocks decreased 6,000 bu. to 2,312,000 bu. Exports for the past week, 1,913,000 bu.; last year, 580,000 bu. Seaboard clearances, 220,000 bu. Car lots were in good demand at 2c under May for No. 2. Offerings light. Local inspection, 10 cars. No. 3 sold at \$1.10 1/2. No. 4 sold at \$1.01.

Beans and Potatoes

BEANS QUIET.

SHEPARD, MICH.—We find the bean situation very quiet with practically no receipts from the farmers and apparently no demand from the trade. In our opinion there are less beans in the farmers' hands than usual in this vicinity at this time of year.—Claude H. Estee.

BEAN MARKET QUIET.

DULUTH.—The market here on beans is very quiet. Very little movement with our trade. Buyer's here are being supplied with Minnesota choice hand picked pea beans, which we are advised they have been buying freely at from \$5.75 to \$6.00 per cwt. delivered Duluth. This competition shuts out buying on Michigan beans as they cannot compete on a delivered basis and quality of Min-

nesota beans this year is equal to the Michigans and buyers will naturally buy where they can to best advantage. With general lines very quiet we do not look for any big movement in beans for some time.—Draper Brokerage Company.

BEANS AND POTATOES.

Quotations follow for bids of good quality condition beans and potatoes sacked, per cwt., unless otherwise specified, as of week of Apr. 4:

Beans—

Chicago—Selling moderately at steady prices. Per 100 lbs.—Spot navy beans, Mich., fancy, \$6.25; red kidney, fair stock, \$10; large, dark, extra quality, \$10.50.
Boston—Choice hand-picked pea beans, \$6.75@6.90; fair to good, \$6.50@6.75; California small white, \$8.35@8.50; yellow eye, extras, \$6.75@6.90; red kidneys, ch., \$10.50@10.75; fair to good, \$9@9.50; California limas, \$14.50@15; native green, peas, \$7@7.50; Canada, \$5.25@5.50; split, \$5.50@5.75. Jobbing prices, 25 to 50 cents above car lots.
San Francisco—Whites, small, 8 1/4c; do, large, 7c; pinks, 9c; limas, 15c; cranberry, 8 1/2c; kidney, 12c; Mexican garbanzos, 11 1/2c; lentils, large, 9c; do, small 8c; black eye, 11c; Mexican reds, \$8.85 per cwt.; speckled bayos, 8 1/2c; bayos, 8c.
New York—Pea, \$6@6.50; lima, Calif., \$14@14.50; lentils, \$5.75@6; red kidney, \$9@10.25; white kidney, \$7.75@9.
Minneapolis—Nominal quotation, per pound, including sacks—Beans, fcy., h.-p. navy, 6c; lima, Calif., 18c; brown, 5c; peas, green, fcy., 8c; yellow, fcy., 6c; marrowfat, 9c.

Potatoes—

Chicago—Market was quiet and prices about unchanged. Demand was slow and the volume of trade light. Most of the regular buyers were inclined to hold off until next week. The little inquiry noted was from a few buyers having some urgent orders to fill. Wisconsin sacks sold mostly at 80@85c and a few sales higher. Idaho russets sold at \$2.25@2.45. Receipts were 88 cars and cars on track 260. Sales reported today were: Per 100 lbs., round white, Wisconsin, bulk, 1 car at 80c, 1 car at 95c, 1 car dusty at \$1.15; sacks, 1 car at 75c, 7 cars at 80c, 3 cars at 82 1/2c, 2 cars at 85c, 1 car at 95c, 1 car at \$1.00; Minnesota, 1 car at 75c; Idaho russets, 1 car at \$2.25, 1 car at \$2.30, 1 car at \$2.40, 2 cars at \$2.45. Bulk, per 100 lbs., Wis., dusty, 95c@1.10; ordinary and poor, 70@90c; round white, sacks, Wis., 90c@1.00; ordinary and poor, 80@85c; Idaho russets, \$2.25@2.50; Ohio, Red Rivers, 90c@1.05. New potatoes—Are increasing; demand is fair. Barrels, Florida, Spaulding rose, \$10.00. No. 2, \$8; No. 3, \$6; boxes, \$3.75. Old—Boxes, Idaho, repacked, \$2.25@2.50. Sweet potatoes—Arrivals moderate; light demand noted. Bushels, Illinois, Jerseys, \$2.50@2.75; Illinois, Nancy Halls, \$2.25; soft and poor, \$1.50; hampers, Tenn., Nancy Halls, \$2.50@2.75; Illinois, \$2.25@2.50; Jerseys, eastern, kiln dried, \$3; ordinary, \$2.25; Illinois, Jersey, large hampers, \$2.50@2.75.
New York—Old, 150-lb. sack—L. I., \$1.50 @2.25; Maine, \$1.75@2.10; state, \$1.50@1.75; Va., bbl., 2nd crop, \$2.75@5. New—Fla., bbl., \$2.50@9.50; Cuba, crt., \$3@3.25. Sweet potatoes—Jersey, bskt., 75c@3.50; Del. and Md., bskt., 75c@2.50; Yams, bskt., \$1.75@2.

BUCKWHEAT MARKETS.

MILWAUKEE — Buckwheat quotations continued unchanged the past week. Silver hull is quoted at \$2.10@2.15; and Japanese at \$2.20@2.25.

CHICAGO.—Fancy Jap buckwheat quotably \$1.70@1.75. Dirty seed less.

ST. LOUIS.—Quoted at \$2.20 per 100 lbs. nominal.

BUFFALO.—Nominal quotations are at \$2.30.

Terminal Markets

NEW ORLEANS.

M. L. Davis, Correspondent.

J. M. Chilton, of Hall-Baker Grain Co., St. Louis, Mo., spent several days in New Orleans this week.

W. A. Forrester, assistant general agent of the Steele S. S. Co., has returned from a business visit through the middle west.

Standard blackstrap molasses is firm at 13c per gallon f. o. b. tank cars New Orleans; medium blackstrap is quoted at 13½c and light blackstrap at 14c per gallon.

Thomas P. Gibbons, vice president of the John T. Gibbons, Inc., has returned to his office after being confined two weeks in the Hotel Dieu, where he underwent an operation. He has completely recovered.

All plans for the entertainment, housing and other details of the American Feed Mfrs.' convention, May 7, 8 and 9, are progressing nicely. The Hotel DeSoto and the Hotel Roosevelt have catered to our trades in years past and are prepared to furnish their usual splendid accommodations.

Export shipments from New Orleans for the month of March were: Wheat, 2,977,727 bushels; corn, 288,667 bushels; oats, 146,861 bushels. This shows an increase of over 2,000,000 bushels for the corresponding month of last year. Stocks in elevators as of today are: Wheat, 2,019,000 bushels; corn, 332,000 bushels; oats, 246,000 bushels; rye, 20,000 bushels; barley, 2,000 bushels. Cars on track: Wheat, 109; corn, 4.

A new record for the amount of grain brought to New Orleans by barges during a single month was established in March when the three barge lines unloaded into the public grain elevator here 2,232,551 bushels of wheat, according to an official report yesterday. The Mississippi-Warrior Barge Line with 27 barges carried 1,261,286 bushels, the Goltra Barge Line with 12 barges carried 834,133 bushels, and the West Kentucky Coal Company with five barges carried 137,132 bushels.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

Exports of grain for the week ending April 3 were 377,938 bushels of wheat.

The Grain Union, Inc., of New York City has been elected to membership in the Philadelphia.

Stocks of oats on April 1, 1925, were 220,115 bus. against 174,304 bus. March 1, 1925, and 65,544 bus. April 1, 1924.

Stocks of corn on April 1, 1925, were 225,196 bus. compared with 190,266 bus. on March 1, 1925, and 352,277 bus. April 1, 1924.

Stocks of wheat on April 1, 1925, were 2,265,750 bus. compared with 2,335,105 bus. on March 1, 1925, and 1,394,906 bus. April 1, 1924.

The number discharged at Port Richmond during the same period was: Wheat, 795 cars; corn, 2 cars; oats, 10 cars; total, 807 cars.

Louis G. Graff, with his wife and daughter, have just returned from a two months' voyage to South America and this following a long trip around the world.

Stocks of rye on April 1, 1925, were 161,577 bus. compared with 178,690 bus. March 1, 1925, and 169,217 bus. April 1, 1924. There were 29,938 bus. of barley on April 1, 1924.

The number of cars of grain unloaded at Girard Point during the month of March, 1925, was: Wheat, 1,527; corn, 17 cars; rye, 113 cars; oats, 49 cars; total, 1,706 cars.

The number unloaded at Twenty-ninth St. elevator during March, 1925, was: Oats, 36 cars; corn, 8 cars; mixed grains, 3 cars; peas, 1 car; barley, 1 car; total, 49 cars.

David H. White, head of the Hancock Grain Co.; Jas. Vandergriffe and Fred. Gearler, two traffic men on 'Change, are going to spend a week fishing at Oyster, Va.

The following out-of-town visitors were registered at the Commercial Exchange during the week: M. Mayhew, Cedarville, N. J.; L. D. Mancill, Kennettsquare, Pa.; J. L. Stetser, Woodstown, N. J.; J. Frank Webb, Smyrna, Del.; L. G. Groff, Geo.

Butcher, Long Beach, Cal.; Stauffer Hiesland, Litiz, Pa.; A. S. Turner, Chestertown, Md.; F. K. Peters, Scranton, Pa.; Ralph Gregory, Petersburg, Pa.; J. Hostetter, Hatfield, Pa.; J. R. Jones, New York City; M. N. Nelson, Hebron, Md.

Receipts of flour and grain for the week ending April 4 were: Flour, 37,855 bbls.; wheat, 496,836 bus.; corn, 18,956 bus.; oats, 23,099 bus.; rye, 50,807 bus., and 360 tons of feed.

Stocks of flour and grain in Philadelphia public warehouses on April 1, 1925, were 162,675 bbls. compared with 156,308 bbls. in March, 1925, and 144,200 bbls. April 1, 1924.

Philadelphia Flour Market.

Philadelphia, April 4.—The flour market continues dull and sluggish and prices are about 25c per bbl. lower under increased pressure to sell due to the unsettled condition of the wheat market. As a result of the wild fluctuations in the grain, buyers will not purchase flour in excess of urgent wants. Receipts for the past week were 37,855 bbls. We quote per 196 lbs. packed in 140-lb. jute sacks: Soft winter straight, western, \$7.75@8; soft winter straight, nearby, \$7.25@7.75; hard winter straight, \$8@8.50; hard winter short patent, \$8.50@9; spring first clear, \$7.75@8; spring patent, \$8@8.50; spring short patent, \$8.75@9; fancy spring and city mills patent family brands, \$9@9.75. Rye flour, \$7.50@8 per bbl. in sacks, as to quality; buckwheat flour, \$4.25@4.50 per 98-lb. sack.

BUFFALO.

E. I. Behler of this city was a recent visitor in Philadelphia.

Peter Wenner, formerly in the wholesale flour and feed business in this city, is dead.

Charles M. Kennedy of the firm of Charles Kennedy & Co. is taking a short vacation at Southern Pines, N. C.

H. C. Veatch, general eastern representative for the Kansas City Milling Co., was a recent visitor to the Wichita, Kans., office of the company.

L. S. Chapman, president of the Great Eastern Elevator Corporation, announces the purchase of the property familiarly known as the Great Eastern Elevator.

E. F. Morris, formerly in charge of Iowa feed sales for the Washburn-Crosby Co., has been transferred to this city and placed in charge of the coarse grains department of the company here.

Among recent Buffalo visitors were E. C. Kessler and George Hoise of the Ames-Burns Co., Jamestown; F. L. Daily of Binghamton, W. Duncan of New York City, David Stott of the David Stott Flour Mills, Inc., Detroit, and Fred Kenyon.

The annual election and banquet of the Buffalo Flour Club will be held at the Hotel Buffalo on April 17. Arrangements are in charge of a committee of which M. C. Burns is chairman, the other members being Edward A. Miller, Frank D. Wilson, Harold Venhern and William S. Preyer.

PORTLAND, ORE.

Phil Benedict, manager of the Kerr, Gifford & Co. Seattle offices, was a Portland visitor the latter part of last week.

Recent visitors to the Merchants Exchange have included K. McLennan, Harry Snowball and A. W. Whitmore of Vancouver, B. C.

Oregon received \$1,490,600 for improvement and maintenance of its rivers and harbors during the fiscal year beginning July 1, according to allocations of funds made by the board of army engineers.

The Old Fashioned Cereal Mill Co. has under way plans for a new building to be occupied within the next few months. Additional capital is to be secured and expansion of sales through advertising is contemplated.

M. B. Grenfell has resigned as assistant to W. D. B. Dobson, general manager of the Chamber of Commerce, to enter business and is succeeded by E. R. Morris. Mr. Morris formerly held the position, leaving it about eight months ago to become manager of the industry department of the chamber. For the time being, at least, he will serve in both capacities.

The wheat crop situation in the state is discussed by Professor George R. Hyslop and E. R. Jackman of the Agricultural college as follows: Winterkill, eastern Oregon, 480,000 acres; western Oregon, 57,000 acres; total, 537,000 acres. Nearly all eastern Oregon winter-killed area replaced with spring wheat. Part of western Oregon area will be planted to oats, barley, corn, etc. More mixed wheat than last year and probably less smutty wheat. Decrease in hard red winter and white club wheat.

Protest is expected to be made by the Portland grain trade against the cancellation of export grain rates from Montana by the Great Northern railway, just announced, to be made effective April 23. No reason is known locally for the withdrawal of the rate, which is less understandable here by reason of the fact that the Great Northern has for the last three years upheld contentions of Pacific coast millers for the export rate, as well as offering evidence in support of it at past hearings.

The protest of the Portland Merchants' Exchange against the proposed ruling of the San Francisco Exchange that only California barley would be applicable on Exchange trades is having influence there. The protest was wired from Portland by the local exchange and a meeting was held in San Francisco on the 18th of this month. The matter was again referred to committee by the San Francisco Exchange, where it now rests, according to Jack Lavin, Portland manager of the Portland Flour Mills Co., who returned from there last week. It is hardly likely that the ruling will go into effect, as vigorous protests have been made against it.

Terminal receipts, in cars, were reported by the Merchants' Exchange for the season to April 1 as follows:

	Wh't	B'y	Fl'r	C'n	Oats	Hay
Portland—						
1924-25.....	14,062	500	1,493	518	596	1,760

SALT LAKE CITY, UTAH.

Fred L. W. Bennett, Correspondent.

It is stated that wheat on Idaho farms is lower now than at any time since 1918.

Alfalfa seed is expected to be grown hereafter on a large scale in the region around Nephi.

Utah's corn production last year was 75 per cent of a normal crop, compared with 76 per cent the year before.

Death has claimed Thomas E. Jeremy, manager of the Jeremy Fuel & Grain Co. of this city, one of the best known concerns of its kind in Utah.

A survey of surplus hay in Salt Lake County available for sale is being made at this time. It was decided to make the survey after statements to the effect that the county has a large surplus of hay this year.

The industrial situation continues good. Metal mining and smelting, livestock and wool, building trades, all are in excellent shape, whilst the outlook for the tourist business, due to the development of southern Utah's scenic spots, is such that all records are expected to be broken this year.

The big livestock show at North Salt Lake created quite a stir, as it usually does. Some very fine stock were exhibited, and the fat stuff brought good prices. The show is held each year during the early part of what is known locally as Conference Week, which assures a large attendance.

The adoption of United States grades on alfalfa by the State Board of Agriculture was favored the other day in a meeting of growers, dealers and consumers held at the Ogden Union Stockyards, Ogden, a few days ago. The decision followed a public hearing conducted by W. A. Wheeler, chief of the hay, grain and seed division, and E. C. Parker, in charge of hay grading for the Department of Agriculture.

The packing industry is declared to be in better shape than it was. An official of a big Ogden packing company told your correspondent last week that although hogs were costing more than they were a month ago they are cutting out now at practically an even break, whereas there has been about \$2 or \$2.25 a hog loss. He said he expected this improved condition to continue for some time to come.

The Albert W. Bell Feed Co. of Ogden recently changed from the credit and delivery system to a cash and carry basis. Mr. Bell tells your correspondent he is delighted with the result. He said he is able to operate on a smaller margin of gross profit in this way and that many new customers have been secured as a result. He declared that the business had actually tripled since the change.

Less hay and grain was left on Utah farms carried over from last season on March 1, 1925, than was carried over on the same date last year, according to the monthly crop report of Frank Andrews, statistician. This year there were 66,000 bus. of corn, 794,000 of wheat, 739,000 of oats, 159,000 of barley and 375,000 tons of hay. On the first of March last year there were 124,000 bus. of corn, 1,642,000 of wheat, 980,000 of oats, 205,000 of barley and 538,000 tons of hay.

The Rocky Mountain Grain Co.

DENVER, COLO.

Always in Market
All Grain

There is not much activity now in the grain business in this section, but prospects are better than they were a month ago. A member of the firm of Alfred-Beckett Co. of the Atlas building said the demand was not strong for anything at this time. Very little grain was being offered, too, he said. The following price list was issued by this firm to its trade as of April 1: For prompt shipment or cars in transit: No. 3 mixed corn, cwt., sacked, \$2.25; No. 3 yellow corn, cwt., sacked, \$2.30; Idaho oats, 38 lb. or better, cwt., sacked, \$2.30; Montana oats, 40 lb. or better, cwt., sacked, \$2.40; whole barley, cwt., sacked, \$2.05; rolled barley, cwt., sacked, \$2.15; white feed wheat, cwt., sacked, \$3.20; mixed feed wheat, cwt., sacked, \$3.15; white millrun, cwt., sacked, \$1.80; blended millrun, cwt., sacked, \$1.75; red millrun, cwt., sacked, \$1.70; bright timothy hay, ton, \$20; first crop alfalfa hay, ton, \$16; second crop alfalfa hay, ton, \$14.50.

OKLAHOMA CITY, OKLA.

W. F. Kerr, Correspondent.

Leo Anthis of El Reno, federal grain inspector, was in Oklahoma City last week.

Enid visitors here lately included W. B. Johnston, C. W. Goltry and Vernon Goltry.

Carl Cassidy of Frederick and S. G. Ambrister of Norman were among the grain dealers here last week.

Roy Hacker, manager of the grain department of the Enid Milling Co., toured southwestern Oklahoma recently.

L. O. Street of Woodward, John Thomas of Carnegie and William Wheeler of Weatherford were among recent callers at the Oklahoma City Grain Exchange.

A. Daane, agronomist at the Oklahoma A. and M. College, is to establish an experimental farm for grain growers near Cherokee to teach methods of seed selection, cultivation and harvesting.

J. M. Crouch of McGregor, Texas, who until recently was engaged in the grain business at Waco, Texas, was a recent visitor here. He reported central Texas suffering from a serious drought.

J. C. Mytinger, manager of the Mytinger Mill & Grain Co. at Wichita Falls, Texas, was here recently with other business men of his city in the interest of the construction of a bridge over Red river near Wichita Falls.

A milling and grain company has been temporarily organized at Grove, Okla., with W. E. Jones, president; Lee House, vice-president, and J. T. Oakley, secretary. The company plans to install a flour mill and a grain elevator at Grove.

B. G. Thomas, formerly an official of the Texas Farm Bureau, has been employed as educational director for the Grain Sorghum Growers Ass'n of the Southwest and he will lecture in Oklahoma, Texas, Kansas, Colorado and New Mexico.

Dealers report a very light movement of wheat in Oklahoma during the latter part of March and a low mill demand in Oklahoma and Texas. No section of the wheat belt of the state to April 3 had received sufficient rain to revive the growth of grain.

The March 31 report of the federal crop statistician in Oklahoma City shows no returns on "planting intentions" with respect to spring wheat. It shows 96 per cent for corn and barley, 108 per cent for grain sorghums, 104 for oats, 99 for tame hay and 80 for peanuts.

Carl Williams, Oklahoma City farm journal editor, and John Manley, secretary of the Oklahoma Wheat Growers Ass'n, have been engaged to deliver lectures as part of a short course for members of the Texas Wheat Growers Ass'n to be held April 20-23 at a state teachers' college at Canyon, Texas.

The El Reno Mill & Elevator Co. will have its new storage plant completed by the opening of the next grain season. The aggregate capacity will be 520,000 bus. and loading equipment may handle 25 cars a day. The plant will be one of the largest in the state. The company has been handling about 1,500,000 bus. of wheat a year and manufacturing about 200,000 bbls. of flour and feed.

M. I. Jordan, Oklahoma City, federal grain inspector, recently made a motor tour of the eastern part of the state. He found the oats crop in good shape and a large acreage but scarcely any wheat. Dealers say that the acreage of wheat in that territory has decreased almost to below the demand of the few mills of the territory. Mr. Jordan's reports from over

all the state lead him to believe that about 5,000,000 bus. of the current season's wheat crop remains unsold.

LOS ANGELES, CALIF.

C. G. White, Correspondent.

Chester Ambler of the Ambler Grain Co., Lamanda Park, Calif., was a visitor in the city last week and while here called on the exchange.

All of California was visited Sunday by a welcome rain storm. Los Angeles received .56 of an inch, bringing the total for this year to 4.90 inches.

O. W. Dillinger of the inspection department of the Los Angeles Grain Exchange left the first of the week on his annual vacation which will be spent at Big Bear Lake.

Joseph Gray, manager of the California Farm Bureau, and C. G. White of the traffic department of the Los Angeles Grain Exchange, will leave tonight for San Francisco, Calif., where they will attend a conference between the state railroad commission demurrage bureau and the California Farm Bureau Wednesday, April 1.

Cash Markets.

The market at this terminal during the past week has been very dull with a slight decline in yellow corn prices, while No. 2 feed barley for April delivery shows a 5c advance over last week.

No. 3 yellow corn for prompt shipment from the east has been selling at \$2.31 per hundred and at the close of the week was being offered at \$2.30 with very few buyers.

No. 2 yellow corn was being offered at \$2.35 with a bid of \$2.31; No. 2 white, bulk kafir was being offered at \$2.22½; No. 2 feed barley for April delivery has been selling at \$1.72½ in hundred-ton lots and at the close of the week they were bidding \$1.75 with none being offered.

The grain arrivals have been very light during the week with but 48 cars of grain and 156 cars of grain products.

The hay arrivals for the week were 201 cars. The market was fairly strong. No. 1 alfalfa was selling at \$22.50 per ton; No. 2 at \$20.50; No. 1 barley hay, \$27; No. 1 oat hay, \$32. The ground feed receipts for the week were 28 cars. Utah-Idaho millrun was selling at \$36; Kansas bran, \$34; alfalfa meal, medium, \$32; molasses meal, \$29; cottonseed meal, \$45; dried beet pulp, \$40.65; rolled barley, \$40. All commodities firm except rolled barley which shows a radical decline.

PEORIA, ILL.

L. L. Eckard, Correspondent.

Illinois corn offerings to this market have been extremely light. Farmers do not appear interested in the market at the present prices.

P. B. Miles, president of P. B. & C. C. Miles Grain Co., returned Friday from Palm Beach, Fla., where he spent the winter. Mr. Miles is one of the veterans of the Peoria Board of Trade.

No rain has been reported in this section and the soil is very dry. Winter wheat beginning to show the effects of the drought. Oats are all seeded and farmers in many cases are plowing for corn.

Oats receipts remain very light with 2 cars. Market was quoted ½c lower, nominally, with no sales reported. The greater portion of oats from this section continue to go to St. Louis, where the best market is reported for low grade oats.

Cash corn prices at Peoria very irregular the past week with 46 cars Saturday. Most of them were applied on contract sales. Although a few sales were made at prices 1 to 4c lower, the demand was good to the extent of the offering quoted and indications point to a small amount of corn headed this way. No. 3 white, 95c; No. 4 yellow, 88@93c; No. 5 yellow, 86c; No. 4 mixed, 88c; No. 5 mixed, 86c.

Grain receipts and shipments at Peoria for the week ending April 4, as compared with same week last year, as reported by secretary of Peoria Board of Trade:

Receipts—	1925.	1924.
Wheat	16,900	4,800
Corn	461,500	270,650
Oats	185,800	182,200
Barley	8,800	15,400
	673,900	473,050
Shipments—	1925.	1924.
Wheat	7,200	4,800
Corn	218,800	118,800
Oats	172,800	176,400
Rye		1,200
Barley	2,800	8,400
	401,600	309,600

MILWAUKEE.

D. K. Steenberg, Correspondent.

Shipments of grain from Milwaukee last week were 139,759 bus. oats, 114,754 corn, 33,965 barley, 23,592 wheat, 18,120 rye; total 330,190 bus., against 459,805 the preceding week and 448,701 a year ago.

Receipts of cash grain at Milwaukee last week were 64 cars barley, 111 corn, 81 oats, 29 wheat, 3 rye, 1 flax, 5 miscellaneous; total 294 cars, against 360 the week before, 277 a year ago and 643 in 1923.

James P. Hessburg, who recently resigned as a member of the board of arbitration of the Milwaukee Chamber of Commerce, is now associated with the Hiawatha Grain Co. of Minneapolis, Minn.

Further declines noted the past week on better crop conditions in the Southwest

where the drought has been broken. Wheat is 13@16c lower for the period; rye, 10c; corn 12@15c; oats, 4@4½c, and barley, 5@6c. Receipts were light and demand was fair.

Enlargement of the workhouse at the mill of the William C. Goodrich Co., Milwaukee linseed oil crushers, will be commenced shortly. The alterations will increase the capacity of the plant storage facilities from 140,000 bus. of flaxseed to 190,000 bus.

Plowing is now generally in progress throughout Wisconsin according to the traveling representatives of the various firms associated in the Milwaukee Chamber of Commerce. Many of the farmers, however, they report, declare that the soil is in need of rain before it can be properly worked.

Grippe wrecked havoc in many of the offices in the Milwaukee Chamber of Commerce during the past week. Practically all of them reported somebody and in some instances several persons are confined to their homes. Mark Farley, veteran black-board marker, was among those absent from their duties.

Milwaukee milling output last week consisted of 7,300 bbls. wheat flour as compared with the same amount the previous week and 3,800 last year. Receipts of flour at Milwaukee last week were 13,500 bbls. as compared with 29,750 in the same week of 1924 and shipments were 26,230 bbls. as compared with 8,740 bbls. last year.

H. S. Wells of DePere, Wis., George A. Jones of West Chicago, Ill., L. J. Hilsman of Madison, Wis., R. B. Frank of Defiance, O., J. E. Thomas of Pewaukee, Wis., Frank Johnson of Darien, Wis., J. H. Eldredge and L. J. Feeney of Chicago, Walter Uyr of Minneapolis, Minn., D. M. Smith of Omaha, Nebr., B. Dadmun of Whitewater, Wis., and A. H. Mintzloff of Grafton, Wis., were among visitors at the Milwaukee Chamber of Commerce last week.

Miss May Guy celebrated her nineteenth anniversary as a telephone operator at the Milwaukee Chamber of Commerce on Wednesday, April 2. Members of the chamber, among whom Miss Guy is very popular, held a little celebration in her honor during the course of the day. Just before closing, James O'Brien, assistant secretary of the chamber, carried a huge birthday cake with nineteen candles at the head of a procession of the membership in to Miss Guy and presented it to her as a tribute from them.

CHICAGO.

Two Board of Trade memberships have been sold the past few days at \$8,825 each, net to the buyer.

Joseph Simons, former vice-president of the Chicago Board of Trade, will become a partner in the firm of Faroll Bros., May 1.

New oats grades in part are about to be promulgated requiring ninety days' notice before application which will make them effective some time after the first of July.

Albert Dickinson, founder of the Albert Dickinson Co., the largest seed house in the world, is dead at Orange City, Fla. He was 85 years old and had been out of active business for a number of years.

Dr. Rudolph Patzig is now connected with Charles Sincere & Co., grain commission, in charge of the market news department. He formerly was with the Agricultural News Service.

The Illinois Sugar Jack Co. has been incorporated by G. E. Penland, J. A. Curtis and E. W. Stees. This company, with headquarters in this city will manufacture and deal in livestock and poultry feeds and grain.

C. H. Woodward, president, Whole Grain Wheat Co. and of the American Education Food Council, and editor of Motive, was one of the principal speakers at the annual banquet of the Norfolk Grain and Feed Dealers' Association.

Section 9 of the Grain Futures Act was specifically called to the attention of the trade this week by Dr. Duvel for its bearing upon the distribution of harmful rumors. There has recently been undue attention given financial difficulties of foreign grain importers which, on checking up, have proven to be of an inconsequential character.

Donald B. Fraser, well known among the feed manufacturers and feed control officials, died recently. Mr. Fraser's first connection with feed manufacturing was as head of the North West Mills Co., Winona. Later he was connected with the Clover Leaf Milling Co., Buffalo, and later on with grain and brokerage houses in the east and in this city.

W. R. Scott, transportation commissioner of the Kansas City Board of Trade, was in the city last week attending a meeting of representatives of grain exchanges to work out a better method of cancellation of surplus tonnage on grain shipments. At present the surplus is cancelled once a year, but there has been agitation recently for a more frequent cancellation of the surplus billings.

A formal plan for refinancing Wilson & Co. and removing it from the receivers' hands, providing for a sharp reduction of fixed liabilities but leaving an equity for all stockholders, has been made public. The plan represents a year's labor by financiers who were faced with the necessity for reorganizing the \$140,000,000 packing concern a year ago when it announced it was unable to meet its obligations.

April 15th will be the effective dating of a new feed barley grade as recommended

by the Grain Committee for the guidance of the Sampling Bureau, as follows: It shall test not less than 40 lbs. to the measured bushel, must contain not less than 70% barley, and may contain 8% of seeds and chaff, 22% of other grains, of which not more than 15% may be wild oats; shall be cool, and may include barley with a strong ground smell, or a musty or bin smell.

Trade Opinion.

It won't do as yet to buy grain on bulges. Trade is too light and confidence too thoroughly chilled to permit of the immediate return to a bull market. None-the-less, underlying conditions are sound. I firmly believe in higher prices eventually and suggest resting orders to pick up all grains on minor depressions.—Thomson & McKinnon.

Undoubtedly the best of us have underestimated for months the enormous speculative long interest in grains and that being the case we have under-estimated the liquidation which would follow such enormous holdings. We are not prepared to believe that the present level of values represent the intrinsic value of grains; in fact, we do believe that such levels underestimate their real value. We will go further and say that before a new crop of either wheat or corn is secure it is our belief that a scarcity will prevail which will carry prices to an infinitely higher level. The confidence of the trade, both speculative and consumptive, has been shaken to its foundations and it remains in a state where stabilizing influence must and will prevail. Present grain prices are far out of line with every other commodity dealt in and used by the world. The producer is again facing a serious situation if the present level of values is not raised. In our opinion, the low levels recently attained are not in any way warranted by general conditions. We believe the markets have reached a point of stabilization and have no fear of putting ourselves on record in that way. Public confidence in present or higher levels will obtain if people will only use their common sense at a time like this when that is all that is necessary to produce good results.—Bartlett-Frazier Co.

There are no clear cut symptoms that the bear market, which has been in progress for little over two months, has terminated. But such a rate of decline is rapidly correcting any unhealthy condition brought about by over-speculation. More than two-thirds of the advance since last June has been lost and it seems more logical to be looking for a turning point than to become strongly wedded to the bear side at this level. Following such a drastic decline it is to be expected that it will take some time to prepare for a sustained bull market. While the trend seems to be still downward, it would seem that on any further decline safer opportunities will be found on the buying side in the new crop futures.—Charles Sincere & Co.

Last Canadian wheat crop was officially estimated at 262,000,000 bushels from 22-055,000 acres. Our estimate was 268,000,000. A decided increase in acreage is intended in 1925 if weather conditions permit. A 9% increase would make around 24,000,000 acres. Moisture conditions are favorable, but fall plowing was below normal. An average yield on 24,000,000 acres would give a production of 380,000,000 bushels.

Deliveries by Canadian farmers during the current season exceed the amount available, from estimates of the crop. We believe this indicates that the large crop of 474,000,000 for 1923 and the carryover therefrom were under-estimated. The 1924 crop in our opinion was not over 270,000,000 bushels.—Lamson Bros. & Co.

The demoralized state which the grain markets have been in for the last few days was replaced today by one of confidence, and a much better tone was noted and more attention was paid to constructive news. A summary of conditions by James A. Patten tended to increase this confidence and there was excellent buying of wheat during the entire session. Short covering in July was very noticeable by several large traders. The trade are looking for rather bullish statistics on Monday and the forecast for the Southwest is for generally fair weather. Russell's News reports that a canvass of the situation shows that stocks of grain abroad are light and with a steady market on this side export business of moment would be consummated. We are of the opinion that the peak has been reached in the large accumulations of wheat on passage and that it will be rapidly reduced. We continue to take a friendly attitude towards new crop futures and thoroughly believe in making purchases on recessions. Investment opportunities of real worth are offered. Cash wheat was 4 to 5c higher.—J. J. Badenoch Co.

The large stocks at ports will probably move out more rapidly as soon as the quantity on ocean passage, which is still above average, is reduced to more moderate proportions; the quantity is now decreasing rapidly. A bearish influence in the market the past week has been rumors of financial difficulties of some Italian importers. Reliable authorities declare there is no serious trouble in this direction. Various crop reports were issued this week, all of them regarded as bullish, but they had little apparent influence on prices. On the other hand, rains over Oklahoma and Kansas were much needed and had a depressing influence. The Secretary of the Kansas Board of Agriculture said that the rains came too late to be of much benefit to wheat. A large acreage in Kansas is reported to have failed to germinate, and

it is interesting to observe in this connection that winter wheat must pass through a dormant period to produce grain. Winter wheat sown in the spring or which lies in the ground unsprouted through the winter may green up with spring rains, but will not produce grain if growing weather continues.—Clement, Curtis & Co.

The wheat market showed more stability today, but the buying appeared to us to be largely for account of strong professional groups rather than the reflection of any improvement in export demand.

The corn market showed a good deal of strength, with some speculative buying and an absence of distressed selling. Sentiment is much more friendly to the buying side, with a good many professionals accumulating corn on the theory that commercial demand will improve around this level. This seems to us to be quite a reasonable view and we prefer the buying side ourselves, but would confine purchases to soft spots for the time being, as the eastern shipping demand up to the present shows only a moderate improvement. Conservative purchases on the dips seem advisable.

Oats and rye followed to a considerable extent the action of the leading cereal and seaboard advices on rye indicate that clearances will pick up materially during the month of April owing to the recent heavy sales for export. This seems reasonable

to us and we think that there is likely to be a liberal decrease in the visible supply from now on. If we were buying any bread grain we should prefer to buy July rye on the soft spots.—Cross, Roy, Eberhart & Harris.

Buenos Aires weaker after their opening Thursday, closed off 5c for May and June, opened today at a further loss of 1c. In the domestic trade desirable and high grade milling qualities are offered very sparingly, the best of the recently established premiums are easily maintained, but competition for the off grades and less desirable lots is tame. Government predictions for near freezing temperatures for the Southwest did not materialize. The Modern Miller report reflects improvement in the dry areas in the Southwest, although conditions West of the Mississippi River are below a year ago, except in Missouri, Indiana and Illinois promise a better crop than last year.

Corn weak from the start. Pressure early was on the distant month, more general and very insistent the balance of the session. Apparently much liquidation for country and outside speculative account. Shippers are able to report another increase in sales for Eastern distribution, and anticipate an active trade if the market will hold reasonably steady or show a tendency to hold around current, or a little better values.—Pope & Eckhardt Co.

OMAHA.

Leigh Leslie, Correspondent.

Edward P. Peck, vice-president and manager of the Omaha Elevator Co., returned to his home here Thursday from Chicago.

The Omaha Traffic Club, which came into being Tuesday night at a dinner at the Elks' Home, elected John A. Kuhn, traffic manager of the Omaha Grain Exchange, president.

Ed S. Miller of the Miller Cereal Mills of Omaha, in a paper which he read to the Grain Men's Club in February, presented some unusually interesting and valuable information about the "King of Grains" and its uses, as well as about many of its by-products.

Good soaking rains fell over practically all of Nebraska Wednesday and Thursday, doing the winter wheat crop a great deal of good. The condition of the crop in the southeastern corner of the state is admittedly bad, but reports received here indicate that much of the crop in other parts of the state may come out well under favorable weather conditions.

W. W. Johnson, assistant general freight agent, who has retired from active service of the Burlington Railroad after serving it in various capacities for forty-one years, was guest of honor Tuesday evening at a dinner given at the University Club by W. J. Hynes of the Hynes Elevator Co., J. H. Wright, Jr., of the Nebraska-Iowa Grain Co., C. C. Crittenden of the Nye-Schneider-Jenks Co. and Ed S. Miller of the Miller Cereal Mills. Many well-known officials of the Burlington were guests at the dinner.

MINNEAPOLIS.

H. A. Paul, Correspondent.

William Kellogg, Minneapolis manager of the Grain Marketing Co., left for Milwaukee for a few days.

J. R. Stewart, president of the Banner Grain Co., returned Friday night from an extended stay in Florida.

John S. Pillsbury of the Pillsbury Flour Mills Co. has been elected a director of Armour & Co., of Chicago.

J. W. Avery of the Pillsbury company is back on the trading floor after a two months' trip through Europe. He spent most of the time in Italy.

Frank and Walter Jaffray of the Bartlett Frazier Co. and the Commander Milling Co., respectively, have returned from New York where they had gone to bid their mother, Mrs. C. T. Jaffray, good-bye before she left on her European trip.

Among the visitors on 'change this week were the following: J. S. Stephenson of Gladstone, Mich.; A. J. Zickland of St. Charles, Mo.; Carl G. Bosch of Peoria, H. S. Newell and C. C. Blair of Duluth, B. V. McKinney of New York City, A. G. Wells and A. Murray of Aurora, Ontario, F. C. Englehart of San Francisco, Sterling Bunnell of New York City, John G. Miller of Waterloo, Ia., W. E. Brown of Winnipeg, Man., Albert Daley of Superior, and W. S. Noyes of Saskatoon, Sask.

Cash Markets.

Wheat—Taken the whole week through, the local cash market was a rather unsettled proposition. Receipts were light mostly but on the days when this was the case the mills seemed least inclined to bid for the offerings. Choice quality wheat showing high protein, as always, was in good demand but the stuff carrying low percentage was hard to dispose of. Besides this, local elevators loaded out quite a lot of their stocks this week and offered them to the mills. Much of this was of low protein content and helped to slow up the market for road wheat of equal protein.

The trade here feels that we are in for a period of light receipts and this seems only natural. It would seem foolish to imagine that the farmers overlooked the extraordinary high prices that they were offered all fall and early in the winter without taking advantage of the opportunity to unload. Country elevator stocks are light and with the movement from first hands down to a minimum we cannot very well hope for any material improvement until the next crop rolls round.

Shipping sales generally were light throughout the week. On Tuesday shippers were taking some of the low protein stuff but the demand from this source did not maintain through the balance of the week.

Elevator stocks today totalled as follows: 12,840,360 bus. vs. 13,098,844 last week and 14,540,792 bus. a year ago.

Based on today's sales, No. 1 hard spring sold at 4@48c over May, No. 1 dark northern 3@47c over May, No. 1 northern spring 2@40c over May, No. 1 amber 5@42c over Duluth May, No. 1 durum 5c under at 40c over, No. 1 mixed 8c under at 40c over. Winter offerings light and demand fair to good all week. Today's prices were 2@26c over May for No. 1 dark hard Montana and May at 11c over for No. 1 hard Montana.

Corn—Offerings of cash corn were light throughout the week just past and demand was fair to good. The futures market had a bad slump but holders of the cash article refused to follow the decline when bids were made on the same comparative basis as on Monday and as a result there was a noticeable firming up in discounts. There were fair amounts of corn worked out of this market to shipping interests but it was the best quality that was wanted. With rumors of the big corn industries closing down there is nothing

particularly encouraging to holders of cash corn except the fact that we have had a bad break and should have a rally.

Today's elevator stocks show the following totals: This week, 939,758 bus. vs. 1,191,154 last week and 1,689,020 a year ago.

Today's range of sales was as follows: Yellow—No. 3, 5@8c under Chicago May; No. 4, 10@13c under; No. 5, 16@19c under. Mixed—No. 3, 12@14c under; No. 4, 15@18c under, and No. 5, 18@21c under.

Oats—The outstanding feature of the local cash oats market and what also may have been said to have been about the only redeeming feature of any sort during last week's hectic market performance was the demand for the cash article from so many different sources. Elevator and shipping interests had wires from eastern, southern, western and southwestern points during the past two days; in fact, the demand seemed very general. Understand that country elevators are selling back oats to the farmers in quantities far in excess of what they usually do at this time of the year. Nearly two million bushels of cash oats were worked out of here during the week and there were bids for fair quantities in addition which were only slightly out of line. Local elevator stocks today were 20,942,905 bus. vs. 21,339,702 last week and 4,622,096 a year ago. Based on today's range of sales, No. 3 whites were worth 1¼@1½c over May, and No. 4 whites 1@2½c less.

FT. WORTH.

The Gladney Grain Co. is the name of a new firm to be operated by Sam Gladney. It is stated that the business will be incorporated for \$10,000.

J. G. Smith of the Fort Worth Elevator Co. has been chosen chairman of the Chamber of Commerce committee which is behind the projected extension of the Texas Panhandle & Gulf Railroad.

The Texas Railroad Commission has advised the Texas Grain Dealers' Association that it has granted its request for a hearing on its request for the amendment of the present transit rules on grain and grain products.

Hay producers and dealers at their recent meeting in this city did not complete the work of adopting definite standards of hay grades and of perfecting a sound basis for trading, and another meeting to be held in San Antonio was arranged for.

DULUTH.

S. J. Schulte, Correspondent.

Ralph McCarthy was given a hearty sendoff early in the week on the occasion of his marriage. He and his bride sailed from New York upon an extended European trip.

Duluth grain men are gradually getting back to business after vacations spent in Florida and California winter resorts. C. F. Haley, manager of A. D. Thomson & Co., and Charles T. Mears of the Itasca Elevator Co. have returned from vacations spent at Florida points.

With holdings of over 12,472,000 bushels of oats in the elevators operators here have been greatly concerned over their steady price recessions from 36½@38½c at the end of last week to 30¾@32¾c this week. The trade is looking for better buying interest in oats at their present low level.

Receipts of grain at Duluth and Superior elevators showed a falling off during March, the total being reported at 3,056,209 bushels against 4,987,606 bushels last year. Of that wheat receipts accounted for 2,351,573 bushels against 1,398,322 bushels last year. Only 29,155 bushels of corn were moved this way last month as against 2,637,099 bushels last year.

Operators on this market agree that never in their experiences have they passed through a more trying period than they have during the last few weeks since the downward course of prices set in. Elevator and commission men have in consequence been playing closely to the boards, but at that the daily "margin call" sign overlooking the pit has been trying upon their nerves.

George Barnum, Jr., received warm congratulations from his friends upon the trading floor over the arrival of George Barnum III at his home. He intimated that the newcomer would probably be initiated into the trade in due time so that there might be no break in the passing of succession in the firm's business from father to son. George Barnum, Sr., is still hale and hearty at 76 years and he takes a lively interest in the business of his house from day to day. He has just returned from a vacation spent at California points.

Bets have been made on this market that the opening of navigation at the Head of the Lakes will take place around April 25. The first charterings of steamers to move grain east were made during the week, the bookings of a steamer for Georgian Bay being reported at 2½c a bushel, and for Buffalo delivery for wheat and rye at 3c. Early in the winter vessel interests

**We Buy and Sell
Ear Corn
RICHTER GRAIN CO.
Cincinnati, Ohio**

here were holding out for 4c but later competition for down cargoes under expectations of a slow early movement of iron ore to the east developed. The elevators at Duluth and Superior are now nearly filled up to their capacities with an aggregate of around 33,000,000 bushels of all grains in store. A brisk movement down the lakes is looked for at the opening of navigation as the elevator interests are anxious to make room to receive supplies being held in interior houses and in farmers' hands over the west.

Comparative receipts and shipments of grain during March were as follows:

1925		
	Receipts	Shipments
Wheat, domestic.....	2,294,159	511,823
Bonded wheat.....	57,414

NEW YORK.

J. M. Nugent, Correspondent.

There was a scattered export business in wheat during the week. Total sales amounted to about three to four million bushels. Most of the trade appeared to be in Manitobas, but there were also some transactions in Duluth spring wheats and some durums.

During the past week the following gentlemen visited the floor of the New York Produce Exchange: R. B. Kloss, W. H. Johnston and W. T. Marlow, all of Montreal; T. J. O'Brien, of Buffalo; F. S. Osgood, L. J. Ryan and C. Nelson, all of Chicago; also George Healey, of Boston; S. Chapman, of London; W. C. Bolle, of Rotterdam.

Flour Situation.

New York, April 4.—Sharp declines featured all grades of flour as a result of the big break in wheat. Business during the week was the smallest in some time, which was a natural condition.

The real feature of the week was the ending of the drought through the Southwest and the general improvement in the grain.

Export business was very dull and no important transactions were reported.

Spring patents were quoted at \$7.40@8; soft winter straight, \$7.60@8, and hard winter straights, \$7.40@8 per 196 lbs.

KANSAS CITY.

T. J. Tanner, Correspondent.

W. J. Mensendieck of the Mensendieck Grain Co. returned Thursday from Florida where he and Mrs. Mensendieck spent the winter.

J. S. Bache & Co., stock and grain brokers, will move their Kansas City offices May 1 from the First National Bank building to the first floor of the Dwight building, Tenth street and Baltimore avenue, formerly occupied by the Pioneer Trust Co.

It has been learned at the Kansas City Board of Trade that strenuous efforts are being made by the Minneapolis market to secure a reduction in the rates on grain and flour from Minneapolis to points east of Pittsburgh and Buffalo. The reduction sought on flour is 6c per cwt.

W. G. Bierd, president of the Chicago & Alton Railroad and receiver for the line, said in Kansas City Saturday that a grain elevator of 1,000,000 bus. capacity might be built by the company in the Lydia avenue yards. Kansas grain interests are said to be the probable lessees of the house.

Visitors at the Board of Trade this week included T. M. Van Horn, Chicago, Ill.; C. B. Rogers, Minneapolis, Minn.; J. H. Nelson, Omaha, Neb.; B. A. Allen, Oklahoma City, Okla.; Kay Kimbell, Fort Worth, Tex.; Karl Humphrey, El Reno, Okla.; and W. V. McCartney, Denver, Colo.

Kansas City received 4,793 cars of grain and grain products in March and shipped 8,250 cars. The wheat receipts were 2,374,650 bus.; corn, 2,410,000 bus.; oats, 343,400 bus.; kafirs, 452 cars; rye, 7 cars; barley, 12 cars; millfeeds, 267 cars; flour, 166 cars. Shipments included 3,168 cars; corn, 1,389; oats, 589; kafirs, 337; rye, 1; barley, 4; millfeeds, 1,246; flour, 1,516.

W. R. Scott, transportation commissioner for the Kansas City Board of Trade, said after attending a conference in Chicago that if the railroads carried out their intention to enforce 30-day cancellations freight billing on grain, there would be filed a protest with the Interstate Commerce Commission. Grain shippers want to preserve the old rule under which billing is cancelled once a year.

Judge A. W. Walker of Fayette, Mo., has refused to quash an indictment against

J. K. Christopher & Co., Kansas City, charged with violating an old state law by operating a house in Sedalia where trading in grain futures is permitted. Mr. Christopher's trial will come up in the Pettis county circuit court some time this month. The case is supported by the Kansas City grain trade and of interest to all speculative lines.

Howard Vanderslice, a retired grain dealer and former president of the Kansas City Board of Trade, contemplates the presentation to Kansas City of an heroic bronze statue commemorative of the heroism of the pioneer mothers. A Philmister Proctor, a Pacific coast sculptor, has an assignment for the model, which represents a woman, two men and two horses making their toilsome way through the West. The group will have a site in one of the parks.

The Southwest Millers' League, in annual convention at the Kansas City Club, Thursday and Friday, elected T. C. Thatcher of Oklahoma City, Okla., as president; A. R. Kinney, Omaha, Neb., first vice-president; R. C. Sowden, Arkansas City, Kans., second vice-president; Thad L. Hoffman, Kansas City, third vice-president; H. G. Randall, Kansas City, treasurer; C. V. Topping, Kansas City, secretary. L. E. Moses of Kansas City, who served as president for ten years, refused to make another race. He has been in California for several months.

Belated Rain Helps Crops.

The big spring event this year in the Southwest was the gentle and prolonged rain of Wednesday and Thursday, which was especially liberal in Kansas and Nebraska. An almost persistent drought of weeks or months, according to locality, was broken with resultant great benefit to wheat, oats and other crops. It was admitted that western Oklahoma and large portions of Texas failed to secure adequate moisture.

Regarding the Kansas situation, a correspondent in Topeka writes:

"The Kansas wheat crop is not as promising as had been hoped for in the early months of the season, notwithstanding that nearly every section of the state received a good rain this week. This does not mean, however, that Kansas will not have a fairly good wheat yield this year. There still remains an acreage of 7,000,000 to 7,500,000 acres that is in the most promising condition.

"There is another million or more acres that may be developed into a fair yield, provided the state has plenty of moisture in the next few critical weeks.

"A careful survey of the wheat counties seems to justify the estimate that from 2,500,000 to 3,000,000 acres of the crop sown last fall is lost beyond hope. The greater part of this acreage has been planted to other crops or is being plowed under in preparation for other crops."

Cash Grain Markets.

Wheat—Receipts for the week, 171 cars, against 190 a week ago and 130 a year ago. Another chapter in the phenomenal decline of the last few months was written but there was a recovery of 2c to 6c at the end. The market was influenced mainly by the action of futures. In hard and dark the trade was paralyzed during some of the breaks, with millers wisely holding off and holders not anxious to sell. Offerings were at no time large. When Saturday's upturn came there was a rush of local and outside milling orders, while elevator men bought freely of such samples as could be hedged. Export business was light, but wheat was shipped to the gulf ports on old contracts. Millers here and elsewhere took wheat out of store. Country advices indicated small sales by farmers, whose reserves are nearly exhausted. The farmers were busy, anyway, with their spring work. Interior elevator men were said to have a considerable amount of wheat on hand that was bought higher, which, if sold, would show a loss. At the close the market exhibited a net recession of 15@16c a bushel, with No. 1 hard and dark at \$1.35@1.57, No. 2 at \$1.35@1.57, No. 3 at \$1.34@1.56, and No. 4 at \$1.33@1.55. There were very light arrivals of soft wheat and the demand was equally limited, though choice milling samples always found buyers. After Saturday's rally from the bottom level the closing nominal prices were 10@17c with No. 1 at \$1.59@1.65, No. 2 at \$1.57@1.65, No. 3 at \$1.53@1.63, and No. 4 at \$1.49@1.59. In general the wheat market reached the lowest figures since last fall. Hard and dark still are 34@36c higher than a year ago and the red variety is 50@55c over prices prevailing in 1924. For the week the local stocks decreased 534,000 bus., to 5,805,000, as compared with 10,568,000 last year.

Corn—Receipts, 195 cars, against 249 a week ago and 128 a year ago. The week brought the worst break of the season in corn, and it was, for the most part, independent of the slump in wheat. Though arrivals diminished, there was an inadequate feeding demand, with only yellow and high-colored mixed wanted for that purpose. Industries were poor buyers. Chicago took a liberal amount, presumably for the manufacture of contract grade to deliver to May longs. Prices broke to a new low level for many months, recovered slightly and closed with net losses of 11@15½c, as follows: No. 2 white, 89@92c; No. 3, 86@88c; No. 2 mixed, 85@89c; No. 3, 84@87c; No. 2 yellow, 90@93c; No. 3, 89@91c. Elevator stocks showed a reduction of 846,000 bus., to 6,710,000, against 1,795,000 last year. As corn is well below \$1 a bushel, dealers are looking for a revival of the southern demand. Hog feeders could

well afford to use the grain at present prices. Both Kansas and Nebraska have considerable surpluses to sell. It is said that farmers are making fair cross-country sales, which help to account for lighter shipments to market.

Oats—Receipts, 38 cars, against 54 a week ago and 93 a year ago. As most of the arrivals were applied on contracts, the floor offerings were light. There was a good demand for choice white oats but the trade in red seed was slow, the sowing being about over in the Southwest. Prices held up well in view of the corn weakness. At the close they were 2@4½c down, with No. 2 white quoted at 45c, No. 3 at 43½@44c, No. 2 red at 45c and No. 3 at 44c. Stocks of oats decreased 409,000 bus., to 1,293,000, as compared with 511,000 a year ago.

Kafir and Milo—Receipts, 65 cars, against 61 a week ago and 47 a year ago. As a result of the decline in corn, barley and other feeding grains, prices were broken sharply but some recovery ensued. Buyers generally were cautious, taking supplies only on recessions. Holders usually refused to sell except on upturns. Dealers said the offerings included few cars of choice quality. Milo suffered more than kafir. It closed with a net recession of 13@17c per cwt., with No. 2 at \$1.75@1.80, No. 3 at \$1.75@1.79, and No. 4 at \$1.75. The decline in kafir was 5@10c, prices ending as follows: No. 2 white, \$1.50@1.52; No. 3, \$1.50; No. 4, \$1.45. Shipments on old and new sales cut the stocks down 71,000 bus., to 357,000, against 480,000 a year ago.

ST. JOSEPH, MO.

N. K. Thomas, Correspondent.

Visitors on the St. Joseph Grain Exchange during the week ending April 4th included: C. B. Rogers, Minneapolis, Minn.; C. C. Miller, King City, Mo.; F. H. Maughmer, Savannah, Mo.; W. B. Owens, Union Star, Mo.; J. L. Ballard, Guilford, Mo.; J. A. Waltemath, King City, Mo.; J. L. Allen, Highland, Kans.; G. W. Robinson, Gower, Mo.

Wheat arrivals and offerings of the past week have been extremely light and most of the receipts have been contract grain. This situation prevails at all western markets, and reflects that farmers are going to hold the remaining 13 per cent of their wheat if prices do not give a better account of themselves than they have the past three weeks. Hard wheat values were

13@15c down for the week at St. Joseph and soft was 12@13c lower. Rather good demand for soft wheat, and better inquiry for hard winters. Corn offerings have been rather light, but the demand has been rather sluggish in the face of declining prices. Prices for corn were 11@13c lower for the week; oats 3@3½c lower for the week; small arrivals.

Receipts and shipments of grain at St. Joseph, Mo., for the month of March, 1925, with comparative figures of March, 1924. Figures are in bushels:

	1925.	1924.
Wheat	702,800	656,000
Corn	939,000	1,083,000
Oats	124,000	166,000
Barley	1,750
Kafir	9,000	4,500
Milo	1,500
Total, March, 1925.....	1,778,050	1,910,100
Total, 3 months	6,534,400	5,511,100
Shipments—		
Wheat	317,800	109,200
Corn	930,000	984,000
Oats	138,000	104,000
Total, March, 1925	1,385,800	1,197,200
Total, 3 months	3,890,550	3,324,650

MEMPHIS.

George Williamson, Correspondent.

Receipts of corn for the week were 57 cars and of oats 166.

D. P. Cameron, Hattiesburg, Miss., was a visitor on 'change Wednesday.

W. L. Duncan of Samuel Hastings Co., Cairo, Ill., was registered at the Merchants Exchange Tuesday.

W. S. Morgan of Little Rock, representing M. C. Peters & Co. of Omaha, was on 'change with B. H. Williamson Thursday.

William Murdock, manager of the St. Louis branch of the Chase Bag Co., was the guest of the local office during the week.

Weather conditions in this territory for farming operations have been ideal during the past week and progress has been unusually rapid. A large part of corn planting has been done although the sharp break in grain prices has lessened the incentive to planting to some extent. Planting of cotton started in the section south of here but very little will be done until next week.

even if the rains stop, having started yesterday in this section.

The wildness of the grain markets has simply paralyzed business, which was already poor enough, say local dealers. Buying was already from hand to mouth, but with grains fluctuating so rapidly and the trend downward as a rule it has been stopped almost entirely. The local people have suffered considerably, as they were loaded with stocks that were comparatively large because demand had been so disappointing. Especially was this true of corn, as the big disparity between corn and oats had resulted in the former being in oversupply. Cash 3 white corn was quoted April 4 at \$1.3 mixed at 96c and 3 yellow at \$1.03. On the same day 3 white oats were quotable at 46¢46½c. It is said that

feeders are buying oats almost to the exclusion of corn because of the big difference in price.

TOLEDO.

S. M. Bender, Correspondent.

Toledo's flour stocks on April 1 was 41,775 bbls., compared with 40,250 bbls. on March 1 and 26,000 bbls. on April 1 last year.

Grain inspections last week were 17 cars of wheat, 32 cars of corn, 32 cars of oats, 3 cars of rye and 1 car of barley. Total, 85 cars.

Grain received here last month included 83 cars of wheat, 333 cars of corn, 116 cars of oats and 5 cars of rye. Total cars for the month, 537 cars.

A change in the dates of the annual meeting of the Ohio Grain Dealers Association was announced last week. It will be held in Toledo, Tuesday and Wednesday, June 23-24.

Millers here and outside are finding the market hard to figure the same as dealers, and flour prices show a great variation. Very little wheat is moving in the country, as farmers prefer to hold their little jag for higher prices. Oats are going into the

ground in many parts of the state and growing wheat looks good in spots.

Flour production as reported by local mills for the past week was 27,600 bbls., or 57½ per cent of capacity. The week before it was 25,500 bbls. and a year ago last week was 30,600 bbls.

The grain cargoes that were held in the Toledo harbor during the past winter have nearly all been unloaded and the boats gone into dry docks for repairs. Crews are coming here to take boats loaded with coal to the northern ports.

The extreme decline during the past week has caused the movement of all grains to be the smallest in months. The soft wheat premium has been around 20 cents above Chicago May and hedgers have reaped handsome profits. Flour sales are just fair, with mills holding down production to as low a figure as possible. Feeds have been meeting with a very liberal demand and prices have been sharply higher. Spot grain is bringing good prices as mills here and outside are in the market again. Corn and oats have had such a drastic price decline that everyone is looking for some improvement, but it appears hopeless to do so at present.

CINCINNATI.

George Mosbacher, Correspondent.

Will G. Stueve, member of the firm of Henry W. Brown & Co., suffered an attack of grip and was confined to his home most of the week.

Max Blumenthal of the firm of the same name was on the sick list this week, also F. B. Edmonds, a director of the Grain and Hay Exchange.

Fitzgerald Bros. Co. have moved their offices from the Fosdick building to the new Southern Railway building, Fourth and Sycamore streets.

The grain elevator of the Henry Feldman Co., retail feed dealers at Norwood, a suburb of Cincinnati, was damaged by fire with an estimated loss of about \$200. The blaze was caused by the exhaust from a small gasoline engine.

The break in May corn to the lowest price since last August created an extremely dull cash situation here with a loss of around 8¢9c per bushel. Receipts were small but more than sufficient for the demand as buyers, owing to the steadily

declining prices, had practically withdrawn from the market except for pressing needs.

The severe break in wheat futures had a rather stimulating effect on the local cash situation and with little country wheat pressing for sale, millers felt the lower values warranted some buying, and a comparatively good business was reported for the week. The slump here amounted to nearly 10c per bushel. Receipts continued very disappointing and mill orders to the south were mostly filled from warehouse and elevator stocks.

There was an exceptionally good demand for seed oats and premiums were extended as much as 4c per bushel over ordinary feeding quality.

Stocks of grain in local elevators for the last week and previous week are as follows:

	Apr. 3, 1925	Mar. 27, 1925
Wheat, bus.....	336,866	259,372
Corn, bus.....	260,464	274,430
Oats, bus.....	110,991	116,941
Rye, bus.....	6,761	4,888

The meeting and complimentary dinner of the Grain and Hay Exchange, held at the Hotel Gibson last week to celebrate the seventh anniversary of the organization's independence as a business and financial institution, proved superior from every angle to any previously ever held by that body. Besides President F. L. Watkins' speech, published in last week's issue of the Price Current-Grain Reporter, there were discussions on matters pertaining to the exchange, and as to the harmony of spirit among the members whose individual aims and ambitions of necessity lie wide apart but which resulted in a broad fraternal willingness on the part of all to join hands in a common cause for the greater benefit of all. By far the most significant address of the evening was that of Frank Collins eulogizing the services of D. J. Schuh, executive secretary, as of incalculable good to the trade, and the eloquent appeal of E. B. Terrill urging a change in sentiment. C. A. Custer, Ralph Brown, Fred Scholl, Harry Niemeyer, W. A. Hopkins, Carl Skidmore and Lew McLaughlin also spoke on trade matters, including the value of co-operation, and for the increased interest of the members in the work of the exchange. The following committee was appointed to seek a site for a new building to house the exchange: A. M. Braun, Geo. Deterle, E. B. Terrill, Chas. W. Schmidt, F. B. Edmonds, Trimble McCullough and Elmer Helle. Resolutions were also passed and a committee appointed to arrange for the broadcasting of the daily quotations officially by the exchange.

BOSTON.

Recent visitors to the Grain and Flour Exchange included W. P. Fisher of Seattle, John M. Hawkins of New York, and W. S. Prior and George P. Urban of Buffalo.

Applications for membership in the Grain and Flour Exchange continue to come in in gratifying numbers. Among recent applicants were V. N. Mayo of Merrill &

Exports from the port of Boston for the month of February included 175,088 bus. wheat, 157,670 bus. oats, 154,285 bus. rye, 130,000 bus. barley, and 12,422 bbls. flour.

DES MOINES, IA.

J. H. Owens, Correspondent.

Frank Paggett of the Des Moines Elevator & Grain Co. spent two days in Chicago last week.

The demand from feeders for corn has been showing a little improvement the past few days.

John Gannon of Valeria and Clint Slack of Algona were most welcome visitors in Des Moines during the past week.

Oats seeding is progressing quite rapidly. The reports coming in at this time would indicate about a normal acreage.

Some concern is being felt over the lack of moisture. The precipitation in Des Moines since Jan. 1. according to the United States Weather Bureau, is only one-third of normal. About the same ratio applies to the entire state of Iowa.

ST. LOUIS.

St. Louis stocks of flour reported at 73,-680 bbls. on April 1, 1925, compared with 62,380 bbls. on March 1, 1925, and 84,630 bbls. on April 1, 1924.

The Merchants Exchange was closed on April 7 on account of municipal election. Board of Directors decided for convenience of members desiring quotations from other markets which remained open to keep open the smoking room and leave operators post those quotations during usual trading hours. According to rules, however, the exchange was legally closed and members were governed accordingly in their transactions.

WINNIPEG.

Geo. H. Mesham, Correspondent.

Friday's market showed firmness at the opening but started to slip at mid-session and closed weak and panicky. Prices were carried to near where they were when the May future was first quoted on the board and there was no real recovery, a little upturn at the close being due entirely to short covering.

A drastic break in the coarse grains which followed the weakness of the Chicago corn market brought on liquidation in wheat. Other factors are the unsettled conditions in French financial matters and general loss of confidence in buying circles. The air is full of fears and rumors and basic conditions are lost sight of in a general depressed feeling at the action of the markets during the week.

Seeding operations have commenced in some districts and some work on the land is being done wherever moisture conditions render it possible. Considerable low lands along the Assiniboine and Red rivers are flooded but this is nothing unusual and the areas affected are not extensive enough to be of any great importance. Generally throughout the west there is plenty of moisture to give grains a good start. It is too early to expect seeding to be general for 10 days even with the most favorable conditions and a setback is quite probable.

CHICAGO

WAGON LOADS RECEIVED
A book for the use of country grain buyers in keeping a record of grain received from farmers.
Its column headings are: Month, Day, Name, Kind, Gross and Tare, Net Pounds, Bushels, Pounds, Price, Dollars, Cents and Remarks.
The book, 9½x12 inches, 160 pages, 20 lines to each page, giving room for recording 3,200 loads, is printed on Linen Ledger Paper and is well bound in strong board covers with leather back and corners. Order form 80. Price, \$1.75.
PRICE CURRENT GRAIN REPORTER, 327 So. La Salle St., Chicago, Ill.

Saturday's market, notwithstanding the weakness at Liverpool, had a greatly improved tone. It looks as though bears are inclined to hold off for the present and there is a pretty general realization that the price is now enough to be attractive to consumers. While the cash trade was small there was a better inquiry for all grains. Holders are firm and spreads narrowing. Cash barley and cash flax were in good demand but offerings very light.

Navigation is expected to be open between April 5 and 20. There is a growing inquiry for cargo space and some contracts have been let. There is no doubt but the market will have a healthier tone once stuff is actually on the move. Vessel agents report that plenty of shipping will be available at moderate rates.

The campaign afoot for organization of a coarse grains pool along the same lines as the wheat pool is not making much progress. There is no doubt but what the wheat pool has been hard hit by the developments of the last five weeks. With much exuberance of soap-box oratory the pool propagandists claimed with the quantity of wheat they had signed up they could stabilize the market. This has proved an idle boast for never in the history of the grain trade have markets been more nervous or fluctuations wider and the weight of pool-held wheat has been a depressing factor that has been a big influence in accelerating declines. What the pool's final payment will be is impossible to guess but it is certain it will be a big disappointment to the poolers.

BALTIMORE.

Robert C. Neu, Correspondent.

The Western Maryland Railroad Co. lifted its embargo against shipments of grain over its lines to this port on April 1.

Ferdinand A. Meyer, president of the Baltimore Grain Co., receivers and exporters of this market, is spending a fortnight at Atlantic City.

The committee on hay and straw quotations of the Baltimore Chamber of Commerce for the month of April consists of Messrs. Geo. E. Morrison, Richard H. Diggs and H. D. Eidman.

Charles P. Blackburn, head of the grain exporting firm of C. P. Blackburn & Co., left on April 2 for a six-weeks' trip to the Canal Zone, and later will sail up the Pacific coast to Seattle.

Thomas Johnston, head of the grain firm of Thomas Johnston & Co. of this market, is confined to his home as a result of an accidental fall, in which he was painfully bruised about the body.

With the lifting, March 6, of the Pennsylvania Railroad embargo against export grain shipments at Baltimore, all three great railroads terminating here now open further business for this port.

President A. W. Mears of the Baltimore Chamber of Commerce took an active part in the conference of the Methodist Episcopal Church South, which took place in Washington, D. C., last week.

Among the out-of-town visitors on the floor of the Baltimore Chamber of Commerce last week were: C. W. Kibler, of Kent County, Md.; E. B. Wright, of New York; John B. Iset, miller, of Tyrone, Pa., and V. M. Harris, of Kansas.

C. A. Fischer, assistant secretary of Dennis & Co., Inc., grain commission merchants and forwarders of this market, is receiving the congratulations of his friends in the trade here upon the arrival of a fine baby girl at his home about ten days ago.

The annual auction sale for choice of grain sample tables on the floor of the Baltimore Chamber of Commerce took place on Monday, April 6, at noon, and the bidding to obtain favorite positions was quite spirited on the part of the various grain firms.

Following closely behind similar action by the Western Maryland Railroad, the Baltimore & Ohio Railroad, on April 4 announced that the embargo in effect since Jan. 10, 1925, over its lines against shipments of grain to the export elevators at Locust Point, Baltimore, Md., had been removed.

Before Judge Morris A. Soper, in the United States District Court, this city, the case of Wm. H. Muller & Co., Inc., grain exporters of New York, against the Pennsylvania Railroad Co., for breach of contract, involving failure to move grain from

News of the Country Grain Trade

ARKANSAS.

Dumas, Ark.—A wholesale feed store will soon be opened by the Southern Feed Co.

Lonoke, Ark.—Hemp Ford succeeds Roy E. Melton as manager of the Southern Feed Store.

CALIFORNIA.

Hollywood, Cal.—Logan & Bryan of Chicago has opened a branch here with Henry Nelson in charge.

Los Angeles, Cal.—The California Mfg. Corp. will erect a modern fire-proof 135x135 ft. warehouse.

CANADA.

Midland, Ont.—A million bushel concrete elevator will be erected by James Playfair Co.

Owen Sound, Ont.—The Great Lakes Elevator Co., Ltd., has organized for the purpose of building grain terminals here and the taxpayers of this city have voted to erect a \$450,000 house with a capacity of 1,000,000 bushels, to be sold, when completed, to private interest. \$83,000 has been proposed in the Dominion House to dredge the harbor to allow the entering of the largest lake freighters.

Goderich, Ont.—The Goderich Elevator & Transit Co. won an appeal in the suit of the Northern Grain Co., Winnipeg, to recover for oats delivered to the Peerless Cereal Mills, Woodstock, Ont., by the Elevator & Transit Co. without bills of lading. The court held good the defense that the Northern Grain Co. had instructed the Elevator & Transit Co. to deliver the 700,000 bus. of oats.

COLORADO.

Loveland, Colo.—James Lyman was suffocated at the Loveland Flour Mills when the wall of a wheat bin collapsed and anchored him beneath its timbers.

Pueblo, Colo.—A large Alfalfa mill and storage elevator at the Broadacre Farm & Livestock Co. ranch, burned with a damage toll estimated at \$75,000. A considerable amount of grain and alfalfa meal was stored in the elevator.

ILLINOIS.

Sibley, Ill.—Peter Brethorst and Emil Steinlicht were re-elected directors of the Sibley Grain Co.

Harper (Forreston, p. o.), Ill.—The Harper Grain Co. will rebuild their elevator as the frost is out of the ground.

Champaign, Ill.—Wegeng-Hills Co. recently opened a cash grain department with John B. Woodin, formerly associated with J. P. Sledge, as manager. They are correspondents of the J. C. Shaffer Grain Co., Chicago.

Minonk, Ill.—Minonk and Woodford grain elevator proprietors will install steel air-lift dumps. At the Stoddard elevator, two are to be installed, at the Memmen elevator one, and at Woodford, the Simpson elevators will have three.

Ransom, Ill.—A verdict of "not guilty" was returned for the Farmers Elevator Co. who were made defendants in a \$1,000 damage suit brought by Frank Gordon, who claims that notice was served on them not to pay Otto Bedecker for any grain delivered owing to the fact that Gordon had a claim of approximately \$400 against Bedecker for farm rental. In spite of this notice the elevator company paid Bedecker for grain purchased, and the suit was brought for the purpose of recovering the money.

INDIANA.

Mt. Vernon, Ind.—Chas. T. Johnson has been elected Pres. of the Southeastern Millers' Ass'n. He is Pres. of the Overland Grain Co., St. Louis; Treas. and Mgr. of the Home Mill & Grain Co. and Pres. of the Sunlight Mfg. Co. here, and Pres. of the Sunnyside Mfg. Co. of Evansville.

IOWA.

Albion, Ia.—Farmers of Albion have voted to refinance the Coöperative Elevator Co.

Clarinda, Ia.—The A. A. Berry Seed Co. has been re-incorporated for another twenty years.

Humboldt, Ia.—George Beel succeeds C. A. Jenks as manager of the Coöperative Elevator Co.

Missouri Valley, Ia.—J. J. Zerb of Omaha will succeed W. A. Fuller as manager of the Updike elevator.

Webb, Ia.—I. J. Nielson of Newell has purchased the DeWolf Grain Co. elevator and will take possession July

1st. Benson, Ia.—Because of the shortage of corn and other crops, the Benson Grain Co. has closed its elevator for a while.

Clearfield, Ia.—F. H. Fosmire has been appointed receiver for the Farmers Elevator Co., following petition for the order made by the board of directors, Joe E. Cooper, F. O. Bender, F. C. Baker and E. M. Owens.

Charles City, Ia.—The Managers Grain Dealers Ass'n has been organized by managers of elevators in Floyd, Butler, Chickasaw, and Mitchell counties for the purpose of discussing the best methods of buying and selling grain.

Storm Lake, Ia.—The Farmers Elevator Co. stockholders have elected officers as follows: William Gutel, president; William Breecher, vice-president; George W. Cole, secretary; A. O. Meinhardt, treasurer. Directors for two year terms: William Pike, Art Dierwechter, William Mauser.

Traer, Ia.—The Farmers Elevator Co. re-elected its officers and directors at their annual meeting. Officers: President R. C. Wood; Vice-President John W. Young; Secretary F. J. Childs; Treasurer Elmer Young. Directors: J. G. Podhajsky, Henry Haach, F. C. Early, B. R. Stoakes and Andrew Whannel.

Gilman, Ia.—The following officers were elected by the Farmers Elevator Co.: Rasmus Lovig, president; S. L. Ludlow, vice-president; John Meling, secretary; J. B. Ramsey, treasurer. Directors: Carl Johnson, Will Wiseman, Ira Green, D. A. Paul and L. G. Laverder. A 10 per cent dividend was declared.

KANSAS.

St. Marys, Kans.—The Dougan elevator, recently destroyed by fire, will be rebuilt.

Strauss (mail to McCune), Kans.—Sherman Roseberry is managing the Farmers Elevator.

Ford, Kans.—A. F. Roberts has been awarded the contract for the Coöperative Exchange's new elevator.

Harper, Kans.—The Bowersock Milling Co. of Lawrence has purchased the Harper Elevator, recently purchased by a Wichita company.

Susank (Hoisington, p. o.), Kans.—The elevator of the Farmers Union Coöperative Grain & Supply Co. is now owned by the Bitter Grain Co.

Galatia, Kans.—Carl Lebsack, manager of the Farmers Coöperative Elevator

here, purchased the Lebsack Grain Co.'s elevator, which sold, with the equipment, for \$5,000.

Stark, Kans.—The 20,000 bu. elevator and equipment of the Farmers Grain Co. has been purchased by the Burgner-Bowman Matthew Lbr. Co., owners of the Stark Grain Co.

Manhattan, Kans.—The official program of the Operative Millers convention, which will include the millers of Districts No. 1 and 2 of the Association of Operative Millers, and which will be held here May 9, has been given out.

Wellington, Kans.—The Wellington Milling & Elevator Co., has placed a contract for the remodeling of their mill with the Nordyke & Marmon Co., Indianapolis, Ind., through S. H. Stolfus Southwestern representative. A full line of sifters, dusters, etc., is included in the new equipment.

Turner, Kans.—Improvements on the Santa Fe elevator "A," being made by the Santa Fe railroad at an expense of from \$1,500,000 to \$2,000,000 will be entirely completed by the beginning of the next crop year, July 1st, according to John S. Metcalf Co., contractors. The elevator is leased and operated by the Grain Marketing Co.

KENTUCKY.

Auburn, Ky.—The McCarley Mill is now known as the Robbins Bros. Mfg. Co., following the purchase of the interest of Lynn David McCarley by Curtis Robbins. Farnett Robbins had already been interested therein.

LOUISIANA.

Shreveport, La.—Hanson-Worden Co., Memphis contractors, have been awarded contracts for building two large elevators, grain mill and warehouse for the Shreveport Elevator Milling Co., each elevator to have 100,000 bushels capacity.

MAINE.

Skowhegan, Me.—H. H. Stover & Co. of Portland, wholesalers and retailers in grain, feed, flour and grocery specialties, have opened for business.

MICHIGAN.

Mt. Clemens, Mich.—The Commission has granted the Farmers Milling Co. permission to lay a spur from the Grand Trunk Ry. across Leander St. to its mill.

East Leroy, Mich.—According to plans of W. H. Nelson, he may erect an elevator replacing the one lost through fire about eight weeks ago, at an approximate cost of \$12,000.

Detroit, Mich.—At the recent annual election of the Detroit Board of Trade, new officers were chosen as follows: Gerald Hulett, president; Wm. G. Lich-

Simonds-Shields-Lonsdale Grain Co.

Kansas City, Missouri

tenberg, first vice-president; Armin Rickel, second vice-president. It is presumed that C. B. Drouillard is to continue as secretary-treasurer.

MINNESOTA.

Hayfield, Minn.—Fire destroyed the Sunwall Independent elevator here. Cause unknown.

March (Warren, p. o.), Minn.—T. E. Ibberson Co. will make general repairs on the Spaulding Elevator.

Sleepy Eye, Minn.—A sprinkling system to fight fires will be added to the Farmers Elevator equipment.

Madelia, Minn.—The Northland Milling Co. is the new name for the mill recently taken over by the Sheffield interests of Minneapolis. B. B. Sheffield heads the new company with F. W. Erickson, manager.

Brandon, Minn.—The Brandon Independent Elevator Co. has been incorporated with capital stock of \$10,000, to buy, sell and store grain, seed, fuel, etc. President C. W. Meckstroth; Vice-President Jacob Tamble; Secretary-Treasurer Jos. M. Tamble.

MISSOURI.

Mexico, Mo.—H. H. Watson, former manager of the Producers Grain Co., is doing a seed and feed business here.

Downing, Mo.—The Downing Milling Co., formerly owned by Charles Simmons, has been purchased by W. F. Riley.

Alma, Mo.—The Farmers Elevator is building a new elevator and office building and will install scales and dump.

Palmyra, Mo.—The Farmers Elevator & Exchange Co. held their annual meeting April 4th. A 7½ percent dividend was declared.

Boonville, Mo.—The Farmers elevator was practically destroyed by fire of unknown origin, causing a loss estimated at \$5,000, partly covered by insurance.

MONTANA.

Helena, Mont.—Despondency over the loss of some \$4,000 invested in a grain elevator in Indiana, caused the suicide of Alfred Lutz.

NEBRASKA.

Mason City, Neb.—The Tierney grain elevator is being torn down.

Raymond, Neb.—The Raymond Coöperative Grain Co. has just installed an electric motor.

Northport, Neb.—The Dunlap & Cove 10,000 bu. elevator was completed and started operation March 1st.

Chappell, Neb.—The Lexington Mill & Elevator Co., Lexington, has awarded the W. H. Cramer Construction Co. contract to increase the capacity of their

elevator to about 45,000 bushels, with modern grain handling improvements.

North Platte, Neb.—The Nebraska Mill & Elevator Co. has been purchased by the McDonald State Bank at a sheriff's sale.

Giltner, Neb.—A truck dump has been ordered by the Farmers Elevator Co. because of the many patrons hauling via truck.

Stronsburg, Neb.—R. O. Andrews has resigned as manager of the Stronsburg Farmers elevator, having accepted a position with a large corporation at Woodstock, Ill.

St. Paul, Neb.—L. J. Puncochar has been chosen manager of the Farmers Grain & Supply Co. They will install a new 10-ton Fairbanks Scale and Kewanee Truck Dump.

NEW YORK.

Brockton, N. Y.—C. P., C. C. and J. E. Lawson have incorporated under the name of C. P. Lawson & Sons and will deal in grain, feed and other commodities.

NORTH DAKOTA.

Stevenson (Wahpeton, p. o.), N. D.—The Milo Billings elevator has discontinued business.

Crosby, N. D.—The Farmers Elevator Co. elevator has been sold to the Farmers Grain Co. N. E. Norman is manager.

Bottineau, N. D.—The Wanner Feed Store has been sold by George Wanner to Frank W. Lonsbrough who has taken charge, under the name of the Bottineau Seed House.

NORTH CAROLINA.

Shelby, N. C.—The Banner Flour Mills has been sold by K. L. Lawing to the Lincoln Ginnery Co. It has a capacity of 80 barrels. S. S. Carpenter, W. B. Mullen, Levi Hallman and Calvin Carpenter are interested.

OHIO.

Portsmouth, O.—A hot bearing caused a small fire, damaging the P. H. Harsha Mfg. Co., to the extent of \$200.

Lebanon, O.—The Lebanon Farmers Coöp. Co. will be managed by J. F. Decker, formerly manager of the Farmers Grain & Supply Co. of Camden.

Shinrock, O.—The Shinrock elevator office was burglarized and \$2.00 taken. The combination was hammered off the safe, but the yeggs were unable to get the inner door open.

Isleta, O.—The secretary and treasurer of the Plains Coöp. Co. have filed a petition asking for the appointment of a receiver to dispose of the grain elevator, equipment and merchandise, and

that the company be dissolved. It is reported that their indebtedness amounts to \$10,000.

Youngstown, O.—The Albert H. Buehrle Co. expect to move in their new elevator building about May 1, which, together with the one untouched by fire, will give them a capacity of about 2,000 tons of sacked goods.

OKLAHOMA

Red Fork, Okla.—Fire recently destroyed Rothhammer's feed store, located near here.

Meno, Okla.—The Farmers Elevator Co. will extensively remodel their elevator, work to start about April 1.

Muskogee, Okla.—A clipper Seed Cleaner with a capacity of 200 bushels hourly, has been installed by the Muskogee Mill & Elevator Co.

Oklahoma City, Okla.—The Oklahoma City Mill & Elevator Co. has placed a contract with the Nordyke & Marmon Co., Indianapolis, Ind., for additional equipment for their mill.

Frederick, Okla.—A company will be organized to operate the Billingslea Grain Co.'s elevators here and at Burt's Spur, recently purchased by Leo Potishman of Ft. Worth, Tex., and Carl Cassidy.

Mulhall, Okla.—Due to its loss by fire, the Mulhall Coöp. Grain Co. is withdrawing from the grain business. The Ponca City Mfg. Co. is erecting a 10-bu. elevator on the site of the former's burned house. The Star Engineering Co. has the contract.

OREGON.

Portland, Ore.—Shull Armstrong & Co. was taken over on March 16 by F. Wendell, who has been connected with the firm for the past three years.

Roseburg, Ore.—On April 1 work was started on the tearing down of the present wooden structure of the Douglass County Flour Mills. A two story concrete building will be erected, the capacity of the feed mill increased and the flour mill improved.

PENNSYLVANIA.

Venango, Pa.—The Venango Flour Mill was destroyed by fire causing a loss estimated at \$75,000.

SOUTH DAKOTA.

Humboldt, S. D.—Harry Peterson was elected manager of the Farmers Elevator Co. He has been connected with the elevator for over six years.

Plankinton, S. D.—Albert Grambiller bid in the Farmers' Union flour mill at \$8,100 at a receiver's sale. After making improvements, it is the purchaser's intention to operate the mill at full time.

Huron, S. D.—The Farmers Coöp. Packing Co. will be sold in federal bankruptcy court, following an order which has been issued to enjoin sale of the company to satisfy a judgment of \$180,000. The plant has a large number of creditors and it was contended in a petition, that any bid for the property would be low because a clear title could not be given.

LIGHTNING Strikes Elevators

Shinn-Flat Lightning Rods are particularly adapted to protect Grain Elevators. Cable is braided in Flat form, providing for expansion and contraction when elevators are loaded or empty. Your liberal discount on fire insurance warrants this investment.

Shinn-Flat Stops Lightning Losses

TENNESSEE.

Lawrenceburg, Tenn.—It is reported that Abrams Brothers, formerly of Wayne County, will put in a mill at this place, following the destruction by fire of the Lawrenceburg Flour Mill.

TEXAS.

Dallas, Tex.—The W. J. Lawther Mills has been chartered with \$150,000 capital by W. J. Lawther, I. A. Fridge, T. S. Kelly.

Brownsville, Tex.—By the installation of new machinery in the mill, the Tex-Mex Trading Co. can now manufacture heavy grain mixture for horses.

WASHINGTON.

Coulee, Wash.—A shortage of over 2,700 bushels of wheat was disclosed in an audit of the books of the bankrupt Farmers Corp. The directors refuse to accept this audit and another will be made.

Roman (mail to Turner), Wash.—A 50,000 bushel elevator has been started by the Turner Whetstone Warehouse Co., and will cost approximately \$15,000. It is to be the crib type, on a foundation of solid concrete.

Davenport, Wash.—The Big Bend Milling Co. has just completed a new mill with a capacity of 4,500 barrels of flour a year. In connection with the mill, five large grain elevators and warehouses are maintained throughout the Inland Empire.

WISCONSIN.

Baraboo, Wis.—Paul Gust, proprietor of the Gust Coal Co., has purchased the Carpenter and Wakefield warehouse. The new enterprise will be known as the Gust Fuel and Warehouse Co. S. E. Wakefield will continue in charge of the flour and feed business.

De Pere, Wis.—The defunct Powell Mfg. Co. mill has been dismantled and is now in the hands of pulp and paper interests. The machinery was sold in November.

TERMINAL MARKETS.

[Continued from page 17.]

Buffalo to Baltimore in 1922, was heard last week.

Charters for several full cargoes of grain, to go out during the month of April, promise to materially relieve the congestion which has existed for some time at the export elevators here. It is reported that eight steamers will deliver cargoes (mostly rye) to Russian ports for account of the Soviet government.

The largest grain deal ever put through by a Baltimore firm was closed last week in New York by J. Murdoch Dennis, vice-president of Dennis & Co., Inc., forwarders and commission merchants of this market, when he sold to agents for the Soviet government of Russia, through New York and Baltimore exporters, 7,000,000 bushels of rye now stored in Baltimore export elevators. The grain is valued at approximately \$9,000,000, and in the transaction the money to cover its purchase price was said to have been cabled from Russia to the New York agents of the Russian Government and the money handled through the Equitable Trust Co. of New York. Nearly all of this rye was sold for first half of April shipment, and it is estimated that it will require about 28 full cargo ships to transport the rye to Black Sea ports. Some of the vessels are already loading here.

Exports of flour and grain from the port of Baltimore during the month of March, with comparisons for the same month last year, were as follows:

	Mar., 1925.	Mar., 1924.
Flour, bbls.....	129,291	26,502
Wheat, bu.....	1,109,253	1,296,316
Rye, bu.....	801,132	141,428
Barley, bu.....	301,500	23,333
Malt, bu.....	24,588

BUY and SELL red, white and alsike clover—white and yellow blossom sweet clover—alfalfa, redtop, blue grass and all seed grains.

NAME CHANGED.

Charles E. Prunty, wholesale seed dealer of St. Louis, Mo., has changed the name of his business to the Prunty Seed & Grain Co.

TOLEDO MARKET UPHOLDS STANDARDS.

TOLEDO seed dealers have been quite wrought up about an article recently appearing in the *Seed Trade News* written by Curtis Nye Smith, chairman of the Grievance Committee of the Wholesale Grass Seed Dealers' Association. In some roundabout way it seems Mr. Smith heard that there was a car of Italian clover headed for Toledo and jumped to the conclusion that it was to be used by a Toledo dealer. A certain Toledo dealer had bought a car of French clover from a Baltimore seed dealer and when the car arrived in Toledo it was found to be Italian clover. This dealer immediately wired the Baltimore seedsmen that he had refused the car and would put it in store for his account. The Toledo Produce Exchange passed a rule prohibiting the delivery of Italian clover on contracts on February 19, 1924, and in addition all Toledo dealers pledged themselves over their signatures not to handle Italian clover at that time. The grievance committee of the above named association it appears knew this fact in addition to the facts in the above case. They were undoubtedly hasty in their conclusions and cast a reflection on the word of Toledo dealers. If there is one market in the country that has tried to uphold the highest standards in the merchandising of seeds it is the Toledo market. A good deal of petty jealousy has been aroused at times because this market has provided the best facilities for the hedging and delivery of prime clover, alsike and timothy. As a matter of fact Toledo dealers have always been ready at all times to co-operate with the Seed Trade Association in its efforts to raise the seed standards and prohibit the importation of any seeds not adaptable to this country. The car of clover in question coming from Baltimore could not be examined until its arrival and when it was found to be other than represented was quickly refused. Later the car was moved to Frederick, Md., for

We buy and sell all standard varieties of grass, clover and farm seeds. Correspondence solicited.
WM. A. WARD SEED COMPANY
Sacramento, Calif.

the account of the eastern dealer. Mr. Smith published in the *Seed Trade News* of March 17th a true account of the facts which is as it should be but it does not relieve the committee of which he is chairman. Their error was certainly a grievous one and should not be allowed to occur again.

TOLEDO SEED PRICES.

The following table shows the range of prices for seed on the Toledo market for cash and the futures of clover, alsike and timothy for the week ending Apr. 4:

	Range for wk.		Close	Close
	High.	Low.	Mar. 28.	Mar. 21.
Clover—				
Cash	\$16.70	\$16.50	\$16.70	\$16.50
Oct.	14.00	13.25	14.00	13.25
Alsike—				
Cash	14.50	14.00	14.50	14.00
Aug.	13.00	12.00	13.00	12.00
Timothy—				
Cash	3.00	2.80	3.00	2.80
May	3.10	2.90	3.10	2.90
Sept.	3.40	3.25	3.40	3.25

SEED RECEIPTS AT TOLEDO.

Following is a statement of seed receipts and shipments at Toledo in bags for week ending Apr. 4 and season to date and comparisons, also stocks, etc., as compiled by C. A. King & Co.:

	Receipts.	Shipments.
	Clov. Als. Tim.	Clov. Als. Tim.
Last wk. ...	70 77 93	1,027 668 1,326
This sea. ...	15,220 5,884 18,286	18,944 5,358 9,101
Last sea. ...	27,430 9,546 10,731	28,051 6,268 8,935

Toledo stocks Apr. 14—Red clover 5,433 bags, alsike 4,854 bags, timothy 14,926 bags. Imports red clover this week none. Exports timothy this week 100 bags.

PRIME INSPECTED.

This season	8,105	3,650	11,523
Last season	15,700	7,850	7,135

TOLEDO SEED MARKET.

TOLEDO, OHIO, April 6.—All seeds were higher the past week and a brisk demand for clover has made dealers more confident. From all indications at this time it appears that the trade will continue well into April and this will give seedsmen an opportunity to get their stocks cut down to the minimum. Large deliveries of March clover went into strong hands and most of it was shipped out to be merchandised by seedsmen in all parts of the country. Arrivals of foreign clover will be light now as they have shipped the bulk of their crop and supplies over there are pretty well exhausted. The carryover will likely be small at the end of the season as the present demand is fast reducing stocks. Domestic clover is wanted in many quarters and dealers are paying a fancy premium for strictly domestic grown. The seeding season is at least a week or two late and this will lengthen the trade. October clover

Field and Grass Seeds

gained fifty-five cents last week on the cash by advancing seventy-five cents while the cash only climbed twenty. A good trade is reported in the new crop and when weather and crop reports begin to count October will be strong and active. Receipts of clover last week, 70 bags, and shipments 1,027 bags. Seed receipts last month were 2,859 bags of clover; 326 bags of alsike, and 1,328 bags of timothy.

Alsike showed great recuperative powers the past week with cash advancing fifty cents and August the new crop future advancing a dollar. The cash demand has been much greater than dealers expected and this has caused sentiment to grow on the bull side. Alsike has been substituted for clover in many sections because of the lower prices. Receipts last week, 77 bags, and shipments 660 bags.

Timothy was also in the swim with a twenty-cent advance. The cash trade was increased with old prime bringing fair prices and new prime also being called for by country dealers. Receipts last week, 93 bags, and shipments 1,326 bags.

MILWAUKEE SEEDS.

Movement of timothy seed and clover seed at Milwaukee as reported by THE PRICE CURRENT-GRAIN REPORTER by H. A. Plumb, secretary of the Chamber of Commerce, for week ending April 4, 1925:

	Receipts, lbs.		Shipments, lbs.	
	Tim.	Clov.	Tim.	Clov.
1925.....		53,328	76,015	145,240
1924.....	77,318	19,158	155,415	162,595

CHICAGO SEED MOVEMENT.

Following is a statement of receipts and shipments of grass seeds at Chicago for the week ending Apr. 4, previous week, same week of 1924 and for the season to date, starting July 1 of the years indicated (amounts stated in pounds, 000 omitted):

	Timothy.	Clover.	Other.
	Rcts. Shpts.	Rcts. Shpts.	Rcts. Shpts.
Week. ...	547 613	213 181	547 68
Prev. wk. ...	245 417	311 315	78 212
1924	183 712	275 322	656 602
1924-25 ..	34,164 24,460	9,897 5,084	15,548 15,220
1923-24 ..	30,166 18,019	9,314 6,708	22,132 11,941
1922-23 ..	30,309 28,093	9,776 7,940	22,482 5,841

Timothy—Outside inquiry increasing and market firm. Offerings were light. Fair country run \$5.00@5.50 per 100 lbs., good country run about \$5.70@5.80, high grade \$5.85@5.90, choice \$6 and fancy at \$6.25@6.50. Sales at \$5.75@6.00.

Alfalfa Seed—Fair demand; prices steady. Re-cleaned country lots at \$21.00@22.00 per 100 lbs.

Clover Seed—Market unchanged. Fair offerings noted, but no sales. Country lots \$19.50@22.25 for 100 lbs., good \$23.00@24.00, choice \$24.50@25.50, fancy \$26.50@27.50, and Mammoth \$22.50@28.00, according to quality.

Flax Seed—Up 5c. No. 1 Northwestern closed at \$2.78@2.81 per bu. of 56 lbs.

Alsike—Market firm. Good demand. Fair country lots \$15.00@16.00 per 100 lbs. Good seed \$16.50@18.00, choice \$19.00@20.00 and fancy at \$20.50@22.00.

KANSAS CITY SEED MARKET.

KANSAS CITY, April 4.—Spring trade in most of the grass seeds is practically over, but dealers expect April to be a good month for business in alfalfa seed. Shipments of alfalfa seed are being made in all directions and in all sized packages. Orders for tested cane seed are coming from the South, North and East, but heavy offerings from the country have made a very weak market and most seed is selling on a feed-mixing basis. Local receipts in March were 61 cars and shipments were 30 cars. German millet is hard to find and not much of any other variety is offered. Prices are high, compared to cane and Sudan,

but a fair demand is reported. Sudan seed trade is improving. There are fair offerings and buyers are satisfied with ruling prices, though growers are not. No great interest has developed in soy beans and cowpeas, which will not be planted for some time.

Wholesale prices of seeds, per cwt. sacked, are about as follows: Bluegrass, \$17@28; timothy, \$5.50@7; red clover, \$25@34; sweet clover, \$10@14; alsike, \$17@23; alfalfa, \$16.50@23; Sudan, \$4.50@5.50; redtop cane, \$1.70@1.80; orange cane, \$1.75@1.85; black amber, \$1.60@1.70; German millet, \$4@4.75; common, \$3@3.75; Siberian, \$3@3.50; hog, \$2.75@2.90; soy beans, \$2@3.25 per bushel; cow peas, \$4.50@5.

The traffic committee of the Kansas City Feed Manufacturers' Ass'n has asked the railroads to standardize the freight rate classifications on mixed feed. As explained by S. T. Henson, chairman of the traffic committee of the association, the main object is to simplify bookkeeping. Mr. Henson said a saving of one-third of the office expense in his department as traffic manager for the Soutnard Feed & Milling Co. could be made if the railroads would accept billing on corn, oats and other grains and allow it to apply on mixed feeds without specifying the number of pounds of each ingredient used. On the committee with Mr. Henson is L. N. Conyers, Arcady Farms Milling Co., secretary; W. L. Bridges, Western Grain & Milling Ass'n; R. N. Steinmacker, Tarkio Molasses Feed Co., and F. S. Nesmith, Ralston-Purina Mills.

ALBERT DICKINSON DIES.

Albert Dickinson, veteran member of the Chicago Board of Trade and head of Albert Dickinson Co., one of Chicago's largest seed firms, died April 5 at his home in Orange City, Fla., where he had lived since his retirement in 1911. He was 84 years old. Until a few days ago he had appeared in good health.

Funeral ceremonies were in Orange City and the body later will be brought to Chicago for interment.

Mr. Dickinson had been the active head of his business here for twenty-five years before his retirement. In 1911 he was married to Mrs. Emma Benham Dickinson, who survives him.

For years, Mr. Dickinson was a member of the Board of Trade, and during the Civil War he served with Taylor's Battery, the famous Board of Trade outfit. He served as a gun captain in some of the major engagements of the war, including the battles of Vicksburg and Shiloh.

ST. LOUIS SEED MARKET.

Quote: Timothy, fair to good country seed at \$5.50 to \$5.75, low-grade, weedy and dark at \$2.00 to \$4.50; clover, fairly clean to high grade clean seed at \$20.00 to \$25.00, heavily to slightly weedy lots at \$8.00 to \$20.00, screenings and tailings less; alsike at \$15.00 to \$20.00; alfalfa at \$16.00 to \$20.00; redtop at \$11.50 to \$11.80 for clean seed—chaffy at \$2.00 to \$10.00; Sudan grass at \$4.25; German millet at \$4.00; White Wonder at \$3.50; hog millet at \$2.05 bulk basis.

Stock Peas—Quote whippoorwill at \$3.60 to \$4.00 and new era and mixed at \$3.25 to \$3.30 per bu. on basis of latest sales.

Sorghum Cane Seed—Last sale black amber at \$1.55 per 100 lbs.

WEEKLY LINSEED REVIEW.

NEW YORK, April 6.—United Kingdom: The linseed situation in the United Kingdom displays a steadier tone toward the close of the week. There has been a moderate business transacted in seed, and crushers are showing more interest.

Linseed oil is now about steady. Consumers bought freely on the recent decline.

Cotton oil rules firmer with more business passing in all classes.

India: Shipments of linseed from Indian ports this week amount to only 56,000 bushels compared with 256,000 bushels last week.

Argentina: Markets for linseed in this country have been dull and heavy during the week. The foreign demand for linseed has been slow, but farmers are not pressing offerings heavily. Clearances still continue moderate at a trifle over 1/2 million bushels compared with 1 1/2 million bushels at this time a year ago. Port stocks remain unchanged from last week at 3,200,000 bushels which compares with six million bushels at this time last year.

DULUTH FLAXSEED MARKET.

DULUTH, MINN., April 4.—Holders of flaxseed experienced a trying period during the last week, the trend of prices continuing persistently downward up till Saturday following a break of 7 1/2 cents on Monday. Specialists in the market felt disappointed over the apparent failure of prices to find a resting spot. They claimed to have been especially impressed over the slow demand experienced even at the low spots made during the week. Buying continued light, and any rallies from time to time were fitful. Advances extending to 5 cents were staged on Saturday with good bidding.

The net result of the six days' operations was a decline of 6 1/2 cents in spot, and of losses extending to from 2 3/4 to 6 cents in the futures.

The movement of seed from the country to the terminals almost completely dried up as shown in receipts of only 12,461 bushels during the week. Shipments came to 29,382 bushels, including 20,366 bushels of bonded, leaving stocks of 383,000 bushels in the elevators.

In the opinion of leading operators in the trade the market in flaxseed has gotten down to a price level where real support might reasonably be looked for. It is noted that the present quotation in the May future compared with a high on the crop of \$3.26 1/2 set on January 31. As a draggy market has prevailed to a great extent since, many consider that the time has now come to adopt a constructive attitude. They are quite ready to concede that the outcome in market operations depends to a great extent upon the attitude of Argentine operators. It has been noted that Buenos Aires interests have invariably dropped their prices to meet any downward readjustments on the American markets. In that they are thought to be evincing anxiety regarding the slow European buying of seed so far this season, and it is assumed that they have been marking down their quotations in the hopes of bringing about the inauguration of buying from over there in sufficient volume to clean up their stocks. In the meantime the movement of seed from Argentine ports to this country is gaining and as an outcome Eastern crushers are now able to obtain Argentine seed with the 40 cents duty paid cheaper than they can bring along American seed from Lake Erie ports. The outcome of the present struggle between holders of Argentine and American seed is being awaited with interest in trade circles.

Closing prices of flaxseed on the Duluth market on Saturday, as compared with the previous Saturday and the same period last year, were:

GROWING SEED CROPS EXCELLENT.

GIBSON CITY, ILL.—Seed situation as to stocks of alsike, red and sweet clover all cleaned up, due to unusually big late demand. There are still supplies of timothy, sudan and soy beans.

Prospects for growing crops are excellent, especially in the red clover.

Seed corn germination is the next thing the farmers are talking about, aside from the tremendous decline in corn prices.—J. A. Oxley, Noble Bros.

CASH CONTRACT WHEAT.

Following is the monthly range of cash No. 2 red winter and No. 2 northern (and better) wheat at Chicago for a series of years:

COTTONSEED MEAL.

KANSAS CITY, April 4.—Trade in cot-
tonseed meal and cake is quiet, with
prices practically unchanged during the
week. Local dealers are selling carlots
at \$41.10 per ton for carlots and \$5
more than ton lots. Oklahoma mills are
offering freely at \$35.50@36 and Arkan-
sas product is available at \$36 from
most points, while Texas is asking \$35.
Owing to a let-up in the export demand,
Texas has more meal for domestic sale,
but it is being taken mainly in the state,
due to the recent drouth scare. In
southern Arkansas a large percentage of
the outturn is going into the fertilizer
trade.

A decline of 30c per ton in linseed
meal is announced. Yet the demand re-
mains poor. Dealers are quoting carlot
prices at \$43.50 to \$44.50 per ton, with
the top for pea size. Minneapolis mills
are offering liberally at \$39.25 to \$40.25.

April usually marks the beginning of
the dull summer period in tankage
trade, but dealers say summer feeding
in the last year or two has shown a
tendency to increase, and for this rea-
son they are hopeful. Hogs are on a
good level. Tankage prices are holding
steady, with carlots at \$55 a ton and
ton lots at \$60. Kansas and Missouri
poultry interests are fair buyers of
meat scrap at prices formerly quoted,
which are \$60 and \$65 per ton, accord-
ing to quantity.

GLUTEN FEED PRICES.

Special interest attaches to the gluten
feed market prompts listing herewith
the price changes for the past ten
months. The comparison with corn
shows that for many months gluten feed
was a pronounced advantage in price
and, of course, no one is in doubt
relative to its splendid feeding prop-
erties.

	Per ton in bulk

MINNEAPOLIS CASH FLAX MAR- KET.

Crushers were bidding sharply for
current offerings of seed that they could
use and the flax market was all of firm
through the week while other grains
were slow sale. The poor quality seed
was difficult to sell however. Offerings
were very moderate and were picked up
rapidly. Today's range of sales shows
No. 1 seed, spot, 1c under at 3c over the
May, and the to arrive at 1c under at 2c
over.

OIL MEAL MARKET.

The oil meal market has shown no
change here. Minneapolis prices are if
anything a shade lower. The mills con-
tinue in a very independent position in
view of the fact that they are well sold
up for the current month, in fact most
of them are from a few days to a week
late in making shipments.

Peasize meal continues extremely
scarce and most of the crushers are ask-
ing \$1 per ton premium. The demand,
on the other hand, is keeping up fairly
well for immediate shipment. There is
no buying of round lots but one, two
and three car orders are coming in right
along and, as they are principally for
rush shipment, they are becoming in-
creasingly difficult to fill.

There has been a strengthening in
eastern export cake values and prices
are up about \$2 per ton from the low
level which prevailed a short time ago.
—The Bertley Bulletin, Chicago, April 4.

FEED DEMAND GOOD.

MONTICELLO, IND.—The demand for
mill feed is very good at present. In
fact, we can not fill all the local orders
that we have.—Loughry Bros. Milling &
Gr. Co., by C. Loughry, Pres.

NEW YORK OATS MARKET.

Oats receipts 114,000 bushels bonded,
146,000 bushels domestic. The action of
the market was in accord with the other
grains, though prices declined to a
smaller extent. The fact that present
values now are so far below those pre-
vailing a year ago and their relative
cheapness should appeal to consumers
generally. Supplies are decreasing in a
satisfactory manner but the amount
available is so large that there must
necessarily be a large carryover into the
new crop. Exporters continue to take
Canadian oats in preference to Ameri-
can on account of their better quality
and lower prices. Total sales, however,
were not large enough to become a fac-
tor. The demand throughout the East
was again very small with but little in-
dication of improvement even at the
lower level attained. There was a fair-
ly good inquiry from local dealers for
Duluth 3 whites and Chicago 3 whites,
ex-lake, now at Buffalo, the basis for
which remained considerably below that
for all-rail oats for the central mar-
kets.—L. W. Forbell & Co.

FEED MARKETS.

BOSTON.

Boston, April 3.—Millfeed—Prompt ship-
ment, per ton: Spring bran, \$28@28.50;
winter bran, \$29@30; middlings, \$28.50@35;
mixed feed, \$33@39.50; red dog, \$45@50;
gluten feed, \$39.95; gluten meal, \$48.70;
hominy feed, \$40.50; stock feed, \$42; oat
hulls, reground, \$14; cottonseed meal, \$43.75
@47.50; linseed meal, \$43.50@44.

Oatmeal—Per 90-lb. sack, rolled, \$3; cut
and ground, \$3.30.

Oats—All rail, fancy, 40 lbs., 60@61c;
fancy, 38 lbs., 58@59c; regular, 38 lbs., 57@
58c; regular, 35 lbs., 56@57c; regular, 34
lbs., 55@56c.

MINNEAPOLIS.

Minneapolis, April 4.—There is really
nothing to be said regarding the local mil-
feed market this week that has not been
said of it last week, the one preceding that,
and the one preceding that, ad infinitum.
Eastern mills are able to offer feed at
prices which cannot be met here and the
only thing that apparently is holding this
market up right now is the extremely light
production. Green grass is just around
the corner and should have a weakening
effect on the market if it were not for the
small amount of feed which is being turned
out of the Minneapolis mills. Of course,
the mills themselves are able to dispose
of a small quantity of feed along with their
flour, in mixed cars, but that seems to be
about all. The jobbing trade is doing
nothing and the amount of business which
the mills are able to do in straight cars is
negligible also.

Shipments during the past week show a
slight improvement over the previous one
at 10,167 tons vs. 9,744 last week and 12-
\$68 a year ago. Season shipments since
Jan. 1: 162,651 this year vs. 202,952 a year
ago; since Sept. 1, 408,184 this year vs.
473,826 a year ago.

Today's asking prices were: Standard
bran, \$23; pure bran, \$23.50; shorts, \$23;
flour midds, \$28; red dog, \$36@40; oil meal,
\$39.50@40.

MILWAUKEE.

Milwaukee, April 4.—Feed quotations de-
clined from 50c to \$2 in the Milwaukee
market during the past week. Practically
no orders were booked for future delivery
and current stocks could only be moved at
concessions and with considerable effort.

MILLS—Minneapolis - Chicago - Toledo - Buffalo - Edgewater

High protein feeds were especially dull. Current quotations are: Winter bran, \$25.20 @25.70; spring bran, \$24.50@25; standard middlings, \$24@25; flour middlings, \$30.50@31.50; red dog, \$37.50@38.50; rye feed, \$25@25.50; linseed oil meal, \$40@41.50; cottonseed oil meal, \$38.50@43.50; hominy feed, \$36.50@37.50; oat feed, \$6@6.50; gluten feed, 30 days, \$32.80; in 100-lb. sacks, carlots, f. o. b. Milwaukee.

CINCINNATI.
Cincinnati, April 4.—Smaller offerings of millfeeds, more than any improvement in the demand, was the sustaining influence of the market and prices closed the week about unchanged. Reports to the trade generally indicated a very light production with a number of mills closed down and others operating at a reduced capacity. Mills were said to be very short of stocks and a number of contracts with local firms for March delivery have not as yet been filled. Quotations represent 100-lb. sacks: Soft winter wheat bran, \$29@29.50; hard winter wheat bran, \$29@29.50; spring wheat bran, \$29@29.50; standard middlings, \$29.50 @30; soft wheat middlings, \$35@35.50; gray hard middlings, \$35@35.50; mixed feed, \$33 @33.50; No. 1 alfalfa meal, \$29; hominy feed, \$35.50@36.

BALTIMORE.
Baltimore, April 4.—The general wheat feed situation continues dull and easy under more than ample supplies to satisfy the limited demand at present in evidence. Hominy feed about steady as last quoted. Gluten feed continues to sell very sparingly. Dried beet pulp in fair demand in a jobbing way. Alfalfa meal tending lower. Quotations follow: Spring wheat bran, per ton, 100-lb. sacks, \$29.50@30; Western middlings, per ton, 100-lb. sacks, \$30@30.50; gluten feed, per ton, \$38.50@39; hominy feed, per ton, \$44@45; alfalfa meal, per ton, \$30@31; dried beet pulp, per ton, \$37.50 @38.

DULUTH.
Duluth, April 4.—Market in feeds held comparatively steady during the last week. Millfeeds are off from 50c@\$.1, but ground feeds are unchanged. Dealers experienced a slow demand from any quarter, with jobbers buying only for their immediate needs. Millers reported large accumulations of supplies. Closing prices per ton follow: Bran, \$24; shorts, \$25; Boston mixed, \$25; red dog, \$38; flour middlings, \$30; ground oats, \$27.50; No. 1 ground feed, \$35.75; No. 2 ground feed, \$33.75; No. 3 ground feed, \$31.75; cracked corn, \$40; coarse corn meal, \$40.

MEMPHIS.
Memphis, April 4.—All kinds of feed have been slow, and the wildness in the grain markets has made matters worse. Some

improvement was just getting under way when the recent breaks came, and now the trade do not know when to look for renewal of demand, although it cannot be long deferred because of the small supplies in the hands of consumers. Millfeed is slightly firmer. Wheat bran quotable today at \$27@28, compared with \$26.50@27 a day or so ago. Gray shorts are very slow and quotable at \$33@34. Alfalfa meal is almost unsalable, as mixed feed people are over-supplied and quotations show a spread of about \$2 a ton, from \$25@27 for No. 1. Mills are offering cottonseed meal rather slowly, but the price has been shaded 25c a ton within the past day or so because of limited demand. Cash quotation today is \$34 for 36 per cent, \$36.26 for 41 and \$38.25 for 43. Loose hulls are in limited demand at \$8 a ton.

NEW YORK.
New York, April 4.—Feed prices closed the week at the low of the movement as well as down around the bottom for the season. Despite this big break there was practically no demand. With the spring weather and the fine conditions prevailing throughout the West, dull markets are expected. City bran is quoted at \$28, middlings \$29 and red dog \$45, while Western bran rules at \$28@28.50, middlings \$28.75 and red dog \$45@45.50 per ton.

PHILADELPHIA.
Philadelphia, April 4.—Feedstuffs are dull with moderate offerings, but prices are better sustained. We quote carlots in 100-lb. sacks at cost per ton: Soft winter bran, \$32@32.50; winter middlings, \$35@36; spring bran, Western shipment, \$27.50@28.50; standard middlings, W. S., \$29@32; flour middlings, W. S., \$37.50@41; red dog, W. S., \$44@45; low grade flour, W. S., \$50@51; rye middlings, W. S., \$29@30; reground oats feed, \$13@24; fine yellow hominy, W. S., \$37@38; fine white hominy, W. S., \$38@39; cottonseed meal, 36% protein, W. S., \$42@42.50; cottonseed meal, 41% protein, W. S., \$44.45.

THE OLDEST SPECULATOR.
The oldest successful speculator prominently mentioned in the Good Book is Noah. He went long a lot of time, energy and labor, building the Ark, because he was sure it was going to rain hard. It did, and those that believed in his theory saved their belongings, as well as lives.
Since Noah's time speculation has been rife in every sphere of life, but

for some reason the farm agitator and the pinheads look upon the speculator as being the Original Sin, instead of the Original Life Preserver he always has been. No argument in favor of speculation can be advanced better than the handling of last year's grain crop. It was the speculator with a theory who put the American farmer on his feet in a financial way, after the leading economists and politicians exhausted their theories and farm agitators, wheat poolers (lately deceased) choked on their own exhaust trying to do it. It's the speculator who served as a safety chute permitted the vast grain industry to slide down from dizzy heights without a failure of consequence, as he was necessary in absorbing a big portion of the hedging, that enabled the industries to pay advancing prices for cash grains, regardless of the movement, because he had the nerve to buy. Seems to me, Old Top, the farmer should cultivate him and Congress vote him a medal.—*Tod Sloan, B. C. Christopher & Co., Kansas City, Mo.*

Use our liner advertising department to sell or buy second-hand equipment.

Fundamental Conditions Bullish
On March 3rd, we switched from the bull to the bear side of all grains. We did this on account of the technical position of the markets. On April 3rd, we turned bullish for similar reasons and from the fundamental conditions everyone knows what happened between these two dates.
The service which protects one from serious losses in critical periods and at the same time places him in position to secure large profits is the one worth having at all times. Market Chart furnishes just such service.

SHOULD BE IN ALL MASH FEED

Feed manufacturers who study the reports from Agricultural Colleges and Poultry Experimental Feeding Stations are quick to realize the important role that Dried Buttermilk is playing in poultry feeding. It is a fact that Dried Buttermilk is now practically accepted as an indispensable and most necessary adjunct to all mash feeds by poultry raisers and poultry experts.

You can't ignore this

BULLETIN 258

Indiana State Experiment Station

Form of Buttermilk	Eggs Laid	Cost per Dozen
Dried.....	189.4	16 Cents
Liquid.....	164.7	16 Cents
None.....	56.6	33 Cents

If you are a manufacturer of mash feed for growing and developing baby chicks, egg production in hens and pullets, or fattening fowls for market, you must consider the "handwriting on the wall," viz: public demand for Collis Process Pure Dried Buttermilk in all mash feeds. Collis Process Pure Dried Buttermilk is manufactured under our patented process which retains all feeding elements and lactic acid found in freshly churned pasteurized buttermilk. Write for further data, authentic feeding reports, cost figures and prices.

ALL KINDS

FEEDSTUFF SITUATION.

The demand for standard middlings and the heavier feeds is unchanged. Much better feeling on the part of buyers for bran and more interest shown, but only for immediate quick or prompt shipment. Buyers are very reluctant to spend their money for feeds much beyond 30-day shipment. Sellers, on the other hand, are discounting May and June considerably but very little business being placed.

MINNEAPOLIS.—Bran, \$23; standard middlings, \$23; flour middlings, \$29; red dog, \$37.

CHICAGO.—Bran, \$25.60; standard middlings, \$25.60; flour middlings, \$31.60; red dog, \$39.60.

KANSAS CITY.—Bran, \$23.50; gray shorts, \$27.

ST. LOUIS.—Bran, \$25.90 gray shorts, \$29.40.

ALFALFA MEAL.

Some declines are experienced on alfalfa meal during the past week, due principally to the urgency of alfalfa millers to obtain directions, and it was only for immediate shipping instructions that lower prices were made. Nominally quoted, second hand bag basis, choice, \$26.50; No. 1, \$24.50; No. 2, \$19.50. New bags, 50c more. Fine ground grades, \$3 to \$4 a ton premium.

REGROUND OAT FEED.—More sellers interest than buyers. Market none too strong, though mills not willing to sell much beyond sixty days at present current prices. Nominally quoted reground, \$6.50; unground, \$7.50.

HOMINY FEED.—This commodity has had some radical declines during the past three weeks and within the last month there has been practically \$10 a ton decline in some instances. Nominally quoted, sack basis, white, \$35; yellow, \$34.50. In bulk, \$1.50 to \$2 a ton less.

LINSEED OIL MEAL.—The mills are very well supplied with shipping instructions for the ensuing thirty days, consequently there is no selling pressure for this time of shipment. Market is holding very well and steady. Nominally quoted, sack basis, \$40.50 Chicago; \$39 Minneapolis; \$2 a ton less in bulk.

DRIED BUTTERMILK.—Demand is very good and market is cleaned up in fine shape. Less than car lot shipments moving very rapidly. Baby chick raisers continue to purchase heavily and are expected to absorb the entire production for some weeks. Quotations are as follows: Creamery in carlots at 6½c per lb. and L. C. L. up to 7½c.

COTTONSEED MEAL.—There has been no change in this market, demand continuing slow and prices are easy. With indications pointing to a smaller cotton crop this year, and consequently higher prices a clean-up is looked for before the new crop. Meal is nominally quoted for 43 per cent protein, Chicago basis, at \$42.50.

GLUTEN FEED.—Demand is slackening somewhat, buyers apparently awaiting the price change due this month, and the only orders being placed are for immediate shipment. Quotations follow: Gluten feed in bulk \$30 a ton, sacked \$32.80; gluten meal of 40 per cent protein \$41.80 in sacks, \$39 in bulk.

PACKERS' PRODUCTS.—Demand is slackening somewhat, buyers apparently being willing to wait awhile and see what happens to the grain and live stock markets. Prices are as follows: Meat scraps in carlots f. o. b. Chicago, \$55@60 a ton; 60 per cent protein digester tankage, \$50; raw bone meal, \$50.

CHARCOAL.—Seasonable demand at a price basis f. o. b. Chicago; Milwaukee carlots, \$33@38 per ton, depending upon size of charcoal. Less than carlots, \$35 @50 per ton, standard units of 50-lb. burlap bags (for the finest grades, paper lined) in 13-ton minimum cars.

PROHIBITION RESULTS.

The Grain Trade Ass'n of the San Francisco Chamber of Commerce is distributing to the trade and elsewhere a chart which shows numerically and graphically the arrests for intoxication and all other causes in a hundred United States cities selected for publicity purposes by the Anti-Saloon League and also from three hundred cities selected for the same purposes by its branch organization, The World League Against Alcoholism. The Anti-Saloon League has admitted the correctness of the figures shown on the chart.

The chart covers a period of years from 1910 to 1923 and shows in the graph only a slight increase in number of arrests for intoxication from 1910 to 1916 and during the years 1917 to 1919, which were wet years with regulations, a decided decrease in the number of arrests from about 375,000 yearly to 225,000. The number of arrests during the dry years of the Volstead Act from 1920 to 1923 starts off in 1920 with slightly under 100,000 arrests and each year shows a rapid increase until, in 1923, the number of arrests were about 375,000, which equals in number the arrests during any of the wet years since records were kept. The most startling information brought to light is that during the wet years the total arrests in this country for all causes was 1,032,669, while in 1923 under the Volstead Act, the number of arrests totaled 1,414,046. During this period which the chart covers, the population in the United States has increased 5% while the number of arrests for all causes increased 49%.

GRAIN FUMIGANTS NECESSARY.

The trade seems to be in the midst of another cycle of extra care in the preservation of grain stocks, noticeable through the application of grain fumigants, lightning protection, and similar activities.

In the first mentioned, the U. S. Department of Agriculture has supported the individual manufacturing and sales efforts of those concerns specializing in grain fumigants. Grain, seeds, flour and feedstuffs of all kinds are particularly susceptible to weevil infestation and among the commercially manufactured articles widely used by our trade for this purpose is "Tetri-Cide," sold by the Texas Chemical & Specialty Corp., Ft. Worth, Tex. It is a non-inflammable, non-explosive preparation, without odor or taste in the grain treated. It is manufactured in accordance with the above mentioned department's Bulletin No. 1313, dated Jan. 26, 1925.

The Texas corporation will also be remembered as the manufacturers of another similar product, "S-O-S Liquid Gas."

Stocks of both preparations are carried in containers of all sizes for immediate shipment and the treatment of grain in store and the preparations for putting new crop wheat into bins should find our readers alert to the inexpensive protection afforded by these products.

NEW FEED BARLEY GRADE.

April 15th will be the effective dating of a new feed barley grade as recommended by the Grain Committee for the guidance of the Sampling Bureau as follows: It shall test not less than 40 lbs. to the measured bushel, must contain not less than 70% barley, and may contain 8% of seeds and chaff, 22% of other grains, of which not more than 15% may be wild oats; shall be cool, and may include barley with a strong ground smell, or a musty or bin smell.

ALFALFA MEAL MARKET.

KANSAS CITY, April 4.—Old contracts for alfalfa meal are practically all filled and no new business is in sight. Manufacturers are cutting prices in the hope of reviving interest. As compared with quotations given a week ago, the market is \$1 to \$2 lower. Choice meal is offered in carlots at \$26@27 per ton, No. 1 at \$21.50@22.50, No. 2 at \$17@18 and No. 3 or brown at \$16@16.50. Conditions in the grain markets are held responsible for much of the dullness. Mill operations are light, except for storage.

Mixed feed dealers quoted few price changes this week, mostly in the way of declines. Poultry feeds fell about \$1 a ton, owing to cheaper corn and other cereals. There was a drop of 50c a ton in the upper quality of horse and mule feeds. A good demand for poultry and horse and mule feeds was reported. Fair sales of hog feeds were announced. The dairy feeds moved in moderate volume. Other mixtures were quiet. The price list on feeds in carlots, per ton, is as follows: Dairy feeds, \$36@47; cattle, \$39@45; hog, \$45@51; pig, \$70; horse and mule, \$30@42; alfalfa-molasses, \$26@33; scratch poultry, \$47@53; mash poultry, \$50@76.

BUSINESS NEWS.

Walter A. Bellis, who for the past 13 years has been associated with the Minneapolis office of the Howe Scale Company, is now associated with Fairbanks Morse & Co., with headquarters at their Minneapolis office. Mr. Bellis' territory will be tributary to the Twin Cities. Mr. Bellis has many friends and acquaintances in the grain trade of the northwest who will wish him well in his new position.

Waller Mfg. Co., 1820 N. Kostner Ave., Chicago, advises that a new branch office has been opened in Room 1988, Railway Exchange, St. Louis, Mo. A. C. Stanhope, an experienced engineer in this field, is in charge.

The Omaha office of the Weller Mfg. Co. at 627 Grain Exchange Bldg., contemplates a good business this spring. O. F. Barklege is manager of the office, a man closely in touch with our trade for many years past and in position to furnish technical and engineering service in the erection of new elevators or the installation of machinery equipment in present plants.

100 PER CENT CORN.

Funk Bros. Seed Co., of Bloomington, Ill., in advertising "Funk's Individual Tested Seed Corn," says the seed has had the proper breeding and selection back of it, and with every ear showing 100 per cent strong germination.

TORNADO INSURANCE.

The Grain Dealers' National Mutual Fire Insurance Company of Indianapolis has just put out some very timely advertising, concerning the windstorm policy issued by it.

The announcement is made that the coverage is complete and the cost low. This company on December 31 had a total of \$123,054,789 insurance in force, available assets of \$1,702,946.29 and a surplus of \$1,039,409.40.

**These are the Fastest
Selling and Most
Profitable Feeds for**

FEED DEALERS

Sugared Schumacher Feed and Boss Dairy Ration are the fastest selling and most profitable feed for feed dealers because—

1. They are **QUALITY** Feeds that exactly meet the requirements of farmers and dairymen.
2. They produce such splendid results for feeders that they always come back for more.
3. They make a **COMPLETE** dairy ration. Sugared Schumacher Feed supplies the carbohydrates and Boss Dairy Ration the protein part of the ration.
4. Sugared Schumacher Feed is an "all 'round" feed—good for hogs, horses and dairy cattle.
5. They are extensively advertised in the farm and dairy publications. These convincing advertisements send thousands of customers to the stores of dealers who handle these feeds.

If you are not handling these fast selling and profitable feeds write us today for our attractive dealer proposition.

Hay Department

FARMERS HAVE 50%.

KEWAUNEE, WIS.—Relative to the hay situation in this territory we estimate that approximately 50 per cent of the past season's marketable surplus is still in the farmer's hands in this territory and with the condition of our markets, it appears that this hay will not be marketed before next fall. The frost has just come out of the ground in this section, consequently it is impossible to determine positively the extent of winter killing. We are of the opinion, however, that the present condition of the crop is about normal, and the winter killing has not been any more excessive than any previous season.—Kewaunee Grain Co., C. L. Duvall.

HAY MARKET REVIEW.

The hay market developed a weaker tone during the week ending April 4th, according to the Department of Agriculture. Continued mild weather restricted hay consumption while consumers in country sections were buying on a hand to mouth basis on account of the prospects of an early pasture season. Receipts were moderate as farmers were busy in the fields, but dealers' stocks were large and the offerings were fully equal to the slack demand. Low grades continued to move only at unsatisfactory prices.

Timothy was lower at most markets. The Boston market held steady with top grades moving readily, although some pressure was still required to move the lower grades. Receipts increased at New York and prices declined 50 cents on a dull market. The Philadelphia market was practically unchanged but timothy declined 50 cents at Pittsburgh in spite of light receipts. The quality of the arrivals at Cincinnati averaged only fair and the better grades sold readily while inferior hay was not wanted. The demand was slightly more active and the market was firm. Offerings were light at Chicago but timothy quotations were reduced \$1 per ton.

Alfalfa was weaker with decreased shipping demand. The accumulation at Omaha was reduced and there was some demand for green dairy alfalfa but other grades were hard to sell. Only good hay was wanted at Kansas City. Mills and feeders were not active in the market and shipments to the south and southeast were very light. California markets were weak on account of light local demand. New crop Yuma Valley alfalfa was moving into Los Angeles while abundant pasturage was restricting the takings of dairymen and stockmen.

The prairie market was draggy. The Chicago market was inactive and prices

declined \$1 at Minneapolis and St. Paul where a large amount of hay was arriving on trucks in addition to the carload receipts. The St. Louis market held steady but the demand at Omaha was slack, although the tracks were fairly well cleaned up on account of reduced arrivals. Low grades were very hard to move. Only good quality prairie was wanted at Kansas City. The stock yards were taking some good hay and there were a few sales to local retailers while the shipping demand was slightly more active.

KANSAS CITY HAY NOTES.

T. J. Tanner, Correspondent.

"The increasing number of motor vehicles, not only in the cities but on the farms, is chiefly responsible for the diminishing use of hay," said C. D. Carlisle of the Carlisle Commission Co. Thursday. "Hence the low prices. As the oil supply cannot last forever, the horse will again have his day, and then the hay business will come back into its own."

Kansas City hay and straw receipts last month were 2,650 cars, as compared with 2,724 in February. A year ago the March arrivals were 2,466 cars. During March, 1925, the offerings included 1,870 cars of alfalfa, 524 cars of prairie, 177 cars of timothy, 34 cars of clover mixed, 25 cars of clover and 20 cars of straw.

"I have heard much talk about financial stringency in the South as a cause of restricted buying of hay," said D. B. Tilson of Dyer & Co., "but I think this condition is confined to Mississippi. That state is feeling the effects of land price inflation, induced by war prices for cotton. Planters bought land at \$300 an acre which today would not fetch \$150. The mortgages are coming due and foreclosures are numerous. Cotton remains high as compared with pre-war prices, but as compared with war levels it is cheap."

C. F. Arnold, when asked Thursday about the demand for timothy hay, said it was good, provided dealers would give it away.

The annual banquet of the Kansas City Hay Dealers' Ass'n has been set for the evening of April 30 at the Hotel Savoy. One of the speakers selected is J. D. Cole, a former president of the association. President N. C. Campbell will act as toastmaster.

The generous rain of Wednesday night and Thursday caused an adjournment of Thursday's hay market. As the downpour covered most of the West and Southwest, the hay crop prospect was greatly improved. Meadows and bluegrass pastures are brightening up.

Receivers—Shippers

Hay, Grain, Millfeed, Alfalfa Meal
Live Stock Exchange Kansas City, Mo.

Drouth talk is hushed and an early spring is being realized.

E. J. Wagner of E. J. Wagner & Co. says farmers are tired of marketing low-priced hay and may be expected to devote their time during the next few weeks to field work. If there were a good demand for hay, a sharp advance in prices might be expected, but the consuming trade appears to be filled up.

There is a fair request for choice prairie hay and medium qualities will sell, according to reports of most dealers, but all agree that poor and damaged stuff is almost unsalable.

"With fair qualities of alfalfa hay selling at \$10 to \$11 a ton and the freight rate \$4 in addition to commission charges and the cost of baling and hauling, I can't see how the producer is able to make anything," said Bryant Arnold of the Kansas City Hay Co. one day this week. "We have grown two big crops, and I think it is time to reduce the production, especially in Nebraska, where the farmers have outdone Kansas in the alfalfa business."

J. C. Clover is convinced that economy in feeding, induced largely by high-priced corn during the last six or eight months, has curtailed the demand for all kinds of hay. "Tight money is another restriction on buying," he said Wednesday. "I believe this is to be true because customers are asking for mixed cars of alfalfa and prairie or timothy. It is unusual for a buyer to ask for such limited shipments."

J. M. Hail of J. M. Hail & Co. says he never saw hay buyers more critical as to the specifications on hay. Especially in the South they will turn down a car if the least excuse can be found.

THE HAY HEARINGS.

W. A. Wheeler, in charge of the hay, feed and seed division, Department of Agriculture, Washington, D. C., who with E. C. Parker, is making a trip throughout the west holding hay hearings, sends in the following on work accomplished the last week.

Hearings were held at Twin Falls, Hermiston, Yakima and Seattle, Wash., on grades for alfalfa hay. There was not much interest shown in the hay grades at Twin Falls because of quarantine restrictions, but at Yakima, there was a good attendance and considerable discussion on many phases of hay marketing with several contributions of diverse character as to the most desirable grades. No definite conclusions were reached as to the kinds of grades desired or their application, and the state department of agriculture has called a meeting to discuss the subject further with the growers next week.

The meeting at Seattle was well attended by dealers and consumers. There was a full discussion of all factors of classification and grading of alfalfa and many constructive suggestions were made. Those present were in favor of a twenty per cent maximum on light mixtures instead of the proposed thirty per cent and they also favored two heavy mixed classes for each combination instead of one class having over approximately thirty per cent of each major component. Those present voted unanimously in favor of the proposed grading scheme, recognizing in it a simple and practical basis for grading Northwestern alfalfa and alfalfa mixed hays.

The hearing at Hermiston, Ore., was well attended by both producers and dealers and they voted unanimously in favor of both federal state grades and inspections for Oregon. A committee was selected to work with the federal department on some of the details in the application of grades of grass mixtures in the Northwest.

WESTERN UPLAND ALFALFA AND TIMOTHY

HAY MARKETS.

NEW YORK.

April 1.—The New York Hay Exchange Ass'n has issued the following weekly report, with latest quotations:

Receipts for week, tons	1,263	Hay	50
Receipts last week	647	Straw	35
Receipts from Sept. 1	37,303		770

With heavier arrivals during the week and demand extremely dull, the general situation on the whole at the close is very unsatisfactory. Offerings are in excess of requirements, supplies tending toward an over accumulation and with the limited outlet prices are barely steady at quotations.

Medium bales of all classes and common hay in both sizes constitute a large percentage of the stocks on hand and these classes especially are extremely difficult to move. Strictly No. 1 timothy in either large or small bales is very scarce and some buyers are inquiring for this top quality and which if available might exceed quotations. We heard of one car during early part of week going at \$26. Most of the sales range in price from \$17 to \$22, with an occasional lot of a mixed-grade going lower. We also heard of a few cars of top No. 2 selling up to \$24 in an exceptional way, but toward the close this figure seems too high for the table range.

Straw situation continues slow and inactive with values nominal.

Report of invoices averages a moderate supply.

Federal grade quotations for large bales are as follows: Timothy—No. 1, \$25; No. 2, \$22@23; No. 3, \$18@20. Light clover mixed—No. 1, \$22@23; No. 2, \$18@20; No. 3, \$16@17. Medium clover mixed—No. 1, \$18@20; No. 2, \$16@17. Light grass mixed—No. 1, \$22@23; No. 2, \$18@20; No. 3, \$16@17. Heavy grass mixed—No. 1, \$16@17.

MILWAUKEE.

April 4.—The Milwaukee hay market continued essentially nominal with potential prices unchanged throughout the past week. Current quotations are: No. 1 timothy, \$14@15; No. 2 timothy, \$12@13; No. 1 mixed, \$13@13.50; No. 2 clover mixed, \$11@12; sample hay, \$6@8; marsh feeding, \$10; packing, \$9; rye straw, \$9@10; oat straw, \$9@10.

BALTIMORE.

April 4.—There is no over-abundance on the market of top grades of timothy and choice light clover mixed hay, but the demand for hay generally is quiet and stocks are ample for all near wants. Low grade and inferior hay is dull and of uncertain value. Straw of all kinds remains about steady as heretofore quoted. Supplies only moderate on spot. Quotations follow: No. 2 timothy, \$19@19.50; No. 3, \$16@17.50; No. 1 light clover mixed, \$18@18.50; No. 1 clover mixed, \$17.50@18; No. 2, \$16@17. Straw—No. 1 straight rye, \$18.50@19; No. 1 wheat, \$15@15.50; No. 1 oat, \$15.50@16.50.

CINCINNATI.

April 6.—There was a slight improvement in the demand for hay, but not sufficient to bring about any betterment in the all-important matter of price. Receipts about equaled those of last week but the supply was again largely of unsatisfactory quality, which sold only at concessions, and because of the scarcity of better grades. Choice or uniform cars of No. 1 of any description had many inquiries, and offerings of this character of timothy and clover would undoubtedly have realized good premiums were they available. Shipping orders were merely routine and local needs limited, but the smaller country movement prevented any accumulation. Mixtures continued in better demand than timothy, but only top grades were wanted. Country advices indicate a decrease in movement, but considerable hay is reported as still available on farms, which will probably not be marketed until spring work is completed. Timothy—No. 1, \$18@18.50; No. 2, \$16.50@17; No. 3, \$13@15; threshed, \$8.50@10.50; no grade, \$8@10. No. 1 heavy clover mixed, \$16@16.50; No. 1 light clover mixed, \$16.50@17.50. Clover mixed—No. 1, \$16.50@17; No. 2, \$13@15; no grade, \$10@11.50. Clover—No. 1, \$16@16.50; No. 2, \$12@15; no grade, \$8@10. Second cutting alfalfa—No. 1, \$21.50@23.50; No. 2, \$17.50@19.50. First cutting alfalfa—No. 1, \$15.50@16.50; No. 2, \$13@15. Sound sample grassy hay, \$9.50@11. Straw—Wheat, \$8.50@9.50; oats, \$8@9; rye, \$13@14.

TOLEDO.

April 4.—The hay market remains sluggish with prices showing no change and demand very poor. Stocks are large here and dealers find the trade unwilling to take hay except at bargain prices. Feeding will soon decrease with new pastures about ready and then the trade will likely be smaller than it is at present. The only hope for hay is for a short crop this year, which would give dealers a chance to clean up some of their holdings.

Prices last week were unchanged and as follows: No. 1 timothy, \$14; No. 2 timothy, \$12; No. 1 light clover mixed, \$18.50; No. 1

heavy clover mixed, \$12.50; No. 1 clear clover, \$11; No. 1 first cutting alfalfa, \$15; No. 1 second cutting alfalfa, \$20; sound dry wheat straw, \$8.50; sound dry oats straw, \$8 per ton. f. o. b. Toledo.

DULUTH.
April 4.—Demand for hay was reported to have shown a still further drop with dairymen light buyers and the logging season wound up. Operators discouraged anything beyond a limited movement from the country. Closing prices per ton are unchanged, as follows: Timothy—No. 1, \$16; No. 2, \$14. Mixed timothy—No. 1, \$15; No. 2, \$12. Prairie—No. 1, \$16; No. 2, \$14; No. 3, \$12. Midland—No. 1, \$10; No. 2, \$8. Straw—Rye, \$9; oat, \$8.

PHILADELPHIA.
April 4.—Baled hay is dull with moderate offerings at former rates. Straw continues quiet, but steady under light supplies. We quote, federal grades: Timothy—No. 1, nominal; No. 2, \$18@19; No. 3, \$16@17; sample, \$10@15. Light clover mixed—No. 1, \$17@18; No. 2, \$15@16; No. 3, \$12@14. Medium clover mixed—No. 1, \$15@16; No. 2, \$13@14. Heavy clover mixed—No. 1, \$14@15. Light grass mixed—No. 1, \$17@17.50. Straw—Straight rye, \$15@15.50; wheat, \$15@15.50; oat, \$14@14.50.

MEMPHIS.
April 4.—Receipts of hay for the week were 71 cars, with scarcity of good grades and not so much low as recently. The dealers have discouraged shipment of low grades as much as possible. Demand is a shade better, but prices are practically without change for the better grades. The others are slightly off for the week. Quote: Alfalfa, one, \$26.50@27; standard, \$23.50@24; two, \$19@19.50. Timothy, one, \$22; standard, \$20@21; two, \$18.50@19.50.

PITTSBURGH.
April 4.—Our hay market is unchanged, the receipts are moderate, but sufficient to meet all requirements except for the best grades of timothy; these grades are in light supply and the demand is fairly active. Poor hay is plentiful for this time of the year; low grade timothy, No. 2 clover and No. 2 heavy clover mixed hay are almost unsalable. Quotations: Timothy—No. 1, \$20@20.50; standard, \$17.50@18; No. 2, \$14.50@15.50; No. 3, \$12.50@13.50. No. 1 H. C. mixed, \$16@16.50; No. 1 L. C. mixed, \$16@16.50; clover mixed—No. 1, \$16.50@17; No. 2, \$10@13. Clover—No. 1, \$16@16.50; No. 2, \$10@13.

Straw—Receipts of straw equal to the light demand. Prices remain about the same. Market on the whole is very dull, with very few buyers in evidence. Quotations: No. 1 wheat straw, \$11.50@12; No. 2, \$11@11.50; No. 1 oat straw, \$11@11.50; No. 2, \$10.50@11; No. 1 rye straw, \$12.50@13; No. 2, \$11.50@12.

KANSAS CITY.
April 4.—In the absence of a better demand, smaller hay receipts this week failed to sustain the market. On the whole, the situation was about as sick as at any time in trade history, with the approaching grass season as one bear factor. Total arrivals were 482 cars, or 157 less than a week ago. A year ago the receipts were 529 cars.

The alfalfa movement dropped 145 cars to total offerings of 290 cars. This was 33 less than the arrivals for the corresponding week in 1924. Prices fell 50c to \$1 a ton on Monday due to drugginess of the market, especially on the low grades and damaged hay. Slow business continued until Saturday, when good qualities developed fair activity. Grassy and objectionable stuff continued sluggish.

The prairie receipts were 140 cars, as compared with 139 a week ago and 157 last year. While prices changed little until Saturday, when a recession of 50c was recorded on everything but packing. Only the upper grades moved with any freedom. Medium to poor qualities often went without bids.

All timothy, clover mixed and clover in the market made receipts of 52 cars, or 13 less than a week ago. Trade was slow, but prices held the levels of the previous week.

Two cars of straw arrived, but they had been contracted. Inquiry was better and the price was marked up 50c.

Carlots of hay and straw are quoted as follows per ton f. o. b. Kansas City:
Alfalfa—Select dairy, \$23@27; choice, \$20.50@22.50; No. 1, \$17@20; standard, \$13.50@16.50; No. 2, \$10@13; No. 3, \$6@9.50.
Prairie—No. 1, \$10@11; No. 2, \$9@9.50; No. 3, \$6@8.50; packing, \$5@6.
Timothy—No. 1, \$15@15.50; standard, \$14@14.50; No. 2, \$12.50@13.50; No. 3, \$10@12.
Clover mixed—Light, \$15@15.50; No. 1, \$13.50@14.50; No. 2, \$10@13.
Clover—No. 1, \$12@14.50; No. 2, \$7@11.50.
Straw—Wheat, \$7.50.

PORTLAND, ORE.
April 2.—Buying prices f. o. b. Portland: Alfalfa, \$19@19.50 ton; valley timothy, \$20@21; eastern Oregon timothy, \$22@22.50; clover, \$15.50@16; oats, \$19@20; oats and vetch hay, \$18.50@19.50; straw, \$8@8.50.

BOSTON.
April 3.—Hay market steady due to light receipts. Most of hay arriving will not grade better than fair No. 2. Top grade in very light supply but demand has not been heavy. Clover mixed in light supply, held steady but dull.
No. 1 timothy, \$26@27; No. 2 timothy, \$24@26; No. 3 timothy, \$18@20; eastern, \$16@24; clover mixed, \$21@25. Straw—Rye straw, \$11@23; oat straw, \$13@15.

ST. LOUIS, MO.
April 6.—The arrivals of hay continue to be light. The market is some stronger, especially upon good qualities of choice tim-

othy and nice light clover mixed. No change in values. Clover under very light demand and hard to place, even good grades. All low grades difficult to move at any price.

Alfalfa—Fair arrivals. Best qualities selling fairly well. Medium and low grades not wanted.

Prairie—Choice qualities in fair demand and selling to advantage. Low grades not wanted.

Straw—Steady.
No. 1 timothy, \$21@22; standard, \$19@20; No. 2 timothy, \$15@16; No. 3 and sample, \$10@12; No. 1 clover mixed, \$17@18; No. 2 clover mixed, \$13@14; heavy mixed, \$14@16; No. 1 clover, \$16@17; No. 2 clover, \$12@13; threshed hay, \$9@10; choice alfalfa, \$24@26; No. 1 alfalfa, \$22@24; standard alfalfa, \$16@18; No. 2 alfalfa, \$13@15; No. 1 prairie, \$14@15; No. 2 prairie, \$11@13; rye straw, \$9@10; wheat straw, \$8.50@9.50.

CHICAGO.
Apr. 6.—Total receipts today were 40 cars, which for Monday was very light. The greater percentage of the offerings were of the medium grades of grass and clover mixtures. These grades, and especially when heavy mixed, are hard to dispose of.
Timothy and Clover—

CHICAGO HAY NOTES.

Better grades of tame hay are in good request, while top grades are selling higher. Low grades continue dull and can be moved only at low prices. Prairie feeding hay not wanted but soft packing selling as high as \$14.00. Straw market is quiet and unchanged.—Walters Brothers.

Quality hay is wanted and will sell above quotations. Poor stuff is draggy and clover and clover mixtures are not wanted. Loadings at country points are extremely light and shipments of good quality hay should net good results. There is no prairie or marsh hay on the market and quite an inquiry.—Bridge & Leonard.

Arrivals are light and there is a good demand for the better grades of timothy and mixed, making this an opportune time to market that kind. We advise against shipping any badly discolored, rained on or musty hay. All kinds of straw are in demand.—Albert Miller & Co.

CASH PRICES OF LARD.

Following is the monthly range of cash prices of contract lard at Chicago for a series of years (fractional 1/2c omitted):

As an illustration of the growth of the radio, this country's exports have increased in value from \$378,806 in 1918 to \$6,030,914 in 1924.

PRAIRIE STATES HAY & GRAIN CO.

RECEIVERS AND SHIPPERS

HAY, GRAIN AND SEED

NORTH PLATTE, NEBR.

American Bale Ties

To conform with the rules of the National Hay Association, hay must be well baled. The use of American Bale Ties accomplishes this. A broken wire on a bale of hay condemns the hay. Broken bales cost more than Bale Ties.

OTHER USES

For baling Excelsior, Shavings, Rags, and Paper. For bundling Barrel Heading and Staves.

No other form of wire has to stand more strain and abuse. Bale Tie Wire must be made in the highest perfection possible. American Bale Ties meet every requirement for which they are intended.

Complete descriptive catalog sent free for the asking.

1923	3,209,000	12,285,000	3,668,000	19,162,000
1922	3,043,000	9,219,000	3,472,000	15,734,000

CHICAGO PROVISION REVIEW.

CHICAGO, April 6.—Lower prices for corn and hogs brought selling orders for provision futures and a sharp decline in prices early in the week followed by a good recovery in the hog market, while corn dropped to the lowest since last August. This made an unsettled condition for provisions and created more of a two-sided affair. While liquidation by longs was on in liberal volume early, packers took advantage of the offerings to cover their short sales or to secure profits on hedges. At the close, lard was $2\frac{1}{2}$ c higher on July to $7\frac{1}{2}$ c lower on September. Short ribs were $2\frac{1}{2}$ c to 25c lower and bellies 45c to 50c lower.

Lard stocks at western packing points on April 1 were 100,458,000 lbs. against 103,056,000 lbs. at the end of February and 48,446,000 lbs. April 1 last year, while two years ago stocks were only 27,200,000 lbs.

LIVESTOCK PRICES AT LEADING MARKETS.

Following are livestock prices at five leading Western markets on Monday, April 6, 1925, as reported by THE PRICE CURRENT-GRAIN REPORTER by the Bureau of Agricultural Economics, U. S. Department of Agriculture:

Feeding lambs, med.-ch.	14.00-15.25		13.75-15.00		

The make of lard is smaller as the result of decreased hog receipts, yet there appears to be ample supplies for all domestic and foreign requirements. Refiners have done a fair business in lard of late and offerings of tank lard are said to be small, making it difficult for buyers to secure supplies.

Stocks of short ribs decreased about 300,000 lbs. last month and were 6,872,000 lbs. against 3,607,000 lbs. last year. Of dry salted meats there were 55,101,000 lbs., against 54,722,000 lbs. last month, and 84,715 lbs. last year. Supplies of hams were reduced and total stocks of pickled meats aggregating 236,881,000 lbs. compared with 244,474,000 lbs. last month, and 242,562,000 lbs. last year. Total stocks of meats were 321,939,000 lbs., compared with 333,803,000 lbs. a month ago, and 355,666,000 lbs. last year. Prices for the week follow:

HOG SLAUGHTERINGS.

The reports to THE PRICE CURRENT-GRAIN REPORTER show the number of hogs packed in the West in the summer season beginning Mar. 2, 1925, compared with the same period of previous year:

	Through Apr. 4, 1925.	Through Mar. 29, 1924.
Chicago	433,500	775,700
Kansas City	144,000	216,600
Omaha	258,300	387,700
St. Louis	226,300	308,600
South St. Joseph	82,100	141,600
Indianapolis	99,000	130,800
Milwaukee	40,500	57,700
Cudahy	25,300	70,800
Cincinnati	56,400	81,300
Ottumwa	46,600	87,400
Cedar Rapids	34,600	73,000
Sioux City	254,400	225,300
St. Paul	271,300	324,600
Cleveland	61,900	141,400
Louisville	18,900	29,500
Wichita	47,200	63,600
Detroit	67,100	124,400
Nebraska City	23,600	34,300
Fort Worth	46,600	33,000
Oklahoma City	34,300	27,900
Above and all others	2,738,000	4,026,000
For the week	395,000	722,000
Previous week	578,000	722,000

Weights are reported as follows: 225, 235, 223, 260, 229, 206, 216, 215, 237.

MOVEMENT OF SHEEP.

Weekly receipts and shipments of sheep at 15 Western centers the week ending April 4, 1925, and totals with comparisons for corresponding time last year, compiled by THE PRICE CURRENT-GRAIN REPORTER:

	Repts., 1925.	Shpts., 1925.	Repts., 1924.	Shpts., 1924.
Chicago	77,588	19,279	66,305	24,677

LIGHTNING and LOCOMOTIVE SPARKS

Were two of the largest known causes of fire in Flour Mills and Grain Elevators in 1924.

The insurance saving pays for protection against both.

A metal roofed, iron clad plant, properly grounded, gives almost certain protection against both, and takes the lowest insurance rate.

Our records show no losses from lightning on plants having standard lightning protection, either by lightning rods or grounded metal sides and roof.

Write your Insurance Company or this office for standards and estimates of insurance saving.

MUTUAL FIRE PREVENTION BUREAU

230 East Ohio Street, Chicago, Illinois

Representing the Mill Mutual Fire Insurance Companies

Security from Lightning Losses

The Mutual Fire Prevention Bureau names lightning as one of the two chief causes of elevator fires during 1924.

Take heed and protect yourself now. Insist on Underwriters' Laboratories Master Label installation. Small in cost in proportion to fixed investment, it assures your insurance reduction.

Fire protection is not available to most grain elevators. Stop this greatest of fire menaces. Saving on insurance pays for a Security System in a few years.

We are manufacturers and installers of Underwriters' Laboratories approved lightning conductor systems for grain elevators, warehouses, factories, smoke stacks and other large structures. Write for specifications and information on how to prevent lightning losses.

FOR SALESMEN'S AUTOS, WAGONS, TRUCKS, ETC.
Decalcomania transfers give you a quick, easy, inexpensive method of "trademarking" all your vehicles. Powerful publicity at small cost.

MEYERCORD

"Duplex" Transfer WINDOW SIGNS

read from
BOTH SIDES

Get them "going and coming" with Meyercord "Duplex" Transfer Window Signs.

Your advertisement on the front and the dealer's good-will message on the back. Or, if desired, the same advertisement on both sides.

Double duty from a single sign, right at the point of purchase.

Dealers Want These Signs

Because they combine their personal message with that of the manufacturer. This feature instantly wins the dealers' favor and insures the signs a prominent place on the doors or windows. Thousands will see them daily as they pass, enter, or leave your dealers' stores.

Anyone can put them up. They are applied as one sign just as easily and as quickly as the regular single-faced transfer signs. Once applied, they remain permanently for a long time.

Beautiful, Non-Fading Oil Colors

We reproduce any trademark, design, or lettering on the front and any desired message on the back. Brilliant, non-fading oil colors are used—any color, or combination of colors, including gold. There is no limit as to size.

Our Service Department and staff of artists will originate new designs, or assist in carrying out your ideas.

Send for samples, sketches and prices without any obligation on your part.

ERECTING GRAIN ELEVATOR IN DISTRICT

Huffine Grain Company of Kansas City
Locates Elevator and Warehouse in
Central Manufacturing District
of Los Angeles.

THE construction of a 50,000 bushel grain elevator on Fifth street, near Gifford, in the central manufacturing district of Los Angeles is announced by J. I. Huffine of the Huffine Grain Co. The construction work is progressing rapidly.

The Huffine Grain Co. has been in the wholesale grain and hay business in Kansas City, Mo., since 1885 and, in its new building in the central manufacturing district, will operate a fully equipped elevator and warehouse, with complete facilities for storing and grinding grains. Carload lots of grains and poultry feeds, cattle feeds, and other ground cereal products, will be the specialty of the company which will cover southern California territory.

The company is operating now in temporary quarters in the Terminal Tower building in the district, pending the completion of its own building which should be ready for occupancy within a few weeks.

The building will be a one story and basement structure with a headhouse for grain storage. It will contain approximately 20,000 square feet of floor space. The elevator will be of modern construction, steel and frame, and the warehouse proper will be of brick and reinforced concrete, conforming in general style of architecture to that of all Central Manufacturing District buildings.

Every modern mechanical device for the economical movement, grinding, and sacking of coarse grains will be installed, together with proper provisions for expanding the capacity of both storage of bulk grains, as well as the warehousing of sacked grains. The capacity of the elevator will be approximately 50,000 bushels. The main floor will be at car floor level and will have loading platform along tracks of the Los Angeles Junction railway, the neutral belt line serving all district industries at through rates.

The directors of the company are Messrs. J. I. Huffine of Long Beach; Benjamin M. Huffine of Kansas City; J. Earl Huffine and Everett A. Huffine of Los Angeles. Messrs. F. L. S. Harman, vice-president, and E. P. Querl, sales manager, negotiated the transaction for Central Manufacturing District, Inc.

KANSAS APRIL CROP REPORT.

The first spring report on Kansas winter wheat, released by the State Board of Agriculture, shows that the Kansas wheat acreage suffered severe damage from winter killing. The April condition is rated at 63% of normal as compared with 87% a year ago and a ten-year average of 76%. No estimate is offered at this time as to the per cent of the acreage sown that will be or has already been abandoned, but the experience of past years would indicate that from such an average condition on April 1 we can expect at least 25% abandonment and that it might reach as high as 30%.

Of the 10,500,000 acres sown last fall it is not likely that much more than 8,000,000 acres will develop for harvest, but this is only a rough approximation. No definite estimate of abandonment will be taken until matters are more settled about May 1. Last year Kansas harvested 9,426,000 acres of winter wheat, with an average yield of 16.3 bushels and a total crop of 153,644,000 bushels.

Kansas rye is rated at 70% of normal on April 1, as compared with 90% last year and a ten-year average of 81%. Kansas produces only about 40,000 acres of this grain, but the larger acreages lie outside the district that have suffered most from dry weather and winter kill.

VISIBLE GRAIN SUPPLY.

The following table gives the stocks of grain in bushels in public and private warehouses at the principal ports and in transit by water on the dates named, with comparisons as compiled by the secretary of the Chicago Board of Trade for the week ending April 11 (1000 omitted)

REORGANIZING DEPARTMENT OF AGRICULTURE.

Word comes from Washington that the new secretary of agriculture, has devoted the first thirty days of his service in that position to the reorganization of the department in the interest of efficiency and economy. Within a few days he will be ready to announce the co-ordination of thirteen separate bureaus having to do with personnel, budget, administration and purchase under one head.

This bureau will be located in the administration building and will handle the entire business of the department. The remaining twenty permanent bureaus will be divided under the heads of science, regulation, extension, press and information, with the head of each to be held responsible for results. This group, together with a business manager, will constitute the secretary's "cabinet" within the department.

It is stated that when he took office Secretary Jardine found that as the department was organized he had to devote not less than twelve hours a day to its mere business management. It left him no time whatever for deciding policies or for the consideration of the larger administrative problems. Under the new arrangement it is estimated

that at least 75 per cent of the routine work will be distributed among the various responsible heads.

ELIMINATES OVERLAPPING.

Another effect of the co-ordination will be the elimination of overlapping in the various bureaus, which is believed to be extensive. An order issued by Secretary Jardine will prevent the filling of vacancies in the department without the approval of the business manager and in this way a substantial reduction of personnel will be effected.

The late Henry C. Wallace worked on the problem of the reorganization of the department for three years and was ambitious to complete it before he retired. In the meantime he had an advisory committee which merely enabled him to handle the routine of his office intelligently without cutting down the work. After Secretary Jardine had tried this system for a week he gave his advisory council ten days within which to make a definite report for the reorganization of the department.

After studying this report for another ten days he issued a series of orders which is bringing about the present reorganization.

If you are looking for paying results in business, have the confidence to advertise.

Shrinkage of a 1,000,000 head of cattle
a year in America's herds, as disclosed
by government figures, understates the
actual drop in the supply, it is indicated
by Commissioner Robert A. Cooper, head
of the Federal Farm Loan Board, in an
article in the current American Bank-
ers' Association Journal.

BUSINESS NEWS
The Folwell-Ahlskog Co. is taking
bids for equipment and other materials
used on these jobs.
George C. Stiles, an attorney, has
been appointed by Judge Waite as re-
ceiver for the J. L. Owens Co. of Min-
neapolis, Minn., builders of grain clean-
ing machinery. This receivership is the
result of a contest among three sons
of the late founder of the firm for the
control of the company.
F. A. Holmes & Co., of Waterloo,
Iowa, are now marketing the "Holmes"
Market radio, which is announced as be-
ing especially adapted for use in the
office, the elevator or the home. Among
the special advantages claimed for this
outfit are wide range, selectivity, and
ease of tuning, and it is sold under a
"money returned if not satisfactory"
guarantee.

Folwell-Ahlskog Co., engineers and
contractors of Chicago, have the follow-
ing jobs in process.

Washburn Crosby subsidiary, the
Frontier Elevator Co. of Buffalo, N. Y.,
1,250,000 bushel storage addition with
a small work house.

A Morris grain drier and building to
contain it is being erected for the
Missouri Pacific R. R. at Kansas City.
The capacity of the drier is 1,000
bushels per hour removing 7 1/2% mois-
ture from corn.

Chicago, Rock Island & Pacific addi-
tional storage at Council Bluffs, Ia.;
850,000 bushels to be completed by July
1st. The foundations are practically
finished and the pouring forms for the
storage tanks well along.

**ARGENTINE EXPORT RATES
FOR APRIL.**

The following changes have been
made in the Argentine export duty
schedule for the month of April, accord-
ing to a cablegram just received by the
Commerce Department.

Oats, from 1.32 pesas per metric ton
to 1.25; corn, from 2.22 to 1.96; linseed,
from 4.61 to 4.43; barley, from 2.67 to
2.56; wheat, from 2.81 to 2.86; sheep-
skins, from 47.10 to 43.05; entire rios
wool, from 71.75 to 67.50; Southern wool,
from 65.25 to 39.60; cordoba wool, from
51.05 to 45.35; Western wool, from 40.30
to 37.60; quebracho extract, to 0.9675.
The duties on other commodities sub-
ject to Argentine export duties remain
unchanged.

**ADJUSTABLE FEATURE OF
"SEEDBURO" MOISTURE
TESTER.**

Among the several advantages of the
new Electric Moisture Tester marketed
by the Seed Trade Reporting Bureau,
1018 South Wabash Avenue, Chicago, is
the adjustable unit arrangement. It
has been made standard for use with
the various moisture testers manufac-
tured. It permits ease of operation and
is sturdy in mechanical design. The
unit may be raised or lowered to com-
pensate for varying degrees of heat so
that moisture tests can be obtained in
the prescribed time. Those operating
the new electrical tester speak for the
advantage of the adjustable unit. Pros-
pective buyers of such equipment, which
is everywhere standard in up-to-date
grain elevators, will find it just another
of the practical features adapted to the
"Seedburo" line.

**INSTALL LIGHTNING PROTEC-
TION NOW.**

In the 1860's, lightning rods, the prin-
ciple of which was discovered by Ben
Franklin, began to attract salesmen.
Franklin recorded his discovery in these
words: "It has pleased God in His
goodness to mankind at length to dis-
cover to them the means of securing
their habitations and other buildings
from mischief by thunder (sic) and
lightning." A better psychological in-
troduction to the sale of a device to
protect buildings could not be imagined,
and it was used with great effect all
over the country.

The great practical need of such light-
ning protection and the profits earned
by manufacturers of its equipment, very
naturally developed a phase of dishonest
selling and installation particularly on
the farm, which has taken the reputable
lightning rod manufacturers many years
to live down.

Now there is a well regulated wide
popular movement towards installing
lightning protection and several repu-
table manufacturers are giving special
attention to the grain trade. Such in-
stallations on elevators, mills and ware-
houses avoid lightning losses in the first
place and encourage the cheaper insur-
ance which is offered this year in the
second place, thus affording two-fold
benefits.

To be of proper value, however, such
lightning protections must be installed
during the Spring or early Summer
months and the properties of our trade
not at present protected should be taken
care of immediately.

By a royal decree just signed by King
Alfonso, foreign wheat again may be
imported into Spain. The decree lifts
the embargo on foreign imports and
authorizes the central food commission
to acquire foreign wheat for flour.

Steel Flight Screw Conveyor

Equipment for Grain Elevators, Flour, Cereal and Feed Mills

Wherever the highest degree of elevating and conveying equipment is required for grain elevators, flour, cereal and feed mills there you will find Webster equipment because of the comprehensive understanding of material handling problems which has been acquired from years of experience in this field. Our engineers will be glad to assist you in planning equipment which will exactly fit your needs.

BUSINESS AND TRADE CONDITIONS

THE political and economic issues that are involved in more closely connecting the interests of the farm and of the city are the brunt of the present efforts being made by the new Secretary of Agriculture, Mr. Jardine, and similar leaders who are working towards the same end. It may be expected that legislative assistance will be sought in such work as it always has been in the past, very often through a mistaken sense of personal rights. When these are meant as personal success, it is unfortunate for all concerned to carry our troubles to the halls of Congress for legislative enactment.

A phase of this matter which needs watching, however, is the increasing political strength of the farmer which has forced the industrialist into at least temporary agreement on issues which were known to be unsound. The advantage of a close working arrangement between these two dominant interests of the country is thereby lost, and the oft-repeated hearty verbal support of the farmer by the industrialist is half-hearted in actual practice. These manufacturing interests are more definitely dependent upon a successful agriculture than they may realize, and the timeliness of closely-knit co-operation is indicated by the following official statement:

This is the "first spring in five years with any evidence of general stimulus in agriculture," the bureau of agricultural economics declares in a report on the situation. There are no big agricultural surpluses except in cattle, the report says, and "judging from the lessened population movement, an increased number of farmers apparently feel it financially safe to stay on the farms this spring."

The nation's sinews are knit with steel, coal, grain, live stock and several such other great industries. It is always helpful to have the comment of leaders in such lines and particularly so when the speaker is Elbert H. Gary, chairman of the U. S. Steel Corp. He was recently quoted in connection with the state of business and particularly concerning the substantial revival in the steel trades.

In general, he referred to the continued keen competition in all lines with profits held down largely because of high production costs. For this and other reasons, it has been natural to observe a slowing up in business but it is encouraging for Mr. Gary to assure the country that in his opinion, fundamental conditions now are better than ever before in our history. He referred to the caution uttered by many who spoke with authority last Fall against inflation of any kind, and he considers it fortunate that the mild inflation which was experienced carried no farther.

Speaking on the wage question, it is Judge Gary's opinion that they will not be lowered because the producing capacity of the country is very large, and the labor demand strong.

It is well to observe the trend of business in other important lines as above surveyed because the tendency is to get too close to one's business. Although the stock and grain markets are ordinarily dependable barometers of business conditions, they are not infallible, and many economists have been recently quoted to the effect that the recent chaotic markets have been out of line with the more stable affairs in such industries as above referred to.

Business Principles

Henry Ford has been much before the public recently in a rather favorable light, tending to make us forget his one great blunder in connection with the peace ship of the early war days. Like Banquo's

ghost, it stands as a ridiculous step in his otherwise commendable career, although none doubt his sincerity even in connection with the peace ship.

He is now quoting several rules to which he attributes his business success, and with \$400,000,000, representing his personal fortune, there are few who would show lack of interest in the life-long principles which are back of this success. They are: Banish fear of the future; venerate the past; put service before profit; buy materials fairly and produce the finished article with the smallest possible cost.

To support the backbone of the business man who is not naturally honest in his affairs, the Government has taken a hand through blue sky laws on fraudulent stock sales and through various bureaus of a regulatory character. It is but natural that this Governmental control of private affairs has in many instances carried too far.

GROWTH CONDITION STILL SPOTTED

WITH rain reported on Monday from Michigan, Illinois, Wisconsin, North Dakota, South Dakota, Iowa, Missouri, Nebraska, Minnesota, and Kansas, it is felt that the acute situation in substantial wheat areas, in so far as moisture is concerned, is temporarily relieved and while growth conditions are exceedingly spotted and estimates, therefore, very unsatisfactory, the feeling seems to be pretty general that wheat by the end of this month will show a much better condition than the one indicated in the government's April first figures.

As a matter of fact, reports received today already show gains in some states, while the percentage of loss in those states showing a decline, is quite small.

It is our impression that business as a whole is gradually improving its morale of honesty, integrity and similar qualities, which are admittedly the only permanent basis of success.

Financial Markets

Continued large sums that are available for investment purposes are either actively "in the market" or exerting strong potential buying power. Included in this list is a half dozen persons who divided \$150,000,000 in round figures as the cash disbursement for the business of Dodge Bros., Inc. These individuals paid a federal tax approximating \$10,000,000 on their profits of the sale of the company, and it is presumed they will invest their funds in tax-free securities. Other bond buyers of the same class are seeking government, state and municipal issues which afford a high degree of safety and tax exemption, in which class the first Liberty Loan 3½% issue is likely to be a popular buy.

The expansion in the circulation of money is today largely offset by the decline in deposits which is nat-

ural. Our gold reserves are lower than at any time since 1921 as reported by the Federal Reserve System, meaning the volume of gold held by such banks against federal reserve notes.

The high position in the financial world of the automobile industry has brought due gratification to such interests over the splendid situation therein. Monthly and quarterly statements are almost entirely more encouraging than had been expected and fundamental conditions are sound.

Politics "At Ease"

During heated political discussions much is often said without true basis of fact or even morally supported by the sincere beliefs of the speaker. The party out of power holds out the unattractive promise that if the people persist in maintaining the party in power, only dire results will follow. Many of the common people take all of this "guff" in, one hundred percent, but conservative business men liberally discount such gloomy outlook. We bid fair this Spring and Summer to escape much of this irregular thinking because politics is decidedly "at ease," with a definite economic program outlined by President Coolidge and endorsed to a very large extent by the American people. Subject to minor off-shoots, National policies are pretty firmly fixed for four years, with taxation reductions and lessened administrative costs assured. Some forty commissions are even now reported in peril of the President's sharp pruning knife.

For the next eight or nine months at least, with Congress enjoying a long recess, there will be freedom from outside bad influences to business through that source.

In fact, it will only be the most resourceful pessimists who can possibly find much to array in support of their convictions during this period, and business is more free to continue its unobstructed course than for some time past.

Advance indication of the vacation activities, such as they are, of these politicians is found in the recent address of Senator Borah, the first of a series in opposition to the world court. President Coolidge, it is understood, will request favorable action on the world court plan in the next Congress, approved in substance by substantially all foreign nations, leaving only the United States, Mexico and Afghanistan aloof.

How time changes mortal opinions is illustrated in comparing today's doubtful position of the League of Nations or World Court idea with its standing during and immediately following the world war. During those days such leading public men as Wilson, Harding, Coolidge, Roosevelt, Lodge, Knox, and practically all in position to know, agreed that a provision of this sort was the only safeguard against other wars. The unanimity of similar opinion abroad is found today in the group of fifty-four nations which have officially subscribed to the League and yet the United States, which had been foremost in advocating it, withheld co-operation on the early principle of our Government that we should not suffer foreign entanglements.

The Tariff Remains as Is

Washington reports continue to state that President Coolidge is much opposed to stirring up the tariff issue in the December session of Congress. The administration feels that tax revision and reform is not only a sufficiently large problem in itself but is so closely allied to a general tinkering with the tariff that success of the former would be sacrificed possibly in tackling the latter. The President is in full appreciation of the desirability of continuing our policy

of protection but at the same time, he has been quoted to the effect that our markets are open to world trade and that our "towering industrial structure" is largely based upon the American producers' right to first opportunity in the home market. The President considers our export policy on raw materials and primary products is exceptionally liberal.

Speaking on this subject to the National Cotton Manufacturers' Ass'n, Mr. Coolidge turned in his customary neat manner a simple explanation of our entire import and export business when he said:

"Foreign buyers may come here for our raw cotton, take it home, turn it into fabrics, and, if they are clever enough, which they often are, sell it back to us. Not only do they have this privilege, but to an impressive extent they have taken advantage of it. We import nearly half as many yards of cotton cloth annually as we export.

"If anybody desires information about export taxes, export bounties, valorization projects, discriminatory taxation, and the like, and how these increase the cost of articles which we have to import, he may well study the policies which various countries apply to such staples as coffee, nitrates, potash, rubber, tin, pulpwood, cocoa, sisal, quinine, and more than a few others."

Political Aspect of the Tariff

In connection with the present efforts in certain quarters to bring about an increased protective tariff, and the search by members of Congress to see what might be done towards improving the administrative sections of the tariff law, we find a continuous political thread running through the entire fabric.

Beyond the above-mentioned Republican protective ideas, is the fear that a combination of Democrats and insurgent Republicans might force a downward revision. It is well known, however, that the latter group has no definite well-grounded program and it is equally apparent that political parties are not above favoring such tariff measures as may support the business activities of important interests among their own constituents.

Under these circumstances, it must be seen that it is no time to subject business to the uncertainties of tariff adjustments, especially in the absence of at least reasonable expectation of an improvement in the schedules.

Foreign Affairs

It was natural for Anatole de Monzie, the new French Minister of Finance, to first turn his hand to the most important need of the country which is the abandonment of Government ownership without delay.

Beyond the customary evils and pitfalls of Government ownership, there is in France a close connection between military control and industrial operation of her railroads, telegraph and telephone lines and other utilities. It has long been felt that the stupid management of such affairs was not even serving military purposes to advantage, and therefore their return to private enterprise is but another logical chapter in the oft-repeated history of Government ownership failures.

A danger to be guarded against in this connection is the present publicity campaign, current in France to persuade the public that the issuance of new paper money can be done without adding to the existing inflation. To those who are willing to be aided by the financial dilemma of Germany in the past several years and France to a lesser extent today, the situation is most instructive. It will be remembered that Germany gradually replaced treasury notes with commercial bills of exchange reaping the consequences, and before it is also too late, France must realign her currency. The Government's policy, largely concerning a "deficit" method of financing has caused the franc to fall and prices to rise. In funding her debt it is necessary to retain the confidence of her peoples, and yet the closest economy both public and private, and heavy taxation are inevitable steps in the process.

EDITORIALETTE

THE particular attention of the flax seed and oil meal trade is called to the Archer-Daniels-Midland market letter in the feed department of this issue. It discusses with a keen mind certain details of the present tariff agitation as bearing upon the interests

of the farmer and of the linseed oil mill. It is further interesting to note that the writer of the letter is Mr. G. A. Archer personally, who has not been recently writing the market letters of the firm. Read it.

SENATOR CAPPER ON SPECULATION

THE tone of the editorials in *Cappers Weekly* are entirely different from those which appeared in this publication when Senator Capper was having the Capper-Tincher bill passed. In a recent editorial, among certain statements made, are the following: "It seldom pays the individual farmer to hold his grain. Usually there is a surplus with a majority of farmers competing for the early market prices. Last year, farmers had more need of money than usual and sold early. No farmer got anywhere near the big price they got this year but the prices farmers did get were helped by the speculators who soon began buying and holding grain for the higher prices it seemed likely the world's shortage of wheat would bring. The grain dealing speculator is the producer's friend. The speculator buys for a rise—because he believes wheat will be worth more by and by, enough more to make it pay for storage, interest on the investment and a profit besides. He helps absorb the supply of an overloaded market. So while we wish the wheat grower had got much more of the \$2.00 price than he did, we are glad the part he didn't get went to the grain-dealing speculator whose operation tends to boost prices."

A VICIOUS LAW IF PASSED

LEGISLATORS are still busy and the anti-discrimination bill, S. F. No. 181, which has been introduced into the Minnesota State Legislature is intended to prohibit an elevator or milling company from paying more for a certain grade of wheat at one station in Minnesota than they do for the same grade at another station, and makes it a misdemeanor for an elevator or milling company to pay a different price for wheat of the same grade as determined by the state grades. Federal and state grades are not the determining factors as to the value of wheat although the grain may conform exactly to the specifications. Its value for milling purposes is determined entirely by the protein content. Therefore, wheat grading exactly the same at two different points and varying in the value of protein content would work an undue hardship both on the farmer and the buyer. It is just such unfair legislation as this that makes it hard to do business and the innocent party foots the bill.

EFFORTS UNAPPRECIATED

WHILE the Sears-Roebuck Agricultural Foundation is fostered by a big mail order house, it would seem rather ungrateful on the part of a certain Montana paper to make the statement that this concern was taking a slam at Montana seed corn simply because it put out the statement that 38% of Montana seed corn was worthless. In broadcasting this knowledge, the Foundation is rendering the farmers of that state a service. It is difficult to procure good seed corn of high germination this year and by urging farmers to take care and pains in its selection, will mean bigger crops the coming Fall. This institution knows full well that for it to prosper, people to whom they wish to sell must also prosper; therefore, its desire to render a service. It would seem that this Montana paper was a little hasty in its conclusions.

BEAUTIFY YOUR SURROUNDINGS

A COUNTRY elevator with well kept premises is certainly a good advertisement for the owner. It indicates thrift and will attract business. A milling company in Kansas will transform an unsightly spot around its plant into a beauty spot for it is planned to have a beautiful well kept lawn

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures from various statistical exhibits appearing weekly in detail in "The Price Current-Grain Reporter," these figures representing the past week, the preceding week and corresponding time last year, here assembled for ready reference:

planted with flowers and it will include a plot where-in will be worked out the name of the brand of flour this firm manufactures. While primarily this mixing of business with pleasure is an advertising scheme, it will add much to the beauty of the surrounding neighborhood and will no doubt bring tangible returns to the promoter. Such efforts could be carried out by country elevator owners as well.

IT CAN'T BE DONE

E. H. GARY, chairman of the United States Steel Corporation, in an article in *The Country Gentleman* says:

"No group of producers can successfully organize against the consumer. No group of producers can evade the law of supply and demand, or fix prices, or arbitrarily limit production, or disregard the welfare of the public at large or otherwise abolish natural laws."

Mr. Gary is at the head of what is perhaps the largest industrial organization in the world, but he may be wrong, and it is barely possible that each one of the things he says cannot be done, can be accomplished. Some of them have been attempted upon numerous occasions and always with disastrous results to those making the attempt, no one of them ever having permanently succeeded.

Under the circumstances we are more inclined to pin our faith to the predictions of Mr. Gary than to the promises of the men who are behind the present paternalistic program for the American farmer.

MARCH CANADIAN MOVEMENT

Grain from Country Points Awaits Opening of Navigation—Coarse Grain Movement Heavy.

By E. A. URSELL, Statistician.

FT. WILLIAM, ONT., April 8.—In view of the near approach to the opening of the season of navigation on the great lakes the movement of all grains from country points to the head of the lakes has been quite substantial. A total of 14,942 cars of all grains passed inspection as compared with 12,544 a month ago and 16,541 a year ago. Of these 10,481 cars contained wheat as against 8,974 a month ago and 11,804 a year ago. The proportion grading into contract grades continues small, being 4,616 or 44.4 per cent for the month, compared with 3,366, or 37.5 per cent during the previous month and 9,977, or 84.5 per cent a year ago.

The movement of coarse grains, particularly barley and flaxseed, continues to far exceed that of a year ago, while stocks in the Fort William-Port Arthur elevators are much larger than usual. There are also some 4,000 cars in local yards and en route for unloading as soon as there is space in the elevators.

It will be noted from table (6) appended the total all-rail movement from Fort William-Port Arthur during the winter season has not been large by any means. It will also be seen that a large proportion of wheat shipments were destined to Canadian and U. S. A. domestic points. Much of this went to important milling centers so that it is highly probable it would reappear as exports of flour.

High ocean freight rates combined with high prices have prevented a large movement via Vancouver to Europe, while the Oriental purchases have been made principally in Australia. Japan will probably need considerable quantities of wheat during the present season as the last rice crop is reported to be so much below normal requirements that the government has appealed to the populace to use more wheat flour in an effort to offset the deficiency. This would appear to offer an excellent opportunity for shippers via Vancouver to increase the movement by that outlet.

Due largely to the high prices in the Winnipeg market as compared with those of other centers early in the year sales of Canadian wheat for export have been comparatively light. Public elevators at lower lake ports have been practically full all the winter and the unloading of storage cargoes afloat has not even yet been completed at either Canadian or U. S. A. ports. Until all of these cargoes have been disposed of and unloaded and a material reduction of visible supplies at eastern points has taken place it is hardly to be expected that sales for export of the surplus still remaining can be made.

With present prices out of line with Liverpool and very little export business in wheat being reported, it would appear the opening of navigation is likely to be a very quiet one as far as wheat shipments are concerned. Wheat supplies now on passage to Europe are, with stocks already in hand, reported to be sufficient to last until early in June. For the balance of the season, and allowing for a small supply on passage, shipments of at least 120,000,000 bushels from exporting countries will be necessary. Canada can furnish approximately 50 million bushels of this amount, although much will be of quality lower than contract grades. Shipments from the southern hemisphere have been much heavier than usual but are now falling off very markedly. Reports from India indicate the drought has materially affected prospects for the crop now being harvested and as available world's supplies as reported and approximate requirements appear to be so closely alike any conditions which may arise as the result of unfavorable weather, crop damage, or reduction of estimates of surplus now being used as the basis of all calculations, will be immediately

reflected in export demand and prices. Consequently crop conditions during the next few months will be very closely followed.

An early spring, abundance of moisture and warmer weather than the average for this time of the year indicate a most favorable prospect in western Canada. Already reports of seeding having commenced are in from both southern Manitoba and southern Alberta where the light lands warm up earlier and absorb the moisture more readily. In view of the small proportion of land prepared last season for this year's crop it is to be hoped the weather will continue favorable to enable spring ploughing to be done early and a full acreage sown.

Comparative tables showing inspections, receipts, shipments and prices follow:

(1)—Number of cars inspected in the Western Grain Inspection Division during March:

	1925.	1924.
Cars.		
Wheat	10,481	11,806
Oats	2,730	3,793
Barley	1,064	627

HIGHER PRICES ANTICIPATED

Look for Further Demand—Flour Prices Reduced—Mills Selling By-Products at a Decline.

By JACK BROOKS.

LONDON, March 28.—In the past two weeks the price of flour here has fallen by \$1.22 per sack, while Canadian and Argentine wheat has fallen from \$4.50 and \$4.18 respectively to \$3.85 and \$3.60 per hundredweight. Sales of imported wheat on the exchanges are exhibiting considerable fluctuations and temporary control of prices appears to have passed to the Baltic where wheat cargoes change hands rapidly. Some of the best sales of imported lately have been Argentine at \$16, Australian at \$16 and Indian at \$15.22 per 480 pounds. Sales of 1924 Canadian best have been done at \$16.22, Duluth at \$15.22 and American red winter at \$15.22. Argentine for April shipment has been obtained as low as \$15.20, while speculators of summer harvests have done big business in American at around \$14.22. It is believed that the cereal year commencing next September will start at around \$3.35 per hundredweight for fair average quality, which would give an index number of 167 as compared with the pre-war 100. Higher prices here are anticipated after the Easter vacation and there is likely to be a demand for imported wheat since 15,000,000 hundredweights of the English wheat crop have been disposed of as compared with 13,500,000 hundredweights for an average season. Prices of English wheat are higher the past week. Liverpool cargo prices show a drop of 50 cents per 100 pounds for wheat since the second week of the present month for both spot and futures. The last few days these prices have picked up two or three cents and will likely climb a bit higher again.

There is plenty of imported flour here now after a rather pronounced scarcity. Good Canadian is quoted at \$7 per bag of 140 pounds which is the equivalent of a drop of 40 cents per bag in a week. Town Household and All English show corresponding reductions. The decline in flour prices the past week has been difficult to average but the price reduction may be put at around 35 cents per bag on Canadian and Household and 47 cents on English and American winter. The mills here have been clearing off their by-products at a price decline of 11 cents per hundredweight.

The trade here understands that some \$30,000,000 is now being distributed to 92,000 farmers by the wheat pools of the prairie provinces of Canada, this second interim payment being at the rate of 35 cents per bushel for No. 1 northern, Ft. William basis. This installment brings the payment of \$1.35 per bushel which, grade for grade is a higher price than in 1923. The success of the wheat pools, it is understood, is encouraging the organization of pools for other cereals such as oats, barley and rye. Information has been received in London that the Western Washington wheat raising districts are facing a virtual failure of crops owing to the exceptionally heavy frosts experienced in mid-December. This condition, it would seem, affects the whole of the Pacific north-west. The Washington Wheat Growers' Association says that unless new seed is obtainable some 165,000 acres will have to be abandoned involving a loss of \$4,000,000 to the state. A credit of nearly half a million dollars is desired for the purchase of new seed to replace that frozen in the ground.

WHAT THE MOTIVE IS.

The Grain Trade News of Winnipeg, says: The Saskatchewan wheat pool has called for tenders for the erection of elevators at thirty points in that province. Of these thirty points, one now has seven elevators; two have six; two have five; four have four; seven have three; nine have two; three have one; and two have no elevators. It is quite evident that the erection of ele-

vators at most of these points is without economic justification and would represent economic waste. The motive is, therefore, business competition and not the providing of needed facilities. There is no law against spending money for work that would not be needed except to take some business away from a competitor, but it is well to recognize exactly what the pool is doing.

FRANK A. COLES, DEAD.

Last week marked the passing of another leader in trade affairs in the death of Frank A. Coles of Middletown, Conn. He had been at the head of the Coles Co. for many years; a prominent delegate at grain, hay and feed conven-

THE LATE FRANK A. COLES.

tions where he will be sorely missed. Several months ago, while in New York with Mrs. Coles, they suffered a taxi accident. His recovery was slow and part of the time was spent at the Battle Creek Sanitarium. He had, however, been unable to attend to business since the accident.

COMING CONVENTIONS.

April 16-17.—Millers' National Federation, Edgewater Beach Hotel, Chicago.

April 21-22.—Western Grain Dealers' Ass'n, Des Moines, Ia.

May 5-6.—Illinois Grain Dealers' Ass'n, Peoria, Ill.

May 7.—Missouri Grain Dealers' Ass'n, St. Louis.

May 7-9.—American Feed Manufacturers' Ass'n, New Orleans, La., Roosevelt Hotel.

May 18.—Panhandle Grain Dealers' Ass'n, Amarillo, Tex.

May 19-20.—Oklahoma Grain Dealers' Ass'n, Oklahoma City, Okla.

May 21-22.—Kansas Grain Dealers' Association, Wichita, Kans.

May 22-23.—Texas Grain Dealers' Ass'n, Ft. Worth, Tex.

June 9-11.—Am. Seed Trade Ass'n, Los Angeles.

June 23-24.—Ohio Grain Dealers' Ass'n, Toledo, Ohio.

June 22 and 23.—Wholesale Grass Seed Dealers Ass'n, Drake Hotel, Chicago.

June 25-26.—Midsummer meeting of the Indiana Grain Dealers' Assn. Meeting place to be selected later at some place in Northern Indiana.

July 20-22.—Southern Seedsmen's Ass'n, Memphis, Tenn.

July 28, 29, 30.—National Hay Association, Cedar Point, Ohio.

August 20-21.—New York State Hay and Grain Dealers' Association, Syracuse, N. Y. Hotel Onondago.

Oct. 12-14, 1925.—Grain Dealers' National Ass'n, Hotel Muehlebach, Kansas City, Mo.

Oct. 12-14, 1925.—U. S. Feed Distributors' Ass'n, Kansas City, Mo.

GOVERNMENT CROP REPORT

Heavy Reduction Seen in Winter Wheat and Some in Rye—Farm Wages at About Same Level as in 1924.

THE Department of Agriculture's April report which deals with the condition of Winter Wheat and Rye and with farm wages in the United States, says:

The winter wheat crop promises a production of about four hundred seventy four million bushels, which is a much smaller crop than any produced since 1917, and nineteen percent less than last year's large crop. This is largely due to the low condition of sixty-nine per cent of normal, which is also the lowest since 1917. The area sown last fall was larger than in the preceding year, but smaller than in any of the five preceding years. The low condition of the crop is attributed to damage by freezing weather in December and March in much of the great plains area, to severe cold and ice sheets in Indiana and Ohio and to lack of moisture in the Southwest and in Washington and Oregon.

Production of rye promises to be about sixty-two million bushels which is a smaller crop than either of the previous three years and about twelve percent less than the average of the past five years.

The estimate for winter wheat is 474,255,000, or 116,000,000 bushels less than were harvested in 1924, and the estimate for rye in 61,652,000 compared with a total of 63,446,000 bushels harvested last year.

Seedings of oats in southern states are one per cent higher than last year. Texas shows a material decrease while the South Atlantic states show material recovery from last year's low acreage. Condition of oats is eight per cent less than a year ago due mainly to extreme drought conditions in Texas.

Report by States.

Farm Wages.
Farm wages are reported as practically the same as a year ago. They were slightly lower in the Northern states from Wisconsin and Indiana eastward. The far Western and range states also showed declines in farm wages. Wages tend to be higher in the South and the Middlewestern states west of the Mississippi. Details of the wage report follow:
Monthly farm wages with board are

reported on April 1, 1925, at \$33.97, compared with \$31.21 on Jan. 1, 1925, \$33.71 on April 1, 1924, and \$30.98 on April 1, 1923.

Monthly farm wages without board are reported on April 1, 1925, at \$47.58, compared with \$45.24 on Jan. 1, 1925, \$47.62 on April 1, 1924, and \$44.47 on April 1, 1923.

Farm labor supply is reported at 89.5 per cent of normal on April 1, 1925, compared with 88.9 on March 1, 1925, 83.4 on April 1, 1924, and 83.6 on April 1, 1923.

Farm labor demand is reported at 90.7 per cent of normal on April 1, 1925, compared with 88.8 on March 1, 1925; 90.4 on April 1, 1924, and 94.6 on April 1, 1923.

The supply of farm labor in per cent of demand for farm labor was 98.7 per cent on April 1, 1925, compared with 100.2 on March 1, 1925, 92.3 on April 1, 1924, and 88.4 on April 1, 1923.

TESTING SEED CORN.

The country papers are full of articles regarding seed corn and its strength of germination and urging that tests be made before planting. Many of our

Figure 1.

readers are equipped to make germination tests and it is really a simple matter. We show in the accompanying illustrations how the kernels look when they are germinating. In Figure 1 is illustrated the way healthy seed looks in the process of germination. Note the strong root growth, while Figure 2

Figure 2.

shows a weak germination and seed that should be discarded for planting purposes. If country dealers in the corn belt wish to have a one hundred per cent crop to handle, they should see that their farmer patrons plant seed that will test as near one hundred per cent germination as possible. We have described several times how to use the rag doll method for germinating seed corn and no doubt all grain dealers are familiar with this method.

A NEEDED FACILITY.

It is stated that the Southwest Wheat Growers' Ass'n is trying to induce the railroads to build a million bushel terminal elevator at Enid, Okla. A terminal elevator at this point would no doubt be profitable.

Some years ago, however, the farmers in that section conceived the idea of building a terminal elevator and a one hundred thousand bushel house, modern, well equipped house, was erected at the little way station of Imo, some miles west of Enid, at which point it has been a dismal failure ever since. When plans for erecting the elevator were being made the grain trade of Enid implored the farmers to build the plant at Enid, telling them it would be profitable there but not at its present location. When the farmers found the grain dealers would like to see the investment made at Enid, they became suspicious and sunk their money in a plant that could never pay at a station where facilities were ample for handling wagon load deliveries from the farms. Had the original investment been made at the proper location, it would have paid for itself and been an asset not only to

the farmers but to the grain trade at Enid.

A public house at Enid can serve that territory well and should be built.

AMERICAN GRAIN EXPORTS.

The Department of Commerce reported the following exports of grain from the principal ports of the United States to foreign countries during the week ending April 4, 1925 (000 omitted):

Articles and countries.	Week ending		July 1, 1924, to

The Letter Box

Winter Wheat Uncertain.

Price Current-Grain Reporter: It seems to me that the winter wheat will be a very uncertain matter on account of the spotted conditions and uncertain abandonment of acreage. The Bear can go into the field and can see everything looking fine and the Bull can go into the same field and find the crop half abandoned and growth conditions poor.—Geo. A. Wells, Secretary, Des Moines, Ia.

Wheat Frozen Out.

Price Current Grain Reporter: The winter wheat is frozen out in this section, so are the old alfalfa fields and a large portion of the clover.

The farmers are plowing under their winter wheat and are replanting fields with spring wheat, barley, and oats, and some peas. The nights are cold and if the frosts continue as they have in the past much more damage will be done.—Knauf & Tesch Co., Wm. N. Knauf, Chil-ton, Wis.

Illinois Condition.

Price Current-Grain Reporter: Illinois appears to have better winter wheat prospects than many other states report, no doubt but that recent rains have helped. One observer reports that half of our acreage now promises an average yield at harvest, while the balance looks like half a crop. Very little will be abandoned.

Our weather man predicts that what further spring rains we may hope for are due during the coming week and that from then on into June we may expect a continuance of the dry spell that seems to hang over the Mississippi Valley. An average acreage of oats has been seeded here under favorable conditions. The sprouts are coming up to a good stand.

The heavy general losses sustained by the general public other than grain dealers through trading on the various grain exchanges will no doubt result in loud criticism from such. We feel that the many newspaper articles enumerating fortunes made while prices were soaring induced many to trade in grain whose lifetime had been spent pursuing some other kind of business for a livelihood.—H. I. Baldwin & Co., Decatur, Ill., Apr. 11.

Drouth in Texas.

Price Current-Grain Reporter: Suffice it to say that the drouth conditions seem worse than at any time since I have had anything to do with the grain or milling business, beginning with 1897, and it is the opinion of those well posted that with the most favorable conditions from now on, Texas can hardly raise more than 5,000,000 bushels of wheat, or 5 to 10,000,000 bushels of oats, with very little corn; but reports indicate that the acreage to sorghum grains in the Panhandle will be largely in excess of last year.

Reports indicate that a great deal of the acreage in wheat and oats will be abandoned and planted to cotton if we have rain in time, and also show that considerable wheat and oats have died for want of moisture, and in many places the oats have never come up and in a very few locations only corn is up. In many places corn has not been planted on account of dry weather conditions. Reports show that grass has not made any headway in any part of the state, and in central and southwestern parts there is very little showing of grass.—H. B. Dorsey, Sec'y Texas Grain Dealers' Ass'n, Ft. Worth, Tex.

Alfalfa Seed Grades Adopted.

Price Current-Grain Reporter: There are some seed developments here in Utah that will be of interest to your readers and I am therefore listing below the Schedule of Alfalfa Seed

Grades for Utah as adopted yesterday by the State Board of Agriculture:

Extra Fancy.

Pure as to kind, clean, sound, plump seed entirely free from noxious weed seeds. Purity 99.50% or more must contain over 95% perfect, bright colored seed.

No. 1.

Containing over 90% plump, bright, full berried kernels, but on account of general quality not eligible to grade Extra Fancy. Free from noxious weed seeds; purity 98.5% or more.

No. 2.

Seed containing more than 80% plump, bright colored full berried kernels, purity 97% or more, free from noxious weed seeds.

No. 3.

Seeds containing more than 65% plump, bright, full berried kernels, purity 95% or over, free from noxious weed seeds.

No. 4.

Seeds containing more than 50% plump, bright, full berried kernels, purity 92% or over, free from noxious weed seeds.

The term "free from noxious weed seeds" shall mean not more than one noxious weed seed found in 25,000 alfalfa seeds.

Noxious weeds for alfalfa are: Dodder, mustard, white top, plantain, Canada thistle, perennial rag weed, and wild morning glory.

The State Board of Agriculture is also considering at this time and will adopt in the near future Rules and Regulations for the Certification and Sealing of Grimm and Cossack Alfalfa Seed.—Pacific Seed House, P. V. Kelly, Mgr., Salt Lake City, Utah.

THE VAN DUSEN CROP REPORT NO. 1.

The Northwest up to this time has had a remarkably fine Spring for all farm work. In the absence of heavy rains farmers have been in the fields continually, and wheat seeding which started in the latter part of March, is now general in the states of Minnesota, North Dakota, South Dakota and Montana. In some districts of South Dakota, southern Minnesota and North Dakota wheat seeding has been completed.

The ground generally throughout the whole territory is in fine condition with sufficient surface moisture, although from some points there have been complaints of lack of reserve moisture in the sub-soil.

Some coarse grains are now being sown in southern Minnesota and South Dakota. There is a general belief that all available land will be cultivated this season due to the good prices. We look for a moderate increase in wheat and barley, but the flax acreage will undoubtedly be considerably larger, than last year.

While it is rather early to obtain accurate information, our reports indicate that some of the Winter wheat, especially in Montana, has suffered to quite an extent from winter killing, and will probably be replaced with Spring wheat.

Winter rye is not sufficiently advanced to warrant a statement as to condition at this time.

Our correspondents advise very little grain on the farms above seed and feed requirements, the bulk of it having moved at the high prices prevailing during the winter. The general sentiment throughout the Northwest shows a great change for the better. The banks have good deposits, but farmers are most conservative and borrowing very little. There is a noticeable inclination to be economical and to eliminate all unnecessary expense in farming operations. There is also an improved inquiry for land, and in many places sales are being recorded for the first time in several years.

We consider the general crop situation in the territory as most promising and with a continuation of the present weather all seeding should be completed much earlier than in an average year.—The Van Dusen Harrington Co., by W. G. Hudson, Apr. 7.

A NUTTY FLAVOR COMES FROM NUTS.

Some agricultural papers in their desire to aid their farmer subscribers and keep alive agitation and socialistic propaganda have certainly profited little. They have misled the farmers into believing that unsound legislation would secure for them the pot of gold at the

end of the rainbow. The success of this great commonwealth of ours is built up and maintained on the basis of the Golden Rule. Business to thrive and prosper must serve all classes and be free and unhampered. The following editorial appearing in a recent issue of *The National Stockman and Farmer*, a paper of sound ideas, says:

"A few agricultural journals continue to harp on the McNary-Haugen bill, which has the same chance to survive as a mouse has at a feline convention. This is their editorial privilege, of course—if anybody wants to harp let him harp. But one can't help wondering how their readers like an editorial page of such a strong 'nutty' savor."

AN EVENTUAL WHEAT SHORT-AGE.

Dr. O. E. Baker, economist of the Department of Agriculture, regards a world wheat shortage by degrees as probable unless rational land and population policies are formulated by the white races of the world. He estimates wheat consumption by white races at 2,525,000,000 bushels annually. At the end of twenty-five years the normal population increase of the white races will call for 3,200,000,000 bushels, without any allowance for per capita increase in the use of wheat. In fifty years the similar requirements will be for 4,300,000,000 bushels and in a hundred, 5,800,000,000 bushels. Dr. Baker thinks it likely the white races will go up to the French per capita consumption. In that case, in fifty years the white races will consume 5,500,000,000 and in a hundred years, 7,400,000,000 bushels of wheat every year.

He asks if the white man can almost treble wheat production in a century, or even grow the 5,500,000,000 bushels which may be needed within the lifetime of some of us. He places the potential world wheat production at 12,150,000,000 bushels, of which the white races will grow and use about 9,000,000,000. This potential production is, however, predicated on more extensive use of fertilizers than now and on more live stock husbandry.

EMPLOYEES MAY BUY FLEISCHMANN STOCK.

Executors of the Fleischmann estate have been requested by Julius Fleischmann, Jr., and Mrs. Henry C. Weiser, Jr., only children of the late Julius Fleischmann, to offer to employees of the company an opportunity to purchase 100,000 shares of the common stock. It is said the plan of sale, by means of which stock certificates will be held in escrow by the Guaranty Trust Company as depository for a period of five years based on the present dividend rate until the stock will have been fully paid for, will preclude the possibility of any of the stock coming into the market.

USING MANY TRUCKS.

Nearly 200 railroads are now using motor trucks as adjuncts to their usual method of transport. Some have fitted the vehicles with flanged wheels and are running them over the rails. Others have put their machines on the highways. This has been done to save the operation of unprofitable trains, to meet competition and to develop new routes as freight feeders.

The New York Central railroad alone is maintaining 50 separate trucking activities, with about 600 trucks in use.

A GET TOGETHER MEETING.

Agricultural leaders from the New England states, New York, Pennsylvania, Ohio, Michigan, Indiana, Illinois and Wisconsin will gather at Cleveland on April 21 to meet leaders of a number of important manufacturers' organizations in the same states in a conference, the keynote of which is a "Better Understanding Between Industry and Agriculture."

In addition to the national grange and various state granges, the American

Farm Bureau federation, and several state farm bureaus, at least two of the largest dairy organizations will also be represented. The National Metal Trades association, the National Founders association, and the National Association of Manufacturers make up the organized manufacturing groups to take part. Special attention will be given at this conference to results already achieved by farmer-manufacturer groups which have been organized in the states of Maine, Wisconsin and Kentucky. The general conference is to be divided into a series of state conferences to discuss the local problems which might lead to similar group organizations in the various other states.

ANIMALS ON FARMS.

The Crop Reporting Board of the Department of Agriculture, from reports of its correspondents and agents, makes the following estimates of live stock on farms and ranges of the United States on Jan. 1 of five years named:

—Numbers—			—Values—	
Jan. 1.	Pct. prec. year.	Total number.	Per head.	Aggregate dollars.
Horses—				
1925...	97.4	17,539,000	\$62.95	\$1,107,248,000

LINK BELT GRAIN CAR UNLOADER

The Great Importance of Rapid Handling Grain Unloading Facilities and Increased Popular Interest in Such Equipment.

During recent months, revived activity of considerable proportions has been apparent among designing engineers, contractors, and owners of present large elevators and proposed houses. High priced grain and the importance of low handling costs is now inviting attention to the contemplation and installation of box car unloaders, of which several important designs are on the market.

The box car unloaders which the Philadelphia Grain Company recently ordered from the Link-Belt Company for their new Port Richmond Elevator will contain many new and interesting features of design which represent a marked advancement over early engineering practice.

For a grain car unloader to receive its widest application it must satisfy the following conditions:

- (1) It must be able to handle all sizes and types of box cars.
 - (2) It must be able to handle without damage any box car capable of carrying grain.
 - (3) It must be simple and fool-proof in operation.
 - (4) It must be equipped with a grain door opener which will remove the grain doors quickly and without damage.
 - (5) It should be carefully balanced so as to reduce the power requirements to a minimum without having any penalizing peaks in the entire cycle of operation.
 - (6) The pit dimensions should be kept as small as possible.
 - (7) The receiving hopper should have a capacity equal to that of the largest car.
 - (8) It must be served with an efficient car haulage system.
 - (9) The track arrangement should permit the storing of a large number of both empty and loaded cars during the periods of peak operation.
 - (10) Its economy in maintenance and operation together with its high unloading capacity must justify its first cost.
- The design of the unloaders which will be installed in the new Philadelphia Grain Company's Elevator has been made with careful consideration given to all of the above mentioned features. A brief description of these machines is as follows:

Each unloader consists of a car supporting platform consisting of two heavy rolled girder beams connected by diaphragms and bracing, pivotally connected with a heavy structural steel cradle. The axes of these pivots are parallel to the longitudinal axis of the car and permit the tipping of the car sidewise to an angle of 15 degrees. The side tipping operation is accomplished by means of two cast steel gear rack sections mounted in structural steel brackets and driven by cut steel spur gears from a 20 H. P. motor equipped with a solenoid brake. The cradle, which is made up of two semi-circular structural steel girders connected by diaphragm and heavy bracing is mounted on four rollers in such a manner as to permit endwise tipping of the car to an angle of 40 degrees in either direction. Steel cables driven from two 30 inch diameter drums and secured to the cradle by spring ends to prevent shock are used for tipping the car endwise. The operating drums are driven through oil enclosed cut steel spur gearing by a 40 H. P. motor equipped with Solenoid brake. The combined effect on the car of the sidewise tipping to an angle of 15 degrees and the endwise tipping to an angle of 40 degrees causes the grain to be discharged through the door opening into the receiving hopper at the side of the machine, from which it is carried by belt conveyors to the elevator.

The door opener which is supported from the main cradle by pivoted struc-

tural steel levers will push in the boards forming the grain door by means of a steel screw and threaded sleeve driven through cut steel spur gears from a 15 H. P. motor. The grain door will remain attached to the door opener frame which will be raised above the main flow of grain during the dumping operation. During the entire unloading operation the grain door will not be touched by hand. When the car is righted the door opener mechanism is removed from the car and the grain door deposited on the car floor. The door opener is adjustable to cars of widths varying from 8 ft. 6 ins. to 10 ft. 6 ins. and with floor heights varying from 3 ft. 5 ins. to 4 ft. 3 ins. above top of rail.

The machinery for clamping the car on the platform against longitudinal movement consists of two cast steel car-

riages which travel on guides in the upper table and hold the car by contact with the couplers. The clamp carriages are moved and held by steel screws, driven by threaded sleeves turning in fixed bronze-bushed bearings. The sleeves are driven by cut steel spur gearing from a 15 h. p. motor. The clamp carriages are to disappear into pits at the ends of the machine when at their extreme outer position, to permit passage of cars on and off the machine.

SIDE VIEW LINK BELT CAR UNLOADER.

ANOTHER EXPLANATION.

George Robertson, secretary of the Saskatchewan grain pool, charges the recent big slump in wheat prices to a combination deliberately devised to de-

stroy Canadian wheat pools. He said that April 4 was the date set for depressing the price below \$1.35, which was the amount represented by the initial and interim payments of the pool. He said that date was selected because it was the day for mailing out the second pool payment of 35c.

Four pivoted end posts, one at each corner of the car supporting platform, are provided for taking the weight of a loaded car or locomotive when passing on or off the dumper. These posts always bring the rails on the dumper into correct alignment with those outside the dumper. The posts are operated by the end clamp carriages and are entirely automatic. When the end clamp carriages disappear into their pits at the ends of the machine they operate the end posts through a system of levers. This feature makes it absolutely impossible to run a car over the machine without the end posts being under the car supporting platform.

Briefly the operation of the unloader is as follows:

The loaded grain car, with its outer door open on the dumping side, is spotted on the platform of the unloader approximately central by a car haulage system, small locomotive, or otherwise. The disappearing end clamp carriages are simultaneously brought into position in contact with the car couplers, thus positively centering the car on the main cradle. This operation also automatically removes the end posts from beneath the car supporting platform. The grain door is then removed by the door opener, and the car tipped sidewise 15 degrees. With this operation a large percentage of the grain in the center of the car is discharged into the receiving hopper. The main cradle is next tipped to a maximum of 40 degrees to the horizontal in one direction to discharge the grain from one end of the car. With the upper end of the car empty a baffle plate is inserted through the door opening and the cradle tipped to an angle of 40 degrees to the horizontal in the opposite direction, discharging the grain from the other end of the car.

After the car has been emptied of its load the side tipping and longitudinal

COAST GRAIN PRICES.

Quotations on grain, reported by grain exchanges on the Pacific Coast as of April 9, are as follows:

Legal, Traffic and Arbitration Decisions

COURT DECISIONS.

Attempted cancellation of fire policy held void because not complying with terms of policy pertaining to cancellation. Insurer's attempted cancellation of fire policy held void, where insurer did not, as policy required, give insured five days' notice of cancellation, and made on tender of or offer to return the unearned premium.

Evidence held to raise question of fact whether insurer waived clause in fire policy as to ownership by insured of fee simple. Evidence that insurer's agents collected from plaintiff the premium on a fire policy, and remitted it to insurer with full knowledge that the property insured was not owned by plaintiff in fee simple, held to raise question of fact whether insurer waived the clause pertaining to ownership of fee simple in property insured.

Evidence held to raise question of fact whether insurer was estopped from asserting violation of clause in fire policy as to insured's ownership of fee simple. Evidence that defendant insurer's agents collected from plaintiff the premium on the fire policy, and remitted it to defendant with full knowledge that the property insured was not owned by plaintiff in fee simple, held to raise question of fact whether insurer was estopped from asserting a violation of the clause pertaining to ownership by plaintiff of a fee simple estate in the property insured.

Refusal of trial court to sustain demurrer to evidence showing waiver by insurer of clause as to unconditional ownership of premises insured, held proper. In action on fire policy, refusal to sustain demurrer to plaintiff's evidence because of the existence of a deed of trust against the property insured in violation of sole and unconditional ownership clause held proper, where the evidence showed that defendant's agents fully knew when policy was issued that the premises insured were incumbered by the deed of trust.

Existence of deed of trust against premises insured against fire held not violation of unconditional ownership clause. Existence of deed of trust against premises insured against fire held not violation of unconditional ownership clause.—Fox vs. Conn. Fire Ins. Co. (St. Louis Ct. of App. S. W. Rep. 268-394).

Counts in petition for loss of grain held to state separate causes of action ex delicto. In action by shipper against carrier for loss of grain, where petition did not allege a contract and consisted of 18 counts, each based on a separate shipment, and each count separately stating facts out of which defendant's common-law duty arose, the breach thereof, and damages arising therefrom, held, that each count stated a separate cause of action ex delicto.

Petition based on 18 separate counts each alleging action ex delicto held not to involve "long account" justifying order of reference. An action against carrier for loss of grain during shipment, in which petition consisted of 18 counts, each based on a separate shipment and each alleging a cause of action ex delicto, damages not being liquidated and there being no items either of debit or credit to be applied, held not to involve "long account," within meaning of Rev. St. 1919, § 1426, subd. 1.

Character of market reports should be established before made the basis of opinion as to market value of grain. In action for loss of grain during shipment, permitting witness to state market prices, not from his own knowledge or experience but from reports, price lists, etc., without introducing such

market reports in evidence or establishing their character, was improper.

Measure of damages for goods lost in transit stated. The measure of damages for goods lost in transit, in either interstate or intrastate shipment, is the value thereof at the time when, and place where, they should have been delivered, less freight charges if not already paid.—Klingenberg et al. vs. Davis. (Kansas City Ct. of App. S. W. Rep. 268-100.)

The United States Circuit Court of Appeals last week upheld the opinion of the United States District Court in the suit brought against the Washburn-Crosby Co. by the France Milling Co., manufacturers of prepared pancake and buckwheat flours. The latter won the right to continue the use of the name "Gold Medal" for their products.

TRANSPORTATION MATTERS.

Tariffs Suspended.

Schedules filed by the St. Paul, Great Northern and Northern Pacific railroads proposing abolition of the export rates on grain from Montana to Pacific coast points have been suspended by the interstate commerce commission until Aug. 21, pending investigation. Cancellation of the export rate would have resulted in increases and would have become effective April 23. As an illustration of advances, the commission said the rate from Billings to Seattle would have been advanced from 33½ cents per 100 pounds to 40½, which is the present non-export rate.

Appoints Woodlock to I. C. C.

Thomas F. Woodlock of New York has been appointed a member of the Interstate Commerce Commission to succeed Mark W. Potter, who recently resigned.

Mr. Woodlock's name was sent to the Senate, before its adjournment on March 4, but as it failed to confirm him, the appointment was withdrawn.

It was again sent to the Senate in the closing moments of the new session, but no action was taken in reference to it, and the president has now given Mr. Woodlock a recess appointment.

Senatorial objections to Mr. Woodlock, who is a Democrat, were voiced by Harris of Georgia, Fletcher of Florida, and others, who felt that the South was entitled to representation on the commission, and the names of George B. McGinty of Georgia and of Allison B. Mayfield of Texas were suggested as being especially well qualified for the position.

Others objected to Woodlock's appointment, because of his alleged connection with Wall street.

Mr. Woodlock, who is a writer on financial subjects, can take over his new duties immediately, but there is a difference of opinion as to whether he can draw salary until senate confirmation is obtained.

Concerning Mr. Woodlock's qualifications, the Wall Street Journal recently made the following statement:

"What seems to be a well-grounded report is current, if perhaps premature, that the President is considering the appointment of Thomas F. Woodlock to succeed Mark W. Potter on the Interstate Commerce Commission. The appointment would be so ideal from every point of view that some of us may well fear that it is too good to be true. There is absolutely no one else in the United States with Mr. Woodlock's qualifications for the office." It added that this was a case of the office seeking the man, adding that certainly a salary of \$12,000 a year for an unexpired term was no serious inducement to an expert whose value in the business world might easily be three times that sum.

Mr. Woodlock came to this country in 1892 and soon thereafter, according to the same source of information, he published his "Anatomy of a Railroad Report," which after thirty years, it said, was still a textbook on the subject. His "Studies in Value," which appeared in the Wall Street Journal, that publication said, was a revelation to stockhold-

ers and railroad managers alike. In relation to American railroads, it asserted, he occupied a position analogous to that of Sir William M. Acworth in England.

DIGEST OF ARBITRATION DECISIONS.

In a decision by the arbitration committee of the Grain Dealers' National Ass'n, the following principles were announced:

W. C. Ervin & Company, Chicago, Ill., vs. Mayo Milling Company, Richmond, Va. (When grain is bought from terminal markets on official certificates final basis, buyer assumes responsibility for all charges that may accrue through his failure to handle the grain promptly on arrival at destination.)

Wallingford Brothers, Wichita, Kansas, vs. J. H. Teasdale Commission Co., St. Louis, Mo. (Rule No. 39 of the Trade Rules of this association reading as follows:

"The inherent right of the seller to collect his drafts through the bank of his choice shall not be questioned. It shall be the duty of the buyer to pay exchange and collection charges on domestic drafts, when the transaction is made 'track point of shipment.' It shall be the duty of the seller to pay such charges in all other cases."

unquestionably imposes the expense of exchange on seller on contracts made on the delivered basis, even though buyer may have given seller draft routing instructions, unless there be a mutual agreement to the contrary. This carries with it the right of seller to ignore draft routing instructions of buyer if he so desires.)

NEW ORLEANS GRAIN SHIPMENTS.

The grain inspection department of the New Orleans Board of Trade reports total shipments of wheat during March

of this year 2,977,727 bushels against 3,702 a year ago, an increase of 2,974,025 bushels; corn 288,667 against 965,983, a decrease of 677,316, and oats 146,861 against 16,690, an increase of 130,171.

Since July 1 the movement of wheat has shown an increase of 21,316,011 bushels over the same period in the previous season, an increase of 513,670 in oats and a decrease of 1,977,086 in corn and 195,913 in rye.

FUTURE TRANSACTIONS AT CHICAGO.

The volume of sales for future delivery on the Chicago Board of Trade for the days indicated, subject to corrections of minor importance, as reported by J. W. T. Duvel, Grain Exchange Supervisor, were as follows (last three 000 omitted):

1925—	Wheat.	Corn.	Oats.	Rye.	Total.
Apr. 1...	49,271	23,100	7,078	2,958	82,407

MUCH HAY TO BE MARKETED

Prices Lower Than a Year Ago—Fair Trade in Consuming Sections.

CONSIDERABLY more timothy and prairie hay remain to be marketed than at this time a year ago, although the movement of alfalfa has held about normal, according to reports received by the United States Department of Agriculture from a large number of shippers. An increased amount was available for market from the record crop of 1924 while the open winter tended to reduce the demand for hay although more liberal feeding of low-priced hay largely offset the decrease in the number of animals.

About 55 per cent of the marketable surplus of timothy had moved up to March 15 against 70 per cent in 1924 and 65 per cent in 1923. The movement was light over all the surplus producing area but was especially slow in Michigan where only about 40 per cent had been shipped by this time. About 50 per cent of the Wisconsin and New York surplus had been marketed while about 55 per cent had moved from Illinois and Indiana. Timothy from Maine, New York and Michigan was moving into New England and a small amount of Canadian hay was still coming into this territory over the tariff barrier, although the volume of imports was much smaller than last year's heavy movement. New York, Ohio, Indiana, Michigan and Illinois were supplying the southern and southeastern states while timothy from Missouri and Kansas was moving to Texas, Arkansas and Louisiana.

Timothy prices have ruled lower than last year reflecting the bumper crop and on March 15th No. 1 timothy at the principal markets averaged \$5.00 per ton lower than last year and 50c lower than in 1923. Markets generally have been gutted with low grades which have been selling at wide discounts under good hay.

Prairie marketings to March 15th were about 65 per cent compared with 70 per cent last year and 80 per cent two years ago. About 80 per cent of the Minnesota surplus had moved with 70 per cent marketed from Nebraska, and 60 per cent from Kansas and Missouri. Some prairie was being shipped from Kansas City to Mississippi and Alabama for farm use but the movement was light.

Although the 1924 prairie hay crop was small the demand for this hay was restricted by the large amount of fair quality tame hay available at low prices and No. 1 prairie at the principal markets on March 15th averaged \$2.50 under the previous year and \$2.00 lower than in 1923, while there was practically no demand for poor hay.

About 80 per cent of the alfalfa surplus had been marketed by March 15th against 75 per cent in 1924 and 85 per cent in 1923. Marketings were heaviest in New Mexico and California, where 90 per cent had moved while 85 per cent had been shipped from Kansas and 80 per cent from Colorado and Missouri. New alfalfa was beginning to move from Arizona. About 75 per cent of the Nebraska surplus had moved but only about 65 per cent of the Wyoming surplus had been absorbed although a special rate to Kansas City had been granted Wyoming shippers. About 80 per cent of the surplus available in Utah and Idaho had been absorbed locally, chiefly by stockmen.

Alfalfa prices had ruled firmer than the prices of timothy and prairie and had held close to last year's level but at the close of the winter the market worked lower and on March 15th No. 1 alfalfa averaged \$4.00 lower than in 1924 and \$2.50 lower than in 1923.

Dealers' stocks in consuming areas were normal but only a fair volume of trade was expected as the supply of local hays, chiefly Johnson grass, Bermuda grass, peanut and peavine hay in the south and timothy and mixed hay in eastern states and New England, seemed adequate. Timothy was moving chiefly to city teamsters, lumber camps

and mines, although some was being absorbed by southern farms. The heavy crop in Pennsylvania, Maryland and adjoining states was reflected in lighter demand from this section. Practically none was being purchased for deferred shipment. Dairies and stock farms were taking alfalfa and shipments of this hay from Ohio, Michigan, and New York were competing with alfalfa from the middle west along the Atlantic seaboard. The quality of the eastern alfalfa is only fair but lower freight charges enable it to be offered at attractive prices. A little California alfalfa had moved to Atlantic and Gulf ports via the Panama Canal.

The large crop, poor average quality, and high shipping costs are suggested by dealers as factors in the slower movement of the surplus in addition to the effect of motor transportation upon the demand for timothy. Shipping costs, including baling, transportation and terminal charges, become increasingly important with the lower prices prevailing this year since they are relatively fixed charges and in many instances leave only a small return for the loose hay, especially for the lower grades.

The 1925 acreage of tame hay will be about the same as last year, according to farmer's "intentions to plant" as reported to the Department of Agriculture on March 1, with increases in the consuming sections offsetting slight decreases in the surplus-producing areas. Should the ten year average yield of 1.43 tons per acre be coupled with the acreage devoted to wild and tame hay in 1924 a total crop of approximately 109,000,000 tons of all hay is indicated, about 3,000,000 tons less than the 1924 crop but almost 3,000,000 tons larger than the 1923 production.

Movement of 1924 Crop Hay with Comparisons.

PROTEIN LABORATORY IN WISCONSIN.

The new chemical laboratory established by the Wisconsin Grain and Warehouse commission is in use, and is said to be one of the most up-to-date and modern of its kind in the Northwest. It is the only state operated laboratory for the use of grain shippers and buyers.

The establishment of the laboratory is due largely to the work of J. W. Conner, secretary of the commission. The purpose is explained in the following statement by Mr. Conner:

Must Know Protein.

"From a miller's point of view wheat cannot be safely purchased entirely by its commercial grade, but it is necessary also to know its protein content. To maintain a uniformity of product, the miller must know the quantity of protein in the wheat and is now selecting wheat on the basis of its protein content as well as the commercial grade.

"The prevailing practice among millers of today is to purchase wheat according to the quality of flour it will produce and the knowledge of the protein content is a valuable index toward this end. For years the larger mills have

maintained extensive laboratories for the purpose of testing the wheat and the product as it comes from the mill that they may produce a uniform quality of flour and in recent years they are paying premiums for wheat containing over 12 per cent of protein. That the producer and shipper of wheat may get this premium, it is necessary for them to have protein determinations made.

Modern Laboratory.

"To aid in the exchange of wheat between the seller and buyer, the commission has established an up-to-date laboratory for the purpose of making protein determinations. Tests are made for a nominal fee sufficient only to cover the actual cost of making the determinations and the service is at the disposal of all who may wish to take advantage of it. The laboratory is also fully equipped to make complete analysis of all cereal products, such as flour and commercial feed products, for which the charges are only sufficient to cover the cost of making the determination.

"The inspection department will issue official certificates under the hand of the state chemist and the seal of the state of Wisconsin, showing in detail the results of the determinations.

CANADIAN VISIBLE.

Canadian visible supply of wheat increased 1,170,000 bus.; oats, 657,000 bus.; rye, 122,000 bus.; barley, 380,000 bus. These statistics represent terminal stocks only:

	Apr. 11, 1925.	Apr. 4, 1925.	Apr. 12, 1924.
Wheat	41,789,000	40,988,000	51,097,000
Oats	19,748,000	19,606,000	9,409,000
Rye	2,317,000	2,193,000	1,693,000
Barley	7,504,000	7,686,000	2,197,000
Afloat—Wheat, 819,000 bus.; oats, 132,000; rye, 140,000.			

According to word from Winnipeg, no more storage is available at Canadian Lake heads, although some remains at Duluth. Fifty-six million bushels are in storage, while registered capacity is 64,000,000 bushels. There is so much wheat off grade at the head of the Lakes that all available space is occupied. Canadian grain trade hears that the worst blockade in history of Fort William-Buffalo route may be witnessed when navigation opens.

Crop Reports

Compiled by GEO. A. WELLS

MARKETING CONDITIONS.

As to marketing conditions of cash grain, "There ain't no such animal," while on the other hand the professional speculators are "shaking dice" with the country. The spotted condition of winter wheat gives an opportunity to affect wide fluctuations, which gives the professional speculator a profitable opportunity.

The rank and file of country speculators never quit the game when they have won. They always quit when they have lost. It would be interesting to know how many grain dealers hedged the oats that were placed in store during the fall and whether or not they are carrying their stocks through under hedge until time of sale or delivery on contract. Well laid plans to store grain and cover same with hedging protection often go astray and finally become lost in speculation. The trading in future contracts is a good system if it is followed in a businesslike manner and not as a speculation. Marketing conditions during the past year were favorable for carrying charges and hedging. The country grain dealer should educate himself to take advantage of such an opportunity and thereby increase his income by earning storage charges on the surplus capacity of his elevator.

Crop Reports.

The season is largely reported as "early" throughout the grain surplus producing states. There are hardly any reports of "late" season.

The soil condition throughout the states of Ohio, Indiana, Illinois, Iowa, Oklahoma and Texas has been largely "too dry." Missouri, Minnesota, North Dakota, Nebraska and Kansas "largely favorable." Rains have occurred to a considerable extent, particularly in the states of Nebraska and Iowa since these observations were taken. The general crop conditions in Texas are reported by Secretary Dorsey as being very discouraging. In certain localities the reports received read to the effect that conditions are so bad that they cannot be estimated properly. They have never been worse; in fact, look worse than for many years, and in some localities complete failure is anticipated.

WINTER WHEAT: The growth condition of winter wheat as compared with the Government term normal, based at 100, is reported on the average for each of the states as follows: Ohio 63, Indiana 68, Illinois 84, Missouri 83, Nebraska 87, Kansas 76 and Oklahoma 63. It is impossible for any person to estimate the growth condition of the winter wheat crop when conditions are so extremely spotted as this year. Damaged conditions are generally exaggerated and past experience is that later reports will show some improvement.

PIG CROP: The pig crop in the surplus states appears to show an increase in the states of Ohio, Illinois, Minnesota and North Dakota. A decrease in the states of Indiana, Missouri, Iowa, South Dakota, Nebraska and normal in Kansas. The farmers have apparently marketed some of the matured brood sows and the younger sows are not producing as large litters. Farm production of grain and livestock as a whole promises an extremely unbalanced situation.

In General.

The general reports given below as to "season" and "general growth conditions" are self explanatory:

ILLINOIS.

Sidell, Ill. (8): Small grain seeding already completed.

Princeton, Ill. (4): Oats seeding mostly completed now.

Wenona, Ill. (4): Seeding of small grain was completed about April 1st.

Nashville, Ill. (3): Oats all seeded. Corn planting will begin in about one week.

Mt. Pulaski, Ill. (5): Oats all in. Farmers busy plowing. Could use a good rain.

Eureka, Ill. (1): Moisture is needed yet the season is early and there is ample time.

Highland, Ill. (6): Some plowing still has to be done for corn. Oats seeding completed.

Decatur, Ill. (5): Oats completed about April 1st. Put out in good shape and only needing rain.

Odell, Ill. (7): Seeding of small grain is completed but ground is too dry for grain to sprout.

Mt. Carroll, Ill. (4): Small grain seeding practically completed but it is too cold and too dry for germination.

Riggston, Ill. (5): No oats sown here. Early wheat is good growth. Late sown is very backward. Very little growth.

Ashton, Ill. (4): Seeding will be completed April 15th. Crop put in excellent condition. Rain needed for germination.

Belleville, Ill. (3): Spring seeding all completed this week; 75 per cent is up and growing fine. Weather is fine and ground is in good condition.

Freeport, Ill. (4): Small grain seeding about completed today. Crop was put in under favorable conditions but now needs rain.

INDIANA.

Rensselaer, Ind. (1): Most oats now planted. Making no progress as ground is very dry.

Delphi, Ind.: Oats seeding finished now. Everything suffering from too dry a spring.

Tipton, Ind. (5): Winter wheat damaged 50 per cent. One-half in country being sown in oats.

Frankfort, Ind. (2): Oats seeding completed except some fields of abandoned wheat. Oats not up.

Marion, Ind. (5): Oats seeding will be about completed by the 15th of April. Need warm rain.

Winamac, Ind. (?) Seeding nearly completed. Ground in good condition but beginning to be too dry.

Lawrenceburg, Ind. (9): No spring wheat here. Oats about all sowed. Will need rain to bring them on.

Brook, Ind. (1): Winter wheat is not doing well. Too cold and dry. Oats seeding all in good shape.

Jasper, Ind. (3): Small grain seeding is completed to date. Prospects not so good. Need rain in the next few days.

Wabash, Ind. (4): Oats seeding will be finished by April 15th. Oats going in the ground in fine shape. We need rain.

Decatur, Ind. (7): Oats seeding just completed. Plowing for corn. Lots of winter wheat killed. Need rain for wheat.

Rushville, Ind. (8): All small grain has been seeded in this locality. Moisture is badly needed at this time for all grain and seed crops.

Monticello, Ind.: Oats seeding completed. Never saw oats seeded so favorably. Weather has been very dry and cold and has improved the growing wheat.

Winchester, Ind. (8): Oats seeding will be done this week. Corn ground plowing one half done. Ground was never in better condition. Country frightfully dry.

Bloomington, Ind. (3): Almost all the seeding of small grain is completed now. It has just begun to rain here today and will prove of great value to all crops especially wheat and oats.

Angola, Ind. (7): Oats and barley sowing now in full blast. Seeding will be completed in a week with good

Authorized in States of Iowa, South Dakota, Nebraska, Kansas, Illinois, Ohio and Pennsylvania

Western Grain Dealers Mutual Fire Insurance Company

Hubbell Building

Des Moines, Iowa

LIGHTNING PROTECTION

If lightning rod protection could be installed on every grain elevator on which this Company carries insurance, it would not only affect a reduction of ten cents in the rate but also a reduction in fire losses paid by this Company. This would also affect a lower cost of the insurance which would be reflected to the policyholder in an increase in the dividend rates.

weather. A moderate rain would be beneficial but conditions generally are favorable.

IOWA.

Tama, Ia. (5): Small grain seeding will be finished by April 16th.

Lowden, Ia. (8): Small grain practically all seeded. We need rain to start growth.

Williamsburg, Ia. (8): All small grain in ground under good conditions. Still shipping in corn.

Wall Lake, Ia. (2): Seeding will be completed this week. Growth of small grain, small up to now.

Gilbert, Ia. (5): Most all small grain is seeded. Ground is too dry to start oats without some rain.

Onawa, Ia. (2): Oats seeding will be completed April 15th. Too dry too germinate any seed as yet.

Henderson, Ia. (3): Seeding will mostly be completed this week. Prospect for new crop is very good.

Belmond, Ia. (4): Small grain seeding practically completed and crop never went in the ground in better condition.

New Sharon, Ia. (5): Oat seeding finished but will not make much growth until we get rain. Soil very mellow but entirely too dry.

Whitten, Ia. (4): With good weather oats will all be in this week. Oats and grass will not do much till we get rain.

Hull, Ia. (1): Seeding 75 per cent completed. Will be finished this week. Soil condition never better for seeding but rain will be needed to start it.

Hamlin, Ia. (2): Some farmers are done sowing the small grain. Others have not started yet but nights are cold and rain is badly needed. Too cold for oats to grow.

Osceola, Ia. (6): Small grain is going into the ground in a dry seed bed. Immediate moisture will be necessary to avert an uneven crop at harvest time.

Marcus, Ia. (1): It is dry and very windy. When farmers plowed and disced the fields, the dry windy weather dried out the ground badly. Rains needed badly. Many complaints are that new grass seeded 1924 showing up bad for lack of rain. Pastures are short and brown. Farmers sold all their old hogs on account of high prices for hogs and scarcity of corn; expecting to use spring and young brood sows, these having small litters.

KANSAS.

Wellington, Kan. (6): Spring seeding all over. Corn planting well along.

Wichita, Kan. (6): About a normal date the seeding of small grains will

be completed. General conditions are good.

Concordia, Kan. (4): Small grain seeding completed. Growth conditions good.

Plainville, Kan. (4): Small grain seeding practically completed. Growing nicely.

Greensburg, Kan. (6): Spring crop poor stand. Too dry to bring it up properly.

Alta Vista, Kan. (8): Oats seeding is about completed. Early oats is up in fine shape.

Neodesha, Kan. (9): Oats seeding completed. Alfalfa sowing. General prospects good.

Madison, Kan. (9): Small grain all seeded by April 10th. Crop growth and conditions good.

Wakeeney, Kan. (2): The seeding of small grain was completed April 1st. Will need a good rain soon.

Waldo, Kan. (5): Wheat crop practically all abandoned. Ground going into spring crops. Good rains the past week.

Minneapolis, Kan. (4): Small grain seeding completed about April 10th. Outlook favorable. Early sown oats up and looking fine.

Pittsburg, Kan. (9): Oats all in the ground in good shape. Plenty of moisture. Wheat would rate at about 75 or 80 per cent of a normal crop.

Uniontown, Kan. (9): Oats all in and coming up nice. Flaxseed going in good shape. We have had the finest March for farm work we have had for years.

Logan, Kan. (4): Have had one and one-half inches rain in past week. Wheat almost a total failure. Oats and barley doing fine. Must have more rain soon.

Hillsboro, Kan. (5): Oats sowing has been completed about 15 days ago. They will commence to plant corn about April 15th. Wheat doing fine and prospects are good.

Hutchinson, Kan.: We had an all-day rain Friday, which was needed. The roads are very bad to drive. The wheat is beginning to show up very nicely. It is damaged and winter killed, and some worm eaten. What per cent is

HENRY RANG & CO.

Established 1862

Grain Merchants

CHICAGO MILWAUKEE
SIOUX CITY

damaged is too early to estimate at the present. I would judge from 10 to 15 per cent. Oats are coming up nicely. Corn planting is in progress.

MINNESOTA.

Wells, Minn. (6): Seeding of wheat and oats about completed. Weather is dry and cool. Need rain.

Prior Lake, Minn. (6): Spring wheat seeding about completed now. Other small grain will be, within a week.

Hutchinson, Minn. (6): Seeding will be finished by April 17th. Too dry at present no subsoil moisture and little surface moisture as we had no snow.

Donnelly, Minn. (2): Seeding will be finished by April 15th, except late barley and flax. Ground has been in very favorable condition for seeding.

London, Minn. (6): Seeding will be completed by the 16th of April. Prospects will be good for growing new crops. Seeding will all be done in good shape.

Minneota, Minn. (3): Seeding now completed. Too dry on corn ground for proper germination of grains. Fall plowing better. Some of these beginning to green.

MISSOURI.

Bethany, Mo.: The oats are all seeded.

Harrisonville, Mo. (1): Grass and seed crop look good.

Salisbury, Mo. (4): Grain will be seeded early if soil conditions continue good.

Chillicothe, Mo.: Seeding was finished about April 5, 1925. Prospects are very good.

Lamar, Mo. (3): Seeding of small grain was completed about March 20th, and crop is making good growth.

Marionville, Mo. (3): Seeding of small grain all done. Conditions for growing crops excellent. Big efforts being made for big crop.

Springfield, Mo. (3): Oats all sown and good stand. Corn being planted. Cane and kafir will be planted together this month. No spring wheat or barley sown.

Corning, Mo. (1): Spring sowing of small grain and oats, just about done. Spring wheat not sown here in this locality. Oats coming up fine that were sown early.

Sedalia, Mo. (5): Most of oats already sown. Early sown oats already up and looking fine. Farmers plowing for corn. Acreage will be increased about 15 per cent on corn.

MONTANA.

Missoula, Mont.: Soil condition good. Season normal. Growth of winter wheat 90 per cent of normal. Seeding of small grain will be completed April 15th.

Billings, Mont.: Soil condition favorable. Season two weeks early. Growth condition winter wheat not abandoned 55 per cent. Spring seeding about May 20th.

Great Falls, Mont.: Soil condition favorable. Season early. Winter wheat 80 to 100 per cent winter killed. This condition prevails as far east on the Milwaukee as Geraldine and on the Great Northern to Big Sandy. The seeding of spring grain is now on and we anticipate will be completed by May 1st.

Glendive, Mont.: Soil condition very favorable. Season exceptionally early. Very little winter wheat raised in this locality. The small acreage that was planted is very poor. Would say about 70 per cent normal. Seeding of spring wheat started April 1st. The seeding of wheat, barley, and oats will be com-

pleted by May 15th. Flax about June 15th.

Lewistown, Mont.: Soil condition favorable. Season early as compared with average. Estimate condition winter wheat approximately 75 per cent of normal. Between 35 and 55 per cent has been winter killed and some fields are badly spotted. No spring seeding done yet and will depend on weather conditions from now on. Present outlook is that seeding will be completed around May 20th.

Valier, Mont.: Too much moisture for cultivation of soil. However, is rapidly drying off and farmers will be busy in the fields in two or three days. Grass beginning to grow and will come along fast. The season is wetter than usual and just a trifle later. However, it has the ear marks of a very good year. No winter wheat in this territory to speak of. Seeding of small grains will start within the next ten days and with favorable weather should be finished by May 15th.

Kalspell, Mont.: Soil condition very favorable for germination of grain and grass crops. Winter wheat in this vicinity about 50 per cent of the normal crop for the last two years. This is due to considerable of the winter wheat being frozen out last winter and is being reseeded to spring. The seeding of wheat will be started in the next few days. The spring season is opening up early as the weather has been very favorable for the last two weeks. The winter wheat came through all right and the grasses are coming along fine. Taking everything as a whole, it looks as if everything will start all right with the indication that we should have a good crop this year.

NEBRASKA.

Winnetoon, Neb. (7): Most all the small grain will be in by April 15th.

Orleans, Neb. (6): Prospects excellent for growing crops. Lots of winter wheat killed.

McCook, Neb. (6): Grain seeding will be completed by April 15th. Prospects are very good.

Neligh, Neb. (7): Farmers are busy seeding. It will be completed by the 15th. Prospects good.

Humphrey, Neb. (8): Everybody gets his small grain in this week. Wheat what little we have is coming good.

Beatrice, Neb. (9): Most of the oats crop seeded. Weather raw and cold. Do not raise spring wheat here. Winter wheat looks good.

Central City, Neb. (3): Oats and barley seeding now in progress. Should be mostly finished by April 15th. Soil in fine condition. Prospects are favorable.

Superior, Neb. (9): Seeding of oats and barley generally completed by April 1st. A general heavy rain last week provides moisture to bring spring grains up to a fine start. Winter wheat a complete failure.

Central City, Neb.: There will not be much movement of grain from farms until after corn planting. We have had good rains in all our territory in the last ten days and everything is looking fine except the spotted condition of wheat in the southern part of the state.

NORTH DAKOTA.

Monango, N. D. (9): Seeding will be completed about May 1st.

Ashley, N. D. (6): Seeding well advanced but it is getting a little dry.

Cavalier, N. D. (7): Seeding just beginning. Will not be general until about 15th.

Fargo, N. D. (8): A large percentage of spring wheat seeding completed. All will be finished by end of this week.

Lakota, N. D. (7): Spring wheat seeding will be completed in about ten days. Prospects good for growth of new crop.

Carrington, N. D. (5): Seeding of wheat will be finished 15th. Other seeding, oats, barley and flax, will drag along till May 1st.

Fargo, N. D. (8): Wheat seeding 25 per cent done. Soil in good condition now but rain will be needed soon, especially in west 2/3 of state.

OKLAHOMA.

El Reno, Okla. (5): It has been very dry. Had a nice rain Tuesday night.

Altus, Okla. (3): Had a little shower last night which will help to hold wheat a little longer.

Enid, Okla. (4): Oats, some are up and fair stand but just standing still now on account dry weather.

Driftwood, Okla. (1): The seeding of small grain most all completed by March first. Prospects for an oats crop is very poor.

Geary, Okla. (2): Winter wheat condition in Blaine county very poor. Abandoned acreage will be very large and increasing as dry weather continues.

Kingfisher, Okla. (4): Too dry for small grains, only one-third of an inch rain this year. Nothing past two months. Wheat can't stand drouth much longer and oats about gone now.

OHIO.

Lima, Ohio (1): Seeding of oats is almost completed. Rain is very much needed. Spring crop of pigs will be increased compared with last year's

Bucyrus, Ohio (4): No spring wheat is sown here. 95 per cent of the oats is sown. Corn planting will begin about May 1st. The prospects for the growth of the new crop is good.

Springfield, Ohio (2): In ten days the seeding of small grain will be completed. Condition of wheat in this territory the poorest, with one exception in 20 years and that year the crop was a failure. 50 per cent of a normal crop would be liberal estimate in this territory for the prospects for a new crop.

Sidney, Ohio: Only an occasional field looks at all promising. We have had but little or no rain fall for over two weeks. The farmers are a week or ten days ahead of normal with their spring work. The spring pig crop will be about 10 per cent under normal. The small farmers will have a fewer number, but the big farmers have doubled up, so the total difference will not be so large. We are just finishing sowing the largest acreage of oats under exceptionally favorable conditions in recent years. The drouth and freezing weather has not been at all favorable to the spring sown grass seeds, but if we get rain and warm weather soon we may reasonably expect fair prospects for pasture and hay crops.

SOUTH DAKOTA.

Canton, S. D. (9): Small grain all seeded now. Soil is too dry for germination and growth.

Flandreau, S. D. (8): With continued favorable weather all small grain seeding should be completed April 15th.

Elk Point, S. D. (9): All seeding done April 1st. The soil is very dry. Much of grain will not sprout until we get moisture.

Brentford, S. D. (7): Spring wheat most all seeded. All small grain will be seeded by 15th of April. Growth condition fine.

Bridgewater, S. D. (8): Getting dry here. No rain yet this spring. All seeding practically completed. Subsoil moisture still fair.

MISSOURI CROP REPORT.

Missouri wheat is 86% of April normal, indicating 28,743,000 bushels against 24,589,000 in 1924, according to the State Board of Agriculture. Condition of 86% compares with 77% last year and 84% in 1923. Abandonment likely under 3%, against 7% last year. Ice and sleet damage was not so heavy as expected. Wheat has not made rank growth this spring, but good color and well rooted.

Rye is 89% normal against 85% last year and 88% in 1923. Oats seeding was 83% completed April 1 against 28% last year, 58% in 1923. The crop is sown earlier and is off to a good start.

CHICAGO GRAIN STOCKS.

Wheat stocks in all positions decreased 83,000 bus. last week, corn 183,000 bus., oats 748,000 bus. and rye 110,000 bus. Barley increased 15,000 bus. Details follow, last three ciphers omitted, except in the totals:

	Public.	Private.	*Total.	Last yr.
Wheat ...	548	3,469	4,017,000	14,748,000
Corn	4,994	8,624	14,902,000	5,542,000
Oats6,113	10,230	17,856,000	3,674,000	
Rye2,057	226	2,283,000	1,865,000	
Barley	247	247,000	190,000	

*Including 1,284,000 bu. corn, 1,513,000 bu. oats and 81,000 bu. rye afloat.

A bill to incorporate the Manitoba Pool elevators, with a capital stock of \$1,000,000 has been ordered reported by the private bills committee of the Manitoba legislature. The company under the bill is given authority to construct or acquire facilities for handling grain for the Manitoba Cooperated Producers, Ltd., and its members.

Federal Farm Loan Commissioner R. A. Cooper reports that out of 403,906 loans to farmers, totaling \$1,535,198,193, foreclosure was necessary on only three-tenths of one per cent of them.

DENVER, COLO.

F. R. Houlton, Correspondent.

Receipts of grain at Denver the past week were seventy-nine cars.

G. L. Swain, who has been a flour salesman for the F. C. Ayres Merc. Co. of Denver for a number of years, has recently left the company.

H. E. Kelly, manager of the Model Flour Mills at Greeley, and C. B. Seldomridge of the Seldomridge Grain Co. at Colorado Springs, were in Denver this week to attend the directors' meeting.

FORT WORTH, TEXAS.

G. E. Blewett, Correspondent.

Weather.

Drought continues unabated over entire state excepting showers of rather insufficient amounts in very limited territory and hardly sufficient to put ground in planting conditions except in East and Southeast Texas, where little or no grain is produced.

Wheat and oats continue to deteriorate from the drought and the prospects are daily being reduced in both of these while corn acreage has been very greatly reduced with the smallest acreage planted this year than for several previous years.

Wheat is in need of rain very badly and while most sections are beyond any material relief from rain still in other sections such as the panhandle and West Texas, a good rain would greatly help the crop and increase the yield.

Plainview and other sections in the south plains advise that if they do not get rain in the next ten days' time they will not raise enough wheat in that section to seed next year's planting with.

It is now estimated the state may make as much as 8 million with good conditions until harvest.

Oats are at the lowest prospects in years and the state can not produce enough to replace those used for seeding this crop. The prospects are for the lightest yield in the history of the state.

Business.

Business the past week has been very slow with mills reporting a very light flour demand and bookings extremely light and few mills report over at 10% run for March. Stocks of wheat and corn are not very heavy, however, and are being gradually reduced resulting in some better premium for wheat and white corn. Mixed car feed dealers report very slow business.

Wheat.

Wheat receipts have been very light the past week and country offers also slow but demand has been very poor and sales are being made with great difficulty. Dark and hard wheat are in fair demand at better premiums, while soft and mixed 75% soft are almost dead and premiums have declined and these grades now sell at a discount under the hard. Stocks of hard are very low while there remains some dark hard and heavy stocks here of soft mixed wheat which the elevators are getting anxious to sell. April 11 values here on wheat basis delivered Texas Group three or Texas common points are as follows: 1 dark hard wheat, \$1.32@1.34; No. 1 hard wheat, \$1.78@1.80; soft red wheat, No. 1, \$1.82@1.85; No. 1 mixed, 80% soft red, \$1.75@1.80.

Corn.

Corn receipts have been very slow and country offers light which with a good demand and light stocks here have caused a sharp advance in the premiums paid for corn, white especially which will doubtless continue in good demand for milling purposes. Yellow is also strong in fair demand while mixed is rather dull and inactive although premiums have advanced on this also. Stocks of all corn are very low and with continued good demand it is expected there will be further advance in the premiums over the options. April 11 values on corn basis delivered Texas Group 1 as follows: 2 yellow, \$1.26; No. 2 white, \$1.24; No. 2 mixed, \$1.19.

Oats.

Oat receipts have also been slow as have been offers, while demand has been steady

with liberal buying on last week's sharp decline. Premiums have also made further gains and further advance is expected. Texas red oats are in very strong demand with very little being offered and these are now being sold at 8c per bu. over northern white oats, which is indeed a very high premium and something unusual. Today's values basis delivered Texas Group 1 are as follows: 3 or better red oats, bulk, 61c.

Milo and Kafir.

Receipts have been extremely light and country shipments very slow, while demand has been steady and prices did not follow the decline in corn nor did they follow the decline in the cash grain at Kansas City. There has been a sharp advance today with steady demand and firm tone and as country receipts will remain light until rain permits seeding new crop it is expected there will be further advance in the price of both milo and kafir. Today's values basis delivered Texas common points or Texas Group three points are as follows: 3 or better yellow milo, prompt, \$2.05; 3 or better white kafir, prompt, \$1.90.

MILWAUKEE.

D. K. Steenberg, Correspondent.

The Milwaukee Chamber of Commerce was closed on Tuesday afternoon, April 7, election day, and on Friday, April 10, Good Friday.

Receipts last week were 63 cars barley, 52 corn, 63 oats, 14 wheat, 9 rye, 0 flax, 7 miscellaneous; total 208 cars, against 294 the week before, 309 a year ago and 427 in 1923.

F. G. Horner, president of the National Grain Dealers' Ass'n, and Charles Quinn, secretary-treasurer, were guests at the Milwaukee Chamber of Commerce on Thursday, April 9.

Shipments last week were 135,850 bus. oats, 111,375 corn, 12,960 barley, 19,250 wheat, 10,570 rye; total, 289,005 bus., against 330,190 the preceding week and 606,184 a year ago.

A. R. Templeton of the Mapl-Flake Mills was re-elected president of the Milwaukee Chamber of Commerce at the annual election held on Monday, April 6. Hugo Stolley was re-elected first vice-president; W. A. Hottensen, second vice-president, and H.

A. R. TEMPLETON,

Re-elected President, Milwaukee Chamber of Commerce.

A. Plumb, secretary-treasurer. P. P. Donahue was elected and L. R. Fyfe and E. LaBude re-elected to the board of directors. E. C. Christl and E. S. Terry were elected to the board of arbitration for full terms and James T. Mallon was named to fill an uncompleted term on the board. J. J. Crandall, J. V. Lauer and A. R. Taylor were elected to the board of appeals.

M. W. Smith, president of the Fraser-Smith Co., Minneapolis, Minn., spent several days last week investigating the Milwaukee market. The company maintains a branch office in this city.

Wisconsin Purina dealers held a sale convention in Milwaukee on Monday and Tuesday, April 6 and 7. Speakers included

several officers from the Purina Mills at St. Louis, Mo. About sixty dealers attended the meetings.

The extremely bullish Government report issued during the past week resulted in much higher markets. Movement light and demand good. Wheat is 17@20c higher for this period, barely 5@6c, oats 5c, corn 15@17c, rye 7@8c.

Harry J. Mallon, brother of James T. Mallon, Milwaukee, and formerly an inspector with the Milwaukee Chamber of Commerce, was a visitor on 'change last week. Mr. Mallon is now an inspector with the Cargill elevator at Green Bay, Wis.

B. Hilger, manager of the Abell (Wis.) Co-operative Union, returned to his home last week after a three weeks' sojourn in a Milwaukee hospital. Mr. Hilger submitted to a minor operation while in Milwaukee and before leaving here reported that he was now in the best of health.

Announcement of the establishment of a new grain and feed firm, The Rankin Co., with headquarters at 316 Milwaukee-Mechanics Insurance Building, across the street from the Milwaukee Chamber of Commerce, was made during the past week. M. G. Rankin, Jr., formerly connected with M. G. Rankin & Co., was announced as manager.

"Farmer" Amos Gould celebrated his seventy-second birthday on Wednesday, April 8. The boys in the pit all remembered him with smokes. Known as 'the oldest trader in the Milwaukee market,' he is always on the job from the opening to the close, allowing his son to manage his extensive farm in Walworth county. He is considered an authority on grain raising and dairying.

Otis M. Smith, vice-president of the Updike Grain Co. at Omaha, Neb.; D. Kern of the Sparta (Wis.) Produce Co.; Bentley Dadmun of Whitewater, Wis.; C. H. Loedige of Detroit, Mich.; R. Williams and A. D. McPherson of Chicago, Ill.; H. A. Cochran of New York City; David Rosenheimer of Kewaskum, Wis.; Charles McNally of Buffalo, N. Y.; Walter Sadow of the Barton (Wis.) Roller Mills Co.; Louis Gifford of the Gifford Grain Co., Cedar Rapids, Ohio; Frank Miller of Manitowoc, Wis.; J. N. Grimes of Minneapolis, Minn.; M. R. Foulkes of Peoria, Ill.; and Herman Zeitler of the Banner Mill & Feed Co., Prairie du Sac, Wis., were among visitors at the Milwaukee Chamber of Commerce during the past week.

MEMPHIS.

George Williamson, Correspondent.

W. T. Brooking, of the Marshall-Hall Grain Co., St. Louis, was a visitor early in the week.

David Kugelman, Pensacola, Fla., representative of the Royal Feed and Milling Co., was here Saturday.

J. W. Badenock, of Chicago, was a visitor during the week and introduced on 'change by E. L. Luibel.

Included in the week's receipts were 43 cars of screenings, an unusual amount, all going to local mixed feed plants.

Guy Williams, Little Rock, Ark., mixed feed manufacturer and dealer, was on 'change Saturday and watched grain prices soar.

John C. Reid, vice-president of the Three-Minute Cereal Co., Cedar Rapids, Ia., was a visitor at the Merchants Exchange.

Oats receipts for the week were 188 cars and the market is reported healthy and more active. Prices have not improved much, cash 3 white quoted April 11 at 49 to 49½c, but there is good movement to feeders and local stocks are not burdensome.

Receipts of corn for the week were 95 cars, somewhat larger than for several weeks. The local dealers are still well stocked with the grain, but feel better since prices have risen considerably from the recent low points. Demand continues rather slow, for feeders are using oats freely, but on Saturday cash quotations were \$1.17 for 3 white, \$1.12 for 3 mixed, and \$1.19 for 3 yellow.

The Fidelity Storage & Warehouse Co. has been incorporated with capital stock of \$50,000 and will operate as an overflow warehouse the old mixed feed plant of the G. E. Patterson Co., recently bought by several people interested in the contemplated merger of mixed feed manufacturers here. According to several executives, the merger plan, however, has been indefinitely postponed and will not be taken up again this season.

Weather conditions for crop preparations throughout this territory continue ideal and indications now are that cotton will be started two weeks or more ahead of average. In the sections south of here much planting has been done and some is up to good stand, while continued good weather will result in rapid progress northward. It seems generally believed that cotton acreage will be larger than last sea-

The Rocky Mountain Grain Co.

DENVER, COLO.

Always in Market
All Grain

son, the reaction in feed prices and the unusually favorable spring having combined to overcome plans to cut it some from last season. Reports indicate that corn is faring well and early prospects were never better.

NEW ORLEANS.

M. L. Davis, Correspondent.

J. H. Jordan, local manager of the Strachan Shipping Co., is on a business visit to Houston and Galveston.

M. Celestino, local manager of the Lloyd Brasileiro, returned this week from Brazil after an absence of about six months.

N. O. Pedrick, general manager of the Mississippi Shipping Co., left this week for a business visit to Washington and New York.

Blackstrap molasses is firm at 13c per gallon, f. o. b. tank cars New Orleans; medium is quoted at 13½c, and light blackstrap at 14c per gallon.

Stocks in elevator as of today are: Wheat, 1,530,000 bu.; corn, 295,000 bu.; oats, 195,000 bu.; rye, 20,000 bu.; barley, 1,000 bu. Cars on track: Wheat, 17; corn, 7.

The Cuban American Trading Co., Inc., was granted a charter here this week, capital stock being \$50,000.00, with Eduardo R. Mendez, President; Arthur J. Chapman, Vice-President, and Wm. J. Tremaine, Secretary. It is understood the company will engage in Latin-American trade.

OMAHA.

Leigh Leslie, Correspondent.

There was no session of the Omaha Grain Exchange Good Friday.

G. P. Horne has been appointed trustee of the defunct Moalfa Mlg. Co.

T. Frank Drummy, representing the Mid-West Grain Co. in the western part of Nebraska, with headquarters at North Platte, was in Omaha the latter part of the week.

W. W. Kimberly, well-known elevator operator at Paxton, Nebraska, was in Omaha several days last week. Mr. Kimberly says the condition of winter wheat in his part of the state is excellent.

According to the April 1 report on crop conditions in Nebraska, released Saturday by the Bureau of Crop and Livestock Estimates, U. S. Department of Agriculture, the condition of winter wheat in this state is abnormally low, being only 66, with a heavy abandonment of acreage expected, while the condition of rye is good.

Reports received by the Nebraska-Iowa Grain Co. from its agents at Sutton, Bixley and Harvard, Nebraska, say that the condition of winter wheat has improved very much since the recent rains and indicate that the crop has not been damaged more than 10 per cent. J. H. Wright, Jr., manager of the company, is of the opinion that in some of the districts from which these reports came the damage will run as high as 20 per cent.

WINNIPEG, CANADA.

Geo. H. Measham, Correspondent.

Liverpool and Winnipeg evidently took the United States government report on winter wheat at its face value which can only be construed as extremely bullish. Winnipeg opened 8½c higher on the May future and closed strong at practically 11c advance for the day. There was a 'broad and active market in wheat but the coarse grains, though participating in the upturn, were neglected.

No business in export circles was reported and with Liverpool market closed on Monday there is not much prospect of any business until the middle of the week. Report of conditions as regards the Indian wheat crop are pessimistic and it may be taken for granted that there will be no exports from that country in the present crop.

In western Canada considerable wheat is already sown and seeding will be general by April 15 if the weather holds. There is plenty of moisture to give wheat a good start. Those closely in touch with farm conditions do not look for any increase in wheat acreage owing to the large areas of spring plowing to be done. It is probable that the acreage in crop to all grains will be little changed from last year.

The Western Canada Co-operative Wheat Producers, Ltd., has broken silence with a lengthy official statement by the secretary of the Saskatchewan pool. He asserts that there was an organized attempt made to

wreck the pool by depressing prices, and indulges in much high-faluting talk about the strength of the pool and the progress it is making. In fact, he "protests" too much to be very convincing.

The pool is on trial and the verdict will depend upon its final showing. When it was being organized under the direction of Aaron Shapiro it was stated over and over again that if the pool could secure control of sufficient wheat it could stabilize wheat prices. The pool campaign did secure sufficient contracts to control the wheat needed and the result has been the widest fluctuations ever experienced in wheat marketing. It has signally failed to make good on one of the main planks of its platform.

CINCINNATI.

George Mosbacher, Correspondent.

The weekly report of J. A. Morris, District Manager of the Cincinnati Operating Committee Car Service Division, disclosed the fact that fertilizer loadings was the heaviest in many weeks, and that no trouble was experienced in taking care of all orders.

Receipts of oats were fairly large compared with wheat and corn, but inadequate to supply the improved demand. The market was firmer and prices a cent higher. No. 2 or No. 3 of heavy weight and suitable for seed continued to sell at a good premium.

The confidence restored in wheat values throughout the country the past week was also apparent in the local cash market, and prices advanced about 20c per bushel over a week ago, but flour trading was limited because of the few offerings. There was, however, an excellent demand for prompt shipment to Southern mills which was influenced by bad crop reports, the future market reaction, and the scarcity of country offerings. Shipments were mostly from terminal stocks which were materially reduced.

The serious break in corn prices last week to a basis below the cost of production practically stopped shipments from the country and with an unsupplied local demand, and improved inquiries from Eastern export and feeding interests, together with sharply higher futures the market naturally reacted and prices advanced 18 @20c a bushel over closing quotations of a week ago. While local buying was mostly by millers and industries a better demand was also noted from retailers. The demand was mostly supplied from terminal stocks. Ear corn was in urgent demand, but offerings were insufficient to accurately quote prices.

Stocks of grain in local elevators for the last week and previous week are as follows:

	Apr. 10, 1925	Apr. 3, 1925
Wheat, bus.	274,141	336,866
Corn, bus.	269,633	260,464
Oats, bus.	101,226	110,991
Rye, bus.	3,611	6,761

Application for a building permit for a concrete grain warehouse and elevator with a capacity of 1,000,000 bushels, to be operated under the Federal Warehouse Act was made by The Early & Daniel Co., one of the leading grain and hay firms of the Middle West at the office of the Cincinnati Building Commissioner, Geo. A. Hauser, last Tuesday. The structure will be erected as an addition to the 400,000 bushel capacity elevator at Hoppel Street and the C. H. & D. Railroad at Fairmount, a suburb of Cincinnati, at a cost of between \$350,000 and \$400,000, and will be thoroughly modern and up-to-date, and one of the finest structures of its kind in the United States. By adopting the federal warehouse system for operating, Mr. Early explained, it automatically becomes a public institution, in so far as the grain trade of Cincinnati is concerned. Inspectors and weighers at the elevator will be employees of the Early & Daniel Company, but licensed by the United States Government and subject to instructions from the Secretary of the Department of Agriculture.

DULUTH.

S. J. Schulte, Correspondent.

Charles F. Huley and Ward Ames and C. T. Mears have returned from vacations spent at Florida winter resorts, and George Barnum Sr. is back from a trip to Southern California. The trio expressed their pleasure at being back in the trade harness on the eve of the opening of navigation.

The Duluth-Superior Milling Co. has dispatched another solid train of thirty-eight cars of its flour to New York state points. The buyers were unable to wait until after the opening of navigation for deliveries. That is regarded here as indicative of the lightness of flour supplies being held by eastern millers.

Parker M. Paine, a former member of the Duluth Board of Trade but now a partner of Logan & Bryan, Chicago, was a visitor on this market during the last week. He expressed the opinion that grain prices are now down to a level where they represent actual market values. The blow on the market has, he thinks, been felt off in the recessions in prices that have come about during the last six weeks.

Operators on this market were chiefly interested during the last week in endeavoring to work up eastern inquiry for shipments around the opening of navigation. Demand for boat space was practically confined to millers for spring wheat and durum. Space for loading here for Buffalo delivery was booked at 2 1/2 cents. Offers of other cargoes were made at 2 1/2

CHICAGO

cents but the business was not accepted by the vessel interests.

Dealers commented upon a substantial improvement in eastern inquiry for oats for opening of navigation shipment. Sales of around 1,400,000 bushels in the aggregate were reported. Two cargoes were reported to have been chartered at 2 cents a bushel. Over 12,400,000 bushels of oats are being held in elevators at Duluth and Superior, some of them having been accumulated at up to as high as 58 cents a bushel last December. The trade is hopeful that export outlets will be found at the lower level of prices that has been set.

Advices received by elevator and commission men here lately have been to the effect that the acreage seeded to durum this spring is likely to show a substantial gain this spring as a result of the high returns from it during the last fall and winter. The area put in spring wheat is expected to make a close comparison with last season's figures. Dealers are strongly impressing upon farmers the advisability of increasing their flaxseed acreage. They are prompted in that attitude by the outlook for more settled conditions coming about in Europe within a year and that the country's over there will as a result be freer buyers of flaxseed from the Argentine and India thus making the American markets more favorable for domestic seed.

LOS ANGELES, CALIF.

C. G. White, Correspondent.

The Huffine Grain Co. started construction work on their new elevator last week, in the new central manufacturing district.

C. B. Holladay, of the Smith & Scott, Inc., spent last week motoring through the San Joaquin Valley, making stops at Fresno, Merced and San Francisco.

Louis Prenot, of Albers Bros. Milling Co., who has been very ill the last 10 days, was reported much improved this morning, but, however, his condition remains very serious and it will be several days before he is on the road to recovery.

About 30 members of the Los Angeles Grain Exchange attended the opening game of baseball between Portland and Los Angeles on April 7th. They all report having a wonderful time and no ill effects have been reported from eating too many peanuts and hot dogs.

J. C. Hodge, president of the Atlas Milling Co., returned last week from a business trip through the northern part of the state. Mr. Hodge reports crop conditions much improved over last year, in the San Joaquin Valley and that district has had a normal amount of rainfall this season and the farmers are looking forward to a very large barley crop.

Cash Markets.

Conditions in this territory remain about the same as a week ago with a slight decline in barley for April delivery; corn remains about the same. The arrivals have shown an increase over last week but still far from normal.

No. 3 yellow corn is being offered at \$2.30 with a bid of \$2.25 for last half of April shipment, while No. 2 was being offered at \$2.33 with a bid of \$2.27 per cwt.

No. 2 white, bulk kafir spot is being offered at \$2.17 1/2, with no bid.

No. 2 hard winter wheat, no smut, not over 1% dockage, board terms, is being offered at \$2.75 with a bid of \$2.72 1/2.

No. 2 feed barley, 100-ton lots for April delivery, is being offered at \$1.67 1/2 with a bid of \$1.52 1/2, while December is selling at \$1.50.

The ground feed arrivals for the week were but 40 cars, the prices remain firm and the demand fair. Utah-Idaho millrun is selling at \$36.00; Kansas bran at \$33.00; alfalfa meal, medium, \$32.00; molasses alfalfa mixed, \$29.00; cottonseed meal, \$45.00; beet pulp, \$40.65, and rolled barley, \$40.00.

The hay arrivals were 157 cars for the week. The market fairly strong. No. 1 alfalfa, Yuma valley, \$23.00; Imperial valley, \$22.00; No. 2 \$2 less; No. 1 barley hay, \$28.00, and No. 1 oat hay, \$29.00.

OKLAHOMA CITY, OKLA.

W. F. Kerr, Correspondent.

C. B. Rogers, representative of the Van Dusen-Harrington Co. of Minneapolis, called on the Oklahoma City grain trade last week.

J. W. Remple, manager of the Farmers Grain Co. at Gotebo, and Frank Wheeler of Wheeler Bros. Grain Co. at Watonga, were recent visitors here.

The Shredded Wheat Co. of New York was admitted to Oklahoma with a capital investment of \$2,500, George M. Green, Oklahoma City, agent.

H. C. Lungard has been transferred from managership of the Atoka Milling Co. to that of the Okeene Milling Co. He is succeeded at Atoka by F. T. Statler.

The Guthrie Mill & Grain Co., Guthrie, Okla., was incorporated by F. L. York of

Guthrie and F. A. Sullins and T. A. Thacker of Oklahoma City, with a capital stock of \$25,000.

Reliable reports received here say that all of the wheat that was stored in Texas by the Oklahoma Wheat Growers' Association has been sold save possibly 100,000 to 200,000 bus. being held at Galveston for export.

W. E. Jones, president of a new milling company at Grove, Okla., reports that the company's capital stock of \$10,000 has been subscribed and plans are drawn for a mill of 80 bbls. flour capacity and 50 bbls. feed capacity.

Estimates of wheat damage by drouth range from 35 to 50 per cent among grain dealers. Acreage abandonment probably will be much larger than the increase over last year. Heaviest abandonment will be where cotton and sorghums may be planted. In most places stands are reported thin. Most of the wheat belt has had rain, but much of it enough for only temporary relief.

The flour, feed and grain jobbing industry is represented on the board of directors of the new Chamber of Commerce at Waurika, Okla., by M. C. Groseclose, a commodity jobber of that city. The city is growing in importance as a jobbing center since the Burlington railroad was built in there from Texas. Completion of the road brought a wholesale grocery and flour mill. The Chamber expects to carry on a campaign for increasing the jobbing and manufacturing lines.

NEW YORK.

J. M. Nugent, Correspondent.

There was a moderate trade in wheat for export early in the week, but buying abruptly dropped toward the end of the week owing to the holidays. Total business in wheat for export probably did not exceed 2 million bushels, mostly scattered, lots of Manitobas, some parcels of Duluth spring wheats and a little American winters.

During the past week, the following gentlemen visited the floor of the New York Product Exchange: W. Draper of Duluth, E. T. Maynard and H. C. Cooper, both of Chicago; also E. W. Erickson and R. E. Groff of Minneapolis; W. E. Harris of Baltimore; Nisbet Grammer of Buffalo; H. W. Corrigan of Montreal, and W. J. Gross of Milwaukee.

Flour Situation.

New York, April 11th.—Advances of from fifty cents to one dollar per barrel occurred in the flour market for both winter and spring wheat qualities, and this movement brought on a better demand here as well as in the Northwestern and Southwestern markets.

Strength in wheat, the decidedly bullish Government Report and the extreme scarcity of cash wheat were the principal factors in this development.

Fresh export business was very quiet, but heavy clearances were again reported from New York and Baltimore for Russia.

Spring patents were quoted at \$8.25 to \$8.75; soft winter straights, \$8.00 to \$8.50, and hard winter straights, \$8.25 to \$8.75 per 196 lbs.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

Exports of grain for five days ending April 10th were: Wheat, 830,356 bus.; oats, 14,970 bus.; rye, 17,143 bus.

Exports of corn were none in March and February, 1925, but 514,503 bus. in March, 1924, and 561,711 bus. in March, 1923.

Exports of oats for the month of March, 1925, were 95,968 bus., compared with 108,833 bus. in February, 1925, with 39,893 bus. in 1924.

Receipts of flour and grain for week ending April 11th were: Flour, 29,654 bbls.; wheat, 834,119 bus.; corn, 3,479 bus.; oats, 44,597 bus. and 25,356 bus. of rye.

Exports of wheat for the month of March, 1925, were 3,736,147 bus., against 4,759,717 bus. for February, 1925, with 2,562,488 bus. in March, 1924, and 4,231,275 in March, 1923.

Exports of rye for the month of March, 1925, were 181,212 bus., 127,992 bus. in February and 64,786 bus. in March, 1923. There were 16,629 bus. of barley exported in February, 1925.

Exports of flour for the month of March, 1925, were 38,020 bbls., compared with 36,763 bbls. for the month of February, 1925, with 26,366 bbls. in March, 1924, and 33,002 bbls. in March, 1923.

Robert J. McKnight, Jr., of the flour and grain firm of Robert McKnight & Sons, one of the oldest houses of its kind in Philadelphia, died last week at his home in West Philadelphia after an illness of about three months with kidney troubles. Deceased was 76 years of age and was a member of the Commercial Exchange 52 years when he died. The old firm headed by Robert McKnight, Sr., joined the Exchange about the time of the breaking out

PORTLAND, ORE.

J. B. Morrison, a grain dealer of Arlington, was in the city last week.

Exactly 100 new members were added during March, bringing the total membership to 3,883.

Recent visitors to the Merchants Exchange included W. J. McDonough of Seattle, W. T. Younger of Pasco, and B. M. Turner of Turner.

The Cascade Milling & Elevator Co. is erecting a building and installing an up-to-date chemical laboratory. The improvement will cost about \$5,000, according to August Schwachheim, president and manager. C. F. Judd has been engaged as chemist.

Membership of the Chamber of Commerce has reached the highest point in the history. M. J. Slatky, manager of the membership department, announces. Enrollments last month were the greatest of any month in five years. Enrollment records of the chamber do not go back further than that period.

In checking cereal shipments by water from Portland for March the Merchants' Exchange reports wheat exports were limited to 37,333 bushels, and flour amounted to 59,897 barrels, while there were 38,940 bushels of wheat, 75,159 barrels of flour, 1,873 bushels of barley, and

26,259 bushels of oats for coastwise destinations. To the gulf district were consigned 3,750 barrels of flour and 35,758 barrels were sent to Atlantic coast markets.

"Grain fields of Sherman county have all been reseeded," reports Charles L. Powell, who has returned to Portland after helping reseed 1,000 acres near Moro, Ore. "The freeze did a complete job. Even the weeds were killed off and in the stubble there are no volunteer spears. It was frozen out slick as a whistle. I understand there were a few acres, about 160 or so, near the Columbia river, which were not affected, but that was all. The rest of the county suffered, just as other parts of the state and Washington. It costs about \$4 an acre to reseed, and that is about what it cost everyone, as near as I can estimate. The wheat, 'hard Federation,' recommended by the experiment station, cost \$2.50 a bushel."

Terminal receipts, in cars, were reported by the Merchants' Exchange for the season to April 8 as follows:

	Wht.	Brly.	Flr.	Cn.	Ots.	Hay
1924-25.....	14,104	500	1,512	523	613	1,793

MINNEAPOLIS.

H. A. Paul, Correspondent.

A. C. Randall of Winnipeg called on the Minneapolis trade last Wednesday.

John Treise of the Cargill Commission Co. is confined to a hospital this week.

Will E. Bopp, district sales manager for the Russell-Miller Co., died Thursday.

Frank Durant of the Grain Bulletin returned this week from an extended stay in California.

J. H. Mullikin, sales manager for the Washburn-Crosby Co., is spending ten days in the east.

Harley Flood of the Cargill Co., located at Duluth, is back on the Minneapolis floor for several weeks.

B. B. Sheffield of the Sheffield Elevator Co. has left for a trip of inspection to his ranch in Montana.

W. H. Kellogg, local manager for the Grain Marketing Co., is back after spending several days in Milwaukee.

A. C. Murray, vice-president in charge of grain department of the Quaker Oats Co., Chicago, was in Minneapolis Monday.

M. H. Woodward, formerly of the Woodward-Newhouse Co., was found dead in his garage at Lake Minnetonka last Sunday. He died of carbon monoxide poisoning.

Charles Quinn and F. G. Horner, secretary and treasurer, respectively, of the National Grain Dealers' Ass'n, were Minneapolis callers during the past week.

T. G. Hall, president of the St. Anthony & Dakota Elevator Co., was greeting his friends on the floor this week, having just returned from a vacation of some weeks.

Among the visitors on the Minneapolis trading floor during the past week were: E. Wilkinson of LaCrosse, Wis.; C. Kurth, Jr., of Milwaukee; T. F. Gallagher of Pittsburgh; J. G. and C. A. Hunting of Winnipeg.

Cash Markets.

Wheat.—The very light receipts of cash wheat coming into this market has resulted in a further firming up in the matter of premiums and it begins to look as though the elevators will have the laugh on the mills before the advent of any new crop wheat onto the cash tables.

There seems to be a marked improvement in the matter of shipping demand; this coupled with the light receipts of road wheat will result in depletion of the local visible and if the mills get much of any flour demand they might be sorry that they did not take advantage of conditions which existed when the futures market was down and premiums comparatively low also.

Southwestern mills were inquiring for wheat testing around 11.50 protein during the past week, but local mixers did not seem inclined to let it get away from them and were picking up offerings of this sort. Demand for the real choice wheat, of which there is very little to be had, has been very keen right along. Country car loadings, according to reports of the railroads, as well as commission houses, are light; and what is more, no apparent increase expected. A good advance in the future market might bring out a little heavier run but it is not generally expected to be of any great extent for the simple reason that the stocks are not there to permit of it.

Local elevator stocks for the week ending today totaled 12,603,134 bushels vs. 12,840,360 bushels last week and 14,331,817 bushels a year ago.

Based on today's range of sales, No. 1 hard spring sold at 4@50c over May; No. 1 dark northern, 3@48c over May; No. 1 northern, 2@40c over May.

The tone of the durum market has been strong through the week, with offerings light and demand good. Today's range of sales shows: No. 1 amber, 5@45c over Duluth May; No. 1 durum, 3c under @ 43c over; No. 1 mixed, 8c under @ 43c over.

Winter wheat receipts, like the durum have been light and demand good. Range of sales on Saturday was: No. 1 dark hard Montana, 2@28c over May; No. 1 hard Montana, May price at 13c over.

Corn.—Receipts of corn have been so extremely light that it was a mighty hard thing to quote a real market on some days during the past week. For instance, on Tuesday, there were only two cars on the tables. Demand was very good for the choice yellow, whenever available. The weather has turned very warm in this section and just about precludes the possibility of heavy shipments of high moisture content corn. Besides this, with hog prices up and corn prices down (until the recent upturn), farmers had undoubtedly decided to market their corn in the form of pork and they could not very well be blamed for such action.

Local elevator stocks for the week ending today total 839,402 bushels vs. 939,758 bushels last week and 1,603,208 bushels a year ago.

Based on today's range of sales, yellow corn sold at the following prices: No. 3, 3@6c under Chicago May; No. 4, 7@12c under; No. 5, 15@18c under; No. 6, 20@22c under. On the mixed, No. 3 sold at 8@10c under; No. 4, 12@14c under; No. 5, 16@20c under, and No. 6, 25@30c under.

Oats.—The situation in the cash oats market did not change materially this week. Local elevator stocks were cut into in substantial fashion and shipping sales each day mounted into fair figures. Of course, twenty million bushels of oats constitutes a fair amount of grain to reduce before the advent of the new crop (which, by the way, is not so many months distant) but all things are possible when one stops to consider the manner in which the futures markets ran up to almost two cents a pound and then slid off to less than one cent per pound, all within the space of less than six weeks. Local stocks today total 19,991,721 bushels vs. 20,942,905 bushels last week and 4,175,047 bushels a year ago. Today's range of sales shows the following: No. 3 whites, 1¼@2c over May; No. 4 at 1@2c less.

BUFFALO.

Fire did \$30,000 damage to the plant of the Fleischmann Malting Co.

E. M. Husted of the Superior Elevator Co. has returned from Algiers.

John Olmsted of the Niagara Falls Milling Co. is vacationing by means of an ocean cruise to the West Indies.

The H-O Cereal Co. general offices have been moved from this city to New York.

F. J. Schonhart will soon become associated with the Cargill Grain Co.'s office here.

W. V. Hamilton, Caledonia, N. Y., president, New York State Millers' Association, was here last week.

Frank F. Henry, vice-president, Washburn-Crosby Co., and manager of the office here, has returned from Camden, S. C.

Latest reports of wheat in stores and afloat here are: In store, wheat, American, 4,086,037, Canadian, 2,918,936; afloat, American, 1,438,405, Canadian, 817,922.

Fred Deyo of the Empire Grain & Elevator Co., Binghamton, N. Y., has been spending some days here in attendance at the American Bowling Congress.

The Quisenberry Feed Co. has been given the New York state contract for 75 carloads of feed to be used in state institutions, its tender proving the most acceptable.

The Seaboard Forwarding Co. announces these rates for canal movement of grain to start the 1925 navigation season between Buffalo and tidewater: Wheat, 7c; flaxseed, 9c; corn, 6½c, and oats, 4c.

Reconstruction of the warehouse of the General Milling Co. is being effected but the mill will not be rebuilt. The wholesale jobbing and storage business will be enlarged to handle 25 more cars of sacked stocks.

C. B. Seay of the Consolidated Feed & Grain Co. will leave the management of

of the Rebellion. He is survived by two brothers, Samuel and Oliver McKnight. He belonged to Philo Lodge, F. & A. M., and was buried in Mt. Moriah cemetery.

Philadelphia Flour Market.

Philadelphia, April 11.—The recent reaction in wheat caused higher flour prices but buyers are slow to follow the advance and are not inclined to purchase in excess of immediate wants. Receipts the past week were 29,654 bbls. We quote per 196 lbs. packed in 140-lb. jute sacks: Soft winter straight, western, \$8.25@8.75; do nearby, \$8@8.50; hard winter straight, \$8.50@9; do short patent, \$9@9.50; spring first clear, \$8@8.25; do patent, \$8.50@9; do short patent, \$9.25@9.50; fancy spring and city mills patent, family brands, \$9.50@10.15; rye flour, \$7.50@8 per bbl. in sacks, as to quality; buckwheat flour, \$4.25@4.50 per 98-lb. sack.

the concern in the hands of Eliot W. Mitchell on May 1, retaining, however, his interest, and go to Miami to start a manufacturing plant for roofing and decorative tile.

The H-O Cereal Co. has been rendered a favorable decision in the suit it brought against a New York corporation which had held the trademark "Hofood" and used it on several cereal products. The H-O Co. contended this was an infringement on its trademark "H-O."

ST. LOUIS.

March shipments from St. Louis by barge totaled 1,412,760 bushels.

Fred W. Seale of the Seale Bros. Grain Co. is back from a trip to California.

W. E. Meek of the Meek Milling Co., Marissa, was a St. Louis visitor last week.

The Purina Mills has purchased the 700,000-bushel grain elevator of J. H. Teasdale & Co.

E. K. Ludington of New York City, president of the Chase Bag Co., was in the city last week on a visit to his former home.

The annual baseball game between the cash grain men and pit men of the Merchants' Exchange will be played April 15.

J. M. Chilton, manager of the St. Louis office of the Hall-Baker Grain Co., has been in New Orleans on company business.

J. M. Adams, formerly connected with the Grain Marketing Co., of Chicago, has taken charge of the feed department of Anheuser-Busch, Inc.

The Powell & Rourke Grain Co., operating the Brooklyn Street Elevator in St. Louis, will build an addition to the present house, beginning work immediately. The new space will consist of 16 concrete tanks with a total capacity of 300,000 bus. This will give Powell-O'Rourke storage to accommodate 440,000 bushels.

At the suggestion of A. R. Smith, vice-president of the Louisville & Nashville railroad, a conference was held in the directors' room of the Merchants' Exchange, April 6, to discuss the subject of domestic rates on grain and grain products from St. Louis to South Atlantic ports. The millers were represented by R. M. McCombs, of Jackson, Mo.; Philip H. Postel, of Mascoutah, Ill.; George F. Phillips, of Chester, Ill.; George N. Sauer, of Evansville, Ill.; O. M. Bartholomew, Charles Ripin and E. P. Costello, of St. Louis. The following railroads were represented: Illinois Central, Louisville & Nashville, Southern, Mobile & Ohio, Missouri Pacific and Frisco.

ST. JOSEPH, MO.

N. K. Thomas, Correspondent.

Visitors on the St. Joseph Grain Exchange during the week ending April 11th included: F. M. Saum, Ruskin, Neb.; S. E. Persinger, McFall, Mo.; W. J. Ebersole, New Hampton, Mo.; E. S. Miller, Omaha, Neb.; Will Kirk, Gower, Mo.; W. A. Henry, Baker, Kans.; I. C. Roelofson, Barnard, Mo.; J. A. Redman, Maysville, Mo.; J. T. Jamieson, City; W. Pearce, Maysville, Mo.; J. R. Crosswhite, Vliets, Kans.; D. Nelson, St. Louis, Mo.; L. L. Teare, Craig, Mo.; H. N. Moore, Graham, Mo.; E. Klecan, Kansas City; W. W. Watson, Rosendale, Mo.

With the pouring of concrete April 8th a \$250,000 project by the Burlington Public Elevator Co. will assume definite shape in a few days. The project is an addition to the company's elevator in the Florence Yards and will increase the storage facilities to about 1,000,000 bushels. The work is being done by the Burrell Engineering & Construction Co. of Chicago and it is hoped to complete the job by August 1st. All piling has been driven and a large amount of material placed on the site. Eighteen tanks 22 feet in diameter and 86 feet in height will be constructed.

Arrivals of all classes of grain were very light during the week ending April 11th. Wheat receipts were practically nil, and trade about the same. Mills showed an increased interest in view of the smaller offerings. Cash prices worked 20c higher on hard wheat and 17@18c up on soft wheat. There is a good current mill demand for soft wheat. Supplies of corn

rather light and demand rather good on a steady market; values have advanced 16@18c for the week. Urgent demand for corn in some cases. Oats offerings small, and demand rather good; prices 3@3½c up for the week.

KANSAS CITY.

T. J. Tanner, Correspondent.

C. P. Cawthorn, vice president and secretary of the Hodgson-Davis Grain Co., was called to Mexico, Mo., Thursday by the death of his mother.

There is a possibility of mills in the southwest shipping in dark northern spring wheat from Minneapolis for mixing purposes. With a billing advantage, prices this week were only 3c to 5c out of line.

Members of the Board of Trade played golf at the Meadow Lake Club grounds on Good Friday. J. J. Kraettil led the contestants with a score of 18 holes out of 85. The president's "cup," however, was awarded to Henry Lichtig. It was a tin cup.

Among the week's visitors at the Board of Trade were J. A. White and R. H. Bunch, Chicago, Ill.; Otto Keuch, New York, N. Y.; Fred W. Elder, Denver, Colo.; Carl Hausen, Tulsa, Okla.; I. C. Hanneby, Fort Worth, Tex.; Joseph Steiker, Dodge, Nebr.; R. A. Shaver, Plattsburg, Mo., and C. A. Moore, Stafford, Kan.

One wing of the baking trust was broken this week when plans for the formation of the Empire Baking Corporation in New York were abandoned. Bryce B. Smith of Kansas City, president of the Consumers Bread Co., was to have been president of the combine. The negotiations fell through when certain eastern bakeries refused to amalgamate.

A committee composed of L. A. Fuller, chairman; B. C. Moore, B. L. Hargis, W. C. Goffe, F. C. Hoose and F. B. Godfrey has been appointed by H. C. Gamage, president of the Board of Trade, to arrange the entertainment for the annual convention of the Grain Dealers' National Association which meets in the Hotel Muehlebach in October.

C. E. Munn of Oklahoma City, Okla., sales manager of the Southwestern Grain Growers' Association, said at the Board of Trade Thursday that recent rains had saved the Oklahoma wheat crop. His estimate on the state's yield is 35,000,000 bus. Interest in the growers' association, Mr. Munn added, continued strong, with new members joining every day.

The Kansas City Board of Trade has offered as a trophy a silver loving cup to the best rifle shot among 2,000 boys who will be in Fort Leavenworth next August. The boys will come from three states, Missouri, Kansas and Arkansas, and will be trained in excellence of citizenship, military bearing, rifle shooting, pistol shooting, drill, sports and track events.

C. W. Barrett of Washington, D. C., national president of the Farmers' Union, has called a meeting for Kansas City, to be held April 16 to 18. Besides the national officials, there will be in attendance state presidents and managers of co-operative institutions from many states. Various matters pertaining to the union and the co-operative movement will be discussed.

A new high price for memberships in the Kansas City Board of Trade since 1922 was made Saturday with the purchase of the membership of Eugene J. Gissler, deceased, by Erwin R. Jensen for \$10,000. This is the net price, as there is no transfer fee on a membership held in a dead man's name. Mr. Jensen is with the Uhlman Grain Co. Mr. Gissler was secretary of Moffitt-Napier Grain Co., St. Louis.

J. F. Jarrell of Topeka, Kan., manager of the agricultural department of the Atchison, Topeka & Santa Fe Railroad, issued a report this week in which he estimated the acreage of winter wheat to be harvested in Kansas at 7,875,000 acres, or 1,850,000 less than was cut last year. Mr. Jarrell figured the yield at 102,375,000 bus., against 153,000,000 in 1924. Mr. Jarrell's estimate is considered liberal, even in the face of additional rains this week. The popular idea is that 25 or 30 per cent will be found to have been plowed up when the May official report shall have been published.

Must Know the Farmers.

Sixty members of chambers of commerce, representing eight states, attended an agricultural conference in the Hotel Muehlebach Thursday and Friday. All went home with the idea that a better acquaintance with the farmer is one of the business man's big needs. The meeting was called by the Chamber of Commerce of the United States on a suggestion from George W. Catts, commissioner of agriculture for the Kansas City Chamber of Commerce. William Dean Harper, chief of the national organization's agricultural department, said the conference had developed some new angles on co-operation between the chamber of the farmers. C. W. Lonsdale of the Kansas City Board of Trade, who is a director of the national chamber,

Cash Grain Markets.

Wheat.—Receipts for the week, 99 cars, against 171 a week ago and 179 a year ago. Floor offerings were even lighter than the arrivals, as many cars came in on contracts from St. Joseph and Omaha. Prices advanced faster than the rise in futures. Local and outside millers paid the highest premiums on the crop for protein samples of hard and dark. Liberal quantities of wheat were sold out of store and there were large withdrawals to fill old contracts for domestic and export accounts. Not over 2,000,000 bus. of the wheat remaining in elevators is unsold and this residue is mainly milling grain. Prices of hard and dark scored an advance of 22@23c per bushel, closing as follows: No. 1, \$1.58@1.80; No. 2, \$1.57@1.80; No. 3, \$1.56@1.79; No. 4, \$1.55@1.78. Practically no fresh

cars of soft wheat appeared and the offerings were mainly from store. There was a good milling inquiry. The market was finally quoted 18@20c higher, with No. 1 at \$1.77@1.85, No. 2 at \$1.77@1.85, No. 3 at \$1.72@1.82 and No. 4 at \$1.68@1.79. A slight increase in the country movement of all kinds of wheat is expected in response to the advance in prices. Farmers are busy with their spring work and nothing but a financial bait would induce them to ship. The wheat to come is mainly in country elevators, some of it having been bought before the recent big decline in prices. Stocks in Kansas City decreased 617,000 bus. for the week, to 5,188,000, against 9,953,000 a year ago.

Corn.—Receipts, 127 cars, against 195 a week ago and 268 a year ago. Demand was very active for yellow and high colored mixed, while white was in fair request. Shipping orders came from local feeders,

the South and Southeast, Iowa and Chicago. Texas took a few lots. Prices advanced radically from the low point reached a week ago. At the close the market was 14@19c higher, with No. 2 white at \$1.05@1.10, No. 3 at \$1@1.04, No. 2 mixed at \$1.01@1.05, No. 3 at 99c@1.03½, No. 2 yellow at \$1.09@1.12½ and No. 3 at \$1.05@1.09. Stocks fell 684,000 bus., to 6,026,000, against 1,479,000 a year ago.

Oats.—Receipts, 53 cars, against 38 a week ago and 71 a year ago. The market responded to strength in corn. There was an urgent demand for the few cars that had not been contracted for previous to arrival. White oats closed 3½@5c higher, with No. 2 at 48½@50c and No. 3 at 47½@48½c. Red oats were taken for both feeding and seeding purposes. They rose 3@

3½c. No. 2 closed at 48½c and No. 3 at 47c. Shipments, principally southward, reduced the local stocks 192,000 bus. to 1,101,000, against 492,000 a year ago.

Kafir and Milo.—Receipts, 53 cars, against 65 a week ago and 45 a year ago. Affected by the rise in corn prices, eastern manufacturers ordered more freely and prices promptly turned up. Country offerings were very light. Kafir advanced 27@30c per cwt. and milo gained 30@35c. Closing quotations were: No. 2 white kafir, \$1.80; No. 3, \$1.77@1.80; No. 4, \$1.72@1.75; No. 2 milo, \$2.10@2.12; No. 3, \$2.08@2.10; No. 4, \$2.05@2.08. Elevator stocks decreased 25,000 bus. to 332,000, against 441,000 last year.

tory, is on a combined business and pleasure trip in the west.

The grain inspection bureau of the Boston Chamber of Commerce, which for many years has been carried on by that organization, is now conducted as a department of the Boston Grain and Flour Exchange. Joseph G. Green, Jr., will continue as inspector.

PEORIA, ILL.

L. L. Eckard, Correspondent.

The winter wheat in this section showed slight improvement from the light showers of last week and is still in need of moisture.

G. C. McFadden, president of G. C. McFadden Grain Co., who has been in Florida for several weeks, returned Friday and was greeted by his many friends and associates.

Oats receipts were 4 cars and values were quoted at 1@1½c higher, with No. 3 white selling at 45c. The southern markets have taken the greater amount of oats from this territory and the demand in that direction still appears good, which accounts for the light receipts here.

Louis Mueller, president of the Mueller Grain Co., was elected mayor of the city of Peoria last Tuesday by the largest majority ever given a candidate for that office in a number of years. Mr. Mueller has been credited with making one of the cleanest campaigns ever made in the city and was rewarded by a majority of 9,343 votes over his democratic opponent. He will take charge of the city affairs May 1.

The recent advance in corn prices has failed to excite the farmer from all reports and a very small amount of corn was offered to arrive at this market during the past week and consignments as well as very light. Receipts for Saturday were 35 cars and local consumers and outside elevators took all offerings at prices 3@6c higher. There was a very good demand.

No. 3 yellow, \$1.11; No. 5 yellow, \$1.01; No. 6 yellow, 98c; No. 5 mixed, \$1; No. 6 mixed, 98c.

Grain receipts and shipments at Peoria for week ending Saturday, April 11th, as compared with same week last year, as reported by the secretary of the Peoria Board of Trade, as follows:

	Receipts—	1925.	1924.
Wheat	6,000	7,900	
Corn	179,050	290,050	
Oats	113,400	273,200	
Barley	12,600	9,800	

	Shipments—	1925.	1924.
Wheat	2,400	8,400	
Corn	162,550	159,750	
Oats	217,800	292,050	
Barley	5,600	4,200	
		388,350	464,400

Receipts of hogs at the local yards were quoted 10@15c lower than Friday's best time. A top of \$13.15 was paid for the best medium weight butchers, with the bulk of 180 to 250 pound averages at \$13@13.15. Packers, \$11.25@11.50. Trading was fairly good, with receipts of 1,000 head.

Cattle prices as well as calves remained steady, with best weaners selling at \$11.50.

CHICAGO.

E. P. Peck of the Omaha Elevator Co. was a recent Chicago visitor.

The first boat through the locks at Saulte Ste. Marie was on Sunday, April 12.

H. R. Strauss of the Beatley company has been taking a short vacation at French Lick Springs.

A. L. and A. H. Gilster of the Gilster Milling Co. of Chester, Ill., were recent visitors with the trade in this city.

L. Eisemann of Eisemann & Co., Inc., exporter of flour and feed, New Orleans, has bought a membership on the Board of Trade.

R. H. Bunch was a visitor on the floor of the Kansas City Board of Trade last week, also F. M. Van Horn and J. A. White.

Arthur A. Clement of Clement, Curtis & Co. has returned to Chicago from a visit to South America, including a trip around Cape Horn.

Everett E. Roquemore, advertising manager of Arcady Farms Milling Co., has left that concern and joined the staff of J. J. Badenoeh Co.

Included in the names posted for transfer of membership are Arthur S. Dumont, Detroit, and Harold A. Abbott and Frank B. Gallagher of Chicago.

Chester Chapin of Chapin & Co., the largest feed manufacturers, was quoted last week relative to their particularly good early April business.

Among prominent visitors on the Chicago floor this week were Percy Ginder of the Barnes-Ames Co., Duluth, and Ralph Dineo, a large Wyoming mill operator, just back from Europe.

Trade Opinion.

After reaching the low price of 91½c for May on April 4th, corn prices have been moving upward almost as fast as they had declined in March. Much of the buying was short covering. Interest in the deferred deliveries, July and September, is increasing.

Oats arrivals were larger, a liberal proportion direct shipments to cereal indus-

tries, mainly heavy and good quality from the Northwest. Current spot prices, i. e., premiums over the active deliveries, are especially attractive and keeping in mind recent declines should encourage consigning. Stocks are still abundant everywhere. —Pope & Eckhardt Co.

Oats prices advanced moderately the past week, partly in sympathy with the trend of corn and wheat. The ample visible supply is a load over May delivery, but with its rapid decrease, small primary receipts and heavy country feeding, there is more interest in the deferred deliveries. September is selling at 2@2 1/4c over May, whereas a month ago they sold at about the same price.—Clement, Curtis & Co.

The action of wheat has, of course, been the prime motive in coarse grains, but corn has received further help from a strong cash market, better grades of current receipts being 1@2c relatively better than the futures. Within a short time navigation will be open and the present warehouse accumulation will begin to decrease. There is no probability of replenishing these supplies during the summer.—Thomson & McKinnon.

A continuation of renewed interest was present in the corn market. Commission houses were on both sides of the market, but offerings on the whole were rather light. As the Government report indicated a rye crop about equal to last year's figures, we would buy rye only on extreme declines and do not look for much of an enhancement in prices unless export business is present or the wheat market continues strong.—J. J. Badenoch Co.

The fact that indications point to a very possible decided reduction in this year's winter wheat crop compared with last year's figures may be influential in awakening interest in cash wheat by the foreigners. Until this interest becomes more apparent we would not care to follow advances such as we have had and believe July wheat around \$1.50 is in debatable ground; it should be kept in mind that a 20c a bushel advance has occurred in the new crop futures in the last week.

Wheat is up 9 1/4c for May, 8 1/4@8 3/4c for July and 6c for Sept. The bullish showing in the Government figures for April 1st was no doubt the important influence at Liverpool, and that helped to establish the very much higher opening here; the active buying continued during the session; closing prices were a fraction under the top. Conservative investors and speculators will hesitate to follow on further advances. Some improvement in growing conditions conceded, after the official tabulation was made.

The Liverpool wheat market has gained most of its strength from U. S. report on condition of growing crop, but also helped by a government estimate of the crop of India showing a total yield of 40 million less than last year and 60 million less than the year before. Crop advances mention improvement by the recent rains, but all of them state that further frequent rains will be necessary. Despite the considerable recovery from the low prices a week ago, there is nothing discoverable to suggest any weakness; in fact, the outlook is for firmness.

Wheat prices had an upward trend during the past week, under the influence of better demand for cash grain, unfavorable crop reports and a more confident sentiment in speculative circles. Primary receipts are light, shipments relatively larger and although export movement is not large, the visible supply is diminishing rapidly, being now smaller than a year ago. The recently large quantity of wheat on ocean passage which has acted as a check on export movement from this country is decreasing rapidly, the shipments from the southern hemisphere having fallen off materially.

Short covering and new buying power carried the market upward and although there were a number of recessions the wheat passed to strong hands and reacted easily. Liverpool closed 7 1/4@7 3/4d higher. The bullish U. S. Government report and an official Indian report, showing their crop 40 million bus. less than last year, caused their advance. There was a good deal of local talk about crop improvement since the Government figures were gathered, based on the recent rains. A private report by our Mr. Snow and corroborated from numerous outside sources, indicated that rains had not been general and that conditions in some sections were decidedly critical. Domestic cash demand continued for all the wheat in sight and premiums were again strong. Sentiment here has undergone a complete reversal

and the strong underlying conditions at home and abroad are again attracting general attention.—Bartlett-Frazier Co.

No doubt the government report on the condition of winter wheat on April 1 is extremely bullish and the situation is made even stronger by the fact that this crop forecast is based on the assumption of average abandonment, whereas, private reports have suggested that more than the usual acreage is past redemption. Yet, ample rains could repair a good deal of the damage, and in fact good rains have occurred since the government returns were compiled, more are predicted and the rest of April may be showery as usual. Furthermore, conditions thus far have been highly favorable for seeding a large spring wheat acreage in this country and Canadian and European prospects suggest larger crops than last year. As to the export situation, financial difficulties in the European grain trade have been greatly exaggerated, the large arrivals at British and Continental ports have been absorbed without further difficulty and Liverpool prices have kept at a sufficient premium to permit sales of Manitoba wheat. The peak of shipments from the southern hemisphere and the stocks on ocean passage have been passed. Altogether the market surroundings are rather constructive and still higher levels may be seen in the May future where a tight cash situation may easily develop.—Charles Sincere & Co.

BALTIMORE
Robert C. Neu, Correspondent.

The Bay State Milling Co., Winona, Minn., has decided to close its Baltimore branch, and J. N. McCosh, who has been in charge of this agency, will be sent to other fields.

The receipts of water-borne corn in the Baltimore market so far this season amount to 62,000 bushels, compared with 225,000 bushels arrived up to the corresponding time last year.

President A. W. Mears, of the Baltimore Chamber of Commerce, is now a grandfather, a fine baby girl having been born on the morning of April 8 to Mr. and Mrs. C. Emmerich Mears, the former his only son.

The Glade Valley Milling Co. of Walkersville, Md., is reported to have recently purchased at a cost of \$36,000 the milling plant of the Farmers' Milling & Grain Co., of Mount Airy, Md., formerly operated by Kline Bros.

At the annual auction sale for the choice of grain sample tables on the floor of the Baltimore Chamber of Commerce, April 6, the first choice was won by Messrs. E. Steen & Bro., grain merchants, who paid the highest price of the day.

Assistant Flour Inspector Lankford, of the Baltimore Chamber of Commerce, has been forced by the condition of his health to temporarily relinquish his duties and may later on go to a mountain resort for rest and recuperation of strength.

At present writing there are seven ocean liners loading grain at the export elevators at this port, most of them to take out full cargoes. In consequence of these heavy withdrawals for foreign shipment, stocks of rye at this port are expected to be sharply reduced in the very near future.

As part of the entertainment program for the annual convention in this city in June of the National Federated Flour Clubs, a water trip to Annapolis and the United States Naval Academy on the steamer "Dreamland" has been arranged by the local committee in charge of the general arrangements for this gathering.

With the removal on April 4 by the Pennsylvania Railroad Company of the grain embargo against export shipments to Baltimore over its lines, all roads to Baltimore are now open and a more normal flow of grain to this market is now anticipated. Stocks are expected to work down sharply

CAIRO, ILL.
Grain Dealers

in consequence of heavy shipments of rye scheduled to be made to Russia in the next few weeks.

The following members of the Baltimore Chamber of Commerce who have been on the sick list for several weeks past are reported to be steadily "rounding to": H. Frank Melier of Hayward & Co., grain, flour and feed brokers; J. Nathaniel McCosh, representative of the Bay State Milling Co., of Winona, Minn.; Thomas Johnston, head of Thos. Johnston & Co., grain receivers.

DES MOINES, IOWA.

J. H. Owens, Correspondent.

Frank Hall, of F. H. Hall & Co., is sporting a new Maxwell sedan these days.

Elaborate plans are being made for the Western Grain Dealers' convention which comes to Des Moines April 21 and 22. A good attendance is expected for this meeting.

Harry Wickham, of Beach-Wickham Grain Co., Chicago, spent last Friday in Des Moines.

The oat seeding in this territory is finished. The oats were put in under most favorable conditions and are about a week earlier than usual. Plowing for corn is rapidly nearing completion and the soil is in excellent condition. While some worry was felt over our deficiency in moisture, we had a good soaking rain last Wednesday which answered fully the hopes of the farmers.

TOLEDO.

D. M. Bender, Correspondent.

Receipts of grain for this market last week were 13 cars of wheat, 18 cars of corn, 26 cars of oats, 1 car of rye and 1 car of barley. Total, 59 cars.

Flour production as reported by local mills for the past week was 24,500 bbls., equal to 51 per cent of capacity. The week before it was 27,600 bbls. and a year ago last week was 33,900 bbls.

Many local millers are planning on attending the Millers' National Federation meeting to be held at the Edgewater Beach Hotel on April 16th-17th. The Indiana Millers' Association have postponed their meeting until the last week in May.

Golfers of the exchange are getting their clubs polished and balls painted ready to swat the pill and those that can't will remain at the nineteenth hole. Some stirring matches among the never-counts and the neber-hits are expected during the summer months.

A message from Leipsic, Ohio, last week said: "After a trip through central and western counties reports show a large share of the wheat acreage already abandoned and do not think the state will raise half as much as last year. It has been the driest spring in years but promises a large corn and oats acreage."

Statistician C. J. West of the State Federal Crop Reporting Bureau called the attention of farmers, grain men and other business men this week to the fact that high grain prices do not necessarily mean prosperity for the farmer. He may feed his grain almost entirely to livestock or on a dairy farm and realize much more than he would if he sold it on the open market. He believes the Ohio farmer will get as much for his products this year as he did last season.

It appears to Toledo grain men as if the market has hit the low mark and is now on its way to the top again. Soft wheat premiums have advanced again this week and are showing great strength. Receipts continue very light but may increase if the market holds its advance. Milling demand has been fair while flour sales are very poor. Farmers are all busy with spring work and oats are nearly all seeded. Heavy oats are still bringing good prices here. Corn is being bought by local buyers at very good prices.

The Canadian provinces report less fallow land this year than for any season since 1921. Such early spring reports are not necessarily indicative of an increased tonnage of wheat at the harvest season but they are significant in figuring possible wheat prospects. Our readers will recall reference here to a similar reduced acreage of fallow land in the United States this year due to extremely low prices secured for hay, and the presumption that an increased grain acreage would follow.

The grain marketing activities of the Illinois Agricultural association are to be under the direction of a full-time expert, Chester C. Davis, retiring commissioner of the Montana state department of agriculture at Helena. In this position he will have charge of the movement in Illinois toward the reorganization of the farmers' grain merchandizing system.

COTTON NEWS

March Exports.

Secretary Hester of the New Orleans Cotton Exchange announces that United States cotton exports to foreign countries, exclusive of Canada, totaled 763,910 bales during March.

Addresses Cotton Assn.

J. H. Ardrey, Vice President National Bank of Commerce, New York, in a speech to the Texas Cotton Association at Austin, Tex., on April 4, says in part as follows:

"Slowly but surely the cotton textile industry is being established throughout the world. The rise of cotton manufactures in Brazil until the country is self-sufficient as to all except special kinds of goods is a matter of twenty years' growth. The cotton textile industry of Japan, which is offering severe competition to the yarns and piece goods of Great Britain and other countries in the Far East, is a development of less than twenty-five years. In India, China, Argentina and indeed in every country the cotton mill industry is getting a footing. Whereas, once the movement of United States cotton was practically all toward Europe, Japan is now a heavy buyer. China takes some, and small amounts go to many other countries. Development of the cotton textile industry in Italy, and its stimulation in the new countries of Europe such as Czecho-Slovakia and Poland is steadily complicating the export business. Cotton now goes in every direction.

"In the twenty years, 1901 to 1920, the cotton crop of the United States averaged 63 per cent of the estimated world crop. We reached this position of dominance as a result of three main factors, namely, a suitable climate, new land fitted for cotton growing, and cheap labor, but recent years have witnessed a great change. Year by year since the beginning of the nineteenth century virgin soil has been planted to cotton until there are no more large areas of land suitable for it. Reduced fertility has lowered the yield and rendered necessary increasing use of expensive commercial fertilizers, thus tending greatly to raise the cost of production. Also, it is futile to close our eyes to the fact that the remarkable development of the cotton growing industry of the United States has been based on a low standard of living. However, the standard of living of the negroes, on the basis of whose labor the industry was founded, has risen. The remarkable industrial development taking place in the South itself is draining much white as well as negro labor from the cotton fields to the towns and cities. The result is a scarcity of cheap labor for cotton growing and a rapid advance in labor costs.

"Another element of uncertainty in the American crop, creating higher production costs which are felt perhaps most sharply of all because of the comparative suddenness of the onset, and because involving questions of soil fertility and labor costs, has been the invasion of the boll weevil. The average cotton crop of the six states of Alabama, Florida, Georgia, Mississippi, Louisiana and South Carolina for the four years 1921 to 1924 was only 3,500,000 bales, compared with an average for the five years 1916 to 1920 of 5,200,000 bales and for the fifteen years ending with 1915 of 6,200,000 bales. Part of the reduction is due to reduction in acreage, but that in turn is in part due to discouragement because of weevil infestation.

"The inevitable result is growing competition between American cotton and cotton grown in other parts of the world. The changing position of the United States is made clearly evident by its comparative position as an exporter. Five countries, the United States, British India, Egypt, Peru and Brazil, exported an average of 12,415,000 bales of cotton during the five years ending with June 1910 to 1914 and exports from the United States were 69 per cent of the total. Exports

from the same five countries averaged 9,951,000 bales during the three-year period ending with June 30, 1924, and the share of the United States amounted to only 56 per cent of the whole."

INSPECTIONS AT FT. WORTH.

Below is given comparative statement of inspections: First, this month, last month and March, 1924. Second, this year and last year. Third, total inspections each year back to 1908, as compiled by V. L. Nigh, Chief Inspector Ft. Worth Grain and Cotton Exchange:

April 11.....	31	4	1	26	12
Total	98	18	49	123	63

BARLEY MARKETS.

MILWAUKEE.—The barley market was strong throughout the past week with a good demand from maltsters and other buyers. Receipts were light with shippers and local industries eager to make purchases. For the week prices closed 5@6c higher and receipts were 63 cars as compared with 65 the previous week and 102 during the same week of last year. Choice to fancy, 48 to 50 lb. test, quotable at 95@96c; fair to good, 44 to 47 lb. test, 84@94c; light weight, 40 to 43 lb. test, 78@90c; feed, 70@85c. Iowa quoted 80@96c, as to quality; Wisconsin, 80@96c; Minnesota, 80@96c; Dakota, 80@95c; feed and rejected, 70@85c.

DULUTH.—Limited offerings and dullness were the outstanding features in the barley market here during the last week. Medium and choice lots of that grain were the only ones that were salable. Receipts were 12 cars. Closing prices are unchanged to 1c off from 64 to 80c.

MINNEAPOLIS.—There was a marked improvement in the Minneapolis cash barley market right through the week, coincident with the sensational advance in the futures. There was a good demand for most grades; malting quality coming in for fair request and the feeding quality as well. Today's stocks show a total of 2,031,920 bushels vs. 2,182,702 bushels a week ago and 402,232 bushels a year ago. Today's sales ranged from 71 to 87c.

NEW YORK.—Business in rye for export was not very active. Outside of some moderate sales early in the week, the general demand appeared dull. Total business in rye for the week amounted to about ¼ million bushels in all positions.

FT. WORTH, TEX.—Barley receipts have been very slow recently and demand has been fair with prices holding firm and steady tone. Basic group, today's values, No. 3 barley, 86c; No. 4 barley, 85c; 40-lb. sample, 84c; 38-lb. sample, 83c.

KANSAS CITY.—Fresh offerings of barley this week were 3 cars. While the demand was limited, prices moved up with other grains and closed 4@9c higher, with No. 3 at 82@85c and No. 4 at 82@83c per bushel. Stocks were unchanged, at 10,000 bus., as compared with 441,000 a year ago.

CHICAGO.—Market steady to firm in light, quiet trade. Good demand here, but not much arriving, which enables receivers to get favorable offers on anything good. Fair trade in barley at 83½@88c and screenings at 41@67c, according to sample. Exports 25,000 bus. and for the week 900,000 bus., against 123,000 bus. last year. Visible decreased 268,000 bus.; last year decreased 140,000 bus.; totals, 3,498,000 bus.; last year, 1,162,000 bus. Local stocks increased 17,000 bus.; total, 247,000 bus.; last year, 190,000 bus. Malting, 80@95c; feeding

and mixing, 70@85c; screenings, 41@65c. Local inspection, 12 cars.

RYE MARKETS

CHICAGO RYE FUTURES.

Following is the range of future prices for rye for the week ending April 11:

Apr.	May.	July.	Sept.
6 1.11	@1.15	1.04½@1.08	.96 @1.00
7 1.13½	@1.16	1.07½@1.09½	.98½@1.00½
8 1.14½	@1.18	1.08½@1.10½	.99 @1.01½
9 1.12½	@1.15½	1.06 @1.09½	.98 @1.01
10			
11 1.17½	@1.20½	1.11 @1.14	1.02½@1.04½

Receipts of rye at Chicago for the week of Apr. 11, 1925, were 23,000 bus. vs. 19,000 bus. same week of 1924; shipments were 37,000 bus. vs. 8,000 bus. same week of 1924.

RYE SPOT QUOTATIONS.

Closing outside prices for rye of No. 2 quality cash for the week ending Apr. 11, were:

	Mpls.	Dul.	Chi.	Win.	Mil.
Apr. 6..	1.08½	\$1.08½	1.12½	1.13½	\$1.11
Apr. 7..	1.10½	1.10½	1.14	1.14½	1.12

April 11.....	7	26		2	2
Total	28	86	13	25	9

RYE MARKETS.

MILWAUKEE.—Receipts of rye the past week improved considerably over the previous week. Prices were strong throughout the period with shippers in the market and eager to buy. Considerable Wisconsin sold on a forward shipping basis, but on arrival sales were slower. Offerings were mostly off-grade with high moisture content and resulting settlements were made accordingly. The market closed 7@8c higher for the week. Receipts were nine cars as compared with three the previous week and one in the same week of 1924. Market closed at \$1.16½@1.17½ for No. 2, inside for Wisconsin, ranging at 2@3c under May price.

DULUTH.—Rye receipts were light on this market up till Saturday during the last week and with supplies held in the East being cleaned up as a result of export trade, dealers felt more hopeful regarding the outlook for prices either being stabilized or advanced moderately. Closing prices of No. 1 rye are 4½c up at \$1.14½.

MINNEAPOLIS.—There was no particular feature to the local rye market during the past week. Road offerings were practically nil each day and the mills seemed willing to pay right up for what they could get. Local stocks are light as compared with those of the same time last year. Today's figures showed 973,682 bushels vs. 966,648 bushels a week ago and 7,885,378 bushels a year ago. Today's range of sales: No. 2 rye, 2@3c over Minneapolis May price.

CHICAGO.—Closed with losses of 3½@3¾c for futures and 3¼c on car lots. Trade was only fair and market less active. A weaker feeling prevailed as a result of heavy selling that was influenced by the weakness in wheat. Demand was light and very little speculative interest manifested. Seaboard reported export demand quiet and estimated about 65,000 bus. worked. Local sales to shippers were 7,500 bus. Visible supply increased 188,000 bus. and total is 20,066,000 bus.; year ago, 21,503,000 bus. Local stocks decreased 29,000 bus. to 2,233,000 bus. Exports for the past week were 1,925,000 bus., as against 532,000 bus. last year. Seaboard clearances, 418,000 bus. Car lots were in fair demand at May price for No. 2. Offerings light. Local inspection 1 car. No. 2 sold at \$1.16½.

BEANS AND POTATOES.

Quotations follow for bids of good quality condition beans and potatoes sacked, per cwt., unless otherwise specified, as of week of Apr. 11:

Beans—

Chicago — Selling fairly well at steady prices. Per 100 lbs.—Spot navy beans, Mich., fancy, \$6.25; red kidney, fair stock, \$10; large, dark, extra quality, \$10.50.

St. Louis — Quote choice hand picked Michigan white beans at \$6.75 and prime machine picked at \$6.50 per 100 lbs. Scotch peas, 7¼c; green split peas, 9c, and yellow, 7c per lb. Lima beans (choice car lots), \$2.82 per brl. Boston—Car lots, per 100 lbs., N. Y. and Mich.—Choice hand picked pea beans, \$6.50@6.75; fair to good, \$6.25; California small white, \$8.35@8.50; yellow eye, extra, \$6.50@6.75; red kidneys, choice, \$10.25@10.50; fair to good, \$9@9.50; California small, \$14.50; native green peas, \$7@7.50; Canada, \$5.25@5.50; split, \$4.40@5.75. Jobbing prices, 25 to 50c above car lots.

San Francisco—Whites, small, 8¼c; do, large, 7c; pinks, 9c; limas, 15c; cranberry, 8c; kidney, 12c; Mexican garbanzas, 11½c; lentils, large, 9c; do, small, 8c; black eye, 11c; Mexican reds, \$8.85 per cwt.; speckled bayos, 8¼c; bayos, 8c. Peas (per lb.)—Split peas, yellow, 7½c; green peas, 8¼c. Stocks of beans at San Francisco Call Board April 1 were 79,734 sacks, compared with 66,371 sacks March 1 and 83,611 sacks April 1, 1924.

New York—General market continued to rule easy with trade slow, though California limas were in good position and ruled firm at mostly \$14.75, a few up to \$15. Other varieties showed no change. Domestic—Marrow, \$9.50@9.75; pea, choice, hand picked, \$6.25@6.35; pea, screened and prime, \$5.75@6; red kidney, \$10; white kidney, \$9; lima, Cal., \$14.75@15. Imported—Marrow, \$8.75@9; white kidney, \$8.25@8.50. Lima, med.—1924-25, \$12.50; 1923-24, \$11.50@12; 1922-23, \$9@9.50. Lima, Europe—Large, \$11.75; medium, \$11.25; small, \$10.50.

Potatoes—

Chicago—The market was unchanged for whites and 10@15c higher on Ohios. There was a fair trade for a week-end, although most of the demand was to fill urgent orders. The receipts were 47 cars and consisted mostly of the ordinary grades. Fancy quality was rather scarce. Red River offerings were light and with a fairly good demand prices advanced sharply. Held-over and poor quality was moved fairly well and cars on track decreased to 145. Sales reported today were: Per 100 lbs.—Round white, Wisconsin, bulk, 1 car poor at 85c, 1 car at 90c, 1 car at \$1; sacks, 1 car at 85c, 7 cars at 90c, 3 cars at 95c, 1 car at \$1, 4 cars at \$1.05, 1 car fancy at \$1.10; Minnesota, 1 car at 85c; Ohios, Red Rivers, 1 car at \$1.10, 1 car at \$1.15, 1 car at \$1.20. Bulk, per 100 lbs., Wis., dustys, \$1@1.15; ordinary and poor, 80@95c; round white, sacks, Wisconsin, \$1@1.10; ordinary and poor, 85@95c; Idaho russets, \$2.25@2.50; Ohios, Red Rivers, \$1@1.20. New Potatoes—Are increasing; demand is fair. Barrels, Florida, Spaulding Rose, \$8@8.50; No. 2, \$6@6.50; No. 3, \$4.25@4.50; boxes, \$2.35@2.50; No. 2, \$1.90@2; Bliss triumphs, boxes or hampers, \$3; old, boxes, Idaho, repacked, \$2.25@2.50. Sweet Potatoes—Arrivals moderate; light demand noted. Bushels, Illinois, Jerseys, \$2.50@2.75; Illinois, Nancy Halls, \$2@2.25; hampers, Tenn., Nancy Halls, \$3; Illinois, \$2.25@2.50; Jerseys, eastern, kiln dried, \$3; ordinary, \$2.25; Illinois, Jersey, large hampers, \$2.50@2.75.

New York—Receipts yesterday included at Pennsylvania R. R. pier 29, 2 cars Florida new potatoes, 1 part car Virginia barrel potatoes, 1 car Delaware basket sweet potatoes, Florida potatoes sold as quoted; Bermudas demoralized. Old sack potatoes easier; basket sweets sold in ranges given. Fla., bbl.—No. 1, \$8@8.25; No. 2, \$5@5.50; Bermuda, bbl.—No. 1, \$8@9; No. 2, \$4.50@5.50; No. 3, \$2@3; Cuba, crt., \$3@3.25. Old Potatoes: Me., bulk—180 lbs., \$2.10@2.75; carlots, cwt., \$1.05@1.20; 165 lb. sk., \$2.15@2.40; 150 lb. sk., \$1.85@2.25. State, bulk—180 lb. sk., \$2@2.25; 165 lb. sk., \$1.85@2.10; 150 lb. sk., \$1.65@1.90. L. I., bulk—180 lbs., \$3.25@3.60; 165 lbs., \$3.20@3.40; 150 lb. sk., \$2.75@3.25; 3 bu. sk., \$2.50@2.75; Jy., bsk., \$1@1.50. Sweet Potatoes—Jy., bsk., \$1.50@3.50; Del. and Md., bskt., \$1.25@2.65. Yams—Del., bsk., \$1.75@2; Jy., bsk., \$1.75.

BEAN SITUATION PERPLEXING.

ST. JOHNS, MICH.—With reference to beans we find the situation rather perplexing, the deliveries are exceptionally

light and have been for the last six weeks.

The growers evidently are not interested in prices less than \$6.00 and as they are fully aware of the small stocks in other states it is our belief that they will not sell until late in the summer unless prices advance materially from present prices.

Wholesale grocers and canners who are inclined to withhold buying possibly thinking they can depress the market further or growers will get tired holding must not lose sight of the fact that higher prices early in the season on both grain and stock created a surplus for the growers enabling them to hold off the market any stocks which they may own.

We have been unable to get any answer to our question, "why are all other white beans so much cheaper than Michigan?" From recent controversy in the state it might seem that some interests were against higher bean prices. If you are able to learn from your many correspondents a reasonable answer to the above question we shall indeed be pleased to hear from you.—Geo. F. Dimond & Co.

BEAN MARKET QUIET.

DENVER, COLO.—The bean market the past ten days has been almost dead; possibly on account of the decline in flour, sugar and other commodities.

The last few days there has been a little improvement. The supplies from this territory seem practically all moved from the farmers, but what is on hand is practically all held by the dealers, none of whom seem to be overly-anxious to sell.

It is estimated that we have about 60 per cent of the beans on hand this year that were here at this time last season.

The acreage of the coming crop will be very large. The weather at this time is exceedingly dry, and hard on crops. The ploughing is impossible in many localities on account of the dry condition of the soil.

This may not affect the bean crop, as that is not planted for from thirty to forty-five days from now. At that time we may have more moisture. The reservoir supply of irrigating water is exceedingly low—lower than it has been in many years. The snow on the mountains is less also than for several years, so our crops this season depend almost entirely on rains.—Ady & Crowe Mercantile Company, April 10.

DEMAND LIGHT.

GREELEY, COLO.—The demand for beans is light, but, at the same time, around 100 cars per month have been moving during February and March. This is gradually cleaning up the light supply and we estimate hardly over 300 cars left in Colorado and New Mexico.

It is our feeling that before the season is over a shortage of pintos and Great Northerns will be experienced. The outlook for new crop planting in June is not favorable. Colorado and New Mexico have very little snow in the mountains, and the rivers are not as full as a year ago at this time. We will have to have an abnormal amount of moisture during the next two months to enable us to plant last year's acreage.—The Farr Produce Company, G. G. Willson, Apr. 9.

BUCKWHEAT MARKETS.

CHICAGO—Fancy Jap. mixed and silver hulled buckwheat quotably at \$1.80@1.85. Dirty seed less.

ST. LOUIS—Quoted nominally at \$2.20 per 100 lbs.

MINNEAPOLIS—Japanese, spot, \$1.85@1.90; silver hull, spot, \$1.70@1.75; mixed, spot, \$1.70@1.75.

BUFFALO—Jan., per 100 lbs., \$2.20; silver hull, do, \$2.10.

MILWAUKEE.—Buckwheat quotations were unchanged in the Milwaukee market throughout the past week. Prices, per 100 lbs., now are: Silver hull, \$2.10@2.15; Japanese, \$2.20@2.25.

News of the Country Grain Trade

ARKANSAS.

Harrell, Ark.—Floyd Jones has purchased the feed store of A. J. Raybon.

Leachville, Ark.—W. W. Rogers has discontinued his feed business and turned the lease on the building over to the Blaylock Seed Co.

CALIFORNIA.

Woodland, Cal.—Emil Niclas has sold half of his interests in the Yolo Grain Rolling Mill property, and will move to Oakland.

San Francisco, Cal.—If the proposed action of the San Francisco Grain Exchange becomes a fast rule, other than California barley cannot be delivered on contract here. The Portland Merchants Exchange is against the move, claiming that Oregon, Washington and Idaho barley compares favorably with that raised in California.

Oakland-Alameda, Cal.—The government will spend some \$884,000 for the dredging of the inner harbor which will permit ocean-going vessels to enter, the dredging to be extended past the elevators of the Western Mlg. Co. So as not to hinder the movement of ocean crafts by the present bridge that spans the harbor and joins the two cities mentioned, a tube will connect them.

Los Angeles, Cal.—J. I. Huffne Grain Co. of Kansas City, announce the construction of a 50,000 bushel grain elevator here. The new building will include a fully equipped grain elevator and warehouse, with complete facilities for the storing and grinding of grains. They will specialize in carload lots of grains and in poultry feeds, cattle feeds and other ground grain products. The directors of the Huffne Grain Co. are: J. I. Huffne of Long Beach, Benjamin M. Huffne of Kansas City, J. Earl Huffne and Everett A. Huffne of Los Angeles.

CANADA.

Toronto, Ont.—The Diadem Flour Co. suffered a \$5,000 loss from the recent Don River Flood.

Streetsville, Ont.—On April 30, the Toronto Mlg. Co. Ltd. property will be sold under mortgage.

Montreal, Que.—The Montreal Mlg. & Grain Co. Ltd. has been incorporated with a capital of \$20,000.

Collingwood, Ont.—The capacity of the E. R. Bacon elevator is to be doubled and improvements made throughout.

Vancouver, B. C.—Frank L. Davies, prominent in local grain circles and export manager for Vernon & Buckerfield for the past four years, has resigned and has left, with Mrs. Davies, for a month's pleasure trip in California.

Vancouver, B. C.—The McMillan Grain Co. Ltd. an established Winnipeg firm, has opened a branch office here to handle shipments from its several prairie branches and independent farmer shippers. It will also offer an up-to-the-minute grain future service in Winnipeg and Chicago markets.

COLORADO.

Limon, Colo.—The Robinson Grain Co. suffered a small loss from fire.

Denver, Colo.—Many of the coöperative organizations in this state are starting a movement to repeal the coöperative marketing act because of the disappointing losses to the growers.

Ft. Collins, Colo.—Wilson, Cranmer & Co. are remodeling their brokerage

offices and installing a complete new stock grain and provision board; also installing cashier cage and private offices.

Lamar, Colo.—C. S. Gulp & Son of Salt Lake City has let a contract for the erection of a small mill and elevator to store the feeds used on the Nowels Ranch, which they have purchased.

DELAWARE.

Mt. Pleasant, Del.—Crothers Bros. have bought a portable Boss Air Blast Car Loader.

Middletown, Del.—S. B. Foard & Son have bought a Fordson type Boss Air Blast Portable Car Loader.

ILLINOIS.

Ellwood, Ill.—David Beattie & Son have installed a 6 bushel automatic scale.

West Frankfort, Ill.—The Kuykendall Bros. warehouse was slightly damaged by fire.

Rochelle, Ill.—Morris Kennedy has purchased a 5 bushel Richardson automatic scale.

Brothers, Ill.—Stevens & Shelby, has installed a 5 bushel Richardson Automatic scale.

Weldon, Ill.—The Weldon Grain Co. has installed a 10 bushel Richardson automatic scale.

Alta, Ill.—The Farmers Elevator Co. has installed an 8 bushel Richardson Automatic scale.

Oneida, Ill.—The Oneida Farmers Coö. Co. is installing machinery in their new \$9,000 feed mill.

Owaneco, Ill.—The Owaneco Farmers Coö. Grain Ass'n. has started excavating for their new elevator.

Ellis, Ill.—A 10 bushel Richardson automatic scale was installed in the plant of Davis Brost Kinson.

West Humrick, Ill.—Fire destroyed the elevator, crib, and dust house of Harry and Laverne Brock-Jones.

Owaneco, Ill.—An 8 bushel Richardson Automatic scale has been recently installed by the Farmers Elev. Co.

Ottawa, Ill.—O. D. Center will succeed F. J. Lindsay of Grand Ridge, as manager of the South Side grain elevator.

Murphysboro, Ill.—Among the concerns wiped out by the recent cyclone in this part of the country, was the Reliance Milling Co.

Grand Ridge, Ill.—The Grand Ridge Coö. Grain Supply Co. will install three truck dumps in the three elevators which they own and operate here.

Springfield, Ill.—The Peerless Mill & Elevator Co. is increasing its capital stock from \$100,000 to \$200,000 and the number of directors from three to five.

Newark, Ill.—The Newark Farmers Grain Co. has acquired the Armour Lumber Yard. Manager Mervin Anderson gets the markets from a five-tube radio set.

Clayton, Ill.—The Clayton Milling Co. is installing an oil engine to propel the machinery from Primm Oil Engine Co. of Marion, Ohio, at a cost of several thousand dollars.

Cisco, Ill.—Albert Leach, formerly grain buyer for the Evans Grain Co. has accepted a position with the Cisco Grain Co. W. E. Miller has been appointed buyer for the Evans Grain Co.

Humrick, Ill.—Fire, thought to have

Kansas City, Missouri

been caused by a hot box, destroyed the grain elevator owned by Harry Brock Jones and Fred Van Duyn, who was in charge, but not there at the time. The loss, estimated at \$20,000, was mostly covered by insurance.

Lovington, Ill.—The following officers were elected by the Lovington Grain Co.: Pres. T. F. Porter, who succeeds N. W. Boggs; Sec'y. I. S. Hoffman, re-elected; Treas., L. T. Anderson, re-elected; Trustees, W. C. Hoffman and T. P. Ellis, both re-elected. George Lindsay, who has been manager for fifteen years, was retained.

INDIANA.

Francisville, Ind.—The Coöperative Elevator Co. will install a new cleaner.

Owensville, Ind.—Fire slightly damaged the Ford and Leonidas Garrett elevator.

Shelbyville, Ind.—A grain elevator, occupied by the Eberhart Grain Co., will be torn down in a few weeks.

Griffin, Ind.—The Price Elevator Co.'s elevator will be rebuilt following its destruction by the recent tornado.

Raub, Ind.—The 90,000 bushel elevator here has been purchased by O. E. Powell and Daniel Waymire, of Rensselaer. Mr. Powell will take charge.

Clifford, Ind.—The Farmers Coö. Elevator Co. elevator has been purchased by John Holder for a reported consideration of \$7,000. He took possession April 1st.

Logansport, Ind.—The Jordon and Baird elevator at Lake Bruce was destroyed by fire of undetermined origin causing a loss of \$15,000. Five hundred bushels of oats and a large quantity of feed and fertilizer was destroyed.

Winamac, Ind.—A new feed grinder is being installed by the Winamac Coöperative Elevator which will be operated by a 50 h. p. motor with direct drive. The grain is cleaned by a dust removing suction fan before it enters the grinder.

Lebanon, Ind.—The elevator property of Thomas A. Grant was turned over to the Citizens Loan and Trust Co. which will act as trustee of the real estate for the creditors. Stanley Jones has taken over the management of the business, having been named trustee to operate the property.

IOWA.

Onawa, Ia.—The foundation has been started on the new mill here.

Riverton, Ia.—The Farmers Coöperative Co. will install a Boss Air Blast Car Loader.

West Branch, Ia.—The H. L. Moore head grain elevator was slightly damaged by fire.

Waterloo, Ia.—Mauser & Fell, gen-

eral contractors, will raze the old grain elevator building here.

Boone, Ia.—The Beach-Wickham Grain and R. C. Start Companies opened their grain commission offices April 6th, having moved them from Perry.

St. Ansgar, Ia.—Thirty-five thousand dollars worth of stock in the new company is offered, following the re-organization of the Lumber & Grain Co.

Hamburg, Ia.—Good Bros. Seed & Grain Co. will erect a new elevator this spring. They operate four houses at four stations, having lost a fifth by fire recently.

Lewis, Ia.—J. C. and Lester Kennedy, the recent purchasers of the Farmers Union Exchange property, owned by F. L. McComb, were given immediate possession. They will repair and remodel the house.

KANSAS.

Hutchinson, Kan.—L. H. Pettit Grain Co. will install several Trapp Dumps in their elevators this spring.

Potwin, Kan.—C. T. Laird purchased the C. R. Johnson elevator, coal, rock and sand business and buildings.

Hutchinson, Kan.—C. D. Jennings Grain Co. will install several Globe and Trapp Dumps in their elevators this spring.

Wichita, Kan.—The Red Star Milling Co. will install several Globe Combination Truck and Wagon Dumps in their elevators.

Topeka, Kan.—The Federal Engineering Co. are installing several Globe Combination Truck and Wagon Dumps this spring.

Sabetha, Kan.—A. E. Roberts has ordered several Globe Combination Truck and Wagon Dumps to be used in his new elevators and repair work.

Winfield, Kan.—The Consolidated Flour Mills Co. suffered over \$1,000 damage when a terrible windstorm struck the local elevator and milling plant.

Wichita, Kan.—The Star Engineering Co. are installing many Globe Combination Truck and Wagon Dumps in the new elevators they are building this season.

Atchinson, Kan.—The Lokens Mlg. Co. are replacing their 600-bbl. unit with a new 5 story 1,000 bbl. unit. The old plant will be used for grain cleaning machinery, flour bins, packing, etc.

Moline, Kan.—T. B. Monical of Winfield succeeds, as manager of the Farmers Mill & Supply Co., J. W. White, who resigned his position that he may devote his time to his numerous other interests.

Topeka, Kan.—The Topeka Kansas Flour Milling Co. awarded to the Ryan Construction Co. of Schuyler, contract

for a 200,000 bushel grain storage tank system to contain 8 cement tanks, to be completed July 1st.

Hutchinson, Kan.—The Larabee Flour Mills Corp. are installing Globe Combination Truck and Wagon Dumps in the following elevators: Rome, Macksville, Ferguson, Goddard, Byers, Kans., Deer Creek and Canton, Okla.

Salina, Kan.—Jack Carrigan, manager for the B. C. Christopher & Co., grain dealers, is now superintendent of all the line offices with headquarters in Salina. Fred W. Elder of Hastings, Neb. will succeed him as manager here.

Hutchinson, Kan.—Phil Clark, manager of the Security Elevator Co., has let a contract to Jones Hettelstater Construction Co., Kansas City, to increase the capacity of his elevators 200,000 bushels. They are at present constructing the additional storage tanks to the Kelly Mills.

KENTUCKY.

Spencer, Ky.—The Beauchamp mill collapsed last month and, in all probability, it will not be rebuilt.

Poole, Ky.—C. F. Kuntz, Jas. Thornberry and Joe Tapp have started the erection of the new flouring mill. They lost a newly outfitted mill and granary last November.

MARYLAND.

Mt. Airy, Md.—The Glade Valley Mlg. Co. of Walkersville, Md. purchased the mining plant of the Farmers Mlg. & Grain Co. for \$36,000. They now operate three plants in the state.

Hagerstown, Md.—The Reed Grain & Milling Co. has taken bankruptcy proceedings, the failure alleged to have been caused by wheat speculation. Mr. E. B. Reed lists his liabilities at \$158,614.93 and assets, including about \$20,000 in open accounts, at \$99,284.82.

MICHIGAN.

Hemans, Mich.—Due to the discontinuation of service on the D. B. C. & W. Ry., the Hemans Grain Co. elevator has not been running.

Bay City, Mich.—The Bay City Mlg. Co.'s two story building was gutted by fire, most of the loss being stocks of grain and flour on hand, partially covered by insurance.

MINNESOTA.

Easton, Minn.—Guy R. Treanor is now manager of the Easton Farmer Elevator Co.

Morton, Minn.—The Farmers Elevator was slightly damaged by fire, due to defective wire.

Hector, Minn.—The Farmers Exchange, have installed a Globe Dump in their elevator here.

Jordan, Minn.—The receiver for the Equity exchange is offering the Equity grain elevator for sale.

Olivia, Minn.—The Empire Elev. Co. will install a Globe Combination Truck and Wagon Dump in their elevator here.

Holloway, Minn.—Henry Einerson of Big Bend City was chosen second man at the local elevator of the Holloway Farmers Coöp. Elevator Co.

MISSOURI.

Palmyra, Mo.—The Peoples Mill was sold at public auction recently.

Choteau, Mont.—J. M. Baker Co. has purchased a country elevator type disc grain cleaner and will install it next month.

Whitetail, Mont.—J. M. Larson has taken over an elevator here and will be associated in its operation with his brother, F. J. Larson of Lookout.

Platte City, Mo.—Artie Fleming formerly manager of the elevator at Farley has been employed as manager of the Farmers Coöperative Elevator to succeed J. E. Roberts.

Harrisonville, Mo.—An offer of \$8,000 for the elevator of the Farmers Coöp. Elevator Ass'n elevator property, made by the former manager, T. C. McKeever, was rejected.

Farley, Mo.—The Farley Coöperative Elevator Co. reports a net profit of \$6,595.07 for the year ending Feb. 23. Net profit for the three and a half years the elevator has been operating total \$14,724.14.

Kennett, Mo.—The McFadden Feed & Mlg. Co. contemplate the addition of a small grinding mill some time in the future and two elevators where they will handle oats and corn, mill by-products and some mixed feeds.

Mound City, Mo.—The ruins of the American Hominy Mills Co. property has been purchased by the Marland Refining Co., Ponca City, Okla. who will start to build a \$50,000 structure for a barrelling plant and warehouse.

NEBRASKA.

Crawford, Neb.—J. C. Roush of Onawa, Ia. is contemplating the erection of a flour mill here.

Albion, Neb.—A. W. Lamb was re-elected president of the Albion Elevator Co. and Carl Spaulding, re-elected secretary. No change was made in the board of directors.

Hastings, Neb.—Fire of unknown origin, destroyed the Juniata Milling Company's mill and elevator, causing a loss of \$20,000, partially covered by insurance. W. H. and H. C. DeSanno, joint owners, announce that the feed mill will probably be rebuilt at this time.

NEW YORK.

Oswego, N. Y.—George W. Smith has opened a new feed store here.

NORTH DAKOTA.

Mandan, N. D.—The Slope Grain & Feed Co. has purchased a new 20-in. Unique Attrition Mill.

Harvey, N. D.—The Farmers Elevator Co. have held their final meeting of the directors for the purpose of completing all business necessary for the change from the Harvey Farmers Coöperative Ass'n to the Farmers Elevator Co. Fred Rasmussen is chairman of the board of directors, J. F. Strauss, sec'y.-treas. and Carl Neubauer, mgr.

OHIO.

Wakeman, O.—Fire damaged the warehouse of the Wakeman Milling & Elevator Co.

McClure, O.—Dynamos are being installed by the McClure Elevator Co. to replace the steam boiler which became unsafe.

Rosewood, O.—The claims under the receivership of the Rosewood Farmers Exchange have been paid, and a cash balance of \$1,098.93 exists.

Norwood, O.—The grain elevator of the Henry Feldman Co. was slightly damaged by fire caused by the exhaust from a small gasoline engine.

Monroeville, O.—The Easton Milling Co., who suffered a recent fire loss, is occupying temporarily the old Armstrong mill. Grain damaged by fire is being sold for hog feed.

Mansfield, O.—Fire caused by lightning, gutted the Lantz Mlg. Co. structure with a loss of \$40,000. Three thousand bus. of stored wheat, 4,000 bus. of oats, 4 cars of feed and 2 of flour were also destroyed. The loss was covered by insurance.

OKLAHOMA.

Lahoma, Okla.—The Enid Milling Co. elevator was slightly damaged by fire.

Washington, Okla.—Fire partially destroyed the stock in the warehouse of the Midland Flour Milling Co.

Oklahoma City, Okla.—A 15 bushel Richardson Automatic scale was recently installed by the Oklahoma City Mill & Elevator Co.

Grove, Okla.—Ten thousand dollars

was subscribed by local business men for another new mill and elevator, and work will start at once. W. E. Jones was chosen president; Lee House, vice-president and John T. Oakley, secretary-treasurer.

OREGON.

Medford, Ore.—The Morton Mlg. Co. has been incorporated for \$20,000 by J. J., E. E. and O. O. Morton.

Halfway, Ore.—Locke & Wynia of Carson has entered an agreement for the sale of the Lloyd mill and a thorough trial will be given it on the next wheat crop.

SOUTH DAKOTA.

Clear Lake, S. D.—Tall & Tall are having lightning rods installed.

Wessington Springs, S. D.—Jeauald Milling Co. will install a Trapp all steel dump.

Brandt, S. D.—A Trapp all steel dump will be installed in the elevator of A. J. Peterson.

Glenham, S. D.—The Glenham Equity will install a Trapp all steel dump in their elevator.

Warner, S. D.—A Trapp all steel dump will be installed by the Warner Coöp. Elev. Co.

Field and Grass Seeds

quickly snapped up. October clover is not receiving as much attention as it will later when the crop reports are coming in. Some orders to buy are waiting for the right move so they may be filled. Investors will turn to this future when the market becomes more active. Dealers also use it for securing or delivering prime seed on contracts. It is a strictly domestic seed proposition as no foreign clover can be delivered on October contracts. Receipts of clover this week 40 bags and shipments 551 bags.

Timothy was also higher due to lively cash trade and interest shown in May and September. Light receipts lately and none for the past week have made dealers believe there is not a great deal of timothy for sale at present levels. Prime timothy is of excellent quality and can be used without fear of getting noxious weed seeds due to the strict purity rules of this market. Receipts of alsike last week 10 bags and shipments 352 bags. Receipts of timothy nil and shipments 691 bags.

lbs., good \$23.50@24.50, choice \$25.00@26.00, fancy \$27.00@28.00 and Mammoth \$23.50@28.50, according to quality.

Alsike—Market continues firm. Fair country lots \$16.00@17.00 per 100 lbs. Good seed \$17.50@19.00, choice \$20.00@21.00 and fancy at \$21.50@23.00.

Flaxseed—Up 3c. No. 1 Northwest-ern closed at \$2.89@2.92 per bu. of 56 lbs.

WEEKLY LINSEED REVIEW.

NEW YORK, April 13.—United Kingdom: The linseed situation in the United Kingdom displayed an easier tone during the early part of the week, declining on the Argentine official estimate of the remaining surplus of seed available for export. Thereafter, however, the market rallied with an improved demand in evidence and a fair business being transacted in Plate seed. Indian sorts appeared to be more or less neglected.

There was a fair trade in cotton oil. India: Shipments of linseed last week amounted to about 352,000 bushels compared with 56,000 bushels the week previous.

Argentina: Markets early in this country were about steady, but were closed the latter part of the week. Clearances are still moderate at about 1/2 million bushels weekly. Port stocks increased moderately and now aggregate about 3,400,000 bushels compared with 3,200,000 bushels last week and 5,600,000 bushels a year ago. The export demand has been moderate and the American inquiry continues disappointing. The government estimate of the available exportable surplus on April 1st is 40 million bushels which compares with 32 million bushels at this time a year ago.

ST. LOUIS SEED MARKET.

Quote: Timothy—fair to good country seed at \$5.25 to \$5.75; low-grade, weedy and dark at \$2 to \$4.50; clover—fairly clean to high grade clean seed at \$20 to \$25; heavily to slightly weedy lots at \$6.50 to \$15; screenings and tailings, less; alsike at \$15 to \$20; alfalfa at \$16 to \$20; redtop at \$11.50 to \$11.80 for clean seed; chaffy at \$2 to \$10; Sudan grass at \$4.25; German millet at \$4; white wonder at \$3.50; hog millet at \$1.85 bulk basis.

Stock Peas—Quote whippoorwill at \$3.60 to \$4 and new era and mixed at \$3.25 to \$3.30 per bu. on basis of latest sales.

MILWAUKEE SEEDS.

Movement of timothy seed and clover seed at Milwaukee as reported by THE PRICE CURRENT-GRAIN REPORTER by H. A. Plumb, secretary of the Chamber of Commerce, for week ending April 11, 1925:

	Receipts, lbs.		Shipments, lbs.	
	Tim.	Clov.	Tim.	Clov.
1925.....	30,000	162,085	38,750	66,650
1924.....	90,000	153,185	308,910	453,325

CHICAGO SEED MOVEMENT.

Following is a statement of receipts and shipments of grass seeds at Chicago for the week ending Apr. 11, previous week, same week of 1924 and for the season to date, starting July 1 of the years indicated (amounts stated in pounds, 000 omitted):

	Timothy.		Clover.		Other.	
	Rcts.	Shpts.	Rcts.	Shpts.	Rcts.	Shpts.

Sept.	3.50	3.40	3.50	3.40

TOLEDO SEED MARKET.

TOLEDO, O., April 13.—Cash clover showed surprising strength this week and advanced fifty cents a bushel. The seed demand has improved and looks as if it may run well into April. If it should continue for two or three weeks many dealers will have an opportunity to clean up their stocks of clover and the carryover will be comparatively small. Large amounts of alsike are being bought because of the wide discount under clover and this has caused a sharp upturn in this seed. Alfalfa and sweet clover have also been going great guns and dealers have had some trouble filling their customers' needs. New and old prime alsike have been rather scarce lately and offerings are

SEED PRICES.

Wholesale prices per 100 pounds of field seeds, on April 4, as compiled by the U. S. Department of Agriculture:

Feedstuffs

The Newton Feed Co. of Milwaukee and Buffalo have joined the American Feed Mfrs.' Assn.

"Chapman's Red Top Products" is the new brand name for meat scraps, digester tankage, raw bone meal, and steam bone meal, used by the Riverdale Products Co., 208 S. La Salle St., Chicago.

The early lamb crop is reported several weeks further advanced than normally.

The Plainfield Grain Co., Plainfield, Ill., has installed a Munson Feed Grinder in its 100,000-bu. house.

Mr. Fellows, representing the Marianna Sales Co., of Memphis, Tenn., visited the Chicago office last week.

The Winamac Cooperative Elevator, Winamac, Ind., has installed a new feed grinding equipment of modern type, to be operated by a 50-horse power motor with direct drive. A dust removing suction fan cleans the grain before it enters the grinder.

A cargo of beet pulp was recently imported at Jacksonville, Fla., in the steamship "Clara Camus." Before it was unloaded a fire caused by internal combustion destroyed seven thousand bags of the cargo.

FEED DEMAND GOOD.

MONTICELLO, IND. — We have a very good local demand for mill feed at present and we believe we shall be able to dispose of all the feed that we will make until we get a new crop of wheat at home or nearby territory. The corn crop was very short, which helped the demand for mill feed.—*Loughry Bros. Milling & Grain Co., by C. Loughry, President.*

COTTONSEED MEAL.

KANSAS CITY, April 11.—Competing dealers differ in their descriptions of the cottonseed meal market. One says: "Many mills are closed and there are no stocks in distress. Trade is good, considering that it usually slackens in April and remains dull until July." As another views it, the situation is this: "More than half the mills are still running, which reflects last year's large cotton crop. Demand is as poor as usual at this date. Drouth in Texas and export business have prevented a severer decline than has been witnessed. Now Texas has rains and the export demand is poor, as shown by waiting tonnage at Galveston." The cheapest meal, freight rates considered, is in Oklahoma. The Oklahoma mill price is \$35@36 per ton for carlots. Southern Arkansas mills ask \$35.50 and Little Rock \$36. The Texas price is about \$1 under Oklahoma and is out of line for Kansas City. Local dealers are selling meal and cake at \$41.10 for carlots and \$46.10 for ton lots.

Linseed meal prices show no change for the week and there is a small volume of buying orders. Stocks are not supposed to be heavy. Demand is expected to be limited during the next three months. Minneapolis mills are offering at \$39. The Kansas City carlot price is \$43.50 and ton lots are \$5 higher.

Tankage is holding firm at \$55 for carlots and \$60 for ton lots. There is a fair demand in Missouri and Kansas, while Iowa and Nebraska are taking

supplies from Omaha. The market was not affected by a drop of \$5 a ton in meat scrap, which is selling at the same prices as tankage. Weakness in scrap was attributed to liberal supplies and competition with other poultry feeds. Bone meal is selling at \$50 per ton in carlots.

MINNEAPOLIS LINSEED MARKET.

MINNEAPOLIS, MINN., Apr. 11.—Our Argentine correspondent cabled April 6: "After business hours government published export surplus 40 million bushels linseed. However, exclusively on the basis of estimates 15th day of January, this report has no value at all. Government estimate production and surplus will shortly be published about 15th of April," and in a late letter quoted the estimate of one of their reliable exporters as 28 million bushels. We think it would be reasonable to add these and divide by two. Much will depend on the weather of the next sixty days. Notwithstanding the government report of intention to reduce the domestic acreage, our guess at the moment is that the domestic acreage will be increased.

The Washington lobbyist in the service of the importers of vegetable oils seems worried in that linseed crushers pay little or no attention to his misleading statements. Linseed oil consumers may be interested in a few facts. It is stated frequent mergers have resulted in having only eight important crushers. Not counting a few small mills on the Pacific coast, there are thirteen crushers who would like to run their thirty odd mills actively if conditions would permit them to do so without loss.

Within a few years we have purchased one mill for 25 per cent of what it cost to build. We have purchased another, which, after trial, we have decided to abandon, selling most of the machinery as junk, and would be glad to accept 50 per cent of the cost of building. We declined another mill offered us on any terms we would make. Lately the books of two of the largest crushers, considered successful, were examined for the past 6-8 years' business by chartered accountants. Results published showed average profits of 3 per cent on gross sales. Years of unusual war profits were included. Is it any wonder that few mills are operated at capacity, and most mills are closed a great part of the year?

This country consumes annually over 90 million gallons of oil from about 38 million bushels of flaxseed. Under the former tariff in 1918, 19 and 20, there was imported an average of over 17 million bushels of seed and 17 million pounds of oil. Under the present tariff in 1923 and 1924, there was imported an average of over 20 million bushels of seed and 28 million pounds of oil, and the present tariff has caused our farmers to increase their flaxseed production from about 7 million bushels to about 30 million bushels. Now we are having this tariff agitation, and the U. S. Government publishes the farmers' intention to reduce the acreage instead of the former intention to increase it.

Our farmers can only sell their flaxseed to our domestic crushers. If importations of linseed oil are largely increased, does it take any great mind to see that there will be less demand for domestic flaxseed. If it could be shown that crushers were making unreasonable profits under this tariff, it would be proper to reduce it, but the efforts to sell and the closing of mills do not indicate this. The stock of two of the largest companies quoted on the New York Exchange has never sold as high as par.

If our farmers were sure of a dependable market for flaxseed and would produce 35 to 38 million bushels, we

feel our oil consumers would have a more stable and reasonable price for linseed oil than to be dependent on foreign producers and importers, and naturally crushers prefer such conditions as permit their mills to be operated without loss.

Minneapolis car receipts past week, 88 cars; same week 1924, 41 cars. Duluth car receipts past week, 12 cars; same week 1924, 17 cars. Winnipeg car receipts past week, 73 cars; same week 1924, 18 cars. Minneapolis, Duluth and Winnipeg car receipts to date this crop, 26,494 cars; Minneapolis, Duluth and Winnipeg car receipts to same time 1924, 14,282 cars.—*Archer-Daniels-Midland Co.*

tion as contract terms had arranged such. The buyer in making an offer as to what he was willing to do might have brought an acceptance or led to negotiations but neither are compulsory. Decline in market favored the seller and the proposition made by the seller is in order as the buyer can choose by accepting such a proposition made or decline it and then direct forwarding on the contract as originally made. All these conditions and propositions proposed by the buyer may be declined by the seller as they have no bearing on the contract, as the contract states the terms clearly and cancellation is under control of the seller.—*Chicago.*

OIL MEAL MARKET.

There is practically no change in the oil meal market here although prices are holding very firm. Mills are having quite a bit of difficulty getting out the tonnage they have booked and are not taking any orders for shipment this month whatever.

Peasize meal still commands a premium of \$1.00 per ton. There is considerable interest in this commodity and in view of the difficulty in getting shipments out we believe nearby requirements should be filled at once.—*The Bertley Bulletin, Chicago, Apr. 11.*

CORN FOR ALCOHOL.

Corn distillation for alcohol was popularly supposed to be quite largely supplanted during the war by molasses. Figures officially furnished by the Bureau of Internal Revenue do not verify this, however, and the present consumption is larger than then.

In 1915, 123,301,496 gallons of molasses of the lower grades were consumed in the production of distilled spirits; in 1919, practically the same amount. A gradual decline followed in succeeding years until 1922, when 97,222,854 gallons were consumed.

The price advantage in molasses for distillation justified a sharp increase in 1923 to 148,711,458 gallons and in 1924, 155,001,162.

For considerable periods recently, black strap molasses, so important in sweet feeds, has been difficult to secure and judging by the above figure, it will be necessary to import larger supplies if the feed trade is to continue the use of this most important feed ingredient at fair prices.

A FEED CONTRACT.

We published in a recent issue a letter from a Southern reader relative to a contract he had with a mill which was as follows:

Wishes Information.

Price Current-Grain Reporter: A dealer has a contract with a mill making feeds for delivery as the dealer's needs develop up to a final shipping date. At this final shipping date, the mill contract gives the dealer the option of the balance of the contract or cancellation of the paper, the mill to get the difference between the market price or the purchase price if the market is lower, or the mill will carry ninety days with charges. This contract says not subject to cancellation.

On account of the market and trade conditions, the dealer wishes to cancel and liquidate part of his contract before final shipping date thereby saving, in his opinion, further losses. He asked the mill what the costs of such cancellation and liquidation would be. The mill delayed reply and when the reply was received, the mill did not cover the question asked, but went on to say that the dealer would have to pay selling and other costs and urged more energetic retail methods. The mill accepts the question, but evades reply. As stated, the dealer has signified willingness to pay charges.

Meantime the market declined further and further. The mill does not set costs for liquidation until after several breaks, thirty days or more after the first request by the dealer. What is the dealer's position? Suppose the mill offers to liquidate on or before completion and final shipping date of the contract? Because of the fact that the dealer had offered to liquidate before the market declined, has the dealer's offer of settlement a bearing on the contract? Could the mill force settlement after several breaks or at any time that they set or does the dealer's signified willingness to settle have a bearing?—*Southern dealer.*

We have had several replies regarding the dealers' status which follow.

The contract speaks for itself and binds both parties. Because one of the parties wishes to modify or change same does not obligate the other to do so. The contract, not being subject to cancellation, the mill was not obligated to cancel before shipping date.

While communication between the two parties was being passed regarding the modifying or changing, no agreement was entered into or meeting of minds regarding same. There is no question in my mind the mill could legally and surely force settlement on the market price basis on the final shipping date.—*Eastern.*

The contract as explained favors the seller as same is not subject to cancellation by the buyer without consent of the seller. The seller is not compelled to answer inquiries as to costs of cancella-

GROWING SOYBEAN SEED.

Growing soybeans for seed may prove profitable for the farmer who cares to take the trouble to grow the crop and prepare it for market. There is likely to be a good demand for the seed for some time, according to L. E. Thatcher of the Ohio Experiment Station, as only about 7 per cent of the rapidly increasing acreage of this crop in Ohio is harvested for seed.

The crop is fully as certain as wheat and the yield of beans is at least two-thirds the yield of wheat on land of equal fertility. This makes the soybean a profitable crop when it is figured that soybeans for seed sell for about twice as much as wheat per bushel.

The Manchu is a good variety; it is easily grown and there is a good demand for the seed. It stands up well, matures early, yields high and does not shatter the seeds when ripe. The Ito San, Blackeyebrow, Ebony and Elton are good early sorts for which there is a good demand. After a little experience in growing and handling the crop the farmer may succeed in growing seed of such good later sorts as Midwest, Peking, Virginia, Wilson, and Hamilton.

MINNEAPOLIS FUTURE BRAN.

Minneapolis mills have for some time been willing to sell future bran but very little business has been confirmed. There is a broad gulf between the asking price of the miller and the price ideas of the buyer. A detail of this situation is found in the by-product sale of the mill when large flour contracts are secured. The flour sales department, in acceptance on round lots of flour takes into account the estimated future price of bran available in the milling of such flour. It is their customary procedure to ask a half dozen or more of the

largest feed manufacturers to bid on future bran, and irrespective of the tentative figures offered, the flour miller comes back with the statement that his bran will be worth more money at the time of delivery.

NEW YORK OATS MARKET.

Oats receipts 88,000 bushels bonded, 314,000 bushels domestic. Prices gradually reached a higher level throughout the week, but the action of the market was sluggish compared with that of other grains. This is due, doubtless, to the enormous supplies at cumulative centers, which will require a long time to merchandise, judging from the decreased consumptive requirements of the country generally. A decrease of practically 3,000,000 bushels in the weekly visible was gratifying and the present farm movement is light. Locally, dealers continued to replenish supplies with ex-lake Northwestern oats at a considerable discount under prices for all-rail oats offerings. Exporters took a fair volume of Canadian oats, but only a small quantity of American.—*L. W. Forbell & Co., Apr. 11.*

FEED MARKETS.

MILWAUKEE.

Milwaukee, April 11.—Stronger cash grain markets the past week caused feed quotations to rise in the Milwaukee market at the close on Saturday, April 11. Consumptive demand, however, continued very weak. Some spot shipment orders were booked, but practically no call for later delivery orders was reported. Current quotations are: Winter bran, \$25.70@26.70; spring bran, \$25.50@26; standard middlings, \$25@25.50; flour middlings, \$30.50@31.50; red dog, \$37.50@38.50; rye feed, \$25@25.50; linseed oil meal, \$41@41.50; cottonseed meal, \$38.50@43.50; hominy feed, \$35@35.50; oat feed, \$6@6.50; gluten feed, 30 days, \$32.80; all in 100-lb. sacks, carlots, f. o. b. Milwaukee.

PHILADELPHIA.

Philadelphia, April 9.—The supply of feedstuffs is small and with a better demand the market is firmer and in some instances a shade higher. Quotations are for carlots in 100-lb. sacks at cost per ton: Soft winter bran, \$35@36; winter middlings, \$34@36; spring bran, \$28@28.50; standard wheat middlings, \$29@30; flour middlings, \$38.50@41; red dog, \$44.50@45; rye middlings, \$31@32; reground oats feed, \$12; fine yellow hominy, \$40@41; fine white hominy, \$40@41; cottonseed meal, 36%

The Salt Without a Fault

Clean, white and free from shale and dirt.

Myles farm salt is particularly adapted for the elevator and farm trade, containing no organic matter, although it costs no more than the ordinary run of salt.

protein, \$42.25@43; cottonseed meal, 41% protein, \$44.25@45.

BALTIMORE.

Baltimore, April 11.—There is a somewhat firmer undertone to the wheat feed market, although present supplies of bran and middlings are ample for trade wants. Hominy feed is quiet and gluten feed also selling very sparingly. Alfalfa meal is tending lower in price. Dried beet pulp not over-plentiful. Quotations follow: Spring wheat bran, per ton, 100-lb. sacks, \$30@30.50; western middlings, per ton, 100-lb. sacks, \$30.50@31; hominy feed, per ton, \$43@44; gluten feed, per ton, \$38.50@39; alfalfa meal, per ton, \$30@31; dried beet pulp, per ton, \$37.50.

MEMPHIS.

Memphis, April 11.—Millfeed is again very quiet, although early in the week a little business was done in wheat bran. Buyers held off when the price worked a little higher. Bran is nominal, but quotations before the sharp rise in wheat ranged from \$28.50@29, while gray shorts were from \$34.50@35.50. Alfalfa meal continues to drag and No. 1 is quotable from \$25@27, with buyers apparently not interested. Cottonseed meal is steady at \$36@36.25 for 41 and \$38@38.25 for 43. Buying for fertilizer uses is still reported as fairly free direct from the mills.

NEW YORK.

New York, April 11.—There was a slightly higher range for both Western and city feeds toward the end of the week, this movement being due to lighter offerings on the part of the mills.

The trade demand here was very dull and quietness is expected for some time, which is natural with the spring weather.

City bran was quoted at \$28.50, middlings \$29.50 and red dog \$45, while Western bran ruled at \$28.60, middlings \$29.60 and red dog \$44.75 per ton.

DULUTH.

Duluth, April 11.—Millfeeds eased 50c a ton during the last week, but ground feeds are unchanged. Demand was reported to have been more draggy than ever as a result of light sales to dealers who are finding dairymen and other consumers confining their requirements to an immediate needs basis. Stocks in the mills continued to accumulate. Closing prices per

ton follow: Bran, \$23.50; shorts, \$24.50; Boston mixed, \$24.50; red dog, \$38; flour middlings, \$29.50; ground oats, \$27.50; No. 1 ground feed, \$35.75; No. 2 ground feed, \$33.75; No. 3 ground feed, \$31.75; cracked corn, \$40; coarse cornmeal, \$40.

MINNEAPOLIS.

Minneapolis, April 11.—The past week has been a further continuation of what local mills and jobbers have experienced since the turn of the year. Demand is of a rather spasmodic character, it being very light one day and entirely absent the next. Stocks in the hands of country dealers must of necessity be at as low an ebb as they have been at any time in years, but they do not seem to be stepping in and taking any quantity of this feed at current prices. Understand that there is a great deal of ground oats being fed in the place of mill offal this year which, of course, accounts to some extent for the marked falling off in sales of this commodity.

Today's asking prices were: Standard bran, \$23; pure bran, \$23.50; standard middlings, \$23; flour middlings, \$23@28.50; red dog, \$36@40.

Season shipments total as follows: Since January 1, 170,847 tons, vs. 215,098 last year; since Sept. 1, 417,360 tons, vs. 486,002 a year ago.

Weekly shipments totaled 9,176 tons, vs. 10,167 tons a week ago and 12,176 tons a year ago.

CINCINNATI.

Cincinnati, April 11.—The market for millfeeds was firm throughout the week, but the strength was again more due to the light offerings than to any improvement in demand. The market, though, evidenced a decided curtailment in buying due to the end of the season and coming of abundant grass with pastures, which were helped materially the past two days in this territory by beneficial rains. Quotations represent 100-lb. sacks: Soft winter wheat \$30@30.50; hard winter wheat bran, \$30@30.50; spring wheat bran, \$30@30.50; standard middlings, \$28.50@29; soft wheat middlings, \$35@35.50; gray hard middlings, \$35@35.50; mixed feed, \$33@33.50; No. 1 alfalfa meal, \$29; hominy feed, \$35.50@36.

HAY MARKETS

BOSTON.

Boston, Apr. 11.—Millfeed—Prompt shipment, per ton: Spring bran, \$28@28.50; winter bran, \$29@30; middlings, \$28.75@35; mixed feed, \$33@39.50; red dog, \$45@50; gluten feed, \$39.95; gluten meal, \$48.70; hominy feed, \$39.50; stock feed, \$39.50; oat hulls, reground, \$12; cottonseed meal, \$43.25@47.50; linseed meal, \$43.

Oatmeal—Per 90-lb. sack, rolled, \$2.90; cut and ground, \$3.19.

Oats—All rail, fancy, 40 lbs., 60@61c; fancy, 38 lbs., 58@59c; regular, 38 lbs., 57@58c; regular, 35 lbs., 56@57c; regular, 34 lbs., 55@56c.

FEEDSTUFF SITUATION.

At this writing, mill feeds are holding quite firm with considerable buyers interest for immediate and quick shipment only; refusing to pay any premiums for further shipment. Buyers apparently are not interested in buying beyond prompt shipment and offering feed at \$1.50 from the current market prices. They refuse to buy for 30 to 50 day shipment.

MINNEAPOLIS.—Bran, \$23.50; standard middlings, \$24; flour middlings, \$29.50; red dog, \$38.

CHICAGO.—Bran, \$26.10; standard middlings, \$26.60; flour middlings, \$32.10; red dog, \$40.60.

KANSAS CITY.—Bran, \$24; gray shorts, \$33.10.

ST. LOUIS.—Bran, \$26.40; gray shorts, \$33.10.

ALFALFA MEAL.

The cheaper offerings have been cleaned up and some of the mills are not so anxious to sell. There is a little better demand prevailing in small lots over widely scattered territories. Nominally quoted, second hand bag basis,

choice, \$27.50; No. 1, \$25.50; No. 2, \$21. Fine ground grades, \$3 to \$4 a ton premium.

REGROUND OAT FEED.—Nominally quoted reground, \$7; unground oat hulls, \$9.

LINSEED OIL MEAL.—Demand ample to take care of mills output for prompt 30 days. Market fairly firm with very little interest beyond 30 days shipment. Nominally quoted Chicago, \$41. In bulk, where available, \$2 a ton less.

HOMINY FEED.—The advancing grain market has advanced the price of hominy feed with stimulation of buyers interest. Nominally quoted white, \$30 to \$37; yellow, \$35 to \$36. In bulk, where available, \$1 to \$1.50 a ton less.

DRIED BUTTERMILK.—Demand is fairly strong and has been for the past couple of weeks, especially for less than car lot shipments for the feeding of baby chicks. There has been no change in prices, which are as follows: Creamery in carlots, 6½c per lb., and L. C. L. up to 7½c.

COTTONSEED MEAL.—There has been no change in this market, demand continually slow and prices are easy. With indications pointing to a smaller cotton crop this year, and consequently higher prices a clean-up is looked for before the new crop. Meal is nominally quoted for 43 per cent protein, Chicago basis, at \$42.50.

GLUTEN FEED.—Demand is slackening somewhat, buyers apparently awaiting the "grass" price change due within the next week or two, and the only orders being placed are for immediate shipment. Quotations follow: Gluten feed in bulk \$30 a ton, sacked \$32.80; gluten meal of 40 per cent protein \$41.80 in sacks, \$39 in bulk.

PACKERS' PRODUCTS.—Demand is slackening somewhat, and as producers are in the midst of their fertilizer business, no special effort is being made to dispose of feed products. Prices are as follows: Meat scraps in carlots f. o. b. Chicago, \$55@60 a ton; 60 per cent protein digester tankage, \$50@55; raw bone meal, \$50.

CHARCOAL.—Seasonable demand at a price basis f. o. b. Chicago; Milwaukee carlots, \$33@38 per ton, depending upon size of charcoal. Less than carlots, \$35@50 per ton, standard units of 50-lb. burlap bags (for the finest grades, paper lined) in 13-ton minimum cars.

CANADIAN GRAIN COMPANY BROADCASTS PRICES.

Radio is used extensively in the United States to broadcast grain quotations, and it is now coming into general use in Canada for this purpose. The Saskatchewan Coöperative Elevator Co., Ltd. has started broadcasting grain prices every day from station CKCK, Regina. Street prices for all grades of grain are given in such form that a producer-dealer in any freight division may know the exact amount he will receive for grain after deducting freight charges. Radio forms have been printed for distribution to anyone who cares to take down the prices as received, and they may be obtained free of charge by applying to the publicity department of the company.

RANGE OF CONTRACT GRAIN PRICES.

Following is the daily and weekly range of quotations for contract grain prices at Chicago in April, the March range and the range previous to March 1 of the deliveries indicated:

Alfalfa Department

ALFALFA MEAL MARKET.

KANSAS CITY, April 11.—All grades of alfalfa meal, except choice, advanced 50c a ton this week, not because of an improving demand, but in consequence of higher hay. The market was quoted as follows, per ton, in carlots: Choice, \$25@26; No. 1, \$22@23; No. 2, \$17.50@18.50; No. 3 or brown, \$16.50@17. Most of the meal now being made is for storage or to apply on old contracts. Millers are exhibiting their confidence by holding liberal stocks of both meal and hay a while, for mixed feed manufacturers to buy freely.

Operating chiefly in grinding horse and mule and poultry feeds, the mixed feed manufacturers report a good business. Dairy feed demand is only fair as new pasturage is an offset. Hog feeds are selling in fair volume, which is improving. Prices were reduced 50c to \$2 a ton this week, except on dairy feeds. The carlot quotations, per ton, are: Dairy feeds, \$36@47; cattle feeds, \$39@44; hog feeds, \$44@50; pig meal, \$68; horse and mule feeds, \$29.50@41; alfalfa-molasses feeds, \$26.50@33; scratch poultry feeds, \$45@51; mash poultry feeds, \$49@75.

ALFALFA PAYS.

A press dispatch from Litchfield, Minn., says:

"John F. Olson of Greenleaf brought in a sack of alfalfa seed yesterday, which he sold to a farmer north of town for 50 cents a pound. The lot was brought to town in a common grain sack, and weighed 164 pounds. It brought \$82. Joel Nelson, a short time ago, bought a sack full of the seed from Mr. Olson at a price even higher.

Mr. Olson threshed 750 pounds of seed from 15 acres, second crop, the first crop yielding 3 tons of hay per acre. He has 40 acres in alfalfa. He will plant 20 more this year. He has one field that has been in alfalfa for 15 years. He plants without a nurse crop, in June, July or August, cultivating the ground continuously during the season up to the time of planting, so as to have it clean of weeds. He says he would not farm without alfalfa. He grows the Grimm variety exclusively.

ALFALFA MEAL THE BEST GREEN FEED.

At the Albert Angell, Jr., Poultry Experimental Station near Chicago where various formulae and ingredients are constantly being tried out to determine their feeding value, additional information has recently been obtained in the tests in feeding of alfalfa meal as a substitute for fresh succulent greens.

While feed manufacturers understand full well the feeding value of alfalfa and use it in more or less quantities in their egg and growing mash, this form of green food has not been generally offered as a substitute for fresh succulent greens as it will be noted from most of the feeding instructions of the various feed manufacturers that fresh greens are recommended in conjunction with the feeding of the mash feeds.

However, Albert Angell, Jr., has for some years used and advised the use of the best grade of finely ground alfalfa meal when blended with mash feeds as a substitute for such green feeds as sprouted oats, fresh lawn clippings, cabbage and similar green food. Five generations of several breeds of fowls have been used in the experiment covering a period of a number of years, during which time no other vegetable protein of any description other than alfalfa was given or consumed by the birds.

Mr. Angell's contention has been that alfalfa is not only a substitute for fresh

green food, but that by its use in the dry mash the birds always obtain the necessary amount of vegetable protein, whereas the poultry keeper more or less neglects to feed vegetables because of it being inconvenient, and at times extremely difficult to obtain, the average back lot poultry keeper otherwise employed not having the time to sprout oats, and the expense of buying vegetables during the fall and winter especially is prohibitive.

Further information along these lines comes at this time from a visitor to the experimental farm who desired 300 eggs for hatching from White Leghorn stock. It was explained that conditions were not conducive to fertility as the birds had not been selected and put in the breeding pens as yet and that under the circumstances only a small percentage of fertility and hatchability could be expected. The prospective purchaser was willing to take his chances as he was anxious to obtain at least some chicks at that particular time, but when it was explained that the birds had not received fresh succulent green food of any description at any time, the poultryman hesitated.

It was agreed that green food was absolutely necessary to insure high fertility and hatchability of eggs, but it was pointed out that alfalfa had been found a substitute for fresh succulent greens and that it is not only recommended but it is used entirely at this farm as the vegetable protein part of the ration.

Three hundred eggs finally changed hands and three weeks later the poultryman reported to the experimental farm that 60 infertile eggs were tested out on the 7th day, and on the evening of the 20th day 220 chicks were hatched.

HEARINGS ON ALFALFA GRADES

The following was received from Mr. W. A. Wheeler, who with Mr. E. C. Parker is making a trip throughout the West, holding hay hearings.

The hearing on proposed Federal alfalfa hay grades held at Billings, Mont., April 7th, was presided over by Commissioner A. H. Bowman of the Montana State Department of Agriculture. Billings hay dealers, Yellowstone Valley producers, county agents from various Montana hay producing centers, county agents from the irrigation projects of northern Wyoming and representatives from commercial clubs and representatives from the Montana agent experimental station were in attendance. The county agents from Powell, Wyo., had been authorized to voice the desires for the Powell shippers who ship about 2,700 cars yearly.

The alfalfa hay grades were recommended as proposed by a unanimous vote. The adoption of a choice grade was voted down and the present proposal to use the words "fine and soft" in connection with the No. 1 grade was recommended. The Montana State Department of Agriculture is in full sympathy with the United States Department's program for uniform hay grades and inspection and will recommend the use of federal grades.

A hearing was held at Denver Apr. 9 at which the Denver grain and hay exchange and the Alfalfa milling companies were represented. Others in attendance were the commissioner of agriculture for the state of Wyoming, an authorized representative of the Fountain Valley Hay Producers' Ass'n of Wig Wan, Colo., the veterinary corps officers of the U. S. army and the alfalfa specialists of the Colorado Agricultural Experiment Station. The alfalfa grades were recommended as proposed by a unanimous vote and the question of adopting a choice grade was voted down.

The state of Wyoming is in full ac-

NOTICE!

MILLS AND ELEVATORS

The U. S. Department of Agriculture recently recommended a new mixture for killing WEEVIL in grain, stating that the mixture was Non-Inflammable and Non-Explosive and could be used without injury to man—at the same time leaving NO ODOR or TASTE in the grain.

"TETRI-CIDE"

For your convenience we are placing on the market the above mixture ready for use, in 30 and 50 gallon Drums, at \$2.25 and \$1.95 per gallon respectively, F. O. B. shipping point. The drums are charged extra at \$6 each, but returnable for full credit within 90 days. Our name and trade-mark for this mixture is "TETRI-CIDE."

For a General Non-Poisonous and Non-Explosive Insecticide for killing moths and spraying for insects generally in mills and warehouses, we recommend

Frt. Allowed
55-gallon drums @ \$3.25 gallon
30-gallon drums @ \$3.50 gallon
10-gallon cans @ \$3.75 gallon
No extra charge for containers.

cord with the program to make United States hay grades official in that state and to inaugurate shipping point inspection as soon as possible in the districts of largest production. The Denver dealers and alfalfa millmen as well as the Shipper's Association at Wig Wan, Colo., expressed themselves as being in favor of the U. S. grades and inspection and hope to organize an inspection service during the coming year in this territory.

RELIABLE STANDARD INCUBATOR

50 to 1100 Eggs

Both Hot Air and Hot Water Heating Systems Used

Automatic Ventilation, Moisture and Heating Regulation. RELIABLE dealers find the Reliable Incubators most satisfactory and profitable to sell for several reasons: 1: Our complete line of various sizes, both heating systems, to meet every need. 2: Best materials, construction and workmanship. 3: Ease of operation and possessing every convenience of modern incubation. 4: Maintains a positive uniformity of temperature with a constant even circulation of pure, fresh air. 5: Correct heating and hatching temperature and moisture in all climates. 6: Double enclosure heating system utilizes heat from lamp in two ways—an absolute guarantee against sudden chills. 7: Has an abundant nursery space.

Various Sizes The Best Yet

RELIABLE Standard Blue Flame Hover

The Leader of them all. A wickless, oil heated Colony Hover. 1925 pattern made to meet every demand of poultrymen—large or small. Fully explained in the Reliable Sales book. An unusual seller.

RELIABLE Standard Coal Burner Colony Brooder

Brooder
Stove

using our own brooder stove with improved feed pouch, increasing coal capacity. Burns both hard and soft coal with equal success. Accurate and dependable heating regulation. Self cleaning. No clogging. Self ventilating canopy, maintaining pure, fresh, warm air, insuring healthy chicks. The Dealer's Favorite.

Our RELIABLE Incubators, Brooders, Hovers, Poultry Appliances and Fixtures are backed by our positive guarantee.

GOOD DEALERS PROPOSITION.

Hay Department

Eastern Iowa meadows are reported very generally plowed up for barley which on the next crop is intended to take the place of hay. An extremely significant statement is published in the March 1st Department of Agriculture bulletin, as follows: "The one great crop which appears to face an absolute readjustment in acreage and for good and permanent reasons is timothy hay." The readjustment means a reduction, counter to the practical recommendation made by John H. Devlin in his authoritative article on page thirteen, the PRICE CURRENT-GRAIN REPORTER of March 18. We do not lose sight of the fact that high-priced hogs and high-priced corn look pretty good to the farmer who has been paid low prices for his hay but beyond the yield per acre, Mr. Farmer should recognize the crop rotation value of carrying the customary acreage each year to hay.

KANSAS CITY HAY NOTES.

T. J. Tanner, Correspondent.

The Kansas City hearing on proposed federal grades for alfalfa and wild hay will be held at 1513 Genesee street Thursday, April 16.

Light offerings of prairie hay are giving the market an appearance of strength, but dealers say the demand is practically all local.

Rains and low prices were sufficient excuses for small receipts of hay this week. On Wednesday only 17 cars arrived, as compared with 67 a week previous and 90 a year ago.

C. S. Scott of Scott & Co. has applied for membership in the Kansas City Hay Dealers' Association. He bought the certificate of H. W. Elliott, formerly of the Elliott-Fisher Commission Co. This will bring Scott & Co., a large local hay firm, into the exchange.

Since the Ralston-Purina Co. added a new mill to Kansas City's manufacturing capacity, the Colorado alfalfa mills have developed another of their periodical alarms. They have received the demand for abolition of the milling-in-transit privilege on hay.

"The South will have to bid up if it wants any more alfalfa hay," said Victor Faris Wednesday. "We have light receipts and the farmers are too busy

to ship unless there is a better price inducement."

J. A. Brubaker says somebody is underselling Kansas City on timothy hay in the South about \$1 a ton. He suspects St. Louis, which is shipping Illinois hay. As far as the Southeast is concerned, Kansas City dealers are becoming accustomed to underselling by the Ohio river states.

Regarding the Hoke Smith resolution as affording a possible solution of the freight rate question on hay, the Kansas City Hay Dealers' Association is considering a proposition for co-operation with the St. Joseph and Omaha exchanges in asking the Interstate Commerce Commission for a hearing to ascertain what rate would be necessary to move hay freely. It is believed by D. B. Tilson and other members of the exchange that a general reduction of 25 per cent in Western territory would accomplish the purpose. The directors of the association are negotiating with Clyde M. Reed of Reed & Glover, Parsons, Kan., to open the contest. Mr. Reed is the former chairman of the Kansas State Utilities Commission, who led the fight for lower freight rates on grain and hay last year, which failed. It is thought that the Hoke Smith resolution will give a new angle to freight rate contests in the future.

HAY PROSPECTS GOOD.

CHELSEA, OKLA.—No alfalfa marketed at this point. Prairie hay good prospect, with large carryover. Oats prospect good; wheat poor; good acreage of corn planted.—J. W. Stewart.

HAY MARKET REVIEW.

The hay market was quiet to dull during the week April 6-11, according to the Department of Agriculture. Country offerings were small with the pressure of spring work but were fully equal to trade requirements with consumers purchasing for immediate needs only. The scarcity of high grade hay in some markets helped to move the arrivals of ordinary hay but the limited demand for the low grades fell off with warm weather and prices for these grades declined, although top grades held steady. No improvement in the market for low grades is to be expected, especially as there is a large amount of inferior hay remaining upon farms which can be marketed if satisfactory prices can be secured.

The timothy market averaged steady on light receipts. The Boston market was practically unchanged and the best timothy held steady at New York although the lower grades declined \$1@2 per ton on black demand. Quotations

HAY Shippers Write for Quotations
WESTERN UPLAND ALFALFA AND TIMOTHY

were unchanged at Philadelphia. The best timothy was in demand at Pittsburgh but ordinary hay was slow sale, while low grades were almost unsalable.

The Cincinnati market was firmer on light receipts. The highest grade timothy was wanted for racing stables but ordinary hay sold only because of the scarcity of good hay. Top grades moved readily in Chicago but the lower grades were draggy. More good timothy could have been sold to Louisiana and Texas from Kansas City but this trade could not use inferior hay.

Alfalfa was practically unchanged with weakness in the lower grades, offsetting a slightly firmer market for the best hay. Quotations were unchanged at Omaha and good alfalfa was higher at Kansas City, although low grade and damaged hay was hard to move. Dairy hay was wanted and there was a light shipping trade to the south and southeast but mills and feeders bought sparingly. California markets were quiet on prospects of a good crop of alfalfa.

The prairie market was dull. Demand was light at Chicago and the Minneapolis and St. Paul market held steady on light arrivals. Lighter receipts helped to clear the Omaha market although low grades were not wanted. The stockyards and a small volume of shipping trade took the offerings of good hay at Kansas City with an occasional car going to local dealers, but the off grades were very slow sale.

CONDITION OF THE HAY TRADE.

From a trade and price standpoint, the hay markets of Greater New York are in about the same conditions as they were at the close of last week. From a supply standpoint, owing to the moderately light receipts by rail since Saturday, a large per cent of the surplus hay on hand at the close of last week has been disposed of. At this writing there is very little good, merchantable hay unsold in the Greater City and not a large amount of common and poor. Judging from today's report there is very little hay in transit; 147 cars unsold including all terminals. Receivers report a heavy falling off in invoices during the past two weeks.

If the quality of hay shipped to this market during the past two months is a fair average of the quality in the hands of shippers and farmers, the percentage of good hay of the 1924 crop available for market purposes, is very much less than at the same period in former years. If such is the case, a large per cent of the hay to come forward between now and the close of the season will be of an inferior quality.

The market on all grades reached the lowest point during March for a number of years. As to the future outlook, if shipments continue to arrive to the extent they have during the past three months and no improvement in the quality of the hay, there is little hope of the market improving.

The consumption of hay in Greater New York has decreased anywhere from 25 to 35 per cent during the past year on account of replacement of horses by motor trucks. Reports from the principal hay producing sections of this country, also Canada, are to the effect that farmers are holding double the amount of hay at this time than they did in former years. If such is the case, the outlook for an improvement in the condition of the hay business between now and the close of the season is by no means encouraging.

In view of the foregoing and everything considered, the only way that an improvement can be effected is to discontinue buying and shipping anything but good merchantable hay. During the

past six months there has been a large amount of poor timothy, clover mixed and clover sent to this market from this state, Pennsylvania, Michigan, Ohio, Indiana and Canada on which freight and other expenses have absorbed practically the entire value of the shipments. There have been a good many instances where expenses have exceeded the value of the shipments.—W. D. Power & Co., by Fred M. Williams Apr. 9.

HAY LOADING DO'S AND DON'T'S.

"Shippers News" of April 8, published by Van Wie & Moorhead of Chicago, carries the following admonitions to hay shippers:

Do load cars uniform wherever possible.

Do separate the different kinds if impossible to load a straight car.

Do load the best hay in the doors. If the car contains two or more kinds and advise us accordingly.

Do load the doorways uniform.

Do load the ends of the bales at the doorways so that ends will face out.

Don't load good hay in the ends of the car and poor at the door.

Don't throw the bales in any way at the door; instead load them uniform ends out.

Don't load the sides of the bales to the doors.

Don't mix up several kinds of hay through the car—separate them.

Don't draw excessive drafts. This causes delay and unnecessary expense.

HAY MARKETS.

NEW YORK.

April 9.—The New York Hay Exchange Assn has issued the following weekly report, with latest quotations:

	Hay.	Straw.
Receipts for week, tons	865	36
Receipts last week	1,263	50
Receipts from Sept. 1	38,168	806

Although receipts during the week show a decrease, the disposition continued extremely slow and at the close offerings present an accumulation, consisting principally of a common to low quality, mostly in undesirable mixed lots and for which poor assortments there is practically no call. The best of the stock receives the buyers' attention, it being almost impossible to get them over \$22, except perhaps in an exceptional way for something fancy and suitable.

There is virtually no straight cars of No. 1 timothy in either large or small bales available. The bulk of the sales range from about \$22 down to about \$15. There are several carlots of a distinctly low and mixed quality for sale which meet with little or no consideration from the buyers almost regardless of price.

In view of the large assortment of mixed carlots, it is impossible to reflect such sales in the table of quotations. On the whole, however, the average values are fully \$1 per ton under one week ago.

Straw situation continues nominal. Report of new invoices show a light receipt.

Federal grade quotations for large bales follow: Timothy—No. 1, \$25; No. 2, \$20@22; No. 3, \$17@19. Light clover mixed.—No. 1, \$20@22; No. 2, \$17@19; No. 3, \$15@16. Medium clover mixed.—No. 1, \$17@19; No. 2, \$15@16. Light grass mixed.—No. 1, \$20@22; No. 2, \$17@19; No. 3, \$15@16. Heavy grass mixed.—No. 1, \$15@16.

KANSAS CITY.

April 11.—Rains over the west and southwest, active spring work on the farms and dissatisfaction regarding prevailing prices effected a further material reduction in all hay receipts this week. In the total arrivals there were 255 cars, as compared with 482 a week ago and 638 a year ago.

Alfalfa offerings were 127 cars, showing a weekly drop of 163. They were indeed small as against the 396 cars that arrived a year ago. All medium to fancy grades sold readily and an early advance of 50c @ \$1 a ton was recorded except on the best select dairy. The percentage of fair to good quality was high. Only the poor and damaged hay was dull.

Prairie receipts fell off 45 cars and aggregated 95. All of the better grades rose 50c @ \$1. The offerings were so light that the limited demand was overtaken. Dealers said the best buying was local.

A total of 33 cars of timothy, clover mixed and clover reached the market. Most of this hay was timothy. Shippers

complained that southern bids were \$1 a ton out of line, due to competition of hay from Illinois. There was some local and outside business. Clover mixed and clover ruled quiet. No notable price changes were noted in timothy or the other kinds. The market had no receipts of straw. There was a fair inquiry and bids were raised 50c@\$1 a ton.

Carlots of hay and straw are quoted as follows per ton f. o. b. Kansas City:

Alfalfa—Select dairy, \$24@27; choice, \$21.50@23.50; No. 1, \$18@21; standard, \$14@17.50; No. 2, \$11@13.50; No. 3, \$6.50@10.50. Prairie—No. 1, \$11@12; No. 2, \$9.50@10.50; No. 3, \$6.50@9; packing, \$5@6. Timothy—No. 1, \$15@15.50; standard, \$14@14.50; No. 2, \$12.50@13.50; No. 3, \$10@12. Clover mixed—Light, \$15@15.50; No. 1, \$13.50@14.50; No. 2, \$10@13. Clover—No. 1, \$12@14.50; No. 2, \$7@11.50. Straw—Wheat, \$8@8.50.

PORTLAND, ORE.

Apr. 9.—Buying prices f. o. b. Portland: Alfalfa, \$19@19.50 per ton; valley timothy, \$20@21; eastern Oregon timothy, \$22@22.50; clover, \$15.50@16; oats, \$19@20; oats and vetch hay, \$18.50@19.50; straw, \$8@8.50.

BOSTON.

Apr. 11.—Per ton, No. 1 timothy, \$25.50@26; No. 2 timothy, \$22@24; No. 3 timothy, \$17@19; eastern, \$16@23; clover mixed, \$21@24. Straw—Rye straw, \$21@22; oat straw, \$13@15.

ST. LOUIS.

Apr. 11.—Receipts (two days), 35 cars, consisting of 23 timothy, 8 clover-mixed, 1 clover, 1 alfalfa and 2 prairie. Prices about steady, offerings moderate and demand fair. Sales:

Timothy—1 car no grade at \$12, 1 car No. 3 at \$13, 1 car do. at \$14, 1 car No. 2 at \$16, 1 car do. at \$17, 2 cars do. at \$18, 2 cars standard at \$19, 2 cars do. at \$20, 3 cars No. 1 at \$21.

Clover-mixed—1 car No. 2 at \$14. Alfalfa—1 car No. 3 at \$15, 1 car standard to No. 1 at \$26.

Prairie—1 car choice at \$17.

Good hay met a ready sale at full prices. Poor stuff in ample supply and sold slowly, with shading of prices. Arrivals were 17 cars timothy and clover, 1 car alfalfa, 1 car Nebraska, 2 cars packing, 1 car rye straw, 1 car oat straw. Prices follow (U. S. grades): Timothy—Choice, \$22@23; No. 1, \$20@22; No. 2, \$16@18; No. 3, \$12@15. Timothy and clover, light mixed—No. 1, \$18@20; No. 2, \$14@17; No. 3, \$11@14. Timothy and clover, medium mixed—No. 1, \$15@17; No. 2, \$13@15; No. 3, \$10@12. Timothy and clover, heavy mixed—No. 1, \$14@16; No. 2, \$12@14; No. 3, \$10@12. Timothy and grass, light mixed—No. 1, \$18@20; No. 2, \$14@16; No. 3, \$11@13. Timothy and grass, heavy mixed—No. 1, \$15@16; No. 2, \$12@14; No. 3, \$10@12. Clover—No. 1, \$14@15; No. 2, \$10@12; No. 3, \$8@9. Mixed grass—No. 1, \$12@14; No. 2, \$10@12; No. 3, \$9@11. Sample grade, \$7@9; alfalfa, No. 2 to choice, \$12@22; marsh hay, feeding and packing, \$10@12; west and southwest prairie, Nos. 1 and 2, \$12@15. Straw—Rye, \$11@12; oat and wheat, \$8@10.

MILWAUKEE.

April 11.—The Milwaukee hay market continued inactive throughout the past week, with no receipts or shipments reported. Quotations, purely nominal, on Saturday were: No. 1 timothy, \$14@15; No. 2 timothy, \$12@13; No. 1 mixed, \$13@13.50; No. 2 clover mixed, \$11@12; sample hay, \$6@8; marsh feeding, \$10; packing, \$9; rye straw, \$9@10; oat straw, \$9@10.

BALTIMORE.

April 11.—In comparison with the limited carlot demand in evidence present receipts and offerings of hay are more than ample for trade requirements, and the general market is quiet and lifeless. What little call that is heard is confined exclusively to top grades of timothy and choice light clover mixed. Inferior low grade stuff is dull and overlooked.

Straw of all kinds remains about steady as heretofore quoted. Demand for straw mainly of a jobbing character. Quotations follow: No. 2 timothy, \$19@19.50; No. 3, \$16@17.50; No. 1 light clover mixed, \$18@18.50; No. 1 clover mixed, \$17.50@18; No. 2, \$16@17; No. 1 clover, \$18. Straw—No. 1 straight rye, \$18.50@19; No. 1 wheat, \$15@15.50; No. 1 oat, \$15.50@16.50.

PHILADELPHIA.

April 11.—The hay market is quiet and unchanged, with moderate but ample offerings. Straw is in small supply and steady but quiet. Hay, federal grades: Timothy—No. 1, nominal; No. 2, \$18@19; No. 3, \$16@17; sample, \$10@15. Light clover mixed—No. 1, \$17@18; No. 2, \$15@16; No. 3, \$12@14. Medium clover mixed—No. 1, \$15@16; No. 2, \$13@14. Heavy clover mixed—No. 1, \$14@15. Light grass mixed—No. 1, \$17@17.50. Straw—Straight rye, \$15@15.50; wheat, \$15@15.50; oat, \$14@14.50.

MEMPHIS.

April 11.—Receipts of hay for the week were only 54 cars and with demand picking up a little tone of the market is steadier and price slightly higher. Better grades of both timothy and alfalfa are firm and the trade is talking of higher prices, as demand is expected to be continuous, though only for small lots. Quote: Timothy, one, \$22@22.50; standard, \$21@21.50; two, \$19.50@20. Alfalfa, one, \$27@27.50; standard, \$24@24.50; two, \$20@21.

DULUTH.

April 11.—A weak situation prevailed in the hay market during the last week. Prices eased from \$1@2 in timothy, mixed timothy and prairies. Current receipts were light as a result of dealers holding back shipments from the country. Closing prices per ton are unchanged, as follows: Timothy—No. 1, \$15; No. 2, \$13. Mixed timothy

—No. 1, \$15; No. 1, \$12. Prairie—No. 1, \$15; No. 2, \$12; No. 3, \$12. Midland—No. 1, \$10; No. 2, \$8. Straw—Rye, \$9; oat, \$8.

TOLEDO.

April 13.—The hay market is no better and prices remain unchanged from a week ago. The demand has been poor as it has been for weeks and receipts are light due to farm work. Farmers are being urged to hold their hay due to the possibility of a dry May, which would shorten the crop and no doubt boost prices. At least they are being advised to wait and see the outcome of this new crop because prices are not likely to go much if any lower.

Prices for last week per ton were as follows: No. 1 timothy, \$14; No. 2 timothy, \$12; No. 1 light clover mixed, \$13.50; No. 1 heavy clover mixed, \$12.50; No. 1 clear clover, \$11; No. 1 first cutting alfalfa, \$15; No. 1 second cutting alfalfa, \$20; sound dry wheat straw, \$8.50; sound dry oats straw, \$8. f. o. b. Toledo.

CINCINNATI.

April 13.—That farmers are taking advantage of the pleasant weather conditions by working in the fields, and not marketing their surplus hay was evidenced in the light receipts this week, which accounted to a large extent for the firmer market and advances in prices for the top grades. An improved demand, however, was also strengthening, but buying as is usual at this season of the year was more discriminating, and only the choice or top grades were wanted. Timothy sold best and advanced a dollar a ton, but mixed and clover also average better in price. Medium and common stuff failed to improve in values and were sold only because of the smaller offerings. The season is approaching when there will be an urgent demand for choice and top grade timothy and light mixed for racing use in territory tributary to this market and shippers are urged to consign only straight cars of No. 1 grade to obtain the premium usually paid for this class of hay. There is still a good demand for clover, but low grade stuff of all kinds sold slowly. No. 1 timothy, \$19@19.50; No. 2, \$17@18; No. 3, \$14@15; threshed, \$8.50@10.50; no grade, \$8@10. No. 1 heavy clover mixed, \$16@16.50; No. 1 light clover mixed, \$17@17.50. No. 1 clover mixed, \$16.50@17; No. 2, \$13@15; no grade, \$10@11.50; No. 1 clover, \$16@16.50; No. 2, \$12@15; no grade, \$8@10; No. 1 second cutting alfalfa, \$21.50@23.50; No. 2, \$17.50@19.50; No. 1 first cutting alfalfa, \$15.50@16.50; No. 2, \$13@15; sound sample grassy hay, \$9@11; wheat straw, \$8.50@9.50; oats straw, \$8@9; rye straw, \$13@14.

PITTSBURGH.

April 11.—Conditions here about the same as they have been for the last two weeks. Receipts are moderate, but are composed almost wholly of the lower grades of timothy; also clover and clover mixed. These grades are very slow sale and prices unsatisfactory. The top grades of timothy standard or better, also strictly No. 1 clover mixed hay, are in fair demand and prices on these grades remain firm. Quotations: No. 1 timothy, \$20@20.50; standard, \$17.50@18; No. 2, \$14.50@15.50; No. 3, \$12.50@13.50; No. 1 H. C. mixed, \$16@16.50; No. 1 L. C. mixed, \$16@16.50; No. 1 clover mixed, \$16.50@17; No. 2, \$10@13; No. 1 clover, \$16@16.50; No. 2, \$10@13. Straw—Receipts of straw are light, but equal to the demand and quotations remain unchanged. Quotations: No. 1 wheat straw, \$11.50@12; No. 2, \$11@11.50; No. 1 oat straw, \$11@11.50; No. 2, \$10.50@11; No. 1 rye straw, \$12.50@13; No. 2, \$11.50@12.

Receipts of hay, 79 cars; straw, 3 cars.

ST. LOUIS, MO.

April 13.—The receipts of hay on both sides of the river were considered moderate. The market is in a strong position for the good qualities of timothy as well as light clover mixed. Quick shipments will surely reach a good market. All medium grades continue to be rather dull and difficult to sell at reasonable figures.

Clover—Under very light demand and hard to place, even good grades. All medium grades difficult to move.

Alfalfa—Arrivals light. Market slow and dull, especially so on all medium grades.

Prairie—High grades in fair demand and selling to advantage. Medium and low grades difficult to sell.

Straw steady.

No. 1 timothy, \$21@22; standard, \$19@20; No. 2, \$15@16; No. 3 and sample, \$10@12; No. 1 clover mixed, \$17@18; No. 2, \$13@14; heavy mixed, \$14@16; No. 1 clover, \$16@17; No. 2, \$12@13; threshed hay, \$9@10; choice alfalfa, \$24@26; No. 1, \$22@24; standard, \$16@18; No. 2, \$13@15; No. 1 prairie, \$14@15; No. 2, \$11@13; rye straw, \$9@10; wheat straw, \$8.50@9.50.

CHICAGO HAY NOTES.

Light receipts have created a very active demand for hay that will grade No. 2 timothy or better and for No. 1 and No. 2 light clover mixed and the light grass, too. Even the low grades are selling better. Country loading is extremely light and still lighter receipts are in prospect.—Bridge & Leonard.

Timothy, and light mixed especially, are selling well. We anticipate a continued light movement of hay this month and that present prices will hold. Those who can load hay should endeavor to market a portion of their holdings.—Albert Miller & Co.

Demand good for all sound grades of

tame hay, which sells at firm prices. There is a demand for good soft packing prairie, but feeding prairie is not wanted.—Walters Brothers.

COUNTRY GRAIN NEWS.

Tahoka, Tex.—The safe of the Briley Grain Co. was broken into and \$30 taken.

Wichita Falls, Tex.—The Wichita Feed & Fuel Co. suffered a \$6,000 damage by fire recently.

Amarillo, Tex.—The Great West Mill & Elev. Co. are installing Globe Combination Truck and Wagon Dumps in their elevator.

Pampa, Tex.—The L. C. McMurtry Grain Co. will install Globe Combination Truck and Wagon Dumps at Hoover and White Deer. Their entire lines will then be equipped with Globes.

Dallas, Tex.—The Pealstone Mill & Elevator Co. contemplate improvements costing approximately \$37,000. The work will consist of a new one-story fireproof warehouse, a one-story office building addition of two stories to the present warehouse structure, and converting the present office building into a warehouse.

UTAH.

Ogden, Utah.—The Farmers Grain & Milling Co. has filed suit against Wesley D. Brown doing business as the Brown Brokerage Co. to collect \$3,051.61 on an open account.

WASHINGTON.

Seattle, Wash.—The Sunswet Cereal Co. has been established here.

Edwall, Wash.—H. C. Bancroft has been appointed temporary receiver for the Edwall Grain Co.

Granger, Wash.—Fire, starting in the basement, destroyed the Granger warehouse at a loss of \$35,000.

Spokane, Wash.—Kyle Bros. Grain Co. recently made assignment to its creditors. C. K. Lee has taken over the business for the creditors and will handle the concern's liquidation.

WISCONSIN.

Lomira, Wis.—Star Malt & Gr. Co. will install a Boss Air Blast Car Loader.

Forest Junction, Wis.—The elevator of Kurt Huebner has been sold to Herbert Krueger of Reedsville, after nine years of operation.

NONE SOLD AT TOP.

Within the past week a little more than 150,000 bushels of wheat have been shipped out of the Government elevator at Calgary for account of the Alberta Wheat Pool. Rumors from that place that the pool missed the top—about \$2.17 to \$2.19—are announced as not surprising, since no one knows anyone who succeeded in putting wheat across seas at or near the top.

A TRIFLE UPSET.

From the National Hay Press a young lady not familiar with the language of railroad men happened to be walking

American Bale Ties

To conform with the rules of the National Hay Association, hay must be well baled. The use of American Bale Ties accomplishes this. A broken wire on a bale of hay condemns the hay. Broken bales cost more than Bale Ties.

OTHER USES

For baling Excelsior, Shavings, Rags, and Paper. For bundling Barrel Heading and Staves.

No other form of wire has to stand more strain and abuse. Bale Tie Wire must be made in the highest perfection possible. American Bale Ties meet every requirement for which they are intended.

near a depot when a freight train was being made up. One of the brakemen shouted, "Jump on her when she goes by, run her down by the elevator and cut her in two, bring back the head end up to the depot." Screaming "Murder" the young lady fled from the depot.

DEPARTMENT OF AGRICULTURE APPOINTMENTS.

G. N. Dagger has been appointed by Secretary of Agriculture Jardine to assume charge of the Packers & Stock Yards administration of the United States department of agriculture, succeeding Chester Morrill, who has been appointed general counsel of the war Finance Corporation. Mr. Dagger has been actively engaged in the work of the administration.

Nelson Antrim Crawford, head of the department of journalism of the Kansas State College will become assistant to William M. Jardine, secretary of agriculture on May 1.

Crawford has been given a year's leave of absence by the school.

The Chamber of Commerce Seed Fund, Inc., has organized at Colorado Springs, Colo. A \$6,000 seed fund for the Pikes Peak region will soon be prepared to loan for purchase of seeds to those farmers who are unable to secure credit thru other channels. At a meeting of the directors last week, it was stated that already \$4,200 of the proposed \$6,000 had been subscribed by professional and business men.

Provisions, Etc.

RECEIPTS, TWENTY MARKETS.

Combined receipts of cattle, hogs and sheep at the seven leading Western markets and thirteen other points for the week, with comparisons:

	Cattle.	Hogs.	Sheep.	All kinds.
Past week.	229,000	522,000	273,000	1,024,000
Prev. wk.	226,000	451,000	254,000	931,000
1924.	204,000	727,000	215,000	1,146,000
1923.	230,000	817,000	255,000	1,302,000
1922.	182,000	568,000	205,000	955,000

Combined receipts at the twenty markets for 1925 to date, with comparisons, as compiled by the *Drovers' Journal*:

	Cattle.	Hogs.	Sheep.	All kinds.
1925.	3,423,000	11,798,000	3,879,000	19,100,000
1924.	3,360,000	13,979,000	3,730,000	21,069,000
1923.	3,439,000	13,102,000	3,923,000	20,464,000
1922.	3,225,000	9,787,000	3,677,000	16,689,000

CHICAGO PROVISION REVIEW.

CHICAGO, April 13.—The movement of provision values was irregular, with no material increase in the speculative trade and only a moderate business in the cash trade. Buying of lard by domestic consumers and exporters was rather disappointing, while the taking of cured meats, as well as fresh pork, was not increased to any extent. The trade on the whole was narrow and prices for future deliveries moved within a fair range, and at the close lard was 17½ to 22½ cents lower. Short ribs showed a decline of 27½ to 35 cents, and bellies 20 to 25 cents, as compared with a week ago. Consumption of hog products is said to be lighter owing to high prices.

Supplies of hogs were somewhat larger than expected, but activity on the part of shippers to eastern markets is absorbing a good percentage of the receipts at Chicago, so that supplies for

packers were rather restricted. Irregularity in hog values at times had an unsettling influence on the market for the cured product. On the declines, shorts and packers were the principal buyers. Reports from foreign markets were mostly of a discouraging character with prices broad and mainly lower. Cotton oil interests were credited with buying lard at times, while packers were the leading sellers.

Prices for the week follow:

		Close			
		Apr. 11.	Apr. 12.	Apr. 13.	Apr. 14.

SITUATIONS WANTED.

WANTED—Position as manager of elevator, or with good commission company; four years' experience grain, coal and feed. Can make small investment. All references. **BOX 76, Sparks, Kans.**

WASHINGTON SEED WHEAT LOANS.

Farmers in the drought stricken sections of eastern Washington were advanced \$85,095.30 for the purchase of seed wheat under the provisions of the bill passed by the legislature in 1923. The total amount collected on these loans in principal and interest was \$64,797.28, according to Fred W. Agatz, assistant director of the department of conservation and development. Of the amount advanced \$60,605.50 was for the purchase of spring seed wheat at an average price of \$1.52 per bushel while \$24,459.50 was for the purchase of fall seed. Collections on the spring wheat seed loans have amounted to \$57,912.98, while returns on the fall loans are now given at \$4,406.02. Owing to the extremely dry condition in Grant, Douglas, Adams and Franklin counties last season, it is problematical how much more of the fall seed account will be collected.

The Associated Corn Products Manufacturers opened offices this week at Room 729—208 S. LaSalle St., Chicago. Hugh G. Van Pelt is managing director and will conduct a feed research department and otherwise assist the corn gluten feed campaign which is now so strenuously conducted by all manufacturers, as parties to the work.

A twenty year average for dockage of cereals (dockage being mostly weeds) is nearly 27 ounces per bushel. The freight alone on dockage over that period was \$4,000,000, a complete loss to the farmer.

AMERICAN GRAIN EXPORTS.

The Department of Commerce reported the following exports of grain from the principal ports of the United States to foreign countries during the week ending April 11, 1925 (000 omitted):

Articles and countries.	Week ending			July 1,
	Apr. 11, 1925.	Apr. 12, 1925.	Apr. 11, 1925.	1924, to Apr. 11, 1925.
Barley	309	107	17,941	
Corn	113	637	5,865	
Oats	119	1	5,210	
Rye	1,380	110	33,365	
Wheat	1,312	575	170,748	
To Italy	136		23,819	
United Kingdom ..	344	226	36,512	
Other Europe	819		54,405	
Canada			48,614	
Other countries ..	13	349	7,398	
Total U. S.	3,233	1,430	233,129	
Canadian in transit:				
Barley	91	83	10,980	
Oats	72	97	10,029

BUSINESS AND TRADE CONDITIONS

EUROPEAN developments are again exerting a rather strong influence on American business. The present French crisis; the slowness with which German affairs are being readjusted and internal conditions in many European countries where trade balances with the United States are an important factor, are being closely watched. Politically there is no disguising the fact that the Hindenburg candidacy is a prelude to the restoration of the Hohenzollern dynasty; nor the sequence that the restoration of the Hohenzollerns would be a preliminary to a war of revenge. It is to be hoped that thoughtful Germans recognize that the victory of Hindenburg would mean an alienation of world sympathy and a strengthening of military preparation in France, Poland and Czecho-Slovakia.

Many of the Continental countries have been advanced large funds by either the American government or American bankers, and in spite of the unquestioned value of the Dawes report, foreign affairs are still sadly muddled.

Borrowed money has enabled the peoples of such foreign nations to re-engage in business; to acquire exportable goods and to manufacture articles, usually inexpensive if not cheap, intended for export. The sale of such surplus materials is proving slower than had been anticipated and in the United States, our exporters are likewise experiencing a smaller demand from trade among the above group of foreign interests than was expected. Proof of this within our borders is clearly seen in price revisions on exportable goods, not surprising in recalling the warning of well posted exporters to the effect that our manufactured and raw materials could not be widely sold at the prices we were asking in competition with foreign products.

We have been getting set for some time in contemplation of a large export trade but our policies to encourage and expand this business have been poorly defined, and with the notable exception of the splendid work accomplished by the Dawes committee, the United States remained aloof for too long a period at a time when Europe, the potential buyer of our surplus, was in sad need of financial assistance if she was to be placed in a position where American merchandise could be bought and paid for.

Housecleaning Time.

As the housewife gets out her broom, encouraged by the Spring atmosphere, so is President Coolidge and his administration cleaning out the cob webs of accumulated job holders. Not only is the value of many bureaus and jobs doubtful but the period for which the national budget has contributed to their maintenance is even more surprising. For instance, the war finance corporation is still drawing salaries, seven years after the close of the war. One of the commissions established many years ago to fix national standards for the threads on screws is still existent and presumably toiling laboriously in the work allotted to them.

These are but typical of some hundred or more commissions which it is understood are to be relegated to the ash heap. If the President's early and rigorous New England training, supported by a keen executive and administrative mind is to have the free play to which he is entitled we have no doubt the thousands of soft jobs, whose incumbents clutter up the rooming houses in Washington, will be vacated.

Federal tax reduction must wait upon and will be largely governed by the cut which is effected partly

through the above measures. Quite obviously, other administration plans of importance comparable with further tax reductions will likewise hinge upon the determination of a round figure reduction in the annual budget. When this figure is ascertained, the President will solicit the legislative branch of the Government to make effective his recommendations. Meanwhile, the "pets" of Congressmen will have submitted urgent pleas in justification of their jobs and just how strong the backbone of such Congressmen will prove to be in turning a deaf ear to their constituents is the "fly in the ointment."

Public opinion, however, reflecting the taxpayers' views is strongly back of the President and although in the final analysis there may be a give-and-take ar-

NO HEAVY U. S. SURPLUS

STATISTICALLY there is no burdensome surplus of wheat in this country and the carry-over at the end of the season will probably be smaller than the 100,000,000 bushels at the end of 1923-24, but how much under is problematical.

At least it is now certain that the extreme claims of the bulls regarding the domestic situation will not pan out as expected, but that the estimates made by ultra-conservative people will come close to being a fact.

The tendency to overestimate the domestic consumption, when the market is advancing, is largely responsible for this showing.

rangement forced upon Mr. Coolidge, the up-shot of the present effort is bound to be largely fruitful of good results.

Future Benefits of Tax Reduction.

When the necessary increased taxation was applied to the incomes of individuals over the country, it was assumed that in most, probably all, instances the tax would be passed along through an increased service charge or price on manufactured goods and hence ultimately paid by the consuming public.

Under the present plan of scaling down taxes, it may be expected under the same line of reasoning to see a reduction of consumers' prices made effective. Congress repealed the excess profits tax; substantially reduced the income tax and, particularly in the business of large corporations, lower prices for goods and merchandise should now be in effect. Price indexes do not, however, show that the public has shared in the anticipated benefits of tax reduction, because prices in the main show higher than for the period prior to the elimination of the excess profits tax. Public utility charges in some sections are the exception, but if they are reduced at all, such lower rates are not comparable with the single item of tax

reduction, as it entered into the manufacturing costs of such utilities. Leaders of the motor industry have asked Andrew W. Mellon, Secretary of the Treasury, to recommend to Congress a repeal of the war excise motor taxes, asserting that a five per cent reduction in the wholesale price on new passenger cars would follow such a procedure.

It is, of course, understood by all that other important factors in business may have increased in cost, but it is an outstanding weak spot in the further demands for tax reduction that reduced living costs of a substantial character are not even promised, much less now being enjoyed.

The New York Journal of Commerce recently expressed an important fact in an editorial entitled "Scaring the Patient."

Wise physicians are well aware that it is perfectly possible to frighten a patient into an illness that may be a good deal worse than the one he has or imagines himself to have. Some of them, therefore, keep back the real meaning of symptoms, while others make reassuring statements which are calculated to soothe the mind of the sick man, and sometimes do have the desired effect.

Something like this situation exists at the present time in business. The business world is in a position which resembles that of the morbid patient who has "messed about" for a long time with nauseous doses of one kind or another and has scared himself into a condition of hypochondria. Business forecasters and "economists" have pestered the community to death for months past with their analysis of the present condition of trade and industry, the probability of future "recession" and the nature of difficulties to be encountered in connection with money, banking, credit and foreign loans.

There ought to be an end to this whole morbid psycho-analysis of trade and industry. As a matter of fact there is nothing seriously the matter with business. It is doing very well in the matter of production. Money rates are low and likely to remain fairly low; foreign demand is at least respectable, and in most branches of trade there is every reason to expect a fair output and a reasonable demand for the goods.

The business world is in a substantially sound and healthy condition, with no particular reason to say much about it and certainly no call for the issuance of bulletins by councils of consulting specialists.

White House Reticent.

The personal reputation for silence which President Coolidge has earned is also an outstanding characteristic of official business at the White House. It is understood that hereafter general statements, prior to actual decisions concerning important matters will be withheld. This should overcome the objectionable release of rumors which are often harmful as they concern matters of foreign policy, tariff and other lines of business which are subject to such influence. It now appears that when an official statement is given, it may be interpreted as an expression of bona fide policy. The new arrangement should not delay information that is essential to the business of the country. The plan will protect us against the broadcasting of irresponsible opinions which have often in the past been entirely foreign to the true facts.

Railroad Operations.

Among the Western railroads, the important consideration of the last several weeks has been the plan towards reviving the St. Paul lines. When it is considered that the system covers approximately eleven thousand miles and the financial loss in terms of depreciated securities around \$500,000,000, the magnitude of the proposition is realized.

A unique feature is the fact that the United States Government is the largest single creditor, holding about \$55,000,000 of the road's paper.

It is very generally understood that the St. Paul's predicament is due to over-expansion and the acquire-

ment of unprofitable mileage, taken on since 1907. The latter coming coincidently with adverse legislation and the reduction of railroad rates overcame an early advantage in the original St. Paul lines which were operating with a particularly small bonded debt.

Today, the system faces an annual interest item of more than \$22,000,000, which in the re-organization must be reduced, through re-adjustment of capital.

MEMBERSHIP CONTRACTS ENFORCEABLE

THE State Supreme Court in Minnesota has handed down a decision that cooperative marketing associations under the Minnesota Cooperative Act to enforce membership contracts are constitutional. No sane person would deny the fact that an organization would not have the right to enforce a contract with a member who joined the association in full knowledge of what was expected. The part of the Minnesota Cooperative Act that does not set well with a free American citizen is the fact that it prohibits an innocent party from doing business with a member of the association. It takes away from him a right guaranteed to him under the constitution and it is not fair or equitable that he should be penalized in so doing.

STILL SEEING VISIONS

SENATOR McNARY of Oregon evidently enjoys being in the limelight. The trade has not forgotten his desire to have the Government take charge of the surplus in wheat and cotton and guarantee prices to the farmer. His latest vision is to provide a National plan for reclamation of waste lands. He would drain the swamp lands of well watered states and impound and furnish water for all the semi-arid regions in the Mountain and Pacific states; pull the stumps from the cut over lands of the Great Lakes region, and restore fertility to the worn out soil of New England.

He does not seem to realize that the country with the present available tillable lands can produce a surplus each year and still permit such land to lie fallow. What American farmers need is not bigger crops than they are at present able to grow, but a price for the crop that will show a profit. This scheme would be about as much benefit to the farmers as the McNary-Haugen bill would have been. Let the waste land fallow until the day of our need for its products.

A TAX ON FUTURES

WORD comes from Springfield, Ill., that the State Senate is expected to adopt the bill introduced by Senator Kessinger, which provides a tax of one-thirty-second of a cent for each bushel of grain sold for future delivery, exempting, however, farmers who sell grain they have grown.

We want to register a very emphatic protest against the measure, and for a number of reasons.

In the first place, it is a sales tax, and as we see it, there is no more reason for a sales tax on grain for future delivery than on a suit of clothes, a plow, a horse, or a farm.

In the second place future sales are simply an inexpensive form of insurance, enabling the man who buys the grain to always pay the grower the market price, and if a tax is levied upon that insurance, the seller of the grain is sure to be the one who will have it to pay.

In the next place, in exempting the farmer, class legislation is made of it, and there is no logical place in America for class legislation; and finally, the load of taxation upon the people of Illinois is already too burdensome and plans for reducing it and for lessening the number of people who are "feeding at the public crib," are certainly more in order than any which would increase the load and add to the already excessive army of state employees.

The idea of turning the money thus raised over to the public school fund is, of course, only a scheme to win approval for the measure, but it is a scheme

which may lead to its passage, unless the farmers and business men get busy, and at once.

As to the constitutionality of the measure, that we may well leave to the courts, although we seriously question it, especially in so far as any attempt may be made to enforce it on orders coming from points outside of Illinois, but if it should be found constitutional and if traders should find it impossible or inexpedient to pass the tax on to others, the logical outcome would be to divert such trades from Illinois exchanges to those in other states.

Calling the proposed law unwise or foolish or vicious will serve no good purpose and we can only add that in thus calling the measure to the attention of those vitally interested, we hope that opposition will be aroused, which will result in its decisive defeat.

MATCHES DANGEROUS

FIRES in elevators and cereal plants start many times in a peculiar way and from causes entirely unexpected. Recently, fire destroyed a grist mill in the South when an employee who had dropped a dime on the floor of the mill room, being unable to find the coin, struck a match to search for it. A spark from the match fell upon some packing that was saturated with oil and gasoline near a gas engine. In the efforts of the employee to extinguish the flame with his hat, a pile of dry velvet bean hulls caught fire which soon spread over the whole mill room and the plant was destroyed.

The use of matches and smoking around a plant should be strictly prohibited. The unexpected always happens.

ECONOMY NECESSARY

A FEW years ago, the packers were prohibited from handling other lines in connection with their packing business. Why, no one has ever been able to find out definitely. There is no line of business that operates on so small a margin of profit as the packers. They found that other products could be marketed on a narrow margin by their salesmen and that the economy could be passed on to the consumer. Economy of distribution seems to be what is being strived for and yet in this case, the very thing that was being accomplished was prohibited. The California Raisin Growers Organization which has developed a successful selling policy and agency finds that it can handle economically other products than raisins and is going to sell peaches and figs for other organizations. This is perfectly right and logical and there is no good reason why this economy should not be affected.

The point is, if it is perfectly right for the California Raisin Growers Organization to do this, why isn't it the right thing for the packers? Economy in distribution of food products seems to be the goal that all are striving for and when successful concerns can accomplish this, they should not be denied the privilege.

MISLEADING THE FARMERS

IN THE current number of a western farm paper which carries as its motto, "Good farming, clear thinking, right living, a weekly journal for thinking farmers," we find an editorial strongly recommending to the farmers, the establishment of a "lot of little packing plants, after the style of the Danish, everywhere over the corn belt."

Continuing its praise of the scheme, the article says, "One thing which makes these Danish packing plants successful, is that before the plant is built, they get a thousand farmers to agree that they will sell all of their hogs to the plant for a period of twenty years. If they sell their hogs elsewhere, they are to pay a fine of \$2.50 for each hog."

What a fine example of "clear thinking" this editorial is!

Just think of it. For twenty long years they are tied up to one little market, with its relatively high overhead, its more difficult problems of finance, of

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures from various statistical exhibits appearing weekly in detail in "The Price Current-Grain Reporter," these figures representing the past week, the preceding week and corresponding time last year, here assembled for ready reference:

continuous operation, and of the disposal of its finished product.

Clear thinking indeed! Is it any wonder the farmers resent being given so much advice?

LIFE A GAMBLE

EX-GOVERNOR JOHN M. PARKER of Louisiana in a recent address, referred to the farmer as follows:

"The farmer of necessity is a gambler. He has to bet on his seed, its fertility, the condition of his land, and then no matter how hard he may work, he must have normal weather, both of sunshine and moisture to produce his crops, and is at the very mercy of the elements in the fall, when he goes to see the farmer.

"The mills should want to see the farmer produce good crops and at a profit, and the farmers should reciprocate by desiring to see the mills with all of their machinery humming and working not only to pay good wages but good dividends."

For some reason or other, a good many of us are inclined to set the farmer apart and point to him as a shining, or as a horrible example, just as circumstances may seem to warrant, of what life in this wonderful country of ours, truly is.

It occurs to us, however, that business is a gamble for every man engaged in it, and while, in some instances, the odds may seem to favor this industry or the other one, or this man or that one, the odds are there nevertheless, and while in many cases, these odds are too great to be overcome, laying down on the job never has been known to lessen the odds, and persistent and intelligent effort usually helps to overcome them.

All life is a gamble and the quitter seldom wins.

THREE DOLLARS a year in the United States and Mexico; \$4.00 a year for Canada, \$5.00 United Kingdom, the Continent of Europe, Australia, and other countries in the Universal Postal Union. Less than a year at the same rate. Single copy 15 cents.

LETTERS from our readers are solicited on subjects of interest to those engaged in the grain and allied trades, news items, reports on crops, grain movement, new firms, contemplated improvements and cars leaving in transit.

THE ADVERTISING value of The Price Current-Grain Reporter as a medium for reaching the buying power of the grain, feed, seed, bean and hay industries is unquestioned. The character of advertisements in its columns testifies to the favorable opinion of and value received by our advertisers. If you would be classed with progressives, place your announcements in the trade's only weekly, which is always first to get the live, up-to-date news to its readers.

CHICAGO, APRIL 22, 1925.

GRAIN TRADE REVIEW

A LITTLE improvement in the outlook for the new winter wheat crop, as the result of rains over part of the belt, is noted the past week, but there is quite an important area in Texas, Oklahoma, and Kansas where no amount of moisture will cause a material change in the condition, and with a lack of subsoil moisture in other sections it will take constant showers to prevent a return of dry weather talk. This situation is having more or less effect on the market here, but as yet has failed to bring in the foreigner as a buyer of new crop winters for deferred shipment. To some extent this is due to the present liberal supplies of old grain, but it is very apparent that the bulk of the North American surplus is in the show windows, and there is still over two months of the crop year to go, in which to clear the remaining surplus from the United States and a longer period for the Canadian. An official report suggests that Canada has between 60,000,000 and 70,000,000 bus. still available for export, a good part of which is of low grade, and this grain is selling at a price well below a parity with American hard winters which prevents a liberal export business in domestic wheat, while foreigners as a whole show little disposition to take hold. With the liquidation in the May delivery, which usually comes at this season of the year, out of the way, it is hoped that the market will settle down, as the recent violent price changes are in themselves sufficient to keep buyers out of the market on a broad scale. Statistically there is no burdensome surplus of wheat in this country, and the carry-over at the end of the season will probably be smaller than the 100,000,000 bus. at the end of 1923-24, but how much under is problematical. At least it is now certain that the extreme claims of the bulls regarding the domestic situation will not pan out as expected, but that the estimates made by ultra conservative people will come close to being a fact. The tendency to overestimate the domestic consumption when the market is advancing is largely responsible for this showing. The exports from the southern hemisphere have fallen off materially and it now looks as though Argentina at least would still have a fair quantity of grain on hand to ship when the American crop year closes, but the quantity that can be shipped in competition

with the new winter wheat crop from this country will not be large. A liberal reduction in the quantities on ocean passage is regarded as a certainty between now and the end of the crop year unless North America ships at an extremely heavy rate, and judging from the reports as to foreign demand this is not likely.

Too Early for New Crop Estimate.
It is still too early in the season for accurate estimates as to the size of the new winter wheat crop, but based on latest private reports there is little probability of a yield anywhere near as liberal as last year, and inasmuch as the spring wheat crop last year was unusually large, the United States can prepare for an exportable surplus for the 1925-1926 season of 50,000,000 to 100,000,000 bus. smaller than the past year. This would suggest between 150,000,000 and 200,000,000 bus. for the country for the new crop year. The effect of the reduction on the world's market remains to be seen, as Canada last year had a small yield and may be able to make up the deficit. Seeding of spring wheat in the American Northwest has made excellent progress and is practically completed in South Dakota and Minnesota, and is far along in North Dakota. Much spring wheat has been put into the ground in the Canadian Northwest and the crop both sides of the international line has made a good start. Inasmuch as early seeded wheat has the best chance for a large crop it would not be a surprise if a liberal yield was secured, but at this season of the year this is largely guesswork, as the size cannot be determined until the grain is actually secured. Crop reports from abroad are generally favorable, and while a few sections need rain, the outlook taken as a whole is much better than at this time last year. In view of the high prices in exporting countries and the good outlook at home, it is not surprising that foreigners show little disposition to stock up freely. Private cables from Australia suggest that an increase of around 1,000,000 acres for the new crop would not be surprising, but the gain is not likely to exceed this figure. Plowing for the new crop in Argentina is progressing, and some increase in the area that will be seeded is indicated.

Coarse Grains.
While there has been some improvement in the demand for cash corn and oats and the visible supply has been considerably reduced from the recent high point, there is still room for a world of improvement, as the East has been taking hold on a relatively small scale. Kansas City and Chicago have the bulk of the corn at primary markets, and the demand will have to come sooner or later. However, there is a strong probability of liberal deliveries being made on May contracts unless elevator interests can turn over their hedges to advantage. Plowing for corn has progressed rapidly and much planting has been done in the Southwest and this work should get well under way in the more northern sections within a week or 10 days. Seeding of the new oats crop this side of the international line is practically completed, and the recent rainfall has given it a good start in the states of largest production.

GRAIN MARKET SUMMARY.

Receipts of wheat, corn and oats at primary markets the past week, with comparisons, follow:

	Apr. 18, 1925.	Apr. 11, 1925.	Apr. 19, 1924.
Wheat	2,838,000	1,821,000	1,943,000
Corn	2,318,000	2,081,000	3,718,000
Oats	2,998,000	1,925,000	2,609,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1924-25.	1923-24.
Past week.....	8,154,000	8,270,000
Preceding week.....	5,827,000	8,995,000
Since July 1.....	919,669,000	867,774,000

Liquidation was on in the May delivery the past week, and the market eased sharply, the nearby future drop-

ping from around 16 over July at one time to around 7c over, only to have the difference widen out again later on buying of May and selling of July by elevator interests. Foreign demand showed a little improvement toward the closing days of the week with business done via Montreal in American grain. Crop conditions in the Southwest continue to be closely watched by the grain trade, and private returns suggest that there has been little general improvement, taking the country as a whole, as compared with the outlook on April 1, while the loss in acreage may be greater than anticipated earlier in the season. Closing trades were 4 1/4 @ 14 1/4 c lower.

At no time were corn prices more than a fraction above the finish of the previous week, liquidation being on in May which more than offset a better cash demand early, but later removal of hedges against sales to the East with a marked reduction in the Argentine crop estimate led to buying and a strong rally. Argentine crop is officially estimated at 187,000,000 bus., against 276,000,000 bus. harvested last year. Exportable surplus is estimated at 120,000,000 bus. Closing trades were at net losses of 3 1/4 @ 4 1/4 c.

Oats prices averaged lower, but the market held within relatively narrow limits. Liquidation by longs in the May delivery was a factor. The cash demand of late has been better than reported, and some elevator interests have managed to work off a good part of the grain they accumulated during the past fall and winter. Closing trades were 3/4 @ 1 1/4 c. Rye broke badly due to liquidation, but there was heavy buying toward the last to remove hedges against sales for export both via the Atlantic and via Montreal, and a strong rally followed. The close was 5 1/2 @ 11 1/4 c lower. Range of prices the past week follows:

	High.	Low.	Apr. 18, 1925.	Apr. 11, 1925.	Apr. 19, 1924.

BUYERS AND SELLERS NECES-SARY

Shipstead Asked to Explain—A North Dakota Editor's Logical Conclusions.

MANY who should know are beginning to learn the true functions which the various grain exchanges of the country perform. This is clearly shown in the many editorials appearing in the newspapers of the country, especially the wheat growing states in regard to the recent advance and decline in the market price of wheat. The following editorial which appeared in the Grand Forks, N. Dak., *Herald*, is interesting and brings out clearly the thought we have tried to express in the above:

SHIPSTEAD AND THE WHEAT FLURRY.
Senator Shipstead is making a political issue of the recent fluctuations in the price of wheat. He insists that the midwinter advance of wheat to two dollars a bushel and better was uncalled for, unjustified, immoral, and brought about by speculators for their own base purpose. Senator Shipstead and his associates have varied their tune on wheat prices most decidedly. Their usual contention is that wheat is too low. No matter what the price, it should be higher, and it would be higher if it were not for the malicious manipulations of the vested interests. Last fall they were displeased because wheat advanced. The advance, they said, was not called for by anything in the real market conditions, and had been engineered for the purpose of lulling the farmers into a sense of false security so that they would elect Coolidge president. About the time the advance began a rainy period set in throughout most of the territory that was then marketing wheat. Threshing was delayed, in some cases several weeks. But the advance continued, nevertheless, and when the rains were over and threshing was resumed, the farmers found themselves several million dollars better off than if they had threshed and sold earlier. Moreover, the advance continued steadily after election, when all the considerations for which it was said to have been engineered had been disposed of.

Mr. Shipstead finds that during February the Chicago board of trade sold 1,581,594,000 bushels of wheat, or five times the world's visible supply. On this point Mr. Shipstead is slightly in error. The Chicago board of trade neither buys nor sells wheat. Its members, as individual business men, buy and sell wheat and other commodities for themselves and their customers. But, if Mr. Shipstead's figures are right, somebody on the Chicago board sold an immense lot of wheat. That looks bad. But suppose we put it the other way and say that somebody bought all that wheat. The people who sold must have had customers. Whenever a sale is made there must be a purchase. Those who sold were interested in having the price go down. Those who bought were equally interested in having it go up. Both were speculating, the one crowd for a drop and the other for a rise. If the sales tended to depress the market the purchases must have tended to sustain it. How does Mr. Shipstead interpret all that?

The sensational advance in wheat prices was speculative. Of that there is no doubt. All prices are more or less speculative. The price of any commodity which is constantly being produced and sold on an open market is the figure at which the estimates of those who have and those who seek to buy meet. It is affected by prospects as to future supply and future demand. Those prospects change from day to day, and the interpretation placed by different men on existing conditions differs radically. It seems that early in the winter a great many people overestimated the relative wheat shortage, and became eager to buy. They bid eagerly, and presently they began to bid frantically, and the higher the price went the stronger became the impression of shortage. At length people began to

realize that they had been dealing in exaggerations, and they concluded, with Mr. Shipstead, that the high prices were not justified. There was no corner. Nobody owned all the wheat. Prices were not "forced" up or down. They varied according to the varying estimates of many thousands of people as to what the price ought to be.

FEED GRINDING.

One of the side lines which has been of profit to the elevator man is that of developing a feed business. Many old plants have been remodeled and grinding equipment installed while a large number of new plants have been designed for the proper installation of grinding equipment. In the last issue of *Our Paper* an interesting article appears on feed grinding and the application of a magnetic separator for the removal of pieces of metal that may be mixed with the grain. We quote from the article as follows:

"In all the strictly wheat growing sections of the country, in fact wherever diversified farming is carried on, the feed grinding business is becoming of more importance. Where a few years

ago everything was shipped out, many stations now ship in, and where formerly a little chicken feed was ground as an accommodation, hog and cattle feed is now being put out by the ton. From an insignificant side line the grinding business is becoming the main source of income for a very large number of elevator owners.

INSTALLATION OF A MAGNETIC SEPARATOR.

ago everything was shipped out, many stations now ship in, and where formerly a little chicken feed was ground as an accommodation, hog and cattle feed is now being put out by the ton. From an insignificant side line the grinding business is becoming the main source of income for a very large number of elevator owners.

"Quantity production has come about through development of high speed grinders—first the single disc mill, then the high speed double disc attrition mill and now the hammer type grinder.

"Properly installed these high speed machines are not particularly hazardous. One of the worst features is that they produce a great deal of dust, but this is taken care of on the hammer type machines, at least, by the installation of dust collectors as a part of the grinder equipment. Attrition mills can be, and should be, so equipped. This dust is of a highly inflammable nature and considering the possibility of a spark being produced in the mill by tramp iron, the hazard is apt to be exceedingly great. Where a dust collector is used, the probability of a dust explosion is minimized as an explosion is very unlikely where the air is moving at a high rate of speed.

"It is generally considered, however, that some means must be provided for removing tramp iron from stock before passing it through any kind of mill or grinder. Outside of the fire hazard,

perfected a magnetic separator to sell at a cost within reach of any elevator owner. It is the best thing of the kind on the market, and is real protection against damage due to tramp iron. This consists simply of a length of 8-inch wood spout with a powerful electro magnet forming part of the under side. The magnet is energized by a small totally enclosed generator furnished as part of the equipment, which generator is belted up to some shaft used with the mill. A small section (S) of the bottom of the spout just below the magnet is held in place by the magnet and so counterbalanced that whenever the current is shut off from the magnet this section pivots to a position at right angles with the spout thus preventing the released iron from passing into the mill. Altogether it is a very practical device and one which we recommend to every user of a grinding unit."

NORTHWEST GRAIN DEALERS' CONVENTION.

R. J. Stephens, president of the Northwest Grain Dealers' Association, announces that the 1925 convention will be held at Walla Walla, Wash., on June 5 and 6. The territory covered by this organization comprises the states of Idaho, Oregon and Washington and more than 200 members are expected to attend the meeting, a program for which is to be announced soon.

IMPORTANT COURT DECISION

Margins Where Gambling Only Was Intended Cannot Be Legally Collected.

In refusing to review the case of Fenner & Beane vs. T. G. Holt, the United States Supreme Court upheld a decision of the United States Circuit Court of Appeals for the Fifth Circuit that the question of the right of a broker to recover money he had paid out and services he performed for his customer in selling cotton for future delivery turns upon the question of whether or not the customer intended to receive or deliver the product bought and sold and the brokers' knowledge of that intention.

The suit involved transactions in cotton on the New Orleans Exchange between Fenner & Beane of New Orleans, and J. J. Barrett of Macon, Ga., a local broker, and T. C. Holt of Macon. The latter placed his cotton orders to buy or sell with Barrett, who transmitted them to the New Orleans brokerage concern for execution. The transactions began on September 8, 1919, and during the succeeding three months something like fifty separate deals were executed. These transactions resulted in a loss to Holt of \$9,800, upon which, at various times, he made payments in the aggregate of \$4,500, leaving a balance of \$5,380 which, Fenner & Beane said, they paid out to opposing brokers and for commission and Government stamps placed on the contracts.

Holt advised Barrett from time to time that he did not expect to receive or deliver any cotton bought or sold by him and that he only proposed to take his profits and stated that he intended all his transactions simply to be speculating on the rise and fall of the market. In fact that he was simply gambling. Holt refused to pay the amount due, denying that he had bought or sold any cotton and contending that his were merely gambling transactions.

The district court submitted the question of whether or not the transactions were of a gambling type and the jury found they were and denied recovery to Fenner & Beane.

This decision stands in view of the refusal of the United States Supreme Court to review it.

1924 EXPORTS OF FOODSTUFFS.

Foodstuffs exported from the United States in 1924 increased \$127,028,000 over the previous year, when they reached valuations of \$978,583,000, according to the foodstuffs division of the Department of Commerce. In 1913 these foreign shipments amounted to only \$516,371,000, a difference of \$462,212,000 from the 1924 totals.

Distribution figures for 1924 reveal a generally smaller percentage of foodstuffs going to European markets in the past two years and a larger percentage going to North American markets and China. Italy is the only European country taking a larger percentage in 1923 and 1924 than in 1913.

In 1913 the foodstuffs exported to the United Kingdom comprised 30.9 per cent of the total United States exports of these products, as compared with 28.7 per cent in 1923 and 26.7 per cent in 1924. The Netherlands show an even greater proportionate falling off from 11.7 per cent in 1913 to 7.7 per cent and 8.9 per cent in 1923 and 1924, respectively.

In 1913 Canada took 7.7 per cent of the total exports of foods and ranked fourth as a market for these products. In 1923 Canada took 11 per cent and in 1924 15.6 per cent. In the last named year Canada was second only to the United Kingdom as a market for foodstuffs.

Exports of foodstuffs to Canada showed a gain of more than 73 per cent in 1924, compared with the previous year. This striking gain was almost entirely due to greatly increased shipments of wheat and rye. Virtually all the other leading items, such as meats, lard, eggs, citrus fruits, canned fruit and cottonseed oil, showed a decided decrease.

LONDON GRAIN SITUATION

April Unloadings to Be Smaller—Sound Milling Wheat Commands Better Prices.

By JACK BROOKS.

LONDON, April 5.—Imported wheat is lower here for June and July than for April and May delivery. Some 500 tons due within the next week include fine Canadian at \$16.35, Duluth and Australian \$16, and Argentine and Indian at just under \$16, all per 480 pounds, cash on arrival, unlanded. The new Indian crop for June is quoted here at \$15.26, Argentine at \$15.70 and Australian at \$15.72. Pressure to sell combined holdings of American and Canadian is reported here. New Zealand wheat, which sells well this side, is now in very small supply. Chile and New Zealand report harvests for February covering 1,400,000 and 170,000 acres. Crops are estimated at rather small totals. In the last two weeks some 2,000,000 hundredweights of wheat has been unloaded at London which, it is believed, constitutes a record. While the April unloadings are likely to be smaller, therefore, the effect on the spot trade tends to favor the miller who takes direct delivery to his mill, thereby saving the importer warehouse charges. The following table gives an idea of the trend in wheat prices the past three months:

	Liverpool cargo prices.		Per 100 pounds.	
	Jan.	Feb.	Mar.	Apr.
No. 2 red winter—				
Spot	\$3.50-3.85	\$3.60	\$3.10	\$3.10
Futures ..	3.38-3.72	3.32	3.03	2.92
Canadian best	4.48	4.46-4.20	3.88	3.82
Argentine ..	4.20	4.20-4.00	3.80	3.80
English F. A. Q.	3.45	3.65-3.36	3.32	3.32

London flour prices show a rapid downward trend the past three weeks, the following table giving the prices current to the opening days of April:

	Jan.		Feb.		Per bag of 140 pounds.	
	Jan.	Feb.	Mar.	Apr.	Mar.	Apr.
Good Canadian ..	\$7.45	\$7.30	\$7.00	\$6.70		
Town household ..	7.18	7.05	7.15-6.55	6.32		
All English	6.20	6.10	5.50	5.60		

London returns a wheat average of \$3.15, but this is limited to sales of British wheat and includes considerable poultry feed. There is very little sound local milling wheat under \$3.30.

In the maize or Indian corn market there is not a lot doing just now. Kibbled or broken maize is quoted at nearly \$2.50 per hundredweight. White maize meal is offered by South Africa here for prompt shipment at just on \$2.50 c. i. f., London. Since the beginning of February fair average quality maize meal has dropped from \$3.50 per hundredweight to the current figure of \$2.68, while maize of fair average quality is down from \$2.70 to \$2.28. Some very fine Indian corn has been on the market here and the trade considers it worth \$1 per quarter more than either North or South American quality. Oats keep pretty stable. The price in January for fair average quality was \$2.64 per hundredweight. The current price is \$2.62. For shipment this month Argentina is quoting oats at \$6.05, Cape Colony \$6.05, Chile \$6.10, Canada (No. 2) \$7, (feed) \$6—all per 320 pounds.

CROP REPORT NO. 2.

The prospects for the grain crops in the Northwest at present are very favorable and above the average for this time of year. Weather conditions have been exceptionally fine and farmers have not been delayed in their seeding operations. Good rains are reported in sections of Minnesota and South Dakota and scattered showers in North Dakota.

Owing to the advanced Spring, farmers were able to get their seed into the ground early, and for this reason more wheat has been sown than was at first anticipated.

With the exception of the Northern part of the Red River Valley, seeding is

practically completed in Minnesota and South Dakota. Early sown fields of wheat and oats show green. Farmers are plowing for corn.

In North Dakota seeding is progressing rapidly, and in the Southern Counties wheat is practically all in the ground, and some coarse grain has been sown. In the Central and Northern districts the amount of seeding varies from 50 to 75% of completion. Rather more wheat and durum are being stubbled in than usual, due to the fact that farmers were unable to accomplish the normal amount of plowing last fall.

Our reports from Montana indicate that seeding is general throughout the state. In the Eastern section, 40 to 60% of the work is completed and in the North Central part, 10 to 20%.

Our correspondents advise that Winter wheat has not made a very good showing, and that a large part of the acreage will be plowed up and sown to Spring Wheat and other crops.

The Winter rye crop of the Northwest shows a good condition generally, although there are a few districts where it has been thinned out by Winter killing.

From many sections of North Dakota and Montana we have reports indicating a large increase in flax acreage.

The crop situation as a whole seems the best in several years. On account of the early Spring it is probable that all available land will be sown to some kind of crop. The soil is in excellent working condition and the seed has gone into the ground under the most favorable circumstances.—*The Van Dusen Harrington Co., by W. G. Hudson, April 15.*

1924 FARM CROP VALUES.

With the exception of dairy interests and live stock producers, the farmers generally realized better profits in 1924 than in 1923, according to estimates of total values of farm products made public by the department of agriculture.

The combined value of crop and live stock production in the United States last year was \$12,404,000,000, which was \$56,000,000 more than in 1923.

Crop production had a farm value of \$11,404,000,000, compared with \$10,401,000,000 in 1923, but of this value some \$4,951,000,000 worth of crops were fed to live stock, whereas in 1923 the value of crops fed to live stock was \$4,286,000,000.

Live stock and live stock products are given a farm value of \$5,951,000,000, compared with \$6,233,000,000 the preceding year, nearly all animal products having decreased in value.

A decrease of \$66,000,000 in the farm value of dairy products produced in 1924 is shown, the department placing the 1924 valuation at \$2,586,148,000, compared with \$2,652,419,000 in 1923. The decrease is attributed to lower prices for all farm dairy products, except buttermilk, whey, and skimmilk.

The department points out that the gross value of either crops or animal products last year was exceeded only in the years 1917 to 1920, inclusive.

The value of the cereal crops in 1924 was \$5,220,000,000, or 45.9 per cent of the total of all crops, as compared with \$4,138,000,000 in 1923, or 39.3 per cent of the value of all crops in that year. Every cereal crop increased in value last year.

The value of the corn crop last year is placed at \$2,890,000,000, as compared with \$2,538,000,000 in 1923; wheat \$1,131,000,000 compared with \$743,000,000 and oats \$799,000,000 as compared with \$554,000,000.

Hay and forage crops are given a value of \$1,733,000,000, compared with \$1,619,000,000 in 1923.

Nearly all animal products declined in value as compared with 1923. Animals raised \$2,267,000,000 compared with \$2,440,000,000 and poultry products \$994,000,000 compared with \$1,038,000,000.

The Letter Box

Season Satisfactory.

Price Current-Grain Reporter: The seed season has been very satisfactory with us, and conditions are very promising at this time in our territory.—*Amenia Seed & Grain Co., S. J. Provan, Mgr., Amenia, N. D.*

Condition of Alfalfa.

Price Current-Grain Reporter: Have visited within the past week the main line of the Union Pacific, North Platte east, also some of the branch lines on other roads out of Omaha in the alfalfa producing sections.

The crop as a whole did not winter very well and there is a considerable quantity of it winter killed. Am very sorry to see this because it will mean that much less tonnage to move, although probably better all around marketing conditions next fall. I saw some fields that were 90 per cent gone; other fields were just a little damaged, but it is a little early to get any definite figures on the entire crop, but in the territories I have been in a fair estimate would be around 25 per cent on the average.—*J. C. Suttie, Omaha, Neb., Apr. 16.*

A Correction.

Price Current-Grain Reporter: We wrote you on April 7th, and this letter appeared in your last issue. If you refer to the last paragraph you will find that it reads, "Why are all other white beans so much cheaper than Michigan?" This should read, "Why are all other white beans so much higher than Michigan?" Will you kindly call attention to this in your next issue as the article is very inconsistent reading as it did?—*Geo. F. Dimond & Co., St. Johns, Mich.*

Illinois Shy of Rain.

Price Current-Grain Reporter: This section is short, so far in 1925 three to four inches of rainfall as compared to an average year, and from present outlook we may expect a dry crop season. Frequent showers would coax along the one-half of our winter wheat fields that show winter killing and vice versa. Dry, windy weather for the next few weeks would cause further deterioration.

By far the greater part of the acreage intended for corn has now been plowed and it seems probable that it is good policy this year to start planting early, in order to utilize all moisture now in the soil, so we expect to hear the click of the corn planters commence during the coming week. The season so far has been very favorable to the seeding and growth of oats; they look pretty across the fields now.

Most dealers agree with the government March 1 estimates of 36 per cent of our Illinois corn in farmers' hands on March 1 and only a moderate reduction in the amount since that time. Of course that does not mean as many bushels as in an average year for the total 1924 crop was below average.

Some complaints are reaching us of corn getting out of condition in transit, which may be expected during this, the germinating season of the year, but the fact still stands that Central Illinois corn is of heavier test weight and of generally better quality than most any other. After the spring breezes have taken their fling at the corn in the farmers' cribs and extracted a little more moisture from same we are expecting to see it grade number two and three and stand shipping most anywhere in safety.—*H. I. Baldwin & Co., Decatur, Ill., Apr. 18.*

On to Michigan City.

Price Current-Grain Reporter: The mid-summer meeting of the Indiana Grain Dealers' Association has been called for the Spaulding Hotel, Michigan City, for June 25-26.

The Chamber of Commerce of Michigan City, a real, live, up-to-the-minute organization, is interested in this meet-

ing and we anticipate splendid entertainment, including a visit to the State Penitentiary. We have the assurance of the club that they will get us in the pen and out again. This extraordinary feature is different from some of our criminal courts, as they can get the fellows in, but guarantee no exit, at least for a term of years.

We have invited the Michigan Grain Dealers to join us and, of course, we expect receivers from all the principal markets.

The ladies are especially urged to attend with their husbands, for special entertainment will be provided for them.

Michigan City is right on the great Michigan Lake, near the Sand Dunes and many other features of interest. The hotel makes a very liberal rate and many should make reservations at once.

It is not our purpose to have a long or tedious program, let it be ever so interesting, but short and snappy sessions will be held both the 25th and 26th. This will enable all to enjoy not only the convention program but the entertainment, and as one of our good fellows from Detroit said while attending a convention at Atlantic City in hot weather, "Mr. President, I move we do now adjourn and go washing with the girls." We have provided the surf and are looking for the Detroiters or other humorist whose conception of real pleasure is so far developed that he may be depended upon for the occasion.

Come to the convention. Stay two or three days.—*Chas. B. Riley, Secretary.*

HAY BUSINESS NOT SATISFACTORY.

DEPAUVILLE, N. Y.—The hay business for the shipper and farmer has been anything but satisfactory so far this season. There is more hay on hand in this section at this time of year than usual. But to offset this there are lots of farmers not going to sell at present price.

Farmers are plowing more than usual on account of high prices for grain.

As to demand, we hear about the automobile and truck which have their effect on hay and feeds. Although on a ten-year average the country seems to be as well picked up as ever.

It is early to determine this year's harvest; the seed bed is working fine. Grass is backward at this time.—*P. J. Lingenfelter, Apr. 17.*

PROPOSES CANADIAN WHEAT EXPORT TAX.

An export duty of 42 cents a bushel on wheat moving to the United States was advocated in the House of Commons on April 16, by W. Black, Progressive, South Huron. It would be a great boon to this country at present, he said. If the United States wished to take some retaliatory measure that was their affair.

MONTANA AGRICULTURE.

Abandonment of acreage on account of winter wheat kill in Montana will be much heavier than usual. Last fall farmers seeded 767,000 acres, an increase of 12 per cent over 1923, but the surviving acreage is less than a year ago. A greater part of the killed acreage will be replanted to spring wheat. Condition of winter wheat on April 1st was 57 against 88 a year ago. Rye showed a condition of 80 against 81 in 1924.—*Lauzier, Wolcott & Co., Butte, Mont., Apr. 18.*

CHICAGO GRAIN STOCKS.

Wheat stocks in all positions decreased 235,000 bus. last week, corn 1,707,000 bus., and oats 1,647,000 bus. Details follow, last three ciphers omitted, except in the totals:

	Public.	Private.	Total.	Last yr.
Wheat ...	286	3,496	3,782,000	14,140,000
Corn	4,704	8,491	13,195,000	5,495,000
Oats	5,986	10,223	16,209,000	3,443,000
Rye	2,123	176	2,290,000	1,864,000
Barley		264	264,000	189,000

For many years, the Boss Air Blast Car Loader has been installed in country elevators for the purpose of loading grain into the cars and recently, the manufacturers of this machine have adapted it to use as a cob blower. The accompanying illustration will show the variety of installations that may be had; first from the grain cleaner to burner and outside cob house or to wagons; second, from a cob bin in the elevator and also from the sheller in the basement to the same destinations as above mentioned. The blower may

Ninety-five per cent, or 250,096,000 bushels, of the estimated Canadian wheat crop of 1924, totaling 262,997,000 bushels, is reported by crop correspondents as having proved to be of mer-

A survey of the Paris market from an agricultural standpoint is to be made by W. A. Schoenfeld, European representative of the Bureau of Agricultural Economics, with headquarters at Berlin. Mr. Schoenfeld will be joined in Paris by Edwin Smith, agricultural expert, and they will join with Department of Commerce representatives for work in looking toward trade development.

"As yet relatively few farmers do this. Heretofore, for example, only limited use has been made of the department's intention to plant reports. These reports are issued twice a year, in March for spring crops like wheat, oats, barley, potatoes, and tobacco, and in August for winter wheat and rye. They show what

The Soo canal was open for navigation on April 15.

THE FARMER A BUSINESS MAN.

THE April number of *The Nation's Business* carries an interview with the new Secretary of Agriculture, William M. Jardine, in which he says, among other things:

"The American farmer is a business man. He has a greater capital investment than the average retail merchant. His business is vastly more complex than that of the average retail merchant.

"The labor problem on the farm is much more serious than in most other lines of business, especially because of the seasonal character of most farm work.

"More factors—at any rate, more factors that are not subject to human control—enter into agricultural production than into factory production, say. The selling, the distributing, end of the farm business has proved difficult, partly because the turnover is limited by nature herself, partly because the farm unit is such that the same man has had to attend to production, distribution and everything else. I wonder if the city business man who had to work under the same conditions as the farmer would be able to show as satisfactory results as the farmer shows, even today.

"The farmer is a much better business man than the public gives him credit for being. The farmer has a lot of native intelligence, fortified by sound business experience. If he didn't have, he wouldn't be able to weather the crises the way he does.

"Take, for instance, the readjustment of the last four years. I'd like to have you show me a city or town business man that could have done any better. There was a perpendicular drop in the prices of farm products, such a drop as was equaled in no other industry. The farmer's income was cut to practically nothing."

"But many farmers went bankrupt?"

"Certainly they did," Dr. Jardine assented, "but don't forget this: There's a lot of them who didn't go bankrupt, who weathered the storm in spite of everything. If you would compare the proportion of farmers who went under and gave up their business in this depression with the proportion of other business men who failed completely in any business panic, I think you'd be satisfied that the farmer has good business judgment and a lot of it. And a lot of courage, too. The average farmer went right ahead, in spite of no income and the slow turnover characteristic of the farm business, and made the adjustments necessary for going ahead. "The farmer knows he is a business man, and he knows that he has done pretty well in his business considering the difficulties that he has just gone through. The farmer who is not a plunger, who has followed diversified farming, who has tried to balance his farm operations as much as possible, is making some money again.

"The farmer is like any other business man. When things don't go well, he is inclined to blame the Government. We all do that—it's human nature. People have always done it.

"We perhaps have heard more complaint from farmers because farming is the most important business in the country and because farming suffered more severely than any other business in the deflation following the war. But I do not believe there was any more complaint from farmers than there has been from any other group of men in a similar situation.

"The farmer doesn't want to be a ward of the Government. Anyone who thinks that is all wrong. The farmer is an individualist from start to finish. If anything, he is too individualistic. He doesn't want the Government constantly monkeying with his business. He doesn't want to be babied or pitied by other people.

"What the farmer wants is just this: He wants his business to have an equal opportunity with other businesses.

"The sound farmer-businessman does not seek legislation to fix prices or to

regulate details. He knows that legislation cannot annul economic laws. The only legislation he wants is legislation that will assist him in getting reasonable credit on sound security—credit adapted to the peculiar nature of his business, which because of turnover and other factors cannot be treated in the same way as other lines of business; legislation that will help him build up machinery for marketing his products successfully; legislation that will put him on a par with other business men.

"There are certain special statutes dealing with banking, with corporations, with labor. The farmer does not demand legislation any more specialized, from his point of view, than those laws are from the point of view of the men particularly interested in them. He wants legislation not as a foundation, but as a shock-absorber."

"Isn't there talk that production ought to be curtailed instead of being increased?"

"Loose talk," said Dr. Jardine. "Even if the curtailing of agricultural production were practicable, it would not get us anywhere. The acreage of certain crops should be adjusted from time to time—now increased, now cut down.

"Farmers have already done this. For instance, they have decreased the acreage of wheat and of cotton and have devoted to other crops some of the land that they used to devote to these. But they don't let their land lie idle.

"Further, if a farmer plants an acre of wheat or of corn or of any other crop, it stands to reason he should get the biggest and best yield possible from that acre. From 1900 to 1920, in which time land values were rising, the acre yield should have steadily increased, and should be increasing now, for the increase in the prices of farm products is not enough to compensate for the rise in land values. As a matter of fact, however, the acre yield of corn in Kansas for the five years prior to 1900 was 23 bushels. For the five years ending in 1920 it was 20 bushels. Continuing, Mr. Jardine, said that what the farmer most needed was to diminish the spread between the price received by him and the price paid by the consumer, and stated that he was to get it mainly through co-operative effort and that the ultimate success of that movement would depend upon farmers' confidence in each other, upon the laying out of a careful program and upon the selection of capable, dependable leadership.

INDIAN EXCISE TAX.

The Indian government has announced that the cotton excise tax will be continued, contrary to the general belief in Indian circles that it would be repealed, according to a cable received from Trade Commissioner C. B. Spofford, Bombay. Two cotton mills at Bombay have closed since this announcement.

CANADIAN INVESTIGATIONS ALSO COSTLY.

The cost of grain inquiry commissions in Canada is analyzed in a return tabled in the House of Commons last week. Since 1897 there have been eleven of these commissions. Of six of these no record of cost is available. The rest cost a total of \$302,456, of which \$170,596 was spent on the Turgeon inquiry of 1923. Of these 11 commissions, one was a special committee of the House of Commons, 1897; five were royal commissions appointed by the Dominion, three were appointed by the Saskatchewan government, one was conducted (in 1916) by the Board of Grain Commissioners, and one was the Price Waterhouse audit of terminal elevators in 1918.

Secretary Jardine has reported to Director Lord of the budget that expenditures of the Department of Agriculture for this fiscal year would be \$1,332,460 less than the \$50,000,000 contemplated in the department's estimate last fall.

COUNTRY GRAIN NEWS.

[Concluded from page 19]

repaired following a fire which occurred in February, and they are again doing business.

Yale, S. D.—The Sheldon F. Feese Elevator Co. has added feed to the sidelines of its business and a large moisture-proof warehouse has just been completed.

Bryant, S. D.—The Stearns Elevator will be improved and electric power installed. H. L. Stearns has purchased the two old W. I. Thompson elevators which will be wrecked and sold.

TENNESSEE.

Memphis, Tenn.—The Fidelity Storage & Elevator Co. has been incorporated with capital stock of \$50,000, by S. T. Pease, John M. Treholm, H. L. McGeorge, John B. Edgar and W. R. Smith-Vaniz.

TEXAS.

Lindsay, Tex.—The Lindsay Elevator Co.'s elevator is now complete and ready for operation.

Knox City, Tex.—The W. R. Condron elevator is now owned by Ray Willis and is known as the Knox City Elevator.

Lockney, Tex.—The 50,000 bu. elevator of the Lockney Farmers Coop. Society will be sold at auction next month.

Liberty, Tex.—Jo-Mill Feed Store, Inc., chartered with \$6,000 capital by J. E. Josey, R. C. Miller and C. C. Chinski.

El Campo, Tex.—Fire destroyed a large hay barn owned by Wilbur Webb with a loss of \$10,000 partly covered by insurance.

Cleburne, Tex.—A. B. Deats Grain Co. has filed an amendment to its charter, decreasing capital stock from \$10,000 to \$5,000.

McKinney, Tex.—Hill & Webb Grain Co. is now erecting a two story iron clad 36x136 ft. building, costing \$10,000, which when completed, will be operated in connection with the firm's adjoining elevator.

UTAH.

Brigham, Utah.—The mill of the Jensen Bros. Mfg. Co. is undergoing a general overhauling.

Murray, Utah.—The Bennion Flour Mills, recently shut down for repairs, have opened for business.

Salt Lake City, Utah.—An office has been opened here by R. E. Miller, active in the grain and flour trade in Utah.

Richfield, Utah.—After a successful first year, the Sevier Valley Mfg. Co. will incorporate, and have decided to purchase the Salina Roller Mills which they leased.

WASHINGTON.

Seattle, Wash.—Webster-Rathke Grain Co. has incorporated with a capital stock of \$15,000 by E. A. Webster and Clarke E. Rathke.

Seattle, Wash.—Percy Brown, who has been in charge of the Ryer Grain Co.'s Portland office in the absence of Frank Ryer, has returned to this office.

WISCONSIN.

Fond Du Lac, Wis.—Arthur Miller was elected president of the Farmers Elevator Co.

The farm reserves of wheat in Canada are placed at 39,000,000 bushels, against 71,000,000 last year, and of this quantity around 35,000,000 bushels it is figured will be required for seed according to Chicago estimates, which would leave only 4,000,000 bushels in farmers' hands for market.

Your Saving Will Pay For It

Insurance companies give reduced rates for elevators with the Dodd System of lightning protection.

This saving will pay for your installation.

Thus it costs you nothing to protect your elevator from the danger of loss from lightning. For over 32 years the Dodd System has been the standard—it is nationally advertised, trade marked and known to nearly everybody.

Write for "Lightning" book today—get the facts. Don't run the risk of losing your elevator.

Legal, Traffic and Arbitration Decisions

COURT DECISIONS.

Commission merchants purchasing grain from elevator owner holding it as bailee held to have acquired no equitable lien as against bailor for advances to bailee. Where defendants, doing general grain commission business, advanced money to elevator owner under promise that grain deposited there by plaintiffs and held by elevator owner as bailee should be consigned to defendants, who might sell it and reimburse themselves for money advanced, held that elevator owner, being merely bailee of such grain, could not defeat plaintiffs' right in such grain or create an equitable lien thereon except by sale in due course, and hence defendants, by their purchase thereof, which was not in due course of business, acquired no equitable lien.

Agent of elevator owner, holding grain as bailee, held without power to complete contract for sale of grain after death of owner. Under rule that death of principal revokes all authority of agent, an agent of elevator owner, holding grain deposited in elevator merely as bailee, held without authority, after death of owner, to complete contract for sale of such grain to defendants, which sale was not in due course of business and gave defendants no equitable lien thereon, and shipment of such grain to defendants constituted a conversion as to owner of grain.

Owners, depositing corn in elevator commingled with common mass, held to have unity of interest entitling them to sue jointly for its alleged conversion. Plaintiffs who deposited corn in varying amounts in an elevator, which corn was commingled with common mass, were tenants in common of such grain, and therefore had such unity of interest in it as to entitle them to jointly sue for alleged conversion of such corn. —Sawers Grain Co. v. Goodwin. (Ind. App. Ct. S. F. Rep. 146-838.)

TRANSPORTATION MATTERS.

Tariffs Suspended.

The Interstate Commerce Commission has suspended tariffs which proposed increased rates on grain and grain products from Cairo, Chicago, Peoria and St. Louis and related points, to Alliance and Ravenna, Ohio, and related points.

A Huge Deficit.

Taking fixed charges into account, the government owned Canadian National Railways had a deficit in 1924 amounting to \$54,860,419.

Some interesting facts connected with this experiment in governmental ownership are: Business of the roads has increased 3.9 per cent; number of

employees has increased 60.3 per cent; service per employee has decreased 35.1 per cent; efficiency by ton and passenger mile test has declined 43.3 per cent.

Allowed to Intervene.

The Millers' Traffic Committee has been permitted by the I. C. C. to intervene in case No. 16510, the complaint of the American Feed Manufacturers' Ass'n, which alleged that rates on cottonseed meal and cake from points in Texas, etc., to points in the East, were in violation of sections 1, 3 and 4 of the act.

Full Address of Consignee.

In order to reduce delay and possibly non-delivery of freight, the National Industrial Traffic League is making a plea for the observance of the American Railway Association's circular No. D-11-166, asking that all shippers place, on arrival notices sent out, the full address of the consignee. The circular warns against sending post-cards without the street address, since the Post Office Department does not give directory service without that information.

The circular, in part, is as follows: "United States post office department does not give directory service to postal cards which do not show the street address and will not undertake to make delivery of same by mail carrier. To insure delivery of arrival notices at the larger cities, it is therefore important that wherever possible to do so, street address be shown thereon, and where it is not possible to obtain the street address of the consignee, notices should be deposited in a two-cent stamped envelope bearing return address. Members are, therefore, again urged to instruct agents at points of origin to secure from the shippers complete address of consignee, which should be shown on bills of lading and carried on waybills to destination, and the agents at destination should be instructed to exhaust every effort to ascertain the street address of consignees when it is not known."

Favor Group Rates.

The Galveston Chamber of Commerce, Galveston Cotton Exchange and the Board of Trade at Galveston favor the grouping or equalization at the same or common rates on agricultural products and other commodities moving from and to points in Texas, Oklahoma, Arkansas, Louisiana and other Western and Southwestern states, the Interstate Commerce Commission is advised.

Galveston business men urged these views upon the commission in connection with the commission's forthcoming investigation of the rate structure generally. They declared that competition between the ports should be promoted and encouraged within reasonable limits and not discouraged by the application of rigid mileage rates to and from the ports. They said that the Government could not be expected to continue appropriating large sums of money annually for the maintenance of the harbors and channels serving Texas ports if the facilities were not to be used except to handle the overflow traffic from the port of Houston.

DIGEST OF ARBITRATION DECISIONS.

In a decision by the arbitration committee of the Grain Dealers' National Ass'n, the following principles were announced:

Geo. W. Cole Grain Co., Peoria, Ill., vs. Albers Commission Co., Omaha, Neb. (Diversion beyond contract destination without the permission of the seller is entirely at risk of buyer. The intent of a contract can be interpreted only through the wording of such contract in connection with the general circumstances surrounding the trade.)

Park & Pollard Co., Inc., Buffalo, N. Y., vs. K. & E. Neumond Co., Inc., New Orleans, La. (Where mail confirmation of a trade is made only by the seller and the buyer simply accepts the terms of the seller, it would naturally follow

that the confirmation of the seller would be final as to terms, but where the confirmation is found not to be clear or subject to more than one interpretation, the loss or liability, if any, should be divided with the buyer assuming the greater part.

Armour Grain Co., Chicago, Ill., vs. Churchill Grain & Feed Co., Inc., Buffalo, N. Y. (When buyer gives seller

shipping directions on a contract, the time of which has expired, without any agreement, as to the length of time in which seller has to ship and without objecting to the fact that the contract was overdue, the seller has a reasonable length of time in which to fill contract and such reasonable time is construed as ten days after receipt of shipping directions.

Security from Lightning Losses

The Mutual Fire Prevention Bureau names lightning as one of the two chief causes of elevator fires during 1924. Take heed and protect yourself now. Insist on Underwriters' Laboratories Master Label installation. Small in cost in proportion to fixed investment, it assures your insurance reduction.

Fire protection is not available to most grain elevators. Stop this greatest of fire menaces. Saving on insurance pays for a Security System in a few years.

We are manufacturers and installers of Underwriters' Laboratories approved lightning conductor systems for grain elevators, warehouses, factories, smoke stacks and other large structures. Write for specifications and information on how to prevent lightning losses.

Barley

CHICAGO BARLEY PRICES.

Following is the daily range of quotations for spot malting barley quotations at Chicago:

Apr. 13....\$0.80@0.95|Apr. 16....\$0.80@0.93
Apr. 14.... .80@ .90|Apr. 17.... .85@ .95
Apr. 15.... .80@ .90|Apr. 18.... .85@ .95
Receipts of barley at Chicago for week ending Apr. 18, 1925, were 75,000 bus., compared with 33,000 bus. same week 1924; shipments, respectively, 150,000 bus. and 71,000 bus.

RECEIPTS OF BARLEY.

Carload receipts of barley last week at different points named, with comparisons, follow:

	Mpls.	Dul.	Chi.	Win.	Mil.
April 13.....	32	5	17	24	37
April 14.....	5	1	12	42	6
April 15.....	18	7	9	24	21
April 16.....	7	2	1	23	11
April 17.....	13	7	5	25	8
April 18.....	6	..	13	19	17
Total	81	22	57	157	100

BARLEY MARKETS.

MILWAUKEE.—Malting demand for barley was very limited last week except on Monday when prices closed 2c higher and in response the market was easy and quotations for the week closed unchanged with malting at 81@95c and pearling at 94@96c. Receipts were light and trade was quiet. During the period 100 cars were received as compared with 63 cars the previous week and 86 in the same week of 1924.

Choice to fancy, 48 to 50 lb. test, quotable at 95@96c; fair to good, 44 to 47 lb. test, 85@95c; light weight, 40 to 43 lb. test, 80@92c; feed, 70@85c.

Iowa quoted 96c, as to quality; Wisconsin, 80@96c; Minnesota, 80@96c; Dakota, 80@95c; feed and rejected, 70@86c.

MINNEAPOLIS.—Barley of other than malting was generally difficult to dispose of during the current week. Feeders did not seem to be interested in current offerings until Friday, when they began to come into the market when the option began to perk up a bit. Offerings were light, which probably prevented a further decline in bids. Today's quotations were in a range of 70@86c. Local stocks total 1,809,983 bus. vs. 2,031,920 bushels last week and 378,880 bushels a year ago.

FT. WORTH, TEX. — Barley receipts have diminished and very little is obtainable here with a fair demand at higher levels and today, April 18, barley is selling here as follows, basis Group 1: No. 3, 87c; No. 4, 86c; 40@85c; 38@83c.

DULUTH.—Trading was limited in the barley market here during the last week. Only 9 cars were offered on the tables and the bulk of them were applied on sales. Demand came chiefly from feeders. Prices are unchanged at from 64 to 80c.

CHICAGO—Offerings small and demand good and Saturday's full market values paid for few cars sold. Sales were at 86@89c. Weekly exports 353,000 bu.; last year, 231,000 bus. Visible decreased 197,000 bu.; last year decreased 30,000 bu.; totals, 3,301,000 bu.; last year, 1,132,000 bu. Local stocks increased 17,000 bu.; total, 264,000 bu.; last year, 189,000 bu. Market closed firm to 1c higher, with 90c bid for a car. Malting quotably 85@95c; feeding and mixing, 75@93c; screenings, 40@65c. Local inspection, 6 cars.

KANSAS CITY—With but one car arriving from the country, the trade in barley this week was chiefly a matter of selling from store. Four thousand bus. were shipped on orders from poultry feed manufacturers. Heavy barley was wanted. Prices advanced 3@7c per bus. No. 3 closed at 85@90c and No. 4 at about the same figure. Elevator stocks decreased 4,000 bus. to 6,000, as against 96,000 last year.

RYE MARKETS

CHICAGO RYE FUTURES.

Following is the range of future prices for rye for the week ending April 18:

Apr.	May.	July.	Sept.
13 1.15 1/4 @ 1.19 1/2	1.08 3/4 @ 1.12 1/4	1.00 1/2 @ 1.03	
14 1.13 1/2 @ 1.16	1.07 1/2 @ 1.10 3/4	.99 3/4 @ 1.02	
15 1.13 @ 1.17 1/4	1.09 1/2 @ 1.13	1.01 5/8 @ 1.03 1/2	
16 1.03 @ 1.13 1/2	1.01 @ 1.10 1/2	.95 @ 1.02	
17 1.06 1/4 @ 1.11 1/4	1.02 @ 1.08 3/4	.96 1/2 @ 1.01 1/4	
18 1.07 1/2 @ 1.11	1.05 1/2 @ 1.08	.97 3/4 @ 1.01	

Receipts of rye at Chicago for the week of Apr. 18, 1925, were 11,000 bus. vs. 94,000 bus. same week of 1924; shipments were 11,000 bus. vs. 3,000 bus. same week of 1924.

RYE SPOT QUOTATIONS.

Closing outside prices for rye of No. 2 quality cash for the week ending Apr. 18, were:

	Mpls.	Dul.	Chi.	Win.	Mil.
Apr. 13.....	13.109 1/2	1.11 1/2	1.16 3/4	1.15	1.15
Apr. 14.....	1.11	1.11 1/2	1.15 3/4	1.16 3/4	1.14
Apr. 15.....	1.08	1.09	1.15	1.13 3/4	1.14
Apr. 16.....	1.01	1.02 1/2	1.12	1.07 3/4	1.10
Apr. 17.....	1.06	1.07	1.10 1/4	1.10 3/4	1.06 1/2
Apr. 18.....	1.03	1.04	1.08 3/4	1.08 3/4

RECEIPTS OF RYE.

Carload receipts of rye at the principal primary markets in the Central West for the week ending April 18:

	Mpls.	Dul.	Chi.	Win.	Mil.
April 13.....	6	36	5	6	..
April 14.....	5	16	1	10	1
April 15.....	2	15	2	4	1
April 16.....	6	5	3	5	2
April 17.....	8	23	3	8	3
April 18.....	5	13	7	8	..
Total	32	108	21	41	7

RYE MARKETS.

MILWAUKEE.—Rye was in comparatively good demand in the Milwaukee market last week and prices ruled firm except on Thursday and Friday when a reversal of form caused them to drop 9 1/2c for the week. Shipping demand was good throughout the week and receipts were light. Offerings were mostly offgrade with high moisture content and discounts were liberal. Dry was scarce and wanted. Receipts were eight cars as compared with nine the previous week and eight in the same week of 1924. Market closed at \$1.06@1.07 for No. 2, inside for Wisconsin, ranging at 1@2c under May price.

NEW YORK.—There appeared to be a fair demand for rye during the week and sales were estimated around three to four million bushels in all positions.

DULUTH. — Traders were given heart failures over the antics of the rye market during the last week. Prices were forced down sharply at times by operators anxious to reduce their holdings, and in the absence of exporters' interest. Receipts were light from the country but the disposition of the heavy stocks in the elevators was a subject of conjecture among operators. At one stage during the week the market in No. 1 rye was off 12 1/2c but some recoveries were made later and final prices were down 10 1/2c at \$1.04.

MINNEAPOLIS.—There were some elevator sales of rye reported during the past week. Road offerings comparatively light and not much of any competition, especially for the poor quality. Choice milling rye, however, was in good demand right through the week and got better as the week drew to a close. Today's stocks in local elevators totalled 949,146 bushels vs. 973,682 bushels last week and 7,909,342 bushels a year ago. Range of sales on today's market was 32@42c over May for No. 1 spot; No. 2 at 12@32c over.

CHICAGO—Closed 1@2 1/2c higher for futures and no sales of car lots reported. Trade was moderately large and the market fairly active. Better class of buying in evidence, which was influenced in the main by the strength in wheat. Selling was not very pronounced and was largely local. Seaboard reported some export business being worked, but amount not disclosed. Visible supply decreased 2,705,000 bu. and total is 17,361,000 bu.; last year, 21,559,000 bus. Local stocks increased 7,000 bu. to 2,290,000 bu. Exports for the week were 3,

536,000 bu. against 857,000 bu. a year ago. Seaboard clearances 275,000 bu. Car lots were in fair demand at May price for No. 2. Offerings light. Local inspection 53 cars and were largely to be applied on contracts.

BUCKWHEAT MARKETS.

CHICAGO—Fancy Jap mixed and silver hullled quotably at \$1.95@2.00. Dirty seedless.

MINNEAPOLIS—Japanese, spot, \$1.85; silver hull, spot, \$1.65@1.70; mixed, spot, \$1.65@1.70.

ST. LOUIS—Quoted at \$2.20 per 100 lbs. nominal.

BUFFALO—Buckwheat, mixed, per 100 lbs., \$2.25; silver hull, do, \$2.10.

MILWAUKEE.—Prices, per 100 lbs., are: Silver hull, \$2.10@2.15; Japanese, \$2.20@2.25.

Beans and Potatoes

Quotations follow for bids of good quality condition beans and potatoes sacked, per cwt., unless otherwise specified, as of week of Apr. 18:

Beans—Chicago—Fair trade at steady prices. Remaining supplies of old beans limited and quotations possible in a jobbing way. Spot navy beans, Mich., fancy, \$6.25; red kidney, fair stock, \$10; large, dark, extra quality, \$10.50.

ST. LOUIS—Quote choice hand-picked Michigan white beans at \$6.75 and prime machine-picked at \$6.50 per 100 lbs. Scotch peas 7 1/4c, green split peas 9c and yellow 7c per lb. Lima beans (choice car lots f. o. b. St. Louis), \$2.82 per bbl.

Boston—Car lots, per 100 lbs., N. Y. and Mich., choice hand-picked pea beans, \$6.50@6.75; fair to good, \$6.25; California small white, \$8.35@8.50; yellow eye, extra, \$6.50@6.75; red kidneys, choice, \$10.25@10.50; fair to good, \$9@9.50; California limas, \$14.50; native green peas, \$7@7.50; Canada, \$5.25@5.50; split, \$5.50@5.75. Jobbing prices, 25 to 50 cents above car lots.

San Francisco—Whites, small, 8 1/4c; do, large, 7c; pinks, 9c; limas, 15c; cranberry, 8 1/2c; kidney, 12c; Mexican garbanzas, 11 1/2c; lentils, large, 9c; do, small, 8c; black eye, 11c; Mexican reds, \$8.85 per cwt.; speckled bayos, 8 1/2c; bayos, 8c. Peas—Split peas, yellow, 7 1/2c; green peas, 8 1/2c.

New York—Very light movement in most varieties Friday and no new features developed, with general feeling easy. Pea beans were unsteady and offered freely at \$6.25. Red and white kidneys very dull sale and tended lower. California limas steady to firm at mostly \$15. Black eye peas barely sustained. Domestic—Marrow, \$9.50@9.75; pea, choice, hand-picked, \$6.25; pea, screened and prime, \$5.75@6.00; red kidney, \$10; white kidney, \$8.75@9; lima, Cal., \$15. Imported—Marrow, \$8.75@9; white kidney, \$8.25@8.50; lima, Mad., 1924-25, \$12.50; 1923-24, \$11.50@11.75; 1922-23, \$9@9.50; lima, Europe, large, \$11.75; medium, \$11.25; small, \$10.50. Peas—Domestic—Black eye, \$10.75; yel. split, \$6.25@6.50; gr. split, \$7.75@8. Imported—Green, Japan, \$6.50@6.75; Holland, \$5.75@6; yel. split, \$5.50@6; gr. split, \$7.75@8; chick, Mex., imperial, \$11.75; monster, \$11.50; large, \$9.50; small, \$7@7.50.

Potatoes—Chicago—Market was quiet and prices about steady. Demand was light and from both local and shipping interests, and buyers were restricting their purchases to absolute needs. Ordinary and poor grades were particularly slow to sell and in many cases price shading was necessary to effect sales. Fancy quality was scarce but wanted by the trade. Receipts were 48 cars and cars on track 168. Sales reported today were: Per 100 lbs. Round white, Wisconsin, sacks, 1 car at 75c, 3 cars at 80c, 1 car at 82 1/2c, 8 cars at 85c, 2 cars at 90c; Minnesota, 2 cars at 75c; Idaho russets, 1 car at \$2.60, 5 cars at \$2.75; Red Rivers, 1 car at 80c, 1 car at 85c. Bulk, per 100 lbs., Wis., dustys, \$1@1.10; ordinary and poor, 80@95c; round white, sacks, Wis., 95c@1.05; ordinary and poor, 85@95c; Idaho russets, \$2.25@2.50; Ohios, Red Rivers, 80@95c. New potatoes—Are increasing; demand is fair. Bbls., Florida, Spaulding rose, \$7.25@7.50; No. 2, \$5.25@5.50; No. 3, \$3.25@3.50; boxes, No. 1, \$2.25; No. 2, \$1.75; sacks, Texas triumphs, 100 lbs., \$4.50; Bliss triumphs, boxes or ham-pers, \$3. Old—Boxes, Idaho, repacked, moderate; light demand noted. Bus., \$2.25@2.50. Sweet potatoes—Arrivals Illinois, Jerseys, \$3; hampers, Tenn., Nancy Halls, \$2.75; Illinois, \$3; Jerseys, eastern, kiln-dried, ordinary, \$2.50.

New York—Florida potatoes met a better demand at the former prices ruling; Bermudas continued to drag; old sack potatoes very slow; Jersey basket sweets steady and unchanged. New potatoes—Fla., bbl., No. 1, \$5.25@6.25;

No. 2, \$3.25@4; No. 3, \$1.50@2; Bermudas, bbl., No. 1, \$7@7.50; No. 2, \$4@4.50; No. 3, \$2@2.50. Old potatoes—Me., bulk, 180 lbs., \$1.90@2.40; car lots, cwt., \$1@1.10; 165-lb. sk., \$2@2.25; 150-lb. sk., \$1.75@2.10; state, bulk, 180-lb. sk., \$1.75@2.10; 165-lb. sk., \$1.75@2; 150-lb. sk., \$1.50@1.75; L. I., bulk, 180 lbs., \$3.25@3.60; 165 lbs., \$3.15@3.40; 150-lb. sk., \$2.75@3.15; 3-bu. sks., \$2.50@2.75; Jy., bskt., \$1@1.50. Sweet potatoes—Jy., bskt., \$1@3.50; Del. and Md., bskt., \$1@2.75. Yams—Jy., bskt., \$2.

COAST GRAIN PRICES.

Quotations on grain, reported by grain exchanges on the Pacific Coast as of April 16, are as follows:

	April.	May.
Wheat—	Bid. Ask. Bid. Ask.	
Hard white.....	\$1.55 \$....	\$1.55 \$....
Soft white.....	1.55	1.55
Western white.....	1.52 1.60	1.52 1.60
Hard winter.....	1.50	1.50
Northern spring.....	1.50	1.50
Western red.....	1.51 1.59	1.50 1.59

Corn—No. 3 E. Y. ship., 43.00

Millrun, stand., 29.00 32.50 30.50 32.50
Bags—Spot, 10 1/2c bid; July, 11 1/2c bid, 12 1/2c asked; domestic, 12c bid, 12 1/2c asked.

Special bid—5,000 bus. western red wheat, last half April, shipment to Puget Sound, \$1.56 bid, \$1.60 asked.

Flour—City delivery prices, 49s: Family patent, \$10.40 per bbl; family pastry, \$18.50; whole wheat, \$8.40; graham, \$8.20; bakers' hard wheat, 98s, \$9.40; bakers' bluestem, patents, 98s, \$10.10; bakers' pastry, 98s, \$8.30.

Millfeed—City delivery prices: Millrun, \$37 ton; middlings, \$49; scratch feed, \$66; rolled barley, \$49; cracked corn, \$57; rolled oats, \$49.

San Francisco, Apr. 16.—The grain price record book of the Grain Exchange carries the following as the latest quotations: Barley—Feed, \$1.65@1.75; shipping, nominal.

Wheat—Feed, \$2.90@3; milling, \$3.10. Oats—Red feed, \$1.80@1.90.

Millfeeds—Shorts, \$38.50@40.50; middlings, \$49@52; millrun, \$36@39; bran, \$35@39. Following are the corn quotations of the last 24 hours:

Corn—California white Egyptian, \$2.85; eastern, No. 2 kafir, \$2.15@2.20; eastern No. 2 milo, \$2.30@2.40; No. 2 eastern yellow, \$2.45; No. 3 eastern yellow, \$2.40.

Spot Calcutta bags—June and July, 12c bid, 12 1/2c asked. During the afternoon session 50,000 bags were sold at 12 1/2c.

San Quentin grain bags, 11 1/2c. Seattle, Apr. 15.—Wheat—Soft white, \$1.50; western white, \$1.48; hard winter, \$1.50; western red, \$1.45; northern spring, \$1.50; Big Bend bluestem, \$1.75.

Yesterday's car receipts—Wheat, 8; hay, 16; oats, 2; flour, 17.

INLAND EMPIRE.

Davenport, Wash., Apr. 15.—Hard white, \$1.60; bluestem, \$1.50; fortyfold, \$1.37; club, marquis, \$1.35.

Dayton, Wash., Apr. 15.—Club, \$1.33; red, \$1.30.

Odessa, Wash., Apr. 15.—Bart and bluestem, \$1.70; turkey red, marquis and fortyfold, \$1.40; club, \$1.38; Jones fire, \$1.33.

Walla Walla, Apr. 15.—Bluestem, \$1.55; club, \$1.38; turkey red, \$1.37.

Lewiston, Idaho, Apr. 15.—Red, \$1.21; white, No. 1, \$1.23.

VISIBLE GRAIN SUPPLY.

The following table gives the stocks of grain in bushels in public and private warehouses at the principal ports and in transit by water on the dates named, with comparisons as compiled by the secretary of the Chicago Board of Trade for the week ending April 18 (000 omitted):

	In store at	Wheat	Corn	Oats	Rye	Barley

Terminal Markets

DENVER, COLO.

F. R. Houlton, Correspondent.

Receipts of grain at Denver the past week were 103 cars.

H. L. Goemann, chairman of transportation of the Grain Dealers National Ass'n, was in Denver for a few days.

Gordon B. Wood, sales manager of Newton Milling & Elevator Co. at Newton, Kans., was recently in Denver on business.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

Exports of grain for the week ending April 17 were: Wheat, 612,235 bushels; oats, 53,080 bushels; rye, 68,571 bushels.

Morris F. Miller of the grain firm of L. F. Miller & Sons has just returned from an extended trip of three weeks through Georgia and Florida.

Receipts of flour and grain for the week ending April 18 were: Flour, 44,603 bbls.; wheat, 726,914 bushels; corn, 9,539 bushels; oats, 70,645 bushels; rye, 59,030 bushels, and 380 tons of feed.

Charles Hay, formerly a well known flour merchant and member of the Commercial Exchange, together with his wife and daughter, are making an extended visit to his mother who resides in Sussex, England. They will also make frequent trips to France while away and will be gone six months or more.

The following notice from the Great Lakes Transit Corporation has been received by John Matthea, traffic manager, Commercial Exchange: "The Great Lakes Transit Corporation expects to start west-bound steamer from Buffalo on April 20. This steamer should reach Duluth about April 24 and sail eastbound about the 25th."

Philadelphia Flour Market.

Philadelphia, April 18.—Receipts of flour for the week just closed were 44,603 bbls. There is very little activity to note, buyers operating chiefly within the line of current wants and holders less disposed to make further concessions. We quote per 196 lbs. packed in 140-lb. jute sacks: Soft winter straight, nearby, \$8.25@8.75; soft winter straight, nearby, \$8@8.50; hard winter straight, \$8.25@8.75; hard winter short patent, \$8.50@9; spring first clear, \$7.75@8; spring patent, \$8.25@8.75; spring short patent, \$9@9.25; fancy spring and city mills patent family brands, \$9.40@10.20. Rye flour, \$7.50@8 per bbl. in sacks, as to quality; buckwheat flour, \$4.25@4.50 per 98-lb. sack.

FORT WORTH, TEX.

G. E. Blewett, Correspondent.

Weather.

Weather in Texas continues dry with only a few scattered showers except in the northeastern and southern parts of the state where sufficient rains have fallen to put ample moisture in the ground for cotton planting. In all sections of the state where grain is produced the drought continues and the prospects for wheat, corn and oats as well as all sorghum crops is daily becoming more discouraging.

Eight million bushels of wheat for the state would now be a very conservative estimate against last year's production of 22,000,000, and while rains coming to the panhandle and west Texas sections might raise this some, still it is a safe bet the state will not make over 10,000,000 under the most favorable conditions from now to threshing time. A great many sections of the state will not raise enough wheat for seed in next year's acreage. Especially is this true in the south plains and western section of the state.

Corn is also suffering from the drought and a large acreage that was prepared for corn will go to cotton and sorghums as the continued drought has discouraged the risk of planting corn.

Oats are showing the effect of the drought and the state will do well to produce as much oats as was used for seeding this crop.

High temperatures have prevailed here this week with a maximum of 95 degrees, reached here Friday.

Business.

In spite of these unfavorable conditions, business continues fairly good and generally satisfactory excepting the mills report a continued slow flour demand and are still on a part-time run with prices badly slaughtered to get any order that might appear probable.

Feed dealers are showing more shipping with a fair run of orders for mixed cars of feedstuffs, but banks are rather slow about putting out any new loans until some rains are received to insure a chance of making a cotton crop.

Wheat.

Wheat receipts are very slow with hardly anything being received from the country shippers and it would seem that there remains very little left in the country for moving out. Demand is rather draggy with premiums holding steady and a sharp reduction is noted in elevator stocks of wheat, especially hard and dark hard, for which there has been a fair demand recently, while mixed and soft wheat continues very draggy. Today (April 10) values here are as follows, basis delivered Texas common points or Texas Group 3 points: No. 1 dark hard wheat, \$1.69; No. 1 hard wheat, \$1.66; No. 1 mixed, 75¢ red, \$1.65.

Corn.

Corn receipts have been very light and very little is being offered from the interior markets, and with a steady demand there has been a sharp reduction here in elevator stocks with yellow and white getting very low. Premiums have held firm to some higher and now prove very attractive to elevators who put in their stocks at much lower basis over the option. Today (April 11) values here are as follows, delivered Group 1: No. 2 yellow corn, \$1.24; No. 2 white corn, \$1.20; No. 2 mixed corn, \$1.14.

Oats.

Receipts very light with fair demand and unchanged premiums. Red oats are moving very slowly from the country and now bring the highest premium over northern white oats that was ever known in this market with sales made showing a premium of 8@9c over No. 3 white oats. This is caused by the trade preferring the red oats and seem willing to pay for them. Today's values, basis Group 1, as follows: No. 2 red oats, bulk, 62c; red oats, bulk, 61c; No. 2 white oats, bulk, 55c; No. 3 white oats, bulk, 54c.

Milo and Kafir.

Receipts of these have been very light and country offers are very slow while demand has been sufficient to cause a sharp advance in the values here on these with a stronger tone noted, and today (April 18) values here are as follows, basis delivered Texas common or Group 3 points: No. 3 or better yellow milo, en route or prompt shipment, \$2.15, or f. o. b., \$1.90; No. 3 or better white kafir, en route or prompt shipment, \$2, or f. o. b., \$1.75.

Fort Worth Grain & Cotton Exchange New Home.

Directors of the Fort Worth Grain & Cotton Exchange in a meeting this week appointed a committee of three with power to select and buy a lot on which the Exchange will at some near future date erect a suitable building for its members. At the annual meeting next week this matter will receive further attention and it is highly probable that work will begin on the new building in the next year as the Exchange is now in very good condition and the entire membership is favorable to the plans.

MEMPHIS.

George Williamson, Correspondent.

Receipts for the week included 75 cars of corn, 141 of oats, 29 of hay and 19 of alfalfa meal.

R. S. Taussig of New York City, representing the American Molasses Co., was registered as a visitor Saturday at the Merchants Exchange.

Business continues slow, for everybody is buying just as little as possible. Corn is selling much more slowly than oats, due to its relative high prices. Cash prices April 18 were \$1.14 for 3 white, \$1.08 for 3 mixed, and \$1.15 for 3 yellow. Cash 3 white oats were quotable same day at 48½@49½c.

Incorporation papers are to be taken out for the American Grain & Hay Co., capitalized at \$50,000. Sam E. Rison, who has been engaged in the grain trade here for years but lately doing nothing but a carlot business, is the prime mover and will be chairman of the board of directors. R. N. Archer, now sales manager for E. E. Anderson & Co., will be vice-president and general manager. The concern will do a

general grain and hay business and will have offices and warehouse facilities on the Illinois Central at Tennessee and Georgia.

Weather conditions throughout this territory have been unusually favorable all of the past week for crop preparations and planting, although some reports are beginning to bring complaints of rain being needed. It has not rained much for some weeks and at this station since the first of January there is a deficiency of over nine inches. Much corn has been planted and it is generally up to fine stand where moisture was ample, but some sections are still planting. Cotton planting has also been unusually early and rapid but that, too, is beginning to suffer somewhat from lack of moisture to germinate the seed. More fertilizer than ever before is being used in this territory on cotton in an effort to get ahead of the boll weevil.

OKLAHOMA CITY.

W. F. Kerr, Correspondent.

Farmers & Merchants Gin, Mill & Trading Co., Headrick, Okla., capital stock \$20,000, was incorporated recently by F. M. Ford, J. F. Knox and J. W. McAskill.

The Farmers Grain Co. of Garber, Okla., and the Chickasha Milling Co. of Chickasha recently applied to the state board of agriculture for permits to sell milled feeds in the state.

John Dobry, a law student in the University of Oklahoma, died recently of pneumonia at his home at Yukon, age 25. He was a son of C. F. Dobry, vice-president of the Yukon Mill & Grain Co.

Application for a permit to sell stock in Oklahoma has been filed with the state issues commission by the Grain Marketing Co. of Chicago, which recently was admitted to do business in the state.

J. A. Whitehurst, president of the state board of agriculture, estimates the Oklahoma wheat yield this year at 33,000,000 bus. A lower estimate is made by J. W. Lawter, secretary of the Oklahoma Farmers Union.

Tom King of Sherman, Tex., has succeeded Arthur Alsop as manager of the Madill Grain & Elevator Co., Madill, Okla. Mr. Alsop and Fitzhugh Lewis have bought the plant and business at Madill of the Industrial Grain Co.

C. W. Goltry, grain dealer, John Manley, secretary of the Oklahoma Wheat Growers Ass'n, and Cecil Munn, sales manager of the Southwestern Wheat Growers Association, have been appointed members of a terminal elevator committee of the Enid Chamber of Commerce.

A circular letter sent to flour millers and grain dealers of Oklahoma by J. A. Whitehurst, president of the state board of agriculture, and E. H. Linzee, state grain inspector, urges all owners of elevators of over 25,000 bus. capacity to operate this year under the bonded warehouse act. The letters announce that the state warehouse commission has been fully organized and is now operating. Arrangements have been made for the negotiability of warehouse certificates.

William Waterman, vice-president of J. S. Waterman & Co., flour exporters of New Orleans, was a recent visitor in Oklahoma. As a guest of George C. Grogan, general manager of the Acme Milling Co., he toured a section of the Oklahoma wheat belt. While doing so he visited the 101 Ranch and witnessed some wild-west sports in the outdoors and some of the large oil fields of the northern part of the state. He and Mr. and Mrs. Grogan were guests at dinner one evening of George Sohlberg, president of the Acme Milling Co., and family. It was the first visit of Mr. Waterman into Oklahoma and he greatly enjoyed it. Regarding business conditions, he predicted light export buying during the remainder of the season because of importers having already ordered stocks to run them for some time. Mr. Grogan reported a marked change for the better in the condition of wheat in northern Oklahoma since rains early in April.

The Oklahoma Meeting.

Secretary C. F. Prouty of the Oklahoma Grain Dealers Ass'n has issued a circular letter to members urging them to attend the annual meeting in Oklahoma City, May 19 and 20, and to assist him in making the largest possible increases in membership. He says:

"We are trying to make this one of the best and most successful conventions ever held here and we are anticipating a large attendance, not only from grain men from our own state but also by a great number of prominent grain men from adjoining states.

"The program will consist of many interesting and very important discussions concerning present-day problems which confront the grain trade. Be sure and come and bring some one or more interested grain men with you. You will not regret the loss of time or expense. You will find it of much value to you. We want your

presence with us for both days. We also want your suggestions for any particular subject or question that you would like to hear discussed. Our program committee is arranging for a round table discussion of many interesting questions that pertain particularly to the difficulties the country grain dealer and the elevator operator have to contend with. We have 'Big Business' before us, behind us, in front of us, and all around us. It, therefore, behooves each and every one of us to waken up and look ahead to things that will sure come to pass, for good or for evil, depending on how the 'steering wheel' is controlled and operated. Come prepared to take a free and active part in these discussions."

WINNIPEG.

Scott Measham, Correspondent.

The week has been featured by extremely nervous and erratic markets. Trading has been largely professional in character but there has been no balance wheel. Aggressive short selling one day has forced prices far down and short covering forced them up the next. There has been remarkably little opposition at times and bulls have little to encourage them. The market needs the solid support of the milling and export interests and at the week end there seemed to be some improvement in the demand from these sources.

It is probable that Canadian mills will want most of the contract wheat now in the west and it is quite possible that a demand from Minneapolis will develop before the tail end of the crop is marketed. The general opinion is that the Canadian surplus will not suffer much longer from neglect and that it will sell at a good price.

The Dominion bureau of statistics has issued a summary of the wheat position. This department still stays with its estimate of 262,000,000 bushels and claims 15 per cent is yet on the farms. Seed and feed has to come out of this and there is admittedly considerable wheat that cannot be classed as of selling quality. This means there is very little wheat to come forward. The bureau's statistics do not seem borne out by the fact as more wheat has already passed inspection than would be possible if they were correct and wheat in fair quantities is still being delivered from the farms.

Wheat seeding is now general in all three provinces and rapid progress made on land already plowed. With average weather it should be completed at about average time. There may be a small increase in acreage. Reports from the Northwestern states indicate wheat seeding near completion and a substantial increase in acreage. An early start is a great help to spring wheat, reducing the hazards of damage from rust and drought. There is plenty of moisture in the land in most of the West but a few districts would benefit by rain at once.

Export business in oats has helped them to maintain prices but stocks are very large and as long as the visible holds near present figures there is little that can be said in hopes of higher prices except that oats are cheap. Barley is again appearing in export trade but Canadian rye is a drug. The flax market is dull but likely to improve when the heavy stocks at the lake head start to go into consumption.

BUFFALO.

Berend J. Burns has opened a brokerage office in grain and feed at 77 Dun building.

The Electric Grain Elevator Co. announces its retirement from business, effective April 1.

Harry T. Burns, Lloyd Hedrick and F. F. Henry were last week elected directors of the Corn Exchange.

F. J. Maurer, well known to the grain trade of the city, has accepted a position with the Watkins Grain Co.

Harold E. Tweeden, manager in this city for the Cargill Grain Co., has applied for membership in the New York Produce Exchange.

W. S. Farrington, who was formerly with the General Milling Co., has been made sales manager of the Globe Elevator Co. H. C. Shaw, who was formerly sales manager for the Globe Elevator Co., is making an extended trip through the west. Bids were opened April 20 at the offices of the Howe Engineering Co., Buffalo, for the construction of the \$1,000,000 elevator of the Saskatchewan company here. Indictments against executives of six grain elevators who are alleged to be parties to a conspiracy to freeze out the smaller operators by cutting rates and accepting rebates are being sought before the Federal grand jury. Several grain men have attended conferences with the district attorney and the entire situation has been thoroughly investigated. They have, it is charged, been cutting rates and giving rebates to Duluth, Chicago and Fort William trade in order to swing the business away from smaller operators.

LOS ANGELES, CALIF.

C. G. White, Correspondent.

L. P. White, traffic manager, Globe Grain & Milling Co., left last night for San Francisco, where he will attend a meeting of the Trans-Continent Freight Bureau. P. E. Larsen, bookkeeper, Los Angeles Grain Exchange, left last week on his annual vacation. Mr. Larsen will spend the greater part of his vacation motoring through Southern California. Announcement was made this week that T. E. Morgan, of the Morgan Sales Agency, San Francisco, Calif., will open a Los Angeles office about the 1st of May. Mr. Morgan is very well known in Southern California, having been connected with the Globe Grain & Milling Co. here for a number of years. They will deal in grain, mill feeds and hay in any quantities.

Cash Markets.

The market conditions at this terminal for the past week has been of a spasmodic nature owing to the flurry in the Chicago market, corn particularly being affected. There is but little trading in wheat, as this market consumes the entire receipts, and there being a normal arrival, the mills have taken all and held the market steady. No. 3 yellow corn at the end of the week was being offered at \$2.32 with a bid of \$2.25, while No. 2 yellow was offered at \$2.40. No. 2 feed barley remains about the same as a week ago, December delivery being offered at \$1.52½ per cwt. with a bid of \$1.45; No. 3 eastern, white oats, 10-day shipment, is being offered at \$2.03½ with a bid of \$1.97½.

The ground feed arrivals for the week amounted to 28 cars. The market remains firm to strong. Utah-Idaho millrun is selling at \$36; Kansas bran, \$34; alfalfa meal, medium ground, \$32; molasses, alfalfa mixed, \$29; cottonseed, \$45; beet pulp, \$40.65; rolled barley, \$39; copra meal, \$31 per ton.

The hay market shows no change over last week. The arrivals were normal. No. 1 alfalfa selling at \$23; No. 2 selling at \$2 less; No. 1 barley hay, new crop, \$23; No. 1 oat hay, \$26.

NEW YORK.

J. M. Nugent, Correspondent.

John A. Kemp has severed all connection with Milmine Bodman & Co., Inc., as of April 14th.

Export sales of wheat during the past week were estimated around 3,000,000 bushels, largely Manitobas and Duluth spring wheats. However, there were also some scattered sales of American hard winters included in this total.

During the past week the following gentlemen visited the floor of the New York Produce Exchange: L. F. Campbell of San Francisco, Arthur Lane of Boston, George Martin of Buffalo, C. L. Johnston and W. Fox, both of New Orleans, also F. K. Morrow of Toronto, J. C. Koster of Kansas City and W. B. Joyce of Duluth.

Flour Situation.

New York, Apr. 18.—Considerable irregularity featured the trade in flour, but as a rule price tendencies were downward. There were rumors of better business at northwestern and southwestern milling centers, but locally the trade demand was absolutely routine.

Export interest was also small with the sharp fluctuations curtailing trade. Further large clearances were made from New York and Baltimore to Russia.

Spring patents were quoted at \$8 to \$8.50; soft winter straights, \$8 to \$8.50, and hard winter straights, \$7.75 to \$8.25 per 196 lbs.

CINCINNATI.

George Mosbacher, Correspondent.

Several members of the local Exchange have signified their intention to attend the annual meeting of the Illinois Grain Dealers' Association to be held at Peoria, Ill., May 5 and 6.

The Early & Daniel Co. will be represented at the annual meeting of the American Feed Manufacturers' Association, which is scheduled for May 7 to 9 at New Orleans, by Lyle Lord and Edward Linder.

President Frank L. Watkins has appointed D. W. Hopkins, August Ferger and Robert L. Early a committee to arrange for the broadcasting of the daily grain and hay quotations in accordance with a resolution passed by the members at the recent sev-

enth anniversary of the Exchange as an independent organization.

Oats sympathized with the weakness of wheat and corn during the week and prices averaged about 4c lower, but their cheapness as compared with other grains helped the demand, and the receipts of more than 75 cars were all absorbed.

Receipts of corn continued small and totaled about 60 cars, but the demand was much better, especially for milling grades of white and yellow. The generally improved interior feeding demand was also reflected here and elevator interests reported a good business. Receipts were mostly of low grades, which showed germination and poor condition. No. 6 ranged in price from 85 to 95c.

The fact that supplies of wheat in first hands and in country mills and elevators are the smallest in years helped the local cash situation during the week, and while the market responded to the option fluctuations, southern mills were actively in the market, and sales as much as 28c and 33c were recorded over the May price. Daily spot quotations, however, were mostly nominal owing to the very light receipts, and the mill orders were again filled from local elevator stocks.

	Apr. 18, 1925.	Apr. 10, 1925.

NEW ORLEANS.

M. L. Davis, Correspondent.

W. H. Tanner of Sikeston, Mo., spent several days in New Orleans this week.

J. H. Jordan, local manager of the Strachan Shipping Co., has returned from a business visit to Galveston and Houston.

N. O. Pedrick, general manager of the Mississippi Shipping Co., has returned from a business trip to New York and Washington.

D. B. Penn, vice-president and general manager of the Gulf & Southern S. S. Co., left this week for a business visit to New York.

Stocks in elevators as of today are: Wheat, 1,364,000 bu.; corn, 244,000 bu.; oats, 159,000 bu.; rye, 20,000 bu.; barley, 1,000 bu. Cars on track: Wheat, 2; corn, 4.

Standard blackstrap molasses is firm at 13c per gallon f. o. b. tank cars New Orleans; medium is quoted at 13½c, and light blackstrap at 14c per gallon.

Philip Shore, president of the Tampa-Interocean Steamship Co., has left for his home in Tampa after spending several days here this week visiting F. H. Hubele, local manager of the company.

W. P. Simpson, former president of the Association of Commerce, left this week for San Francisco from which port he will sail on April 25 on a tour of the principal ports of Japan, China, Korea and the Straits Settlements, India and Mediterranean countries. The object of Mr. Simpson's visit is the promotion of foreign trade and closer business relations between New Orleans and the countries he will visit.

J. W. Stimpson is the present manager of the Hotel DeSoto, who assures us that full arrangements have been made to take care of the guests at the American Feed Manufacturers' Convention, May 7, 8 and 9. He succeeded Vic LeBeau, who passed away on March 18, a man particularly well liked and widely known among our trade. Mr. J. W. Stimpson had, however, been associated with Mr. LeBeau for the past twelve years and is continuing the same hospitality which has made the DeSoto so popular with the trade. Reservations for rooms during the convention are being properly handled.

BALTIMORE.

Robert C. Neu, Correspondent.

The receipts of water-borne corn in the Baltimore market so far this season amount to 75,600 bushels, compared with 245,000 bushels arrived up to the corresponding date last year.

Yates Penniman, president of the National Marine Bank of this city, and a member of the Baltimore Chamber of Commerce, is seriously ill with pneumonia at his home, 214 Roland avenue, this city.

The steamship Edward Munch cleared from the port of Baltimore last week with a full cargo, 45,536 barrels, of Canadian flour for a port in Russia. The Maple Leaf Milling Co., of Toronto, Canada, was the shipper of the flour.

J. N. McCosh, local representative of the Bay State Milling Co., of Winona, Minn., and a well known member of the Chamber of Commerce, has entirely recovered from the effects of a recent surgical operation and is again daily on 'Change here.

Beginning Monday, April 27, all operations on the floor of the Baltimore Chamber of Commerce will be advanced an hour to conform to the daylight savings program, which will be resumed on that date by the Chicago Board of Trade and Minneapolis Chamber of Commerce.

At the regular monthly meeting of the Baltimore Flour Club, held in the directors' room of the Baltimore Chamber of Commerce on April 15, J. Ross Myers was elected as the representative of the local club on the executive committee of the National Federated Flour Clubs for the coming year.

N. J. Elliott, district freight representative of the Pennsylvania Railroad Com-

pany, and W. Scott Burton, foreign freight agent of the Western Maryland Railway Company, were the delegates on behalf of the Traffic Club of Baltimore to the annual convention of the Associated Traffic Clubs, held at Kansas City, Mo., last week.

Under the drain of heavy withdrawals for export during the past two weeks, stocks of rye in elevators here which a short time ago were above 7,000,000 bushels, have been reduced to a little over 4,000,000 bushels, and further sharp reductions will take place during the coming week, as the scheduled shipments to Russia have not yet been completed.

Edward T. Sheil, Jr., formerly secretary and treasurer of the Baltimore Grain Company, has been appointed assistant supervisor of collections in the bureau of receipts of the municipal government. Mr. Sheil passed an efficiency test with the highest average among thirteen applicants for this position. He had previously been filling the position under a temporary appointment.

Among the out-of-town visitors on the floor of the Baltimore Chamber of Commerce last week were: C. Edward Kline, of Hagerstown, Md.; Harry M. Stratton, of Donahue-Stratton Co., grain shippers of Milwaukee; W. L. Spurrier, Mt. Airy, Md.; Julius Cohen, Dusseldorf, Germany; C. W. Somers, Ontario, Canada; F. W. Lund, of Philadelphia, Pa., and V. W. Nicodemus of Monrovia, Md.

In appropriating \$10,000 last week to aid Baltimore's civic and trade organizations in opposing the Butler bill, introduced by Senator Butler of Massachusetts at the last session of Congress, and seeking to abolish the differential in favor of Baltimore, Philadelphia and Norfolk, the municipal government has given substantial evidence that it is wholeheartedly in the fight to protect a natural geographical advantage of the port of Baltimore.

MILWAUKEE.

D. K. Steenberg, Correspondent.

Secretary H. A. Plumb has been visiting a brother at the Rochester (Minn.) Hospital.

Receipts last week were 100 cars barley, 49 corn, 102 oats, 19 wheat, 8 rye, 0 flax, 4 miscellaneous; total 282 cars, against 208 the week before, 331 a year ago and 400 in 1923.

Shipments last week were 193,963 bus. oats, 416,834 corn, 52,816 barley, 65,106 wheat, 120,321 rye; total 801,510 bus. against 289,005 the preceding week and 474,349 a year ago.

Harry Stratton of the Donahue-Stratton Co. was welcomed back on 'Change Saturday morning after having been absent for about two weeks while in the East on a business trip.

Prices are lower for the week, excellent conditions prevailing, and the new crops are experiencing an auspicious start. Wheat is 12@15c lower, rye 9½c, oats 2@2½c, while barley is unchanged and corn is up 1@2c due to better basis.

Opening of navigation through the Straits of Mackinaw was signalled in Milwaukee on Saturday afternoon, April 11, with the arrival of the steamer Stanton from Toledo, Ohio, and the clearance of the steamer W. A. Reiss with a cargo of corn and rye for Goderich, Ont.

Production of wheat flour at Milwaukee last week was 6,650 bbls. as compared with 6,500 bbls. the previous week and none in the same week of 1924. Receipts of flour at Milwaukee for the week were 11,890 bbls. as compared with 25,550 bbls. in the same week of last year, and shipments were 21,830 bbls. against 15,180 bbls. in the same week of 1924.

Showers over the state have not been heavy enough to relieve the dry conditions, says the weekly crop report of the Milwaukee office of the U. S. weather bureau. "Seeding of barley, oats and spring wheat is well under way in the northern part of the state and it is completed in the southern part. Plowing for corn is delayed by dry, hard soil. Winter grains and clover came through the winter in good condition. Meadows and pastures are growing slowly and stock still has to be fed indoors. Soaking rains are badly needed for germination of seed, for pastures and for plowing."

W. O. Snyder of Racine, Wis.; Joseph Straub of Lomira, Wis.; R. Martin of Beaver Dam, Wis.; Charles Walsuk of Montevideo, Minn.; H. A. Shepard of Chicago, Ill.; W. F. Uebele of Burlington, Wis.; K. B. Laubenstein of Hartford, Wis.; W. G. Stoddard, E. E. Cable, J. Hull and George Broker, all of Markesan, Wis.; S. P. Reese, Eugene Foley, F. M. Mulloaly and H. O. Natesta, all of Chilton, Wis.; C. E. Higbie of Rio, Wis.; J. Stoppenbach of Jefferson, Wis.; Otto Timm of Plymouth, Wis.; C. L. Olson of Winfield, S. D.; J. P. Hessburg of Minneapolis, Wis.; and W. D. Mihls of Fond du Lac, Wis., were among visitors at the Milwaukee Chamber of Commerce during the past week.

New committees for 1925-1926 were chosen at a meeting of the board of directors of the Milwaukee Chamber of Commerce on Tuesday, April 14. The meeting was the first since the annual election. The committees of the board of directors are as follows: Finance—L. R. Fyfe, A. L. Flanagan, F. P. Donahue. Furniture and rooms—G. W. Kruse, L. J. Keefe, W. A. Hottensen. Grain "to arrive"—A. L. Johnstone, F. P. Donahue, L. J. Beck. Market reports—E. La Budde, A. L. Johnstone, G. W. Kruse. Membership—W. A. Hottensen, O. R. Sickert, E. La Budde. Rules and

DULUTH.

S. J. Schulte, Correspondent.

The Duluth Board of Trade membership of the late M. L. Jenks, president of the Itasca Elevator Co., has been transferred to James W. Wood, treasurer of the company.

Boat space was offered for Buffalo delivery at from 2 to 2½¢ a bushel with vesselmen anxious to book sufficient grain space to keep their boats going until iron ore shipping should become more active.

Grain men here have been receiving optimistic reports regarding the progress of seeding of wheat and soil conditions over the Northwest. As a result of the prospective falling off in the production of winter wheat their advices are that a larger area will be seeded to spring wheat this season. The flaxseed acreage is expected to be greatly increased.

Holders of rye on this market are sanguine that exporters will be looking this way for it in the near future in view of stocks at Buffalo and Baltimore having been practically cleaned up. They are therefore inclined to be more bullish in their views as evidenced that their offerings have been restricted during periods when its market showed acute weakness.

The season of navigation was opened on April 15 with the clearing for Buffalo of the steamer E. L. D. Ford with a cargo of 400,000 bushels of spring wheat consigned to milling interests there. The grain had been loaded out at Great Northern Elevator S and the Consolidated elevator. The Occident Elevator Co. figured in the dispatch of a cargo of spring wheat shipped to the Russell-Miller Milling Co., Buffalo. The Barnum Grain Co. also loaded out a

cargo of spring wheat for Buffalo. A load of 100,000 bus. of spring wheat that had been afloat in the harbor here was dispatched to Chicago where it was sold at the May delivery price.

Dealers reported that the opening of navigation this season was the fullest in their experiences on this market. Apart from grain that had held storage as cargoes all winter only three new charters for boat space were recorded around the opening of navigation and elevator men asserted that they were unable to see any daylight ahead for some time yet. With over 32,850,000 bushels of all grains held in Duluth and Superior elevators at the opening of the new lake season, operators were doing some conjecturing as to how soon stocks are likely to be materially reduced. The dullness was attributed to export demand having dried up through foreigners having become nervous owing to the irregularity of the markets during the last month.

Flour Prices Up.

Market in flour was stronger here during the last week. Demand was light with jobbers small buyers. Patents were marked up 75c. Closing prices per bbl. in carlots at mill follow: Family patent, jute, \$8.25; bakers' patent, jute, \$8; first clears, \$7.25; second clears, \$6.25.

OMAHA.

Leigh Leslie, Correspondent.

A wire from Chadron, Nebr., says: "Crop conditions in northwest Nebraska are better than they have been in several years."

There has been a very light movement of wheat, corn and oats to the Omaha market since the recent decline in the market set in. For the week ending Saturday, April 18, receipts of wheat were only 38 cars.

A report from Beatrice, Nebr., says: Hundreds of acres of wheat land have been drilled to oats in the last ten days because the wheat failed to show up green. The acreage of oats will be unusually large this year and that of wheat smaller than usual."

A letter from Callaway, Nebr., says: "Prospects for the winter wheat crop are better in this part of the state than they have been before at this season in several years. The crop was greatly benefited by the late rains. A large acreage of oats was sown this spring."

A letter from Ogallala, Nebr., says: "Much wheat will be destroyed and more of it will be set back two or three weeks in the south part of Keith county by the army cut worm unless the farmers take steps to check the advance of this pest, according to Don B. Whelan of the University of Nebraska college of agriculture. Infestation by this worm has been reported from practically every county in western Nebraska. It has been particularly bad in Keith and Perkins counties."

MINNEAPOLIS.

H. A. Paul, Correspondent.

F. M. Crosby of the Washburn-Crosby Co. sailed for Paris last week.

T. J. Cassidy of the Chas. E. Lewis Co. spent several days in Chicago this week.

Dana McMillan of the Washburn-Crosby Co. just returned from a three months' tour of Egypt.

I. S. Joseph of the I. S. Joseph Co. made a trip through eastern feed centers, returning this week.

B. B. Sheffield of the Sheffield Elevator Co. is back in Minneapolis after a visit to his Montana ranch.

Nat C. Murray, crop expert for the Clement-Curtis Co. of Chicago, was a visitor here Saturday.

Joseph Sullivan of the Northwest Consolidated Mfg. Co. feed department spent several days in Chicago this week.

L. H. Pinney, secretary of the Minnesota Millers Association, is back today after an illness of several days' duration.

E. S. Woodworth of the E. S. Woodworth Co. was the principal speaker at a joint banquet of the Minneapolis and St. Paul traffic clubs.

The Lyons-Kuehn Co., feed dealers, has been dissolved and F. L. Lyons, who has been conducting the business under the old name since the withdrawal of Mr. Kuehn, will continue to operate under his own name.

Among the visitors on 'Change during the week were the following: L. M. Lounsbury of Binghamton, N. Y.; M. Henman of Postville, Ia.; W. J. Ridd of Bismarck, N. D.; T. Fillman of Red Wing; H. K. Chedlow of Grand Forks; F. M. Zanner, D. Johnson and J. M. Bohn of Des Moines, Ia.

Cash Markets.

Wheat—The outstanding feature of the past week in the local market has been the loading out of elevator wheat and the offering of it in competition with the offerings from the road. Receipts have been cut down to a surprisingly low figure but the presence of these elevator stocks and the apparent willingness of the mills to pick it up at the going level has prevented much of any competition for stuff coming in direct from the country.

There is no improvement in the matter of advices to commission houses but this is not at all surprising in view of the fact that farmers are right in the middle of seeding operations and cannot spare the time for hauling what little wheat or other grain they may still have left in the granaries.

There has been some soft wheat on the tables but this class does not meet with much approval from mill buyers, the latter preferring to pick up elevator offerings as stated above.

Shipping sales during the week just past were in no way heavy, running from 10,000 to 50,000 bushels daily. Local elevator stocks for the week show a total of 12,254,548 bushels as compared with 12,603,134 bushels last week and 13,903,850 bushels a year ago.

There was a sharp falling off in the premiums for durum this week. It seems that the market here was largely of a nominal character for some time past, due to the light receipts, and this week millers began to cut down their bids, some of them dropping them as much as 10c per bushel.

Based on today's range of sales, No. 1 hard spring brought 4@50c over May; No. 1 dark northern, 3@48c over; No. 1 northern spring, 2@40c over; No. 1 dark hard Montana, 2@28c over May; No. 1 amber, 3@30c over Duluth May; No. 1 mixed durum, 10c under @ 28c over; No. 1 durum, 5c under @ 28c over.

Corn—Offerings of road corn, like those of wheat, are getting very scarce. During the week there has been a fair demand for the dry stuff but the low grade was in generally poor request. Toward the close of the week, however, shippers hoisted their bids for the No. 5 and No. 6 grades, as well as those of higher quality. On Friday there were several cars of heating corn offered for sale and they brought an even half dollar. Local stocks, made public today, show 740,239 bushels in store vs. 839,403 bushels last week and 1,526,910 bushels a year ago.

Today's range of sales showed the following: Yellow—No. 3, 5@6c under Chicago May; No. 4, 8@10c under; No. 5, 13@15c under; No. 6, 16@18c under. Mixed—No. 3, 7@9c under; No. 4, 10@13c under; No. 5, 14@17c under; No. 6, 19@22c under.

Oats—The past week did not reveal as heavy a drain on elevator stocks as many thought it would. The reason for this is quite possibly that considerable of the oats reported as having been worked out of this market is for more deferred shipment, and the decrease will not show up for some time yet. Totals today were 18,503,995 bushels vs. 19,991,721 bushels a week ago and 3,686,660 bushels a year ago.

Offerings of choice oats from off the road were very moderate and the demand held good through the week. There was quite a lot of thin quality with lots of wild oats to be had but no one seemed to want it especially at current asking prices.

Today's range of sales showed No. 3 whites quoted at 1¼@1½c over May and No. 4 whites at 1c under @ 2c over.

ST. JOSEPH, MO.

N. K. Thomas, Correspondent.

A quarterly meeting of the membership of the St. Joseph Grain Exchange has been set for April 22. The meeting will be preceded by a golf match.

J. W. Holloway, transportation commissioner of the St. Joseph Grain Exchange, attended the meeting of the Associated Traffic Clubs of America at Kansas City April 16.

Arrivals of grain at St. Joseph were increased as compared to the preceding week. Prices had about the same unsettled trend, with wheat closing 15@20c lower for the week on hard winters and 15c down on soft. Corn was unchanged to 4c lower for the week. White corn has drawn closer to yellow in price. Arrivals of corn are mostly yellow and mixed. Wheat is in rather slow demand as a rule. Corn inquiry rather good. Oats supply heavier and fairly good demand, prices ½c lower for the week.

Visitors on the St. Joseph Grain Exchange during the week ending April 18 included J. H. Gray, Maryville, Mo.; M. V. Garrett, Forbes, Mo.; H. C. Anderson, Plattsburg, Mo.; W. E. Kellogg, McFall, Mo.; R. F. Bywaters, Cameron, Mo.; J. L. Hidy, Stewartsville, Mo.; W. T. Crews, Craig, Mo.; C. H. Blanke, Atchison, Kans.; J. C. Schlup, Stewartsville, Mo.; Alva Schaefer, Cameron, Mo.; J. E. Gregory, Agency, Mo.; O. H. Lane, Hastings, Nebr.; B. F. Moore, Gower, Mo.; F. S. DeLong, Syracuse, Nebr.; J. W. Douglas, Nortonville, Kans.

PORTLAND, ORE.

Frank Ryer, president of the Ryer Grain Co., has returned home from a six weeks' visit to Cuba, Panama and Florida.

Among those who are expected to attend the annual meeting of the Chamber of Commerce on Friday are Carl Gray, president of the Union Pacific; Ralph Budd, president of the Great Northern, and Charles Donnelly, president of the Northern Pacific Railway.

John Perrin, chairman of the board of the federal reserve bank at San Francisco, will make the chief address at the annual dinner meeting of the Chamber of

**We Buy and Sell
Ear Corn**

RICHTER GRAIN CO.
Cincinnati, Ohio

Commerce April 24. His acceptance was received yesterday. His subject was not known, but it is assumed he will discuss the federal reserve bank and its operations.

The fall sown wheat crop in Oregon will be small this year because of the heavy winter kill. While much of the area has been reseeded to spring wheat, the normally lighter yield of the spring crop will tend to make the total wheat production for the state even lower than the light crop of 1924, says F. L. Kent, statistician of the department of agriculture. While the whole effect of the winter killing of fall seeded wheat has not yet been determined, it seems probable that more than one-half of the Oregon acreage seeded last fall has been either reseeded to spring wheat or other spring sown crops. The condition of the remaining acreage is probably the lowest in the history of large scale wheat growing in the state, the percentage figure being placed at 55 per cent of normal. The condition of the Oregon rye crop is estimated at 65 per cent.

Terminal receipts in cars were reported by the Merchants' Exchange for the season to April 16 as follows:

Portland—	Wht.	Bly.	Flr.	Corn.	Oats.	Hay.
1924-25 ...	14,155	501	1,543	525	629	1,857

KANSAS CITY.

T. J. Tanner, Correspondent.

Fire destroyed the plant of the Caldwell Mill & Elevator Co., Caldwell, Kans., Saturday, with a loss of \$75,000.

Efforts of the Kansas Wheat Growers Ass'n to induce the Chicago & Alton railroad to build a grain elevator in Kansas City are not bearing fruit. Officials of the railroad have made no promise.

W. F. Logan, grain exchange supervisor in Kansas City, returned from Chicago Monday after spending several days in the investigation of the March price slump in wheat. He returned to Chicago Saturday.

The Benton Grain Co. of Kansas City has incorporated under Missouri laws with a capital of \$60,000. C. H. Benton is president, Cort Addison vice-president, and L. A. Patterson secretary and treasurer. The company has been in business for many years.

The Wyandotte Elevator Co., a subsidiary of the Southwestern Milling Co., has let a contract to James Stewart & Co. of Chicago for the addition of 750,000 bus. of storage capacity to the elevator in Kansas City, Kans., which adjoins the mill. This will give the milling company a total storage capacity of 2,500,000 bus. The work will be done by Aug. 1.

B. M. Huffine of the Huffine Grain Co., Kansas City, is one of the organizers of a company in Los Angeles, Cal., which will erect a 50,000-bushel elevator and feed mill. About \$75,000 will be expended. The directors are J. I. Huffine, Long Beach, Cal., formerly in business in Kansas City; Benjamin M. Huffine, Kansas City, a member of the Board of Trade; J. Earl Huffine and Everett A. Huffine, Los Angeles.

Visitors at the Board of Trade this week included George Bryant, Chicago, Ill.; Rufus Jackson, St. Louis, Mo.; E. A. Priest and E. J. Slater, Omaha, Neb.; A. P. Gill, Indianapolis, Ind.; C. G. Wilkins, Fort Worth, Tex.; Joe A. Kell, Wichita Falls, Tex.; J. D. Rayliff, Hutchinson, Kan.; J. F. Crawford, Sapulpa, Okla.; L. D. Flanagan, Dodge City, Kan.; C. B. Turney, Edgerton, Mo.; and C. A. Pravity, Des Moines, Ia.

The bowling season of the Board of Trade league ended Friday night. According to the score, the Longs, captained by William McNeil, finished in first place, with a lead of two games over the Shorts, headed by Oscar Cook. The Millers and the Bears, led by Harry Stephenson and Ed Meserve, respectively, were tied for third honors. Prize money totaling about \$70 will be received by the winners. Thomas Knight held the high score for 10 frames, at 221, and the team with high 10 was the Longs.

James T. Bradshaw, former Missouri warehouse commissioner and head of the state grain inspection department, will have a new trial on the charge of illegally expending \$1,760 of fees collected by his department. The supreme court, en banc, made an order to this effect April 13 after confirming a circuit court judgment against Mr. Bradshaw. It is the contention of the state that the money was paid to employees of the grain inspection department for work done at Kansas City elevators outside of their regular duties in 1919 and 1920.

Usual Harvester Quota Required.

Though an abandonment of 25 per cent or more of the winter wheat acreage in Kansas is alleged, George H. Tucker of Topeka, director of the federal farm labor bureau, says the normal number of harvester hands will be required. Mr. Tucker is taking into consideration the men needed to handle oats and barley and to aid in cultivating the big corn acreage being planted. About 53,000 extra men were employed by Kansas farmers last year, the largest number ever used in the state. Additional rains this week were of undoubted value to the agricultural situation in Kansas, Missouri, Nebraska and Oklahoma; but

there were many reports that wheat was not responding uniformly, because too many plants were dead. R. O. Cromwell, a Chicago expert who visited Kansas City, said Kansas could not harvest more than 94,000,000 bus. of wheat, but W. G. Hoover and other Board of Trade members admitted a possible yield of 100,000,000 to 120,000,000.

Cash Grain Markets.

Wheat—Receipts for the week, 246 cars, against 99 a week ago and 216 a year ago. Reversal of the previous week's course in futures had a similar effect on the cash market for hard and dark, despite continued large shipments from store to fill old contracts. There was less new buying of carlots by outside millers and the local millers were indifferent owing to slow flour trade. Premiums on protein samples were reduced from their high level. The increase in offerings was greater than had been expected. Some recovery from the week's bottom prices was scored on Friday and Saturday but closing quotations were 12@16c lower, as follows: No. 1 hard and dark, \$1.45@1.65; No. 2, \$1.45@1.65; No. 3, \$1.44@1.64; No. 4, \$1.42@1.62. Arrivals of soft wheat were slightly enlarged but the demand was very slow. Prices showed a net recession of 15@17c, closing with No. 1 at \$1.62@1.68, No. 2 at \$1.62@1.68, No. 3 at \$1.54@1.65, and No. 4 at \$1.51@1.60. Stocks of wheat decreased 762,000 bus., to 4,426,000, as compared with 9,472,000 last year.

Corn—Receipts, 119 cars, against 127 a week ago and 448 a year ago. The market was irregular, fluctuating from day to day and closing unchanged to 3/4c lower, with No. 2 white at \$1.04@1.08, No. 3 at 99c@1.04, No. 2 mixed at \$1.02, No. 3 at 98c@1.01, No. 2 yellow at \$1.09@1.10, and No. 3 at \$1.07@1.09. Feeding orders were fair, especially for yellow, and there was mill buying of white. Elevator men had a good shipping business southward, including Texas. Stocks decreased 694,000 bus., to 5,332,000, against 1,287,000 a year ago.

Oats—Receipts, 105 cars, against 53 a week ago and 63 a year ago. Heavier offerings exceeded the demand for carlots and trade ruled slow, but elevator interests made fair shipments on old sales to the South. White oats closed unchanged to 1c lower, with No. 2 at 47 1/2@50c and No. 3 at 46 1/2@47 1/2c. There was very little trading in red seed oats. No. 2 closed 1/2c lower, at 48c, and No. 3 were quoted nominally 3c down, at 44c. A reduction of 139,000 bus. was shown in local stocks, leaving 962,000 bus. in store, against 364,000 a year ago.

Kafir and Milo—Receipts, 69 cars, against 53 a week ago and 85 a year ago. Dealers reported a fair feed manufacturing demand and liberal shipments from store, but the course of prices was governed in the main by the action of the corn market. Country offerings were slightly larger. Kafir closed 3@7c per cwt. down, with No. 2 white at \$1.73@1.75, No. 3 at \$1.71@1.73, and No. 4 at \$1.69@1.70. Milo lost 3@5c, closing as follows: No. 2, \$2.05@2.08; No. 3, \$2.05; No. 4, \$2.02@2.03. Stocks decreased 43,000 bus., to 289,000, against 419,000 a year ago.

CHICAGO.

George Bryant was noted as one of last week's visitors in Kansas City.

A Board of Trade membership sold last Saturday at \$8,000 net to the buyer.

E. E. Tanner has been admitted to membership in the firm of Vance & Co.

Hately Bros., provision handlers, have removed from Room 71 to Room 50, Board of Trade building.

Among Chicago visitors last week was Mr. Robinson of the Hunter-Robinson Milling Co., St. Louis.

The death of William C. Foley, one of the younger members of the Board of Trade, has been announced.

Hill, Joiner & Co., 105 South La Salle street, are moving to the Home Insurance building, 137 South La Salle street.

F. S. Lewis & Co. have opened their new office in the Austin building, opposite the Board of Trade on Jackson boulevard.

William M. Johnston, in the employ of Beach-Wickham Grain Co., has been admitted to membership in the Board of Trade.

Among those who have recently applied for membership on the Board of Trade were R. C. Bacon, Geo. S. Hutchison, J. V. Rank, Julius Rosenfeld and J. H. Wilkins.

George W. Cook, formerly manager of the Beef Department of the Dold Packing Co. of Buffalo, is now manager of the Chicago Packing Co. The corporation is back in their rebuilt plant, replacing the packing house which burned several months ago.

William Murphy, grain department manager of Farnum, Winter & Co., was possibly the first bull to warn his trade of the sharp decline in wheat a month or so back. He saw this very distinctly as it hung over the head of the market and the full realization of his prediction was highly appreciated by the company's customers.

Harry B. ("Daddy") Shaw, after forty-two years of activity in the grain trade, is to retire to more peaceful pursuits in the village of Momenca. "Daddy" is one of the most popular men on the Chicago Board of Trade, and as a token of esteem his many friends presented him with a console type Howard neutrodyne radio set.

The Associated Corn Products Manufacturers opened offices this week at Room 729, 208 S. LaSalle street, Chicago. Hugh G. Van Pelt is managing director and will conduct a feed research department and otherwise assist the corn gluten feed cam-

Board of Trade Duluth, Minn.

paign which is now so strenuously conducted by all manufacturers, as parties to the work.

Recent new members of the Board of Trade include R. W. Baxter, J. H. Crilly, Clifford Culloden, J. J. Fleming, J. J. Godfrey, Samuel Hazelhurst, W. M. Johnston, G. E. Jacobs, J. H. Kemper, A. R. Marquis, W. A. Mooney, F. J. Mallory, W. M. Paris, J. M. Welch, T. P. Brosnan, J. A. Eckert, Ludwig Eisemann, Clarence Mears, Edward Stradella and G. P. Taylor.

Dr. J. W. T. Duvel, in charge of the grain futures administration, has asked all clearing house members of the Board of Trade for a full statement showing purchases and sales of wheat futures, daily by futures, for all accounts for which purchases or sales were made on any one day of 100,000 bushels or more. Statements are to cover trades from Jan. 2 to April 18. The "net long" or the "net short" position of each account, either at the close of the market on Dec. 1, 1924, or at the close of the market on April 18, 1925, is asked for. Quantities only are desired.

TRADE OPINION.

Dullness in export trade at this time of year is not at all unnatural and should not be the basis of bearish ideas. There is no good reason why they should bid for the remaining supply of our old wheat at 10 cents premium over new crop quotations. But foreigners will soon be contracting for the new crop, and for that reason its progress will bear close watching, especially in view of the fact that European supplies are admitted to be uncomfortably low. If private reports are correct and should again be substantiated by the government report next month, there is excellent foundation for a position on the buying side of deferred futures.—Thomson & McKinnon.

The wheat market continues to be an erratic affair, with wide price swings in both directions. Crop damage reports from the Southwest were numerous with many complaints regarding winter killing and some reports from Kansas telling of damage done by army worms. News from abroad and from export circles is distinctly bearish. Export business appears to be far from encouraging. Crop scares, winter killings and bugs of various kinds serve to build up false hopes with the speculative public year after year. We think it's the same old bunk and nature will be kind to the producer and a fair crop in the United States and Canada will again fill the farm-

ers' bins and bulge his pocketbook.—W. F. Murphy, of Farnum, Winter & Co.

Crop damage claims from widely scattered areas have become more influential market factors, as evidenced by private reports of damage by cut worms in Kansas, which resulted in a very substantial upturn. Export buying has not been a factor of late, but the demand from domestic sources has improved. Visible stocks continue to shrink. Despite this season's enormous primary movement, total visible stocks are actually less than last year. Decreasing shipments from the Southern Hemisphere will soon again emphasize European dependence upon North American supplies. Prospects of light season-end supplies, combined with the seasonal increase in export buying of the new crop and the uncertainties of the latter, appear to us as decidedly in favor of higher prices.—Bartlett-Frazier Co.

Cash markets are firm, country offerings are light, the southwest is beginning to call for more rain again and the markets are pretty well sold out. As foreign conditions clear up, we look for an expanding export trade in new crop wheats and doubt if the old crop supplies will be burdensome at any time from now on. On the setbacks consequently we favor buying wheat. An Argentine estimated surplus of 120,000,000 bushels of corn against 200,000,000 bushels the past year was a bull factor, while the decrease of 3,055,000 in the visible and a local stock reduction of 1,707,000 were the bull helps. There are beginning to be earmarks of a more aggressive bull market in corn and would take hold on all setbacks. Present indications are that world's conditions in corn will be bullish for some time to come.—Logan & Bryan.

There were cables to the effect that the Canadian Wheat Pool were offering wheat at prices below competitors. A firmer tone was present in the Liverpool and Buenos Aires markets but continued definite export business in our wheats is necessary to create a basis which will attract outside buying. Should rains over the wheat belt be thorough lower prices naturally would be experienced for the far-off futures, but we still maintain a friendly attitude towards July and September wheat, disbelieving that this year's winter wheat crop will approximate last year's yield. Germany has bought 40,000 barrels of flour from Kansas City mills the last few days. The corn market reflected considerable broadening of the trade and prices were strong

considering the weakness and decline in the wheat market.—J. J. Badenoeh Co.

Export business is disappointing, the sales moderate. Most of the business the past week has been for Manitobas. The domestic situation, however, is quite strong. Millers' selections are selling readily; hard winter is held at stronger premiums and the red winter is scarce. A situation may develop so that the movement of spring wheat from the Northwest to this market will be welcomed. A London cable says English buyers hesitate to follow recent advances in North America. Hog prices and moderate farm reserves are again, with the Argentine corn crop losses, the big factors before the trade. Reliable information from northwest Iowa suggests that the feeder demand in that

section has been very tame recently. Shippers report a good business for domestic distribution, but that the advances have checked new business.—Pope & Eckhardt Co.

Reports received from nearly 1,000 correspondents between April 14-16, covering the winter wheat belt, average 6 per cent lower than their estimates of condition made in the last week of March. Their estimates of the abandonment now average 20 per cent, their March estimates averaging 18 per cent. Our interpretation of correspondents' estimates made in the last week in March was 510,000,000. A reduction of 6 per cent would make our present interpretation 480,000,000 bushels. This means that there has been very little if any net improvement during the first half of April, the government's April 1 forecast being 474,000,000. The total acres abandoned will be approximately 3,450,000 acres, leaving 33,867,000 acres for harvest. About 1,500,000 of the abandoned acres in the Pacific Northwest is being seeded to spring wheat. In the central belt the abandoned acreage is going largely into oats and corn. A yield of 480,000,000 bushels on 33,867,000 harvested acres would be nearly 14.2 bushels per acre. The ten-year average is 14.9. Past records show that when the condition is low in April the decline in condition

after April averages less than when the April condition is high. We have taken this into consideration in our interpretation. Normal rainfall in the future is necessary to maintain present forecast.—Nat. C. Murray, of Clement, Curtis & Co.

The course of the market in the next two months hinges on crop news and the rate of disappearance of the old wheat. The trade does not take adverse crop news too seriously, as prices have already discounted a good deal of the damage and the strength in the crop condition is not increasing at present; moreover, European prospects are more favorable than last year. The idea of a final sensational bull market in May wheat has been generally discarded, and large interests have been working for lower prices in this future, evidently for the purpose of buying in of hedges. Export business continues to be most unsatisfactory and the decreases in the visible supply are by no means sufficient to create a tight cash situation. Altogether conditions surrounding the May future do not attract much accumulative buying by strong interests, and the theory of a shortage in contract wheat for May delivery, though still being the leading argument of the most ardent bulls, is not likely to find strong leadership. The short interest in May wheat, however, seems to be rather large, and any revival in buying power may result in sharp advances, and as hedges are gradually being removed, final values may ascend to higher levels. But this will become a more professional affair, while the public interest is concentrating in the new crop futures. Further straight advances in May wheat will have a rather forced appearance as long as export business remains only nominal, while bullish developments in the new crop futures largely depend upon crop news, particularly from Europe.—Charles Sincere & Co.

PEORIA.

L. L. Eckard, Correspondent.

Heavy rains Sunday morning throughout this district were very beneficial to wheat and oat crop, which were in need of moisture.

J. W. Bryan, former manager of Murphy-Grier Co. at Springfield, was a visitor on the Peoria 'Change last Thursday. Murphy-Grier Co. have leased their office at Springfield.

Louis Mueller, president of the Mueller Grain Co., who was recently elected mayor of the city of Peoria, is enjoying a week's vacation before assuming his duties as mayor, May 5.

Oats receipts were only 1 car and there was no comparison as to price. No. 3 white oats quoted at 45c. Oats from this territory continue to move south, which affords the best market at the present time.

Receipts of corn at Peoria continue light and only 18 cars arrived Saturday and all offerings were readily taken at prices 1½¢ @ 3¢ higher. Local industries were good buyers. No. 2 yellow, \$1.09; No. 3 yellow, \$1.05 @ 1.06½; No. 6 yellow, \$1; No. 4 mixed, \$1.03; sample, 80c. Receipts of corn from the northwest were very light during this past week and it is said that the supply of corn from that territory is limited.

Grain receipts and shipments at Peoria for week ending April 18, as compared with those of the corresponding week last year, as reported by the secretary of Peoria Board of Trade:

	1925.	1924.
Receipts—		
Wheat	18,000	20,400
Corn	208,352	247,350
Oats	128,200	341,200
Rye	1,200	2,900
Barley	2,800	8,400
	358,550	620,150
Shipments—		
Wheat	1925.	1924.
Corn	10,800	10,800
Oats	188,850	101,800
Rye	173,700	304,200
Barley	9,800	1,200
	382,150	420,800

TOLEDO.

G. M. Bender, Correspondent.

Stocks of wheat at the end of last week in all elevators was 1,357,780 bus.; of corn, 236,798 bus.; of oats, 203,501 bus.; of rye, 36,736 bus.

Receipts of grain in this market last week were 19 cars of wheat, 7 cars of corn, 16 cars of oats and rye and barley, none. Total, 42 cars.

David Anderson, president of the National Milling Co., and Fred Mayer of J. F. Zahn & Co., have gone to French Lick Springs, Ind., for a visit and expect to be gone for about ten days.

Flour production as reported by Toledo mills for last week was 26,500 bbls., equal to 55 per cent of capacity. The week be-

fore it was 24,500 bbls. and a year ago last week was 31,700 bbls.

Reports from Indiana and Michigan on new wheat are far from favorable and rain is needed most everywhere. Quite a number of fields have been abandoned. The corn and oats acreage is expected to be very large.

The demand for soft wheat has been slightly more active lately and mills outside are coming here for their supplies. Local mills are not bidding. The flour trade has suffered from the panicky wheat market and buyers have almost given up hope of seeing flour settle down where they can feel secure in making commitments. Corn and oats are enjoying a lively trade and premiums for the higher grades are holding up exceptionally well. Rye has also been receiving more attention and it is possible to work a little for export.

Ohio wheat can hardly make more than two-thirds of a crop this year unless the weather is entirely favorable from now until harvest. There is some good wheat around Toledo and the northern part of the state, but in very few sections is it above the average. The condition is estimated at 60 per cent of a normal crop compared with 73 per cent last year. The damage was largely due to ice and freezes the latter part of the winter. Cold weather early in March was especially severe. Dry weather lately has not improved the outlook.

lished organization committee of shippers in Boston, May 8. Twenty-seven members have been named on the organization committee, Mr. Gormley said, and when the number has been increased to thirty-seven, as contemplated, it will be representative of every branch of industrial activity in the New England section.

ST. LOUIS.

Among last week's visitors on the Kansas City Board of Trade was Rufus Jackson of this city.

J. M. Chilton, St. Louis manager of the Hall Baker Grain Co., has returned from a trip to New Orleans.

H. H. Langenberg of Langenberg Bros. Grain Co. has applied for membership on the New York Produce Exchange.

The Moffitt-Napier Grain Co. announces that owing to the recent death of N. L. Moffitt and E. J. Gissler, officers of that company, it will retire from the grain commission business on May 15.

DES MOINES, IA.
J. H. Owens, Correspondent.

Will Simons of Chicago was in Des Moines Friday and Saturday.

F. J. Thatcher, of Uppike Grain Co., Chicago, was a visitor in Des Moines last week.

Guy Williams, of the Guy Williams Elevator Co., Little Rock, Ark., spent two days in Des Moines last week.

Miles Young, of M. Young & Co., Winterset, and E. W. Miller, of E. W. Miller Co., Guthrie Center, were visitors in Des Moines last Thursday.

Death has claimed Jack Wilson, who was manager of the Hubbell building branch of the Postal Telegraph Co. Mr. Wilson died of heart failure at his home last Wednesday.

BOSTON.

W. E. Rouse, of Geneva, N. Y.; P. M. Marshall, of Minneapolis; R. E. Sterling, of Kansas City, and H. P. Hinckley, of Chicago, were recent visitors to the Grain and Flour Exchange.

The Boston Grain and Flour Exchange has reached the limit of 200 members, fixed by its rules, and the applications now being received are being placed on the "waiting list." The reaching of the required number of members will allow the admission of associate members.

Organization for the New England states of a shippers' regional advisory board similar to those now operating in other sections is the purpose of a call issued by M. J. Gormley, chairman of the car service division of the American Railway Association, for a meeting of the already estab-

Hon. W. R. Motherwell, Canadian Minister of Agriculture says the report that Canada has only 35,000,000 bushels of wheat for export, is untrue, as there are 40,000,000 in the Port Arthur Elevator, alone.

The Manitoba Grain Futures Tax Act has been declared beyond the powers of the provincial legislature, because "it was imposed in a form which contemplated some one else than the person on whom it was imposed, paying it."

News of the Country Grain Trade

ARKANSAS.

Piggott, Ark.—B. L. Royall, for some years president of the Clay County Mill & Elevator Co., died at his home recently.

Blytheville, Ark.—The Blytheville Feed & Coal Co. has just completed a large elevator for the storage of grain and the initial carload of oats has been placed in the elevator.

CANADA.

Canrose, Alta.—The United Grain Growers, Ltd., Local 142, burned recently, together with a quantity of grain and flour. The loss of \$14,000 was covered by insurance.

Montreal, Que.—If the plans before the Harbor Commissioners are adopted, the new No. 3 elevator will be enlarged by the construction of a new storage section of 3,000,000 bushels capacity. This will give the elevator a storage capacity of 5,000,000 bushels, making it the largest elevator in Montreal.

Regina, Sask.—Bids on 30 modern country grain elevators of about 32,000 bu. capacity each have been requested by the Saskatchewan Pool Elevators, Ltd., bids to be in at the head office here May 1. The elevators must be completed by Aug. 15th, and plans, specifications and locations at which the elevators are to be built, can be secured on application. Tenders may be submitted for units of 5 or more elevators.

COLORADO.

Denver, Colo.—A bill has been introduced in the legislature here regulating the purchase and sale of agricultural products throughout the state. A \$50 annual tax is assessed on everyone but farmers and producers. Reports are required three times a month or as requested by the office of the Director of Markets, to be endowed with the power of issuing and revoking licenses at will, as to the prices paid and quantity bought. All arbitration is to be arranged by the director mentioned and, if the present bill becomes a law, all complaints must be adjusted by the same individual.

DELAWARE.

Wilmington, Del.—The Pottsville Milling & Produce Co. has been incorporated with a capital of \$100,000.

ILLINOIS.

Lerna, Ill.—Fire totally destroyed the grain elevator here.

New Canton, Ill.—Heidloff & Rose contemplates the installation of a shell-er next fall.

Havana, Ill.—The Havana Coop. Grain Co. has let contract for the erection of a concrete elevator. Work will begin at once.

Media, Ill.—H. O. White has purchased the Farmers Grain Co. elevators and business, and will operate under the name of H. O. White & Son.

Rees, Ill.—George Brown, Samuel Darley and Chas. R. Gibson were elected directors at the annual meeting of the stockholders of the Rees Farmers Elevator Co.

Steward, Ill.—R. F. Nelson has purchased the Shearer & Son elevators which will be operated under the name of The R. F. Nelson Grain Co. and will be managed by J. McNally for the present.

Eichorn, Ill. (R. F. D. No. 4, Golconda, Ill.)—The J. F. Humm Milling Co. has been incorporated with a capital of \$30,000. Incorporators: Jacob F. Humm, Marcella M. Humm, John C. Humm.

Trilla, Ill.—The elevator owned by George Kizer of Mattoon, was destroyed by fire of unknown origin. The elevator and sheds were valued at about \$6,000, covered by an insurance of \$1,500. Mr. Kizer has not decided whether or not he will rebuild the elevator.

St. Charles, Ill.—C. P. Davis of the Davis Coal & Farm Implement Co., has purchased the feed and grain business of Charles Crandall. The elevator buildings are the property of W. P. Lillibridge who formerly operated the business. Mr. Davis will conduct the feed mill in connection with his other interests.

INDIANA.

Orangeville, Ind.—The mill here is now owned by S. N. Mattox of Salem.

Markleville, Ind.—The Markleville Elevator Co. is installing new machinery and wiring for electricity.

San Pierre, Ind.—The San Pierre Farmers Grain & Supply Co. will reroof their elevator with asbestos shingles.

Frankfort, Ind.—Fire caused by a hot bearing or foreign matter in the rolls caused a small loss to the Sims Milling Co.

Remington, Ind.—The Farmers Coop. Co. is now managed by Lee Carl succeeding M. C. Coover who managed the affairs of the company for the past 14 years.

Edinburg, Ind.—L. J. McMillin has installed a 180 ft. chain drag for conveying corn to a distant crib in the elevator of Martin Cutsinger. Other equipment was also installed.

IOWA.

Sioux City, Ia.—McCaull-Dinsmore Co., Minneapolis, has temporarily closed its office here.

Fernald, Ia.—Hesson & Lynch will be succeeded by the North Iowa Grain Co., Mason City, Ia.

Brooklyn, Ia.—H. C. Light & Son has purchased the Stokely Lumber Company's lumber, coal and grain business.

Allerton, Ia.—The Allerton Grain & Coal Co. has dissolved, having wound up its business and disposed of its assets.

Leeds, Ia.—An explosion in an attrition mill started a fire which slightly damaged the mill of the International Milling Co.

Osceola, Ia.—The Eddy Grain & Produce Co. has moved into a new building which will aid them in handling their trade.

Waterloo, Ia.—The Grow-Well Seed Co., managed by George Hall, has been organized and will operate at Bluff St., 6 Park Ave.

Center Point, Ia.—The elevator of the defunct Farmers Co-op. Grain Co. has been purchased by L. J. Dennis, elevator operator here.

Lake View, Ia.—A new company may be organized if the proposals received for the assets of the Farmers Union Grain Co. are not satisfactory.

Denison, Ia.—Two stockholders of the Farmers Union Exchange have asked that a receiver be chosen for the Exchange which was incorporated in 1919 for \$50,000.

KENTUCKY.

Eminence, Ky.—The Eminence Milling Co. suffered a total fire loss April 16th amounting to \$30,000. The tile grain tanks adjacent to mill were damaged.

Morganfield, Ky.—The Morganfield Roller Mills are erecting an additional warehouse 32x80 feet and two stories high. A molasses feed plant and a new type Hammermill grinder for ear corn, whole wheat, alfalfa, oats and other products, are among the improvements which will amount to \$5,000.

Paris, Ky.—B. M. Renick has sold the Paris Mill to S. H. Kash and W. W. Quicksail of Lexington, Ky., and James Drake of Campton, Ky., for a consideration said to be in the neighborhood of \$100,000. The new owners will take immediate possession. The mill is modernly equipped in every way and has a storage capacity of 85,000 bushels of grain.

MASSACHUSETTS.

Lowell, Mass.—The fire which burned the plant of the Ryan Grain Co. caused a loss amounting to \$50,000.

MICHIGAN.

Morgan, Mich.—The Cecil Munton elevator and feed mill is still closed down.

Brown City, Mich.—The Michigan Elevator Exchange is promoting a co-operative movement here.

Eckford, Mich.—The Albion Farmers Elevator Co. elevator is still in the hands of creditors and has been idle for the past year.

MINNESOTA.

Conger, Minn.—A Mr. Johnson of Kiester is the new manager of the Speltz Elevator.

Brooten, Minn.—The Farmers Elev. Co. have purchased two Lord's stationary type dumps.

Hector, Minn.—A Trapp all steel dump is being installed by the Hector Coop. Milling Co.

Raymond, Minn.—The Farmers Coop. Elevator have ordered a Lord's portable type dump to be installed in July.

Waldorf, Minn.—The Farmers Elevator Co. are erecting a separate office on the north side of the elevator.

Minneapolis, Minn.—The Andrews Grain Co. will install several Globe and Trapp Dumps in their country elevators this spring.

New Ulm, Minn.—Recreation grounds will be provided by the Eagle Roller Mill Co., where the workers can enjoy outdoor sports.

Austin, Minn.—C. J. Marboe, manager of the Hormel Mills here and formerly

Leon, Ia.—C. G. Biddison, who recently sold his interests in the Biddison-Graham Coal & Grain Co., has established an office at the Baker Mill and will deal in coal, feed and grain.

Garden City, Ia.—Jewell Bockwitz is succeeded by Ole Tungland as manager of the Garden City Farmers Elevator Co. Mr. Bockwitz has accepted a position with the Lamson Bros. branch at Des Moines.

Council Bluffs, Ia.—The contract for the reconstruction of the Rock Island Elevator head-house has been let to The R. M. Van Ness Const. Co. The total cost of the improvements will be about \$60,000.

Alta, Ia.—Officers were elected by the Farmers Elevator as follows: Claus Lindlie, re-elected President; Chas. Christensen, Vice Pres.; G. H. Watson, Sec'y; Samuel Parker, Treas. Directors: Bert Schuelke, John Stromberg, Eloy Nelson, Chas. Holtz, Peter Strom, B. A. Warne and J. A. Blom. The affairs of the company are in a flourishing condition.

KANSAS.

Parsons, Kans.—D. R. White has installed a new mill on his farm.

Wichita, Kans.—The Carroll Grain Co. has chartered with \$10,000 capital.

Attica, Kans.—A. N. Black succeeds R. D. Ely as manager of the Attica Grain & Elevator Co.

Great Bend, Kans.—Chas. V. Brinkman has purchased the stock of Nick Smith in the Walnut Creek Milling Co.

Copeland, Kans.—The Jennings Grain Co. of Hutchinson contemplate the erection of another grain elevator here.

Alma, Kans.—Andy Anderson has resigned from the responsibilities assumed at the Farmers Elevator two years ago.

Oskaloosa, Kans.—Geo. M. Casebier has leased the Dobbs elevator, and will operate it in connection with his present establishment.

Tonganoxie, Kans.—It is reported that the Fair-Hinshaw Mill, closed after the Farmer's and Merchants State Bank failure, will soon be ready to start up again.

Lane, Kans.—At a meeting of the stockholders of the Lane Coop. Elevator Co., the directors were given authority to sell holdings of the company. The elevator will be placed on the market at once.

Kansas City, Kans.—The contract for the construction of 28 new storage bins for the Southwestern Milling Co. has been awarded to James Stewart & Co., Chicago, who have agreed to have the bins completed by Aug. 1st. When completed the bins will hold three-quarter million bushels of wheat.

is operating the elevator on a long time lease and will still retain possession.

Palmyra, Mo.—The Board of Directors of the Farmers Elevator & Exchange Co. has chosen the following officers: C. R. Happel, Pres.; W. F. Legenbauer, Vice Pres.; George V. Saffarans, Treas., and F. E. Robinson, Sec'y.

Hale, Mo.—The feed business of C. W. Kinsey and the produce and feed business of the Deardorff Produce House will become one firm under a deal which has been closed. They will occupy the present quarters of the Kinsey feed store.

Florence, Mo.—An addition to the Burlington Elevator Co.'s property, costing approximately \$250,000, has been started. It will consist of 18 tanks, 86 feet high, 22 feet in diameter with walls 7 inches thick, and when completed, will double the present elevator's capacity of 500,000 bushels of grain.

Monroe City, Mo.—The Farmers Elevator Co. report a \$511,686.06 business during the months from June 1, 1924, to March 15, 1925. It is probable a 7 per cent stock dividend will be declared. Directors elected for the ensuing year are: J. D. Robey, C. L. Elzea, A. Lee Ely, A. F. Griffith, Frank Rayna, Lewis Bell and B. A. McElroy.

MONTANA.

Buffalo, Mont.—Albert Lewis, present manager of the Farmers Elevator, has purchased same for a consideration of about \$7,000.

Whitetail, Mont.—J. M. Larson has taken over an elevator here and will be associated in the operation with his brother of Lookout, F. J. Larson.

NEBRASKA.

Kearney, Neb.—J. P. Gibbons Grain Co. has installed a Howe 10-ton Heavy Duty Motor Truck scale.

Stamford, Neb.—A Howe 10-ton scale is being installed in the elevator of O. E. Westerburg, and repairs are being made.

Brock, Neb.—The Farmers Union Coop. Ass'n. has been operating under the name of Farmers Elevator Co. since April 1st, following its reorganization.

Polk, Neb.—At a meeting of the stockholders of the Farmers Grain & Stock Co., it was voted that the company continue business. Twelve farmers have filed a petition in bankruptcy asking that the affairs of the company be terminated. It is claimed that the company owes around \$45,000.

NEW JERSEY.

Patterson, N. J.—Fire destroyed the grain elevators of Meyer & De Vogel with a loss of \$100,000. Large quantities of hay, feed, oats and other grain were destroyed.

NORTH DAKOTA.

Antelope, N. D.—Fire caused by a locomotive spark slightly damaged Elevator No. 2 of the Occident Elevator Co. on April 11th.

LIGHTNING

Strikes Elevators

Shinn-Flat Lightning Rods are particularly adapted to protect Grain Elevators. Cable is braided in Flat form, providing for expansion and contraction when elevators are loaded or empty. Your liberal discount on fire insurance warrants this investment.

Bismarck, N. D.—The Russell-Miller Milling Co. will increase their capital stock from \$6,000,000 to \$12,000,000.

OHIO.

Toledo, O.—The Keiser Milling Co. has been incorporated for \$150,000.

Celina, O.—The Celina Mfg. Co. is now owned by J. A. Copeland of Spencerville.

Shanesville, O.—F. Grimm of Warren recently took over the Andreas Bros. Flour Mill.

Finlay, O.—The Ohio Hay Sales Ass'n. has been organized with a capital of \$1,000 for the purpose of marketing hay directly to the consumer in an effort to reduce freight charges and increase profits. Those interested are: W. A. Beutler of Ottawa, Pres.; C. H. Stateler, Mgr.; J. C. Bright, W. S. Wallen, C. M. Wiseley and J. J. Herman of Vanlue.

OKLAHOMA.

Carnegie, Okla.—A. P. Snowden and Gus Ellwanger have leased the Nixon-Roody Flour Mill and have made some improvements.

Clinton, Okla.—Fire, thought to have started in a sack of lint cotton, damaged the elevator office of the Clinton Mfg. Co. Loss covered by insurance.

Tulsa, Okla.—The Central West Flour & Feed Co. has been incorporated by E. V. Keeney, Joseph Keeney and others with a capital of \$7,500.

Hammon, Okla.—H. J. Clark, trustee for C. H. Cantrell of Hutchinson, recently purchased the Hammon Mill & Elevator under execution by the sheriff, for \$2,500.88.

Banner, Okla.—The Jones-Hettelsater Const. Co. will erect a 20,000 bu. reinforced concrete elevator for the Yukon Mill & Grain Co., Yukon, Okla., to be completed by July 1st.

El Reno, Okla.—The grain storage plant of the El Reno Mill & Elevator Co. will be enlarged before the next grain season and will give the plant

a total capacity of 520,000 bushels and equipment for unloading 25 cars a day.

Guthrie, Okla.—The Guthrie Mill & Grain Co. has been organized by A. F. Sullins and T. A. Thatcher, both of Oklahoma City, and F. L. York, Guthrie, with a capital of \$25,000. They will erect a new modern flour mill for this year's grain crop.

Enid, Okla.—A movement to have the Santa Fe, Rock Island and Frisco Railroads build a 1,000,000 bu. terminal elevator here has been revived by the officers of the Southwest Wheat Growers Ass'n., having secured new extensions of the transit privilege from the Interstate Commerce Commission.

SOUTH DAKOTA.

Columbia, S. D.—The Columbia Farmers Elevator Co. will start to build about May 1st.

Aberdeen, S. D.—The convention of the South Dakota Grain Dealers Ass'n will be held here next December of January.

Redfield, S. D.—H. W. Speight will equip his house with lightning rods and another ventilating type motor, and put on a new composition roof.

Yankton, S. D.—The Farmers Union Co-op. Elevator Co.'s elevator has been

TOLEDO SEED MARKET.

TOLEDO, O., April 20.—Cash clover was lower the past week owing to a reduced demand and heavier offerings. The trade have been expecting to have the demand last until well into April and it has proven rather disappointing. Seedsmen say there has been heavy substitution for clover owing to the high price. Stocks here are not large and may be further reduced before the season closes. Receipts last week were 51 bags and shipments 418 bags.

October clover was higher last week and is receiving more attention daily. The crop reports are still based on guesses as the season is not far enough advanced to make definite conclusions. The trade in the new crop future has been fairly heavy considering the time of year. Some investors who bought early have accepted profits and there are some hedges being put out against cash seed that may be carried over. General rains over the clover belt have helped lately but more are needed to give the crop a good start. As the season comes to a close October usually becomes more active and trading shows a large increase.

Alsike and timothy remain strong and the cash trade has been larger than expected. Stocks of alsike, both prime and lower grades, have been exhausted in this market and seedsmen from outside have found it difficult to get alsike anywhere. Timothy stocks have been materially shaken down also and this leaves timothy in a much better position. Receipts of alsike last week were

This season	16,450	7,850	7,485

KANSAS CITY SEED MARKET.

KANSAS CITY, April 18.—Sales of alfalfa seed are making a fair volume, with orders from both nearby and distant territory and ranging from small lots to carlots. Grass and clover seed business is practically over for the season. Southern trade in forage seeds has subsided and dealers are awaiting the start of the corn crop in more northern states to see how heavy the demand for cane and millet will be. There is plenty of cane seed, and it has been selling on a feed-mixing basis for some time. Millet is scarce, except Siberian. Sudan seed is abundant and cheap. Cowpeas are so high that soy beans may be taken as a substitute. Rains in April have been favorable for growing fields of blue grass, clover, alfalfa, timothy and other grasses.

Seeds are quoted in a wholesale way as follows, per cwt., sacked: Blue grass, \$20@30; timothy, \$5.50@7; red clover, \$25@34; sweet clover, \$10@14; alsike, \$17@23; alfalfa, \$17@23.50; red top cane, \$1.75@1.80; orange cane, \$1.80@1.85; black amber cane, \$1.70@1.80; red amber cane, \$1.80@1.85; German millet, \$4@4.50; common millet, \$3@3.50; Si-

Field and Grass Seeds

berian millet, \$2.25@2.75; hog millet, \$2.25@2.50; Sudan, \$3.50@4.50; cowpeas, per bushel, \$4.50@5; soy beans, \$2.15@3.25.

MILWAUKEE SEEDS.

Movement of timothy seed and clover seed at Milwaukee as reported by THE PRICE CURRENT-GRAIN REPORTER by H. A. Plumb, secretary of the Chamber of Commerce, for week ending April 18, 1925:

	Receipts, lbs.		Shipments, lbs.	
	Tim.	Clov.	Tim.	Clov.
1925.....	30,000	70,953	10,040	18,455
1924.....	25,780	184,695	335,280	

ST. LOUIS SEED MARKET.

Quote: Timothy—fair to good country seed at \$5.50 to \$6.00, low-grade, weedy and dark at \$2.00 to \$4.50; clover—fairly clean to high grade clean seed at \$19.00 to \$24.00—trashy and heavily weedy seed unsalable; alfalfa at \$16.00 to \$20.00; redtop at \$11.50 to \$11.80 for clean seed—chaffy at \$2.00 to \$10.00; Sudan grass at \$4.25; German millet at \$4.00; hog millet at \$2.05 bulk basis.

Stock Peas—Quote whipporwill at \$3.60 to \$4.00 and new era and mixed at \$3.25 to \$3.30 per bu. on basis of latest sales.

Sorghum Cane Seed—Quote (on basis of latest sales) at \$1.55 per 100 lbs. for black amber and \$1.15 for orange.

CHICAGO SEED MOVEMENT.

Following is a statement of receipts and shipments of grass seeds at Chicago for the week ending Apr. 18, previous week, same week of 1924 and for the season to date, starting July 1 of the years indicated (amounts stated in pounds, 000 omitted):

	Timothy.		Clover.		Other.	
	Rcts.	Shts.	Rcts.	Shts.	Rcts.	Shts.
Week ..	387	746	73	93	205	42
Prev. wk.	320	671	639	181	310	232
1924 ..	396	913	384	437	406	511
1924-25.	34,871	25,877	10,609	5,358	16,063	15,494
1923-24.	30,764	19,405	10,222	7,434	23,072	13,095
1922-23.	31,010	29,167	9,893	8,412	22,664	6,135

Timothy—Quiet and unchanged. Fair country run \$5.70@5.90 per 100 lbs., good country run about \$6.00@6.15, high grade \$6.20@6.30, choice \$6.35@6.45 and fancy at \$6.75@7.00.

Alfalfa Seed—Fair trade. Recleaned country lots at \$22.00@23.00 per 100 lbs.

Alsike—Large demand at firm prices. Fair country lots \$16.00@17.00 per 100 lbs. Good seed \$17.50@19.00, choice \$20.00@21.00 and fancy at \$21.50@23.00.

Flax Seed—Nominal. No. 1 Northwestern closed at \$2.78¼@2.80¼ per bu. of 56 lbs.

Clover Seed—Offerings fair, market easy. Country lots \$19.50@22.25 for 100 lbs., good \$23.00@24.00, choice \$24.50@25.50, fancy \$26.50@27.50 and Mammoth \$23.00@28.00, according to quality.

DULUTH FLAXSEED MARKET.

DULUTH, April 18.—Trading in flaxseed continued dull and draggy on this market during the last week. Crushers were reported to have been practically out of the running and the interest was monopolized by pit traders who appeared to be ready to press the selling side on any strong spots. Apart from on Thursday, when a break of 5½ cents was registered in sympathy with slumps in wheat and other grains, trading came within a narrow range. On the net result of the six days' operations spot and May seed broke 8½ cents and the other futures from 6 to 8½ cents.

Receipts were light during the week, amounting to 23,190 bushels and shipments were 42,398 bushels, leaving stocks of 328,000 bushels in the elevators.

Interest of operators was centered at Winnipeg, where business mounted up into a substantial volume. In explanation for that it was pointed out that traders have been doing the bulk of their hedging up there for some time back on account of supplies in their lake elevators

and at points in the interior being sufficiently large to assure deliveries being made if called upon. Specialists in the flaxseed market claimed that inquiries have been put out at Fort William for boat space to move a fair lot of flaxseed to Buffalo. Taking into account that Canadian seed is estimated to be worth 10 cents a bushel more than American on account of its oil content their market is now practically at working basis. It is therefore being assumed that the needs of crushers' plants down there will be supplied to some extent with Canadian seed. Another bearish development commented upon by operators is the increased movement of Argentine seed in the Atlantic ports. That had been foreshadowed for some time back by the lack of export demand for Argentine seed in Europe.

Closing prices of flaxseed on the Duluth market on Saturday, as compared with the previous Saturday and the same period last year:

	Saturday.	Wk ago.	Yr. ago.
Spot	\$2.70-76	\$2.78¼-84½	\$2.39-46
To arrive....	2.70	2.78¼	2.39
April	2.70	2.78¼	
May	2.70	2.78¼	2.39
July	2.71	2.77	2.35%
Sept.	2.50	2.21

WEEKLY LINSEED REVIEW.

NEW YORK, April 20.—United Kingdom: The linseed situation in the United Kingdom during the past week has been rather steady with a fair demand for seed in sympathy with the firmer tone in linseed oil.

Linseed oil has been meeting with a good demand for all positions. Continental interests rebought some of their recent sales.

Cotton oil appears to be in good demand, and all classes are dearer.

India: Shipments of linseed this week amount to 384,000 bushels compared with 352,000 bushels the week previous.

Argentina: Clearances of linseed are enlarging, last week's outward movement exceeding ¾ million bushels compared with less than ½ million bushels the week previous. Port stocks are also increasing and now aggregate four million bushels compared with 3,400,000 bushels the previous week and 5,200,000 bushels at this time a year ago. Markets for linseed have displayed a steadier tone during the week. The export demand appears more active.

NAME CHANGED.

The M. & M. Seed Company, Chicago, has been authorized to change its name to the Ernest E. Meyer Seed Co., Inc.

GARNET WHEAT IN CANADA.

Commenting on the recent statement before the Agricultural Council of the House of Commons, that the production of Garnet wheat may possibly in the near future replace the famous Marquis staple, the American Press Bureau of the Canadian Pacific Railway says, "It is difficult to grasp the full significance of the claim that the Garnet staple has capabilities of high production in drought and ripens earlier than Marquis, thereby escaping the dangers of rust and frost, and that it will extend the wheat belt much farther north than it is now.

"Marquis wheat developed by Charles Saunders, who was recently granted a pension of \$5,000 per year by the Canadian government, and was awarded the gold medal by the Royal Society of Canada, has revolutionized wheat growing in America. In the past twenty years it has placed millions of additional dollars in the pockets of Canadian and United States farmers. The statement forces attention to what has been accomplished in wheat growing in Western Canada.

"In the early eighties when the Cana-

Canadian Pacific Railway first thrust its steel into the West and government and railway advertised the area as a grain growing territory, many authorities stated dogmatically that it would never be produced economically there. In 1924, forty years later, Canadian wheat acreage was 22,505,000 and the estimated spring wheat production, 271,622,000 bushels. This compared with an acreage of 59,659,000 and a production of 872,673,000 in the United States in the same year. Canada's yield in the past year was equal to nearly 12 per cent of the world's wheat crop grown in thirty-one countries, as recorded by the International Institute, as against 32 per cent in that of the United States crop.

"In 1911 Canada first entered the international lists with her wheat. She has failed in only one year since to carry away the world's championship, and then had the consolation of knowing that the winning Montana farmer had produced his crop from Canadian seed. The yield of wheat in Canada is consistently higher than in other countries of similar conditions. For the last five years the spring wheat average over Canada has been 15.1 bushels per acre. The world's record wheat crop was grown in Alberta in 1923, when 108,443,000 bushels were produced on 5,958,361 acres, an average of 28 bushels to the acre of wheat weighing 61.45 pounds to the bushel.

"One is inclined to wonder how much farther North the wheat belt can be pushed. In 1876 the prize winning wheat at the Centennial Exposition at Philadelphia came from the Peace River country of northern Alberta, and in 1893 another section of the same territory carried off the champion wheat honors at the Chicago World's Fair. North of Edmonton, in Alberta, 500 miles north or so of the international border, wheat which cannot be excelled is raised, and this year more than two million bushels of it came out of the country over the Edmonton, Dunvegan & British Columbia Railway."

SEED TRADE BETTER.

EVANSVILLE, IND.—Seed trade with us was better this season than last. The stocks of red clover, alsike, and sweet clover have been practically cleaned up. What the trade on stock peas, millet, soy beans, etc., will be remains to be seen.

Seed corn has not moved freely, but probably when farmers get ready to plant the demand will be more active. Stocks seem to be sufficient to take care of the normal demand, but from what we can learn, farmers expect to plant all they possibly can to corn on account of the good price they have been able to obtain for the 1924 crop.

Red clover looks tip-top in this section with about an average acreage. Wheat is in splendid condition and unless something happens to it between now and harvest we should have a yield above the average in this territory.—Ohio Valley Seed Co., Louis J. Graf, Sec'y-Treas., Apr. 20.

CANADIAN VISIBLE.

Canadian visible supply of wheat increased 1,170,000 bus.; oats, 657,000 bus.; rye, 122,000 bus.; barley, 380,000 bus. These statistics represent terminal stocks only:

	Apr. 18, 1925.	Apr. 11, 1925.	Apr. 19, 1924.
Wheat	40,489,000	41,789,000	50,643,000
Oats	18,640,000	19,748,000	9,131,000
Rye	2,368,000	2,317,000	1,654,000
Barley	7,513,000	7,504,000	2,065,000
Afloat—Rye, 110,000 bus.			

Effective April 4, a 33 per cent increase in the Rumanian tariff rate to offset the depreciation of currency on the exchange market was put into effect. The decline of the Lei in the last month is said to be due largely to inability to market last season's corn crop against the prevailing competition. The exportation of all Rumanian grains, except corn, now is prohibited.

OATS IN PRIMARY MARKETS.

Receipts of oats last week at 14 primary markets, compared with the corresponding week last year and also for the period beginning Aug. 1 to Apr. 18 (final 000 omitted):

	Apr. 18, 1925.	Apr. 19, 1924.	Apr. 18, 1924-25.	Apr. 19, 1923-24.

Feedstuffs

The Millers' Federation met in con-
vention last week in Chicago April 16
and 17 at the Edgewater Beach Hotel.

Gluten feeds at \$35 a ton compare
very favorably as a substituted ingre-
dient for soy bean meal at \$52 a ton.
This relative advantage for gluten feed
may not always prevail but at the pres-
ent many manufacturers are substi-
tuting it for soy bean meal or other
high priced good ingredients in their
balanced rations.

The alfalfa mill of the Broadacre
Farm & Livestock Co., which burned
several weeks ago, is to be rebuilt im-
mediately. It is located on the twenty-
two thousand acre Colorado farm of the
company where a considerable tonnage
of alfalfa, barley and other feedstuffs
are raised. The farm produces a par-
ticularly high grade of alfalfa which
is now being offered, baled in carlots,
through their sales office in the Conway
Building, Chicago, Ill.

COTTONSEED MEAL.

KANSAS CITY, April 18.—Slow trade
in cottonseed meal is admitted by deal-
ers, and this condition is expected to
continue during the next two months.
An early spring and plenty of grass are
the reasons given. Oklahoma continues
to be the principal source of offerings.
Prices asked by Oklahoma mills for car-
lots range from \$35.50 to \$36 a ton.
Arkansas quotes the same figures, but
freight rates place mills in that state
at a disadvantage for the Kansas City
market. Texas meal, also, is out of line.
A few more mills closed this week for
the season. The Kansas City price of
carlots remained at \$41.10.

Minneapolis mills raised the price of
linseed meal 50c a ton, to \$39.50 for
carlots. Local dealers reflected this to
the extent of 30c and sold meal at
\$43.80. There was no improvement in
the demand, which has been light for
several months as far as the Southwest
is concerned.

Both tankage and meat scrap held
steady all week. Each sold at \$55 a
ton in carlots and \$5 more in ton lots.
There was a moderate demand for tank-
age and a fair request for meat scrap.
Supplies were liberal.

MINNEAPOLIS' FLAX MARKET.

MINNEAPOLIS, Apr. 18.—The demand
for the cash article was rather spas-
modic, being good one day and poor the
next. Country run offerings were light
but on Friday there was quite an influx
of seed which had been loaded out of
Duluth and shipped in here, thus ac-
counting for the sudden increase in post-
ings. Crushers would take the choice
quality seed most any day that they
are available but backed away from the
poor stuff consistently. The week's to-
tal stocks were 365,745 bushels vs. 360,
722 bushels a week ago and 104,507
bushels a year ago. Range of sales on
today's market was 1c under at 2c over
May for No. 1 seed on track and the
same for the to arrive.

TRADE MARK REGISTRATION.

Attention of the trade is again called
to the probability that the names of feed
ingredients in your trade mark will pre-
vent trade mark registration.

There has been considerable discus-
sion in official circles recently on this
point and those who have experienced

the inconvenience and loss of busi-
ness through a necessary change in trade
marks after some little early expen-
se in advertising, will be very careful to
properly select their trade mark in the
first place before registration. The trade
mark law forbids the use of an ingre-
dient as descriptive of the feed or arti-
cle covered, subject to some qualifi-
cations through the earlier use of the feed
for a period of years so that the ingre-
dient itself has a distinct secondary
meaning. Many cases have been tried
by the Trade Mark Division against or
more descriptive words applying to
the product which are therefore not en-
titled to registration.

OIL MEAL MARKET.

Conditions which prevail in the wheat
feed market are also prevalent in the oil
meal market. Especially is this true of
the Chicago situation. Due to the
scarcity of flax locally production has
been reduced materially. The largest
mill in the city is closed down com-
pletely and does not know when it will
resume operation, this being dependent
on its securing flax from either Duluth
or Canadian ports by water. The other
mills, while still running are, in the
main, producing considerably less stuff
than they were a short time ago.

The export market is tight and cash
is commanding good prices. Don't let
your stocks of oil meal run too low.—
Bertley Bulletin, Chicago, Apr. 18.

NEW YORK OATS MARKET.

Oats receipts 148,000 bushels bonded
68,000 bushels domestic. The weakness
of other grains was reflected to a mo-
erate extent in this cereal, which re-
acted to near the previous level after
the pressure was removed. The mo-
erate movement from the farms shows
no tendency to increase and is result-
ing in very liberal weekly decreases in our
record visible supply. Now that lak-
navigation is again open, increased offer-
ings of Northwestern oats may be ex-
pected and the Eastern trade will doubt-
less secure their supplies through this
source in preference to Western all ra-
offerings, on account of their relative
cheapness. Foreign purchases of oats
were in large volume, being mainly of
Canadian origin, though sales of domes-
tic oats also were reported.—*L. W. Fol-
bell & Co.*

DOMESTIC FLAXSEED INCREASED PRODUCTION.

The 1924 yield of flax in important
producing countries is as follows:
United States, 3,289,000 acres producing
30,173,000 bushels.

India, 3,730,000 acres producing 11,
480,000 bushels.

Argentina, 5,906,000 acres producing
52,359,000 bushels.

Canadian and Russian acreage is not
available but the Canadian production
was 9,751,000 bushels and Russia is re-
liably estimated at 11,000,000 bushels.

This makes a total world production
of 121,763,000 bushels.

An interesting feature of this data
that the Argentine crop is some 15
20 per cent less than the production
1922 and 1923, whereas the United
States and Canadian crop totals approx-
imately 75 per cent more than for the
years.

J. F. Jackson, of Pynchon & Co., says
"The government method of crop report-
ing on condition is fallacious. Today's
will use around 16.5 as par against 1923
in June and July, theorizing that the
condition will deteriorate so much as to
issue a report in estimated bushels, that
is, 2½ bus. an acre less than were the
final par yield used. It would be far
better for the trade were one standard
par used and the estimated yield lower-
ed or raised as the condition changes."

FEED MARKETS.

MEMPHIS.

Memphis, April 18.—Quietude continues in the feed markets, for buying is limited by immediate requirements and to small lots. Financial conditions are causing hesitancy to be more nearly than usual on the basis of cash and less than usual in the outlook for future shipment. Millfeed is firm, but demand slow. Wheat bran today is quoted at \$29.50@30.50, while gray shorts were from \$35.50@36. Alfalfa meal continues very dull and one grade quotable from \$25.50@27. Cottonseed meal is held steady by the mills, who decline to sell freely at current quotations, which are \$6.50 for 41 per cent and \$38.50 for 43. Trading continues usually of small lots, with some fertilizer purchases.

BOSTON.

Boston, April 18.—Millfeed: Prompt shipment, per ton: Spring bran, \$30.50@31; winter bran, none offering; middlings, \$30.50@32; mixed feed, \$34.50@40; red dog, \$6.50; gluten feed, \$39.95; gluten meal, \$3.70; hominy feed, \$44; stock feed, \$41; cut hulls, reground, \$13; cottonseed meal, \$4@48.50; linseed meal, \$44@44.50. Oatmeal, per 90-lb. sack, rolled, \$2.90; cut and round, \$3.19. Oats—all rail, fancy, 40 lbs., \$6.1c; fancy, 38 lbs., 58@59c; regular, 38 lbs., 57@58c; regular, 35 lbs., 56@57c; regular, 34 lbs., 55@56c.

NEW YORK.

New York, April 18.—Both western and y feeds, but especially the former, were advanced rather sharply toward the end of the week, with reports that one of the leading sellers had withdrawn from the market. An active demand was reported from Buffalo. Stocks here are moderate and there was less resale pressure. City corn is quoted at \$30, middlings \$31 and red dog \$45, while western bran ruled at \$1.60, middlings \$31.60 and red dog \$45.50 @16 per ton.

BALTIMORE.

Baltimore, April 18.—There is a firmer tone to the spot wheat feed situation, and inquiry for sacked bran and middlings shows slight improvement. Hominy feed and gluten feed continue to move out slowly. Dried beet pulp quiet as we go to the season for pasture. Alfalfa meal quiet. Quotations follow: Spring wheat, per ton, 100-lb. sacks, \$31@31.50; eastern middlings, per ton, 100-lb. sacks, \$30.50@32; hominy feed, per ton, \$41@42; rye feed, per ton, \$39.75@40; alfalfa meal, per ton, \$30; dried beet pulp, per ton, \$37@37.50.

MILWAUKEE.

Milwaukee, April 18.—Condition of the Milwaukee feed market was steadier throughout the past week, with all current offerings absorbed by a day to day demand for small lot shipments. Prices of feed feeds closed approximately 50c per ton higher and a few orders were said to have been booked for future delivery at other 50c higher. The volume of sales reported was below the normal for this time of the year. Closing quotations for the week were: Winter bran, \$26.20@70; spring bran, \$25.50@26; standard middlings, \$25.50@26; flour middlings, \$31.2; red dog, \$38@39; rye feed, \$25@25.50; seed oil meal, \$41@41.50; cottonseed meal, \$40@44.25; hominy feed, \$35@35.50; gluten feed, \$6@6.50; gluten feed, 30 days, \$8; all in 100 lb. sacks, carlots, f. o. b. waukee.

CINCINNATI.

Cincinnati, April 18.—The firmness of the feed market became more pronounced this week as a result of the continued scarcity of offerings and an improved demand, and bran sold \$1.50 and middlings out 50c per ton higher. Reports that sales were oversold and that many were operating, and that consequently there is none available for prompt shipment is largely responsible for the decidedly firmer tone. The trade deemed it advisable this week to eliminate the hominy quotations owing to the difficulty of establishing accurate prices. Quotations represent 100-lb. sacks: Soft winter wheat, \$30.50@31; hard winter wheat bran, \$50@30; spring wheat bran, \$29.50@30; standard middlings, \$29.50@30; soft wheat middlings, \$35.50@36; gray hard middlings, \$40@36; mixed feed, \$33@33.50; No. 1 alfalfa meal, \$29.

PHILADELPHIA.

Philadelphia, April 18.—There is a good demand for nearby deliveries of feed stuffs of all kinds, and with light receipts prices

for these are firm and a shade higher. Future shipments are dull and neglected. A better export inquiry is also responsible for a great deal of the strength of the market. Quotations represent carlots in 100-lb. sacks at cost per ton: Soft winter bran, \$34@35; winter middlings, \$33@34; spring bran, \$30@31; standard wheat middlings, \$31@32; flour middlings, \$33.50@41; red dog, \$44.50@45; rye middlings, \$30@31; reground oats feed, \$12; fine yellow hominy, \$40@41; fine white hominy, \$41@42; cottonseed meal, 36% protein, \$42.25@43; cottonseed meal, 41% protein, \$44.25@45.

MINNEAPOLIS.

Minneapolis, April 18.—This week there was a marked improvement in the local feed situation. As a matter of fact, it can be said that there was more real life than at any time since the first of the year. During the past few months, with the exception of a rather desultory demand from nearby territory, there has been practically nothing doing here. Of course, the mills have been putting out some feed in mixed carlots, but there was no real consistent demand from any one source. This week, however, Philadelphia, who has not been heard from since the time that Buffalo began to flood the east with cheap feed, began to put out some feelers and before the week was out were bidding \$23 for pure bran. This is about \$4 higher than their last bids.

The improvement in demand seems to have been largely for deferred shipment, however. But with such a light output as the mills have been experiencing it is only natural that the spot and prompt stuff should become relatively stronger also.

Based on today's range of sales, standard bran is bringing \$23@23.50; pure bran, \$23.50; standard middlings, \$23.50; red dog, \$37@40; flour middlings, \$23.50@29.50; oil meal, \$39.50@40.50.

Weekly shipments of feed out of this market totaled 9,904 tons vs. 9,176 tons last week and 11,269 tons a year ago.

Season shipments since January 1st, this year and last, total 180,751 and 226,376 tons, respectively, and since Sept. 1st, 427,264 and 470,280 tons, respectively.

DULUTH.

Duluth, April 18.—Market in feeds continued quiet during the last week, with dealers confining their buying to their immediate needs in view of unsettlement in the coarse grains market. A good volume of feeds was shipped out to fill standing orders. Bran, shorts and Boston mixed figures were advanced \$1. Other prices are unchanged. Closing prices per ton follow: Bran, \$24.50; shorts, \$25.50; Boston mixed, \$25.50; red dog, \$38; flour middlings, \$29.50; ground oats, \$27.50; No. 1 ground feed, \$35.75; No. 2 ground feed, \$33.75; No. 3 ground feed, \$31.75; cracked corn, \$40; coarse cornmeal, \$40.

The London Grain and Seed Reporter estimates the requirements from March 13 to July 31, at 325,000,000 bushels, or at the rate of about 16,000,000 bushels per week.

BROOM CORN MARKETS.

The past week corn has moved rather steadily from warehouses, the largest sale made being a block of 800 to 900 bales by one warehouse to a middle western manufacturer last Friday afternoon. The sale of this block of corn together with the sale of one and two-car lots finds the sales of the week totaling a good average movement.

With corn moving, warehouses also have been scouting around the various districts in order to make replacements. Efforts along this line have not brought any amount of corn to the market, as buyers find that it is difficult to obtain crops except at a high buying expense. With sales made since the beginning of the month and the destruction by fire of 55 cars Thursday, the market has had a firmer undertone.

The tendency noted is to turn corn on the market, with prices showing no change as compared to the week previous. Dwarf is offered from around \$65 to \$130 and \$140, bulk held around \$85 to \$110.

Standard is offered from \$75 upward to \$150.

Interest has been shown in old corn recently, this grade moving around \$50 to \$60.—Broom Corn Review.

SHOULD BE IN ALL MASH FEED

Feed manufacturers who study the reports from Agricultural Colleges and Poultry Experimental Feeding Stations are quick to realize the important role that Dried Buttermilk is playing in poultry feeding. It is a fact that Dried Buttermilk is now practically accepted as an indispensable and most necessary adjunct to all mash feeds by poultry raisers and poultry experts.

BULLETIN 258

Indiana State Experiment Station

Form of Buttermilk	Eggs Laid	Cost per Dozen
Dried.....	189.4	16 Cents
Liquid.....	164.7	16 Cents
None.....	56.6	33 Cents

You can't ignore this

If you are a manufacturer of mash feed for growing and developing baby chicks, egg production in hens and pullets, or fattening fowls for market, you must consider the "handwriting on the wall," viz: public demand for Collis Process Pure Dried Buttermilk in all mash feeds. Collis Process Pure Dried Buttermilk is manufactured under our patented process which retains all feeding elements and lactic acid found in freshly churned pasteurized buttermilk. Write for further data, authentic feeding reports, cost figures and prices.

Buy and Sell Feed Materials—
ALL KINDS

The United States set a post-war record in world trade last month when imports and exports totaled \$837,000,000, the department of commerce announces.

a livelihood and prevents the public from receiving the fruits of his labor, is void on the grounds of public policy. I think this contract is void."

FEEDSTUFF SITUATION.

For April shipment particularly, there is a very strong demand for mill feeds, and with it markets are very firm and advancing. Strong premiums are being paid in order to get transit and immediate shipment. It is rumored that some buyers interest is developing on feed for shipment to August inclusive at \$2 to \$3 a ton under present current prices prevailing for prompt shipment. The favorable sentiment on the part of buyers to contract for feed has changed quickly, as a week ago, buyers looked upon mill feeds with more or less distress believing that lower prices would be in store than prevailed at that time for future shipment.

MINNEAPOLIS.—Bran, \$24 to \$24.50; standard middlings, \$25 to \$25.50; flour middlings, \$30 to \$30.50; red dog, \$39 to \$40.

CHICAGO.—Bran, \$26.60 to \$27.10; standard middlings, \$27.60 to \$28.10; flour middlings, \$32.60 to \$33.10; red dog, \$41.60 to \$42.60.

KANSAS CITY.—Bran, \$26; gray shorts, \$33.50 to \$34.

St. Louis.—Bran, \$28.40; gray shorts, \$35.90 to \$36.40.

ALFALFA MEAL.

The demand is unchanged but prices are firmer inasmuch as the distressed condition of some mills for want of shipping instructions has been relieved. There is some little buyers interest for prompt 30-day shipment. Nominally quoted second hand bag basis, choice, \$27.50; No. 1, \$26.50; No. 2, \$21.50. Fine ground grades, \$3.50 to \$4.50 a ton premium.

REGROUND OAT FEED.—Nominally quoted reground, \$7 to \$7.50; unground oat hulls, \$9. A little better demand as buyers are learning that the rolled oat mills are curtailing production and at this time of the year there is a better demand for this commodity than at any other time and higher prices usually prevail. Therefore, buyers are endeavoring to protect their wants for the next thirty to sixty days at current prices.

LINSEED OIL MEAL.—Market holding steady with ample demand to take care of present output for thirty to six day shipment. Nominally quoted, fine ground for prompt thirty days, Chicago, \$41; Minneapolis, \$39. In bulk where available, \$2 a ton less.

HOMINY FEED.—The market is more or less checkered as no two sellers are alike on their selling prices, for hominy feed recently has been selling more or less on a fat content basis. Those mills producing 7 per cent hominy have realized a premium on their hominy over mills who are only producing 5 per cent; as much as \$1, \$1.50 to \$2 being paid for the higher fat content. Nominally quoted white, \$37 to \$38; yellow, \$35 to \$36.50. In bulk, where available, \$1.50 to \$2 per ton less.

DRIED BUTTERMILK.—Demand is strong and has been for the past few weeks, the result being that the market is cleaning up rapidly. There has been no change in prices, which are as follows: Creamery in carlots, 6½¢ per lb., and L. C. L. up to 7½¢.

COTTONSEED MEAL.—There has been some improvement in the market, the demand being somewhat stronger. With indications pointing to a smaller cotton crop this year, and consequently higher prices a clean-up is looked for before the new crop. Meal is nominally quoted for 43 per cent protein, Chicago basis, at \$44.00.

PACKERS' PRODUCTS.—Demand is slackening somewhat, and as producers are in the midst of their fertilizer business, no special effort is being made to dispose of feed products. A new price list is expected within a couple of days, but today's quotations are as follows: Meat scraps in carlots f. o. b. Chicago, \$55@60 a ton; 60 per cent protein digester tankage, \$50@55; raw bone meal, \$50.

CHARCOAL.—Seasonable demand at price basis f. o. b. Chicago; Milwaukee carlots, \$33@38 per ton, depending upon size of charcoal. Less than carlots, \$@50 per ton, standard units of 50-lb. burlap bags (for the finest grades, paper lined) in 13-ton minimum cars.

PORT DIFFERENTIALS ABOLISHED.

The U. S. Shipping Board has approved the resolutions adopted by the Gulf Shipping Conference and the South Atlantic Steamship Conference, which resolutions establish the principle of parity of rate on commodities originating for ocean shipment in competitive territory whether such commodities move through the Gulf, the South Atlantic or North Atlantic ports.

This action of the Shipping Board abolishes the discriminatory differentials against the Gulf ports of 15¢ per 100 pounds, and against the South Atlantic ports of 7½¢ a 100 pounds heretofore existing. The resolutions adopted by both the Gulf and South Atlantic Steamship Conferences followed the order of the Shipping Board of January 20, which disapproved and cancelled the tri-partite conference agreement, which was composed of North Atlantic, South Atlantic and Gulf steamship operators and under which the differential against the Gulf and South Atlantic, now removed, were established.

The differentials were originally set up by an agreement of the tri-partite conference, which was made up of the North Atlantic, the South Atlantic and the Gulf steamship interests. A provision was placed in the original agreement requiring unanimous consent for its abrogation, and during hearings the Shipping Board members were told that though they had often tried, the South Atlantic and Gulf members of the conference had been unable to revise the rates in the face of opposition from the North Atlantic group.

The Shipping Board on January 20 abolished the tri-partite conference thereby nullifying the agreement and opening the entire rate question. Later the South Atlantic and Gulf groups decided on rates which would equal those of the Northern group, and it was this agreement which was made effective on the board.

NAVIGATION IS OPEN.

The Grain Trade News of Winnipeg says:

"With the arrival at Fort William Port Arthur of the first vessel of the season on April 14, and the departure on the 15th of the first grain cargo, lake navigation has again begun. The season is early but not a record. It is satisfactory to know that the most favorable transportation conditions the present situation permits of will be available for the movement of the balance of the crop. Although there is some 600,000 bushels of grain in the terminal elevators there appears to be no pressure at all about early movement. Indeed there have been few periods during the present crop year when the consumption demand for our wheat created pressure. Canadian prices have maintained themselves at the top of the list and have moderated demand. That will be able to dispose of the balance of our crop on good terms admits, of course, of no doubt."

AUSTIN, TEX., Apr. 10.—Cottonseed 1924 out of farmers' hands. Stock largely held by oil men and dealers.

Since June 1924 Texas has had little or no rainfall. Oats failed, wheat very short, corn crop 1924 very short a small acreage for 1925.

Cotton acreage for 1925 will undoubtedly be very large. Everything now depends on rain. 1925 outlook very, very discouraging.—Wm. G. Bell Brokerage Co.

In response to requests from the U. S. Department of Agriculture, nearly 50,000 farmers have thus far reported on the number of acres they intend to plant in different crops, this year.

Alfalfa Department

ALFALFA MEAL MARKET.

KANSAS CITY, April 18.—Prices of No. 1 and No. 3 alfalfa meal advanced 50c per ton this week, but choice and No. 2 were unchanged. The rise was based on cost of hay rather than revival of demand. Though advices from the South suggested that mixed-feed manufacturers were gradually working out of depression, it was believed here that 30 days more would elapse before meal could be sold in large volume. The current quotations, per ton, are: Choice, \$25.25; No. 1, \$22.50; No. 2, \$17.50; No. 3, \$17.50.

The market for mixed grain and molasses feeds ruled strong this week in reflection of last week's advance in corn and other cereals, though the grain prices failed to hold their gains. Hog feeds went up \$1 a ton and horse and mule feeds sold \$1.50@2.50 higher. There was an advance of \$2.50@3 in scratch poultry feeds. The best demand in the list was for horse and mule feeds. Poultry feeds sold well. There was a moderate inquiry for dairy and hog feeds. Prices of carlots per ton were: Dairy feeds, \$36@46; cattle feeds, \$39@44; hog feeds, \$45@57; pig meal, \$68; horse and mule feeds, \$32@42.50; alfalfa-molasses feeds, \$26.50@33; scratch poultry feeds, \$48@53.50; mash poultry feeds, \$49@75.

LIME ON ALFALFA.

The farmer in the vicinity of Vawter, Minn., are looking forward to the time when that part of Morrison county will be an alfalfa paradise and are doing everything possible to make the land there suitable for raising that crop. A carload of agricultural lime was recently received at the Vawter station and has been distributed. The lime is newly ground and cost the farmers \$2.65 per ton laid down at Vawter.

DAMAGE TO ALFALFA.

According to reports the heavy sleet storm of last winter did considerable more damage to alfalfa than was estimated at the time.

It is claimed the crops were not frozen, but suffocated, the air being shut away from the plant or germ, for more than ten days.

ALFALFA PRIZES.

The First National Bank, because of its belief that alfalfa spells prosperity in Walworth county, Wisconsin, is offering ten prizes for the ten best single acres of alfalfa raised by boys between the ages of 10 and 20 years.

TO FIGHT ALFALFA WEEVIL.

At the call of the California Development Association officials and leaders in agricultural enterprises from all parts of the state gathered at Stockton recently, in an extensive session to consider the alfalfa weevil situation in the West. Officials from both Utah and Nevada were represented and California's position was explained by G. H. Hecke, director of the state department of agriculture. Other state officials were also on the program and the railroads were given an opportunity to present their viewpoint. An effort was made to gather data on the situation in the West and California today.

C. C. Teague, chairman of the agri-

cultural committee of the California Development association presided. Practically all of California's larger enterprises having to do with alfalfa, including representatives of the cattle and sheep association were in attendance. Need for control efforts were discussed but no announcement made for the public.

Why

These are the Fastest
Selling and Most
Profitable Feeds for

FEED DEALERS

Sugared Schumacher Feed and Boss Dairy Ration are the fastest selling and most profitable feed for feed dealers because—

1. They are **QUALITY** Feeds that exactly meet the requirements of farmers and dairymen.
2. They produce such splendid results for feeders that they always come back for more.
3. They make a **COMPLETE** dairy ration. Sugared Schumacher Feed supplies the carbohydrates and Boss Dairy Ration the protein part of the ration.
4. Sugared Schumacher Feed is an "all 'round" feed—good for hogs, horses and dairy cattle.
5. They are extensively advertised in the farm and dairy publications. These convincing advertisements send thousands of customers to the stores of dealers who handle these feeds.

If you are not handling these fast selling and profitable feeds write us today for our attractive dealer proposition.

ALFALFA MEAL

A. B. CAPLE, Toledo, O.

Hay Department

ALABAMA AND TEXAS ADOPT FEDERAL HAY GRADES.

The United States Department of Agriculture has completed an agreement with the Alabama Department of Agriculture and Industries which provides for the adoption of federal hay grades as state hay grades in Alabama and the establishment in that state of joint state and federal hay inspection as soon as necessary details can be completed. The inspection service will be available for both producers and shippers who have Johnson and alfalfa hays for sale and to dealers who have hay shipped into the state from other sections.

An agreement has also been made by the United States Department of Agriculture with the Texas Markets and Warehouse Department, providing for the adoption of the federal grades in that state and the establishment of joint state and federal inspection at points where it may be wanted in that state.

It is expected that schools for training federal hay inspectors will be held at some point in both Alabama and Texas in the near future.

HAY MARKET REVIEW.

The hay market was practically unchanged during the week April 13-18 according to the weekly hay market review of the United States Department of Agriculture. Consumers were buying from hand to mouth and the moderate arrivals were ample for current needs. Offerings of top grades were light and prices of this hay advanced at several markets, but inferior hay was slow sale at unsatisfactory prices. The season seems about ten days earlier than usual and hay consumption in the country has been reduced by the early pasturage available. Pastures generally have made good progress, although rain was needed in the upper Mississippi valley and the upper Ohio valley states, while drought continued in the great southwestern grazing districts and the range situation remained critical, particularly in New Mexico and Arizona.

Timothy held steady. The Boston market was practically unchanged with the light offerings equal to the demand and the accumulation at New York was being reduced. Poor hay was slow sale at both markets. Good hay was firm at Pittsburgh but low grades were dull. Receipts increased at Cincinnati as the pressure of farm work slackened and the market was easier, although there was an urgent demand for the very best grades. The Chicago market was firm and Southern markets were practically unchanged.

The best grades of alfalfa were firmer but damaged hay was hard to move.

Some good alfalfa was wanted at New York. Sound alfalfa was \$1 higher at Omaha, although off grades sold with difficulty. Good quality hay was firm at Kansas City and the lower grades held steady. Quotations at Memphis advanced \$1.

Prairie was easier on increased offerings. There was almost no inquiry at Chicago and prices declined at St. Louis, although the Minneapolis and St. Paul market was higher. Receipts at Omaha were equal to the slack demand and prices were reduced at Kansas City on a weak market with the offerings moving at the bottom of the quotations. The stock yards were buying some good quality hay but the shipping trade and the local demand were light.

KANSAS CITY HAY NOTES.

T. J. Tanner, Correspondent.

Reports received from New Mexico by J. M. Hail & Co. indicate that the new alfalfa crop in that state is two weeks late and will not be ready to move before the last week in May or the first of June. Acreage this year shows some reduction, due to more interest in cotton and the employment of labor in the oil fields. The crop went safely through the winter. Some old hay remains to be marketed.

According to a letter received by the Carlisle Commission Co., new alfalfa hay is coming into use in Mississippi.

William Dwyer of North & Co. says there is nothing unusual in Illinois timothy hay underselling the western product in Mississippi. It is his experience that when a Mississippi man buys timothy in Kansas City it is due to good quality or unfamiliarity with market prices and freight rates.

Wet weather thus far in April has been all that could be desired for the growing crops of hay in the Southwest. Only the cut worm and other insects are feared as crop adversaries.

R. C. Bell has a theory to explain the difficulty of selling Western timothy hay to the lower Mississippi valley states and the Southeast. "Hay dealers in New York state," said he Wednesday, "have been buying Canadian hay, which is very fine stuff. They sell it in the Eastern markets at good prices. The billing is used to ship their own product on southward. This crowds Illinois hay out of the Southeast and forces it into the south Mississippi states, making shipments from Western territory difficult or impossible."

The hay tracks were abandoned Thursday on account of rain, and no market was held.

C. R. Strain of the Lamar Alfalfa Milling Co., Lamar, Colo., spent Wednesday in Kansas City, after a business

North & Company

Receivers—Shippers

Hay, Grain, Millfeed, Alfalfa Meal

Live Stock Exchange Kansas City, Mo.

trip through Virginia, Tennessee, Kentucky and Indiana. He said he found mixed feed manufacturers coming out of the depression of the last two or three months, with stocks gradually being worked off. He predicted a better demand for meal within the next few weeks. Mr. Strain said the Colorado mills were through their season's grinding, which ended with considerable stocks of meal on hand.

The Kansas City hearings on tentative grades of alfalfa and wild hay were held April 16 and 17 by W. A. Wheeler and Edward C. Parker of the Hay, Feed and Seed Division of the Department of Agriculture in the office of G. F. Kellogg, in charge of the local branch of the division. There was a good attendance of officers and members of the Kansas City Hay Dealers' Association, outside dealers, dairymen and other interests. Besides, there were present representatives from the Oklahoma State Department of Agriculture and the Kansas State Board of Agriculture. The proposed grades for prairie hay were thoroughly discussed and the general plan of these grades was recommended as being comprehensive and yet more simple and practical than grades for prairie hay heretofore used in the prairie hay markets of the United States. Considerable discussion arose relative to the question of introducing a choice grade. Some of the Kansas City dealers were in favor of the choice grade, while others believed the product was so rare that this grade was not justified. The question was finally brought to a vote, and the majority voted in favor of giving federal inspectors the authority to add the words "exceptional green color" to the No. 1 grade, whenever the inspector estimated the green color of the hay to be 75 per cent green or better. Grades for alfalfa hay were generally acceptable. Several changes were suggested, which met with the approval of the conference, among which were: That the term "soft" be available for application to all of the numerical grades; that over 75 per cent green color whenever present be designated; that pigeon grass or green or yellow foxtail be considered foreign material in all stages of development; that the maximum limit of grass in alfalfa light grass mixed be placed at 20 per cent instead of 30 per cent. A considerable portion of the Kansas City hearings was devoted to the ways and means for providing thorough and uniform plug inspection. The subject of dual inspection between shipping points and terminal markets also received much discussion, as well as the question of handling appeals in case of hay arriving out of condition. In response to a suggestion, N. C. Campbell, president of the Kansas City Hay Dealers' Association, voiced the sentiment that the Kansas City exchange would be pleased to discuss any changes in the rules and regulations which the department might wish to make in the future.

HAY MARKETS.

BALTIMORE.

April 18.—There is a somewhat easier feeling in hay under ample receipts and a slow outward movement, this resulting in some accumulation of hay on sellers' hands. Receipts of hay by trucks from nearby country points are supplying most needs. Low grade and inferior hay hard to move at any price.

Straw of all kinds is about steady with a fair jobbing inquiry for wheat and oat blocks, but big baled rye straw slow sale. Quotations follow: No. 1 timothy, \$20; No. 2, \$18@18.50; No. 3, \$15@16.50; No. 1 light clover mixed, \$17@17.50; No. 1 clover mixed, \$16.50@17; No. 2, \$15@16. Straw—No. 1 straight rye, \$18.50@19; No. 1 wheat, \$15@15.50; No. 1 oat, \$15.50@16.

PITTSBURGH.

April 18.—Hay receipts continue light and there is a fair demand for the better grades of timothy and strictly No. 1 clover

mixed. All medium grades continue very dull, however, and are very hard to place. Quotations: No. 1 timothy, \$20@20.50; standard, \$17.50@18; No. 2, \$14.50@15. No. 3, \$12.50@13.50; No. 1 H. C. mixed, \$16@16.50; No. 1 L. C. mixed, \$16@16.50; No. 1 clover mixed, \$16.50@17; No. 2, \$10@11; No. 1 clover, \$16@16.50; No. 2, \$10@11. Straw—Receipts of straw light, but there is no urgent demand. Prices firm as quoted. Quotations: No. 1 wheat straw, \$12.50; No. 2, \$11.50@12; No. 1 oat straw, \$11.50@12; No. 2, \$11@11.50; No. 1 rye straw, \$12.50@13; No. 2, \$11.50@12. Receipts of hay, 48; straw, 3.

PORTLAND, ORE.

Apr. 16.—Buying prices f. o. b. Portland: Alfalfa, \$20@21 ton; valley timothy, \$20@21; eastern Oregon timothy, \$23@24; clover, \$16.50@17; oats, \$19@20; straw, \$19.50@20.50; hay, \$8@8.50.

BOSTON.

Apr. 18.—No. 1 timothy, \$25.50@26; No. 2 timothy, \$22@24; No. 3 timothy, \$17@18; eastern, \$16@23; clover mixed, \$21@22; Rye, \$21@22; oat, \$13@15.

CHICAGO.

Apr. 20.—Demand good, especially for choice hay; market firm. Offerings moderate. Choice timothy at \$22@23; No. 1, \$20@22; No. 2, \$16@18; No. 3, \$12@14. Timothy and clover, light mixed—No. 1, \$14@16; No. 2, \$12@14. Heavy mixed—No. 1, \$14@16; No. 2, \$12@14. Timothy and grass, light mixed—No. 1, \$18@20; No. 2, \$14@16. Heavy mixed—No. 1, \$15@16; No. 2, \$12@14. Clover—No. 1, \$14@15; No. 2, \$10@12. Mixed grass—No. 1, \$12@14; No. 2, \$11@13. Oklahoma, Kansas, Nebraska and South Dakota prairie hay, \$12@15. Marsh hay, \$10@12; rye hay, \$11@12. Rye straw, \$11.50@12. Oat straw at \$8@10; wheat straw at \$8@10.

MEMPHIS.

April 18.—Receipts for the week were only 29 cars, so stocks are gradually diminishing, although buying continues hand to mouth sort. Alfalfa is steady, relatively than timothy, as receipts have been smaller, but not much snap is shown in either. Quote: Timothy, one, \$22.50; standard, \$21@21.50; two, \$19.50@20.50; alfalfa, one, \$28@28.50; standard, \$25@26; two, \$22@22.50.

OMAHA.

April 16.—Prairie hay: Receipts light. Arrivals are of fair to good quality. Demand continues extremely dull. Prices steady. Alfalfa hay: Receipts light. There is some improvement in demand for better grades. Off grade or damaged alfalfa very difficult to move, but sound stuff is showing some improvement. Prices higher. Prices below are for carload lots: U. S. land prairie—No. 1, \$10@10.50; No. 2, \$7@9; No. 3, \$6.50@8. Midland prairie—No. 1, \$9.50@10; No. 2, \$7.50@9; No. 3, \$5.50@7. Lowland prairie—No. 1, \$6.50@7.50; No. 2, \$5@6. Choice alfalfa, \$18.50; No. 1, \$17@18; standard, \$12@15; No. 2, \$9@11; No. 3, \$7@8. Straw—oat, \$7@8; wheat, \$6@7.

NEW YORK.

April 16.—The New York Hay Exchange Ass'n has issued the following weekly report, with latest quotations:

	Hay.	Straw.
Receipts for week	757	50
Receipts last week	865	36
Receipts from Sept. 1	38,925	856

Although rail arrivals have been extremely light at all points, trading on the whole was rather inactive, buyers taking more sparingly, confining their purchases more particularly to the better classes. Water receipts to Manhattan points were increased by the arrival of the first barge on Wednesday, which offerings naturally attracted some trade away from the regular market places.

Considerable of the carlot offerings are of a common to low grade, in mixed class of no stable value and hard to move.

Straight carlots of No. 1 and No. 2 timothy are mostly preferred and work readily at quotations, but No. 3 shows improvement, receiving only second consideration. Common mixed lots carry no fixed values and sell for such offer as enable the best outlet.

Rye straw plentiful and very inactive.

New invoices in light receipt. Federal grade quotations for large bales follow:

Timothy—No. 1, \$25; No. 2, \$21@23; No. 3, \$17@19. Light clover mixed—No. 1, \$13@15; No. 2, \$17@19; No. 3, \$15@16. Medium clover mixed—No. 1, \$17@19; No. 2, \$15@16. Light grass mixed—No. 1, \$21@23; No. 2, \$17@19; No. 3, \$15@16. Heavy grass mixed—No. 1, \$15@16. Rye straw—No. 1, \$15@16.

MILWAUKEE.

April 18.—The Milwaukee hay market continued in nominal status throughout the past week. Current quotations are unchanged, as follows: No. 1 timothy, \$14.15; No. 2 timothy, \$12@13; No. 1 mixed, \$13.50; No. 2 clover mixed, \$11@12; sample hay, \$6@8; marsh feeding, \$10; packing, \$9; rye straw, \$9@10; oat straw, \$9@10.

KANSAS CITY.

April 18.—Expansion affecting all kinds of hay, but especially the prairie variety, raised the total receipts this week to 477 cars. A year ago the arrivals were 669 cars.

Prairie offerings took the lead, amounting to 217 cars, or more than twice as much as a week ago. As many cars of low grade and damaged hay were included, the market began to slump on Monday. It had another small recession on Saturday. During the entire week inferior hay sold very slowly, some of it selling below cost.

harvesting, storing and shipping. There is a limited demand for fair to good hay, with stock yards buyers and shippers making supplies. The market closed \$1 to .50 a ton lower on everything above packing, which was unchanged to 50c down.

Alfalfa was scarce, though receipts increased 38 cars, to 165. Local buyers, including dairymen, retailers and millers, were in the market and there was a fair shipping demand for sound hay. Only the imaged and low grade hay was difficult to move and some of this unsold at the week end. Prices rose 50c@1.50 a ton on Tuesday. The improvement was held.

Among the other kinds of hay on sale there was only fair request and pure clover was weak, closing unchanged to .25 lower. Receipts were 50 cars, or 17 more than a week ago.

Straw was in light supply, with one fresh car arriving. The market was firm, holding at the same price as a week ago. Carlots of hay and straw are quoted as follows per ton, f. o. b. Kansas City:

Alfalfa—Select dairy, \$24@27; choice, \$1.50@23.50; No. 1, \$19@21; standard, \$5.50@18.50; No. 2, \$11.50@15; No. 3, \$7@11. Prairie—No. 1, \$9.50@10.50; No. 2, \$8@9; No. 3, \$5.50@7.50; packing, \$5@5.50. Timothy—No. 1, \$15@15.50; standard, \$14.50; No. 2, \$12.50@13.50; No. 3, \$10@12. Clover mixed—Light, \$15@15.50; No. 1, \$3.50@4.50; No. 2, \$10@13. Clover—No. 1, \$9.50@12; No. 2, \$7@9. Straw—Wheat, \$8@8.50.

CINCINNATI.

April 20.—Receipts of hay, which had shown a curtailment in recent weeks, were again materially increased the past week, indicating a completion of much of the spring work on farms, and more disposition on the part of farmers to market their remaining surplus, which is quite large in adjacent producing sections. As a consequence of the larger offerings the market developed an easier tone, but the demand was also lacking to sustain prices, which averaged 50c@1 per ton lower. Choice top grades alone commanded the attention of buyers who seemed averse and unwilling to take more of the medium and common quality than was absolutely necessary for their immediate needs, feeling confident that the market will be amply supplied with ordinary hay for the remainder of the season. High grade was scarce compared with other kinds, and the demand urgent for the timothy and light mixed suitable for racing stables. Clover was dull, as also alfalfa. No. 1 timothy, \$8@18.50; No. 2, \$16.50@17.50; No. 3, \$14@18; threshed, \$8.50@10.50; no grade, \$8@10. No. 1 heavy clover mixed, \$15@16; No. 1 light clover mixed, \$15.50@16.50; No. 1 clover mixed, \$15@16; No. 2, \$13@14; no grade, \$10@11. No. 1 clover, \$15@16; No. 2, \$11@12; no grade, \$8@9. No. 1 second cutting alfalfa, \$21.50@23.50; No. 2, \$17.50@19.50. No. 1 first cutting alfalfa, \$15.50@16.50; No. 2, \$13@15. Sound sample grassy hay, \$9.50@10. Straw—Wheat, \$9.50@10.50; oats, \$9@10; rye, \$13@14.

PHILADELPHIA.

April 18.—Baled hay and straw: The market for hay is dull and weak. Supplies are moderate but fully ample for the limited demand, and prices show no quotable change. Straw is steady under light receipts but there is very little inquiry. Federal grades: Timothy—No. 1, nominal; No. 2, \$18@19; No. 3, \$16@17; sample, \$10@15. Light clover mixed—No. 1, \$17@18; No. 2, \$16@17; No. 3, \$12@14. Medium clover mixed—No. 1, \$15@16; No. 2, \$13@14. Heavy clover mixed—No. 1, \$14@15. Light grass mixed—No. 1, \$17@17.50. Straw—Straight mixed, \$15@15.50; wheat, \$15@15.50; oat, \$14@14.50.

DULUTH.

April 18.—Dealers found a slow demand for hay, with only the better grades salable. In view of that condition the trade held upon country shippers the necessity of holding their shipments down. Closing prices per ton are unchanged, as follows: Timothy—No. 1, \$15; No. 2, \$13. Mixed Timothy—No. 1, \$15; No. 2, \$12. Prairie—No. 1, \$15; No. 2, \$12; No. 3, \$12. Midland—No. 1, \$10; No. 2, \$8. Straw—Rye, \$10; oat, \$8.

TOLEDO.

April 20.—Hay remains low in price and stocks still large. The demand is just a little better. Farmers are busy and some buyers have had to come to the terminal markets for their purchases. Dealers are not reducing their prices to make sales as they say the crop this year may prove very disappointing and the hay that now goes begging may be wanted.

Prices as quoted per ton in this market last week were: No. 1 timothy, \$14; No. 2 timothy, \$12; No. 1 light clover mixed, \$5.50; No. 1 heavy clover mixed, \$12.50; No. 1 red clover, \$11; No. 1 first cutting alfalfa, \$15; No. 1 second cutting alfalfa, \$9; sound dry wheat straw, \$8.50; sound dry oats straw, \$8, f. o. b. Toledo.

ST. LOUIS, MO.

April 20.—The arrivals of hay on both sides of the river continue to be moderate. The market is steady and strong for good qualities of timothy hay as well as light over mixed. All medium grades continue to be slow and dull and difficult to sell at reasonable figures.

Clover—Hardly any demand and difficult to sell and only at low prices. Alfalfa—Arrivals fair. Market slow and dull, especially so on medium and low grades.

Prairie—Arrivals plentiful. Market slow and prices in buyer's favor. Medium and lower grades hard to place.

Straw—Steady. No. 1 timothy, \$21@22; standard timothy,

\$19@20; No. 2 timothy, \$15@16; No. 3 and sample, \$10@12; No. 1 clover mixed, \$17@18; No. 2 clover mixed, \$13@14; heavy mixed, \$14@16; No. 1 clover, \$16@17; No. 2 clover, \$12@13; threshed hay, \$9@10; choice alfalfa, \$24@26; No. 1 alfalfa, \$22@24; standard alfalfa, \$16@18; No. 2 alfalfa, \$13@15; No. 1 prairie, \$14@15; No. 2 prairie, \$11@13; rye straw, \$9@10; wheat straw, \$8.50@9.50.

CHICAGO HAY NOTES.

Good timothy hay is in light offering with a very firm undertone, in fact it is selling above quotations in many instances. No. 3 timothy, clover and heavy clover mixtures are not urgently wanted, though sales show some improvement. All kinds of straw are wanted and prices strong.—Bridge & Leonard.

Buyers are now looking for the better grades of timothy and light mixed hay. Cars of extra good quality selling above quotations. A good time to market some hay and a few cars of packing prairie will sell well. All kinds of straw are in good demand.—Albert Miller & Co.

A very good demand, especially for the better grades of tame hay, while the low and off grades were moving to better advantage. No feeding prairie offered and apparently no demand, but there is a good inquiry for packing prairie, which sells from \$11.00 to \$14.00, top price for nice soft, pliable hay. We advise prompt shipment of all grades of tame hay, feeling present prices are as good or better than will obtain later.—Walters Brothers.

FUTURE TRANSACTIONS AT CHICAGO.

The volume of sales for future delivery on the Chicago Board of Trade for the days indicated, subject to corrections of minor importance, as reported by J. W. T. Duvel, Grain Exchange Supervisor, were as follows (last three 000 omitted):

1925—	Wheat.	Corn.	Oats.	Rye.	Total.
Apr. 1...	49,271	23,100	7,078	2,958	82,407
Apr. 2...	62,204	34,497	13,956	3,032	113,689
Apr. 3...	66,146	45,689	22,290	4,734	141,859

Oct. 12-14, 1925.—Grain Dealers' National Ass'n, Hotel Muehlebach, Kansas City, Mo.

Oct. 12-14, 1925.—U. S. Feed Distributors' Ass'n, Kansas City, Mo.

AS SHIPSTEAD SEES IT.

A charge that the recent skyrocketing of wheat prices on the Chicago board of trade was due to the activities of price-fixing speculators is made by Senator Shipstead (farmer-labor, Minn.) in a letter to Julius Barnes, former president of the Chamber of Commerce of the United States.

The senator also asserts that the department of agriculture, "whether by good intention or otherwise," assisted in the "bull" movement by co-operating with the issue of "false propaganda" regarding a threatened shortage of world wheat supplies.

The communication made public by the senator was in reply to an article published recently by Mr. Barnes, in which he asserted that Senator Shipstead, in advising the farmers last fall to market their wheat crop then made it impossible for the farmers to take advantage of the higher prices of wheat prevailing this year until the recent break in the market.

Denying that he so advised the farmers, Senator Shipstead said he did warn producers not to be "fooled by the money powers pushing up quotations for political and financial purposes." By following this warning, Senator Shipstead said, the producers had escaped being caught in the "awful crash" in the market.

To support his contention that the \$2 wheat price was the work of speculators, the Minnesota senator said the secretary of agriculture had attested that during February alone the Chicago board of trade sold wheat "futures" amounting to 1,581,694,000 bushels, or more than five times the official world's visible supply.

The senator then proceeded to ask Mr. Barnes a series of questions, one of which is "whether it is not now apparent to him that wheat never was worth \$2 and more in January and February, and that such a price was artificial, unwarranted by world conditions, a ballooning gamble created by price-fixing speculators for their own enrichment after the bulk of the crop was out of the farmers' hands.

Referring to the chamber of commerce's recommendation to President Coolidge that future trading exchanges be encouraged as a step toward aiding the farmer, Senator Shipstead asked Mr.

PRAIRIE STATES HAY & GRAIN CO.

RECEIVERS AND SHIPPERS
HAY, GRAIN AND SEED
NORTH PLATTE, NEBR.

American Bale Ties

To conform with the rules of the National Hay Association, hay must be well baled. The use of American Bale Ties accomplishes this. A broken wire on a bale of hay condemns the hay. Broken bales cost more than Bale Ties.

OTHER USES

For baling Excelsior, Shavings, Rags, and Paper. For bundling Barrel Heading and Staves.

No other form of wire has to stand more strain and abuse. Bale Tie Wire must be made in the highest perfection possible. American Bale Ties meet every requirement for which they are intended.

Complete descriptive catalog sent free for the asking.

American Steel & Wire Company
Chicago New York

Barnes if he now thought this was necessary and whether he could "guarantee" that the national administration still has that panacea in stock as an aid to the American farmer."

FEEDER MOVEMENT.

The following tables show the movement of stocker and feeder cattle and sheep from the markets named during March and the first three months of 1925, with comparison for the corresponding periods of 1924. Compiled by John Clay & Company:

Sales of grain futures in Illinois will be taxed for school purposes, if a measure introduced by Senator Harold C. Kessinger of Aurora, becomes a law at the present session of the general assembly at Springfield.

Provisions, Etc.

RECEIPTS, TWENTY MARKETS.

Combined receipts of cattle, hogs and sheep at the seven leading Western markets and thirteen other points for the week, with comparisons:

	Cattle.	Hogs.	Sheep.	All kinds.
Past week.	241,000	583,000	267,000	1,091,000
Prev. wk.	228,000	523,000	274,000	1,025,000
1924.	229,000	698,000	212,000	1,139,000
1923.	223,000	824,000	277,000	1,324,000
1922.	199,000	533,000	167,000	899,000

Combined receipts at the twenty markets for 1925 to date, with comparisons, as compiled by the *Drovers' Journal*:

	Cattle.	Hogs.	Sheep.	All kinds.
1925..	3,663,000	12,382,000	4,147,000	20,192,000
1924..	3,589,000	14,677,000	3,942,000	22,208,000
1923..	3,662,000	13,926,000	4,200,000	21,788,000
1922..	3,424,000	10,320,000	3,844,000	17,588,000

CHICAGO PROVISION REVIEW.

CHICAGO, April 20.—Liquidation of speculative holdings of provisions was on last head, resulting in sharp declines and a close around the lowest of the week. Speculative holdings have been greatly reduced and the big packers who were heavy sellers at higher prices took the offerings of speculators on the break. Closing trades were at losses on lard of 52½ to 60 cents, short ribs 15 to 25 cents and bellies 15 to 70 cents, as compared with a week ago.

Stocks of lard in Chicago on April 15 were 78,669,000 pounds, compared with 79,255,000 pounds on April 1 and 33,860, pounds on April 15 last year. Stocks in cold storage on April 1 were heavy and materially in excess of last year.

Supplies of hogs were more than ample for all trade requirements and consumption was disappointing, owing to high prices, which are double those of around six months ago. Movement of

lard and meats for the week, while making a fair showing, was materially under last year. Outside packing points are shipping lard to Chicago in liberal volume and it is surprising the way it has disappeared. One packer, discussing the situation, says that he believes lard will be in better demand the balance of the season and he predicts large reduction in stocks. Prices for the week follow:

Cut meats, lbs.	5,078,000	161,295,000	85,916,000	
Lard, lbs.	4,484,000	191,567,000	415,694,000	
Shipped—				
Cut meats, lbs.	13,372,000	395,987,000	447,762,000	
Lard, lbs.	5,896,000	220,743,000	304,745,000	

BEGINNING TO PAINT.

As warmer weather comes, country elevators in large numbers are adopting the "paint up" program, which was recently decided upon. That program called for the painting of 5,000 grain elevators, this year, a battleship gray, with green trimmings, and carrying the slogan, "There Is No Substitute for the Farmers' Elevator."

SELLS MUCH ALFALFA SEED.

The Western South Dakota Alfalfa Seed Growers' Exchange of Rapid City, So. Dak., sold and shipped during the first half of March more than 160,000 pounds of seed.

MOVEMENT OF CATTLE.

Weekly receipts and shipments of cattle and calves at 6 Western centers the week ending April 18,

34 Years of specialization in temperature control has given us a wealth of knowledge and experience which is at your service without cost or obligation. Let our engineers help you on your problems of temperature control; we may be able to save you much trouble and expense. The Powers Regulator Co., 2774 Greenview Ave., Chicago. Offices: New York—Boston—Toronto and 30 others. See your telephone directory. (3058)

BUSINESS AND TRADE CONDITIONS

AT the recent executive council meeting of the American Bankers' Ass'n, the President said: "In contrasting deflation and optimism, there was no serious impairment of the basic elements of prosperity today." He considered that the set-back in grain and stocks indicated no fundamental change in conditions, and that the over-optimism wave, apparent in many quarters, had subsided with the result that business is more wholesome and dependable.

Considering the statements of other bankers, whose perspective is likely to be broad, we find a practically unanimous view of today's outlook. Ernest M. Stevens, Vice-President of the Illinois Merchants Trust Co., recently stated:

"The trouble is with those who expected too much. Taken as a whole, we are doing a very good business today. It is spotted, of course, but on the average it is good. The reports of poor business are exaggerated and seem to make more of an impression on the public mind than favorable developments. It is true that there are some industries not doing so well but, on the other hand, there are others doing much better than for some time.

"An agricultural implement manufacturer a few days ago showed me his sales figures for the first quarter, which were twice what they were a year ago. And so it goes down the line. Recognized indices, such as car loadings and bank clearings, leave no doubt that the volume is well ahead of last year. At the present time, we are experiencing some hesitancy which is natural at this season, due to the desire of manufacturers and merchants to wait upon more definite indications as to crop yields before they determine how much the farmer may be expected to buy."

Finances and Money

The distinction between credit with the many other financial considerations and money has been called to the attention of our readers. Paper money without the gold guarantee would be of little value. The mechanical details of printing paper money and distributing it through the various banking centers is an interesting one, and its expense is now justifying a Government plan towards reducing the denominations of the various kinds of paper money. The Bureau of Engraving and Printing turns out twenty carloads annually of five general kinds, silver certificates, gold certificates, U. S. notes, national bank currency and federal reserve currency. It now seems unwise to treasury officials to print as many as eighty denominations in the various currencies, ranging from the \$10,000 note down. The plan contemplates more silver certificates; for instance, eliminating all but the one-dollar and two-dollar bills, and other economies in various forms.

In its influence on money rates, the federal reserve system has a large place but in our opinion too much power is ascribed to the federal reserve influence in advancing or declining commodity prices. For instance, when the federal reserve system reduced its re-discount rate some time back, prices declined and when more recently prices advanced, the federal system advanced its rate of interest, in spite of which prices subsequently declined moderately. Real students of banking affairs maintain that this seeming close relationship was not actually proof of same, as witnessed by the latter reduction in commodity prices. These authorities do not anticipate any marked influence on prices through federal reserve activities for some time to come.

In times of inflation, we do not overlook the probability that the reserve banks indirectly encourage the inflationary idea through the insertion of cash into the market in soliciting investments with which the federal system earns their expenses.

American Exports

March figures have just been made public by the Department of Commerce evidencing a sound and promising condition. Exports for the month amounted to \$452,000,000 as compared with \$370,000,000 in February and \$339,000,000 a year ago. These figures are rather ahead of those anticipated, indicative of a very satisfactory volume of our products moving to foreign shores. A related factor because it largely concerns raw materials imported for our factories, is found in the following March import figures: \$385,000,000 compared with \$334,000,000 in February and \$320,000,000 a year ago. A detail of this business which must be recognized is the fact that contracts, dated some time back, accounted for

Crop Outlook Improved but Carry-Over Light

CROP outlook was reported as improved as the result of recent rains, but there is still a wide area that needs more rain, as there is a decided lack of reserve moisture. Texas still remains dry and it is expected that state will have to be a large buyer of feed grains the balance of the season. The visible supply is steadily decreasing as the result of small receipts at terminal markets and to shipments via lake, to Canadian ports.

The world's statistical position shows little change and at the present time there seems to be little likelihood of a scarcity, while at the same time, the rate at which wheat is leaving this country, suggests that the carry-over at the end of the season will be lighter than last year.

it and there are certain well posted people who feel that export business during the Summer will be none too easy to secure. Complaint is still heard in domestic circles that European competition is seriously cutting prices. Therefore, continued exports on an increasing scale hinge partly upon the prices asked for such raw material as grain, cotton, tin, copper, etc.

Public Economy Finds Favor

Real results are coming to light in connection with the pruning of Governmental expenses in Washington, as shown through a bulletin issued by the Civil Service Commission which discloses that during March, 2,318 Government clerks were dismissed, and that more were scheduled for the toboggan. Even those who had to be shown are now fully appreciative of the fact that the President intends to make a practical application of his plans for economy in every Federal department.

Wide popular approval attends this work and those with any experience at all in such matters know how easy it is to increase expenses and how difficult it is to reduce them.

As a part of the criticism which is not entirely justified as it concerns Washington affairs, the people of the nation have felt for some time that extravagance of a high order existed and should be curtailed. Although the ways and means to be adopted in such work differ in comparing National affairs and the experiences of an individual who oversteps himself, the need for change is precisely the same.

An interesting and entirely human side issue of this affair is cropping out in the objections of even such men of prominent position as former Governor Allen of Kansas, to the effect that there is too much talk of personal economy. For instance, it is probably not true but it is certainly harmful to general business to read about the economies of the President in wearing his old suits and hats. Such information tends to encourage these so-called "buyers' strikes" which we experience every once in a while. It was doubtless just as well during the war to curtail luxuries but it is never sound business to carry on petty economies in necessities, for if enough people do so, the entire business fabric of the country is disturbed.

With the present modest degree of business activity, there is no justifiable sense for the housewife to buy table needs, for instance in half quantities or for the man of the house to hold off his customary purchase of a straw hat and a summer suit. The latter should not be associated in any way with the deserved elimination of administration extravagance.

Increasing Investment Abroad

Frequent public comment is heard relative to the criticism of this country for failure to co-operate with other nations in the maintenance of peace and the elimination of war. The other day, considerable prominence was given a speech of this sort at Cincinnati and in New York and Chicago, newspapers of the same date, in the investment columns, referred to American investments in foreign countries before the war approximating \$2,000,000,000, whereas now such investments are approaching the \$10,000,000,000 mark. The latter sum will earn approximate interest of \$650,000,000 and that these items have no connection whatever with the war loans of the Government to foreign nations, which now total about \$12,000,000,000. It would seem sound business economics to protect business of this magnitude through the closest co-operation of this country with those countries in which the securities represented were offered. If the enlightenment of the United States is as high as we believe it to be, can we afford to be charged with official stubbornness in the continued policy of remaining aloof from European finance and business? There are doubtless large groups of American people who sympathize with our present policy of complete political isolation but in our judgment, some way will be found to satisfy their views in the matter and at the same time protect American business interests and investments, as well as show a proper sympathetic interest in the affairs of foreign nations.

AN OPPORTUNITY FOR CO-OPERATION

TWO of our state agricultural colleges maintain small flour mills for grinding and testing wheat grown in their respective states, the object being to determine what types of wheat are best adapted for soil conditions in the state and at the same time, produce a high grade of flour. Such information is of much value to the growers and also works to the benefit of the country elevator. The more good wheat,

grown with the right protein content, that is handled by the dealer, the less trouble he will have with grades and discounts. State grain dealers associations should cooperate with the state agricultural colleges along these lines as it means less trouble in the handling and marketing of the crop.

OUTLOOK PROMISING

THE outlook for the grain trade for the coming year is bright. Economists figure that there is another ten-billion-dollar year in sight for agriculture. While the Winter wheat states will probably have less wheat to market than last year, certain sections of the corn belt will have a great deal more. The outlook for the Spring wheat states is encouraging and a little above normal for this season of the year. Grain handlers always have fat and lean periods in their business for statistics show that the bulk of grain starts to market shortly after harvest and always dwindles along until the tail-end of the crop and another crop is in sight, but the rightly managed grain firm which considers the year's business as a whole can show a profit. Integrity, fair dealing, coupled with efficient service secures and retains business. Grain firms who advertise in the grain trade press are the ones who do the most profitable business for it brings them in touch with new customers, helps to establish pleasant business relations and identifies them in a staid and stable manner with the trade.

TO INVESTIGATE INVESTIGATIONS

WORD comes to us that a number of Kansas cattle feeders have started an investigation to ascertain, if they can, just how much governmental regulation and agitation has cost them and the industry as a whole—agriculture and crop production included—in the last few years.

One cattleman as quoted in the *Kansas City Daily Drovers' Telegram* puts it in this way:

"We want the laws enforced and want a square deal, but it seems to us that we have to bear the burden of government regulation. Whenever the packers get hauled up before some commission and have to spend a lot of money defending this or that case or this or that phase of some of their activities they have to pay big attorney fees and lots of other costs.

"There is but one way to get this money back and that is to cut the price of live stock and advance the prices of their finished products. If any other factor of the live stock trade is dragged into some hearing or some investigation and has to make a costly defense of that practice the expense has to be passed along to the producers of live stock and farm products. There is no one else to absorb it, since, in this case the ultimate consumer can not take up part of the slack in the price he has to pay for finished meats.

"It is absurd to contend that we do not have to pay this overhead. We do not pay it and we know that we pay it and so far as our group is concerned we have not, in several weeks' research work, been able to locate a single item of good accruing to us from any of these investigations, and while nothing hurtful to the industry of producing farm crops and live stock has been done directly, yet the tremendous expenses of all the government hearings on this and that live stock, and farm crop and their allied lines of processing raw materials into finished articles, have been borne by us and are still being borne by us.

"We are not consulted as to whether we want to be made a party to such action or not. The cases are filed and a lot of witnesses called and an army of lawyers are rallied around the case and they get big fees and pile up enormous expenses which are ultimately and surely passed on to us.

"It may be contended that the costs that are allocated to the individual through a year's process of government hearings is not large, but the total is staggering as we hope to be able to prove if we can successfully carry on our investigations. It is difficult to get the facts, since the government's figures are not available and those who are prosecuted or persecuted hesitate to make a showing of their costs since it would seem that they are antagonistic to law and order and spend vast sums of money, which, to some minds, is considered as being put into the thwarting of justice.

"We Kansans feel that W. M. Jardine, as secretary of agriculture is going to humanize the department of agriculture at Washington and turn it into a helpful institution and take it out of the rock crusher and concrete mixer class. If he does so the live stock industry and farming in general will be saved an aggregate of

millions of dollars annually and prices for our products will be better and conditions stabilized and made all around."

The average city consumer who is called on to pay around 35 or 40 cents a pound for a rib roast, from 45 to 50 cents for a sirloin steak and about 20 cents for stewing meat or a chuck roast, would doubtless contend that he and not the cattleman, whose average price on the Chicago market last week was 10.05 was footing all the bills.

However, the question of who pays for these investigations is not at the moment in controversy, the point being that governmental investigations always are expensive—they are easy to start and usually hard to stop—they are frequently so slow that conditions have radically changed before they are concluded, thus making the findings academic—and last, but not least, too many of them are being undertaken.

SPENDING OUR MONEY

ACCORDING to a statement recently prepared by Senator Overman of South Carolina, the first session of the 68th congress appropriated \$58,575,274 for the department of agriculture and the second session appropriated \$124,774,441.

In addition, there was appropriated in the two sessions, in what are designated as permanent and indefinites, the sum of \$24,701,500.

It will thus be seen that the amount given to this one department, if nothing was included in either of the deficiency bills, or elsewhere, makes a grand total of \$208,051,215.

With these figures in mind, the recently-made statement of Secretary Jardine that he expected to save \$1,332,460 from the total appropriated for his department, loses some of its impressiveness, being, as a matter of fact, considerably less than one per cent.

However, the start is a good one, and we hope, not only that he may keep it up, but also that his efforts may prove contagious in other departments in Washington and on down through states, counties and cities.

Not only is government costing us too much money, but too large a percentage of our people are living off the others, in that specific way.

KNOW YOUR FEED

MANY country elevators are handling feed as a side line and the successful dealer is the one who knows what his feed is actually doing. It will pay to make investigations and learn first hand how many pounds of feed it takes each day to produce a certain given quantity of milk as well as to learn how economically and in what length of time a hog can be fattened for market. By knowing what results the feed you handle produces, you will be able to build up a following of satisfied customers. It costs money to make the first sale and steady patronage is what produces the profit.

THE USE OF LIME

LIME on many soils and particularly on those that are to be used for clover or alfalfa, is an absolute necessity and the methods employed in testing soils for acidity are simple.

It would seem, therefore, that elevator men in large numbers might profitably handle agricultural lime, as a side line, and by way of service, make, free of charge, the tests above referred to.

PROVING THE CASE

THE grain man, who for years, has made a business of studying and analyzing all kinds of figures and statistical data will take "with a grain of salt," the statement recently put out by the Department of Agriculture that taxation, based on property values tends to press more heavily upon farm owners than on other taxpayers.

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures from various statistical exhibits appearing weekly in detail in "The Price Current-Grain Reporter," these figures representing the past week, the preceding week and corresponding time last year, here assembled for ready reference:

	Apr. 25, 1925.	Apr. 18, 1925.	Apr. 26, 1924.
Wheat—			
Primary receipts	1,952,000	2,839,000	2,751,000
Primary shipments ..	3,667,000	3,381,000	4,051,000

July42¾	.42½	.44¾
September43½	.42¾	.40½

In that statement it was said that in certain districts in the Middle West rented farms yielded before taxes 3.8 per cent upon their capital value. Rented city real estate yielded 4.6 per cent and bank property yielded 8 per cent. Thus if a uniform levy of 2 per cent were placed upon these different classes of property the tax would absorb 25 per cent of the return upon the bank property, 42.5 per cent of that upon city real estate and 52.5 per cent of that upon farm land.

It is an old saying that a person can prove any thing by the Bible, and figures may of course be used in the same way.

SIMPLIFIED PRACTICE

TWO hundred industrial groups are now at work on definite programs of waste elimination and standardization and simplified practice if put into universal practice in this country's industries mean an annual saving estimated at ten billions of dollars.

Elevator men are of course interested in the movement not so much perhaps because of what can be done in simplifying and standardizing their own practices, for these are already standard and simple, but because of the benefit which would accrue to them if for example standardization was worked out in all kinds of elevator machinery and supplies.

CHICAGO, APRIL 29, 1925.

GRAIN TRADE REVIEW

WHEAT market has been holding within relatively narrow limits, with the trade disposed to go slow on either side, pending the outcome of the May deliveries. What the May will do is regarded as largely a case of guesswork, and until it is out of the way or the trend can be definitely determined, it is not surprising that the average speculator is disposed to go slow. The world's statistical position shows little change and at the present time there seems to be little likelihood of a scarcity, while at the same time the rate at which wheat is leaving this country suggests that the carry-over at the end of the season will be lighter than last year, probably 75,000,000 bus. or less, compared with around 100,000,000 bus. a year ago. The Indian wheat crop is officially estimated at 319,000,000 bus. or 42,000,000 bus. less than last year's harvest, which suggests that India will have little or no wheat for export during the 1925-26 crop season, the yield being slightly below domestic requirements. Supplies on ocean passage are being steadily reduced, as world's shipments are now under the average weekly requirements of importing countries, but there is still a very liberal stock, and foreigners are not disposed to take hold freely on account of the generally favorable new crop outlook abroad.

Highly beneficial rains have fallen over the greater part of Kansas and Oklahoma and the new crop of winter wheat is making fair progress toward maturity, but taken as a whole the indicated yield is much smaller than last year, owing to the recent drought which prevented stooling in many sections. Texas is certain to reap a small crop this season regardless of weather conditions, and there are some parts of that state that have not received rain in many months, and even newly planted corn and other grains are in bad shape. The lack of subsoil moisture over a good part of the belt causes considerable apprehension, as temperatures so far this spring have been much above the average and with high winds the moisture on the surface has been rapidly depleted, leaving the crop in a position where constant rain has been necessary to prevent deterioration. Expectations are that the Government May crop report will show a somewhat higher condition than the 63.7 shown in

April as the abandoned acreage will be eliminated. Private reports as to the loss in acreage continue to show a loss above the average.

Spring Seeding Completed.

Spring wheat seeding in the American Northwest is practically completed and in the more southern areas the grain is up to a good start. There is no lack of moisture in any section at the present time, and there has seldom been a year when the start was as good as it is this year. The same applies to the Canadian Northwest and if weather continues favorable it is expected that there will be a fair increase north of the international line, while the area in the Dakotas is likely to be larger than has been anticipated. The amount of wheat Canada still has available for export is unknown, the trade as a whole not believing that the recent Government report was correct, feeling that the crop was underestimated, and there will be more grain come forward than expected. Seeding is making rapid progress in the three Canadian provinces. At the beginning of growth of the spring wheat crop the condition is usually as good as it is at any time, the period of crop damage usually coming late in June or in July when the moisture received determines the size of the crop. Under existing conditions considerable irregularity in price movements is to be expected. Sentiment at the present time is decidedly mixed, with a belief in some quarters that the reduction in the Southwest, as compared with last year, is represented in the present price, while the failure of the market to break of late, in spite of the breaking of the drought over part of the Southwest has given bulls added courage, but at that the aggregate trade has not been large. A steady reduction in the visible supply is to be anticipated, as the movement to terminal markets from the country is small.

Coarse Grains.

Eastern demand for cash corn has fallen off considerably as compared with what it was the previous week, and apparently distributors have covered their requirements for the time being. The expectations that a fairly liberal quantity of mixed corn will be delivered on May contracts has also been a factor in holding back buyers, as there is an impression that considerable scattered liquidation will take place before the first delivery day. Plowing for corn is progressing rapidly and in the more southern sections much planting has been done. A period of warm weather would probably carry the planting north to the center of the main corn belt. There are numerous points in Texas where there is not sufficient moisture to germinate the grain and the outlook for a good yield in that state is very pessimistic. The recent rains have been extremely beneficial for the new oats crop in the main belt, and with an increased acreage a large yield is expected based on the prevailing outlook. The Eastern demand for cash oats is not large, but sufficient to take care of all the offerings at terminal markets and results in a steady reduction in the visible supply.

GRAIN MARKET SUMMARY.

Receipts of wheat, corn and oats at primary markets the past week, with comparisons, follow:

	Apr. 25, 1925.	Apr. 18, 1925.	Apr. 26, 1924.
Wheat	3,729,000	2,838,000	2,809,000
Corn	2,042,000	2,318,000	5,030,000
Oats	3,219,000	2,998,000	4,298,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1924-25.	1923-24.
Past week.....	8,990,000	12,137,000
Preceding week.....	8,154,000	8,270,000
Since July 1.....	928,659,000	879,911,000

Wheat prices fluctuated in an erratic manner the past week within a fairly wide range, closing at intermediate figures with May 1½c higher, July ¼c lower and September ½c higher. Outside trade was not large and sentiment

amongst local traders mainly bearish, but on all declines there was a good class of buying and sharp rallies followed, the tendency to oversell on breaks by local operators being a sustaining influence. Crop outlook was reported as improved as the result of recent rains, but there is still a wide area that needs more rain, as there is a decided lack of reserve moisture. The export demand was decidedly slow throughout the week, and the domestic call was also limited.

Scattered liquidation developed in corn the past week, and prices declined readily and closed about the bottom with net losses of 2½@2½c. The continued slow Eastern demand, with a shading of prices in the sample market as compared with the May, had considerable influence on sentiment. Texas still remains dry and it is expected that state will have to be a large buyer of feed grains the balance of the season. The visible supply is steadily decreasing as the result of small receipts at terminal markets and to shipments via lake to Canadian ports.

Oats held within narrow limits the past week, with trade largely of a local character. Elevator interests bought May and sold July while scattered longs sold the May and bought the July. Recent rains were decidedly beneficial for the new crop, and the outlook at the present time is generally favorable, except in parts of the Southwest. Closing trades were unchanged to ¾c higher as compared with the previous week, with September showing the most strength. Foreign demand for rye continues slow, and the May and the July, at one time on Saturday, sold at the same price for the first time this season. Closing trades were ¾c lower to ¾c higher. Range of prices the past week follows:

	High.	Low.	Apr. 25, 1925.	Apr. 18, 1925.	Apr. 26, 1924.
Wheat—					
May	\$1.56½	\$1.42½	\$1.48½	\$1.47½	\$1.03½
July	1.44½	1.35½	1.38½	1.38½	1.05½
Sept.	1.36	1.29½	1.31½	1.30½	1.06½
Corn—					
May	1.10½	1.04½	1.04½	1.06½	.76½
July	1.14½	1.07½	1.07½	1.10½	.78½
Sept.	1.13½	1.06½	1.07½	1.10½	.77½
Oats—					
May	.42½	.40½	.41	.41	.46½
July	.44½	.42½	.42½	.42½	.44½
Sept.	.44½	.42½	.43½	.42½	.40½
Rye—					
May	1.12½	1.05	1.07½	1.08	.65½
July	1.12½	1.04	1.06½	1.05½	.67½
Sept.	1.03½	.97	.98½	.98½

WHEAT STOCKS AND CONSUMPTION.

Statement of the movement of wheat and consumption in 14 primary markets, compared for three years:

	1924-25.	1923-24.	1922-23.
Stocks at July 1 ...	30,500,000	23,278,000	10,789,000
Receipts to April 25 ..	469,184,000	311,474,000	395,181,000

WORLD'S WHEAT EXPORTS.

Exports of wheat last week compared with the previous week and a year ago, as reported by the Broomhall service and forwarded to this paper:

	Apr. 25, 1925.	Apr. 18, 1925.	Apr. 26, 1924.
American	6,218,000	6,716,000	6,970,000
Argentine	2,449,000	1,871,000	4,615,000
Australian	4,672,000	3,360,000	1,600,000
Indian	24,000	32,000
Russian	240,000
Others	120,000

Total

Of the above total wheat from America there cleared in the form of flour 1,822,000.

The total export of wheat since Aug. 1, the commencement of the European crop year, compared for three years:

	1924-25.	1923-24.	1922-23.
American	346,336,000	334,953,000	349,090,000
Argentine	103,604,000	119,599,000	98,226,000
Australian	91,448,000	56,618,000	36,440,000
Indian	29,416,000	5,872,000	8,996,000
Russian	328,000	27,176,000
Others	2,736,000	14,980,000	5,503,000
Total	573,868,000	559,198,000	498,360,000
Season	753,195,000	662,698,000

WORLD'S CORN EXPORTS.

Exports of corn last week, compared with the previous week and a year ago, as reported by the Broomhall service and forwarded to this paper:

	Apr. 25, 1925.	Apr. 18, 1925.	Apr. 26, 1924.

Season	67,500,000	65,765,000

CANADIAN GRAIN IN U. S.

The following table exhibits the quantities of bonded grain in the United States reported last week compared with previous week and one year ago:

	Apr. 25, 1925.	Apr. 18, 1925.	Apr. 26, 1924.
Wheat	7,019,000	4,895,000	7,670,000
Oats	2,152,000	865,000	959,000
Rye	527,000	276,000
Barley	2,262,000	891,000	56,000

25th Annual Convention, Western Grain Dealers, Des Moines, Ia., April 21-22

Clifford C. Belz President-Elect—Other Officers and Important Proceedings.

Des Moines was again the host for the Western Grain Dealers Ass'n at their 25th annual convention. J. R. Murrell, Jr., its president, said in opening the proceedings Tuesday morning, April 21st:

This is the third annual meeting of the Western Grain Dealers Ass'n. at which I have enjoyed the honor of presiding. This is the first time, however, that I've ever presumed to inflict an address upon you. Association work has always been a pleasure to me. I have enjoyed very much my duties as your President. I also enjoy my work as an Arbitrator in the National Association.

In this connection, I want to say a few words to you. Settlement of disputes by Arbitration has progressed among the grain dealers of the U. S. much further than in any other line of industry. There are only a few instances where the litigants do not abide by the decisions of the Committees. It would require the stretching of your imaginations to appreciate how much money has been saved for the trade by the settling of trade differences in this manner.

On February 12th this year, President Coolidge signed the Mills Bill. The object of this measure is to make enforceable agreements for arbitration arising from disputes over contracts. The Bill will be known as the "U. S. Arbitration Act." It will go into effect January 1st, 1926.

The Arbitration Society of America will communicate with the various transportation associations, asking them to determine the views of their members on arbitration, and will ask for suggestions as to how arbitrations may be applied in connection with disputes arising out of contracts of transportation.

While it has been realized by the grain trade for some years that arbitration is the gentlemen's method of settling trade differences, nevertheless it is gratifying to see that our government also believes in arbitration.

Now as to your own particular troubles. We in the eastern part of the state probably are having more grief than those of you from the West. Owing to the fact that Eastern Iowa has not had a real corn crop for two years, our business has changed from shipping out to shipping in. We are not enjoying it very much. Conditions surrounding the trade have not been favorable over the entire state. Bear in mind, however, that all we need is one or two good crops and we'll be sitting on top of the world again, and that is Iowa's rightful place.

Legislation against the grain trade is not quite so rabid as it has been for the past few years. The attitude of our present government toward so called compulsory co-operative schemes is that they must stand on their own merits, and not be asking the federal government for aid.

We as grain dealers need have no fear of the compulsory co-operative movement. In all probabilities, if the facts were known, over half of the compulsory co-operatives should be in receiver's hands right now. It would be most interesting to know the actual conditions of these companies, and have our legislative bodies see for themselves what this style co-operation has accomplished. In all probabilities if this could be done, we would hear no more of co-operative movements for some time to come.

You as individual dealers would do well to heed Henry Ford's rules for success in business; namely "Banish all fear of the future; Venerate the Past; put service before profit, buy and sell the various commodities fairly and handle them at the smallest possible cost.

Remember that real prosperity is not based upon the whirlwind fluctuations of the future markets. Rather it is based on your own common sense, which should enable you to make the best use of your own resources.

This meeting has been largely arranged by our most efficient Secretary, George Wells.

To his ability, tribute has been paid by much more competent men than I am. Nevertheless I want him to know I appreciate his work for the Association, and I'm confident this opinion is held by all our members.

President Horner of the National Ass'n supported Mr. Murrell's comment on arbitration matters in his place on the program.

Secretary-Treasurer Geo. A. Wells covered the activities of the past year and the outlook for future association activities in the following report:

Secretary's Report.

This is the twenty-fifth Anniversary of this Association and of my service as its Secretary. A period of a quarter of a century that in a sense completes a most important cycle in Grain Trade History.

During this period we have witnessed a most wonderful evolution in the grain trade in which there has been a very great improvement in the mechanical facilities for

handling grain. The flat warehouse and the horsepower elevator has been displaced by the most perfect elevator building construction and equipment operated by gasoline, oil and electric power.

Transportation service has now almost reached the point that grain like water seeks its own level of supply and demand. The day of Railroad discrimination has passed so that all shippers receive practically the same treatment.

The terminal grain markets have likewise improved their grain handling facilities and they have also established Boards of Trade or Grain Exchange organizations, incorporated under Rules and Regulations for the purpose of governing the conduct of their members and also for the protection of country shippers.

Public supervision of grain inspection and weighing, unloading and sweeping of cars, watchman service and report of sealed records have also been established under Grain Exchange Rules and Regulations. Uniform grain grade standards have been established and are now enforced by the Federal Government under supervision of the United States Department of Agriculture.

All grain trade organizations including the Grain Dealers National Association, State Associations and the terminal market grain exchanges now maintain and enforce trade and arbitration rules to such an extent that the grain trade as a whole is in fact a law unto itself. Grain trade controversies are now seldom considered by the courts.

It is indeed unfortunate for the grain trade that the public and particularly the farmers, bankers and businessmen do not fully understand the efficiency and the economy of the present competitive grain trade system that engages the energy, courage and ambition of the most efficient men in the commercial distribution of grain. Good salesmanship is just as essential in the commercial distribution of grain as in any other commodity.

Grain Business Competitive.

A detailed analysis of the operation of the competitive system of commercial distribution of grain will show that the profit taken from the time the grain is unloaded at the country elevator until it reaches the manufacturers or consumers is lower than such service can be maintained by any other system.

Under this system the farmer enjoys an open market, not only at the local country elevator but at terminals where the grain is sold at auction in a manner similar to the farm sales except that the terminal market organizations handling such large volumes of business have perfected rules and regulations that guarantee honorable conduct in all transactions.

The evolution and improvement in grain trade conditions during the cycle of twenty-five years has been inspired and enforced largely through the influence and efforts of grain trade organizations.

The inherent element of speculation cannot be eliminated from the production and commercial distribution of grain. There is a harvest in some country of the world every month of the year with its varying unfavorable and favorable conditions that vitally affect the promise and final production of crops and furthermore the consumptive demand is vitally affected by world conditions, buying power and requirements.

The individual ingenuity and energy of men engaged in the world's grain trade who make a study of the world's crop conditions give expression to the most expeditious and accurate information of such conditions by their activity in the speculative grain markets in the competitive buying and selling of grain, thus establishing marketing values of grain that are momentarily reflected through the grain exchanges and wire service thus giving the widest possible publicity and establishing on a world supply and demand basis the values of grain more expeditiously and accurately than can be done through any other system that may be devised.

The Government and International crop reporting services are always approximately discounted by the grain trade. Excessive speculation in grain is an evil that should be restricted, if it can be done legally without detriment to the maintenance of a broad open market.

We have had excessive speculation in farm lands, packing and oil stocks in which farmers, bankers and businessmen have participated to their sorrow and which has brought more financial distress to the Agriculture section of this country than has ever occurred through grain speculation.

Grain Trade Suffered More Loss Than Farmers.

The grain trade as a whole has suffered heavy financial losses through the deflation of values and shortage in crops that has occurred since the war. In fact I am sure that if an accurate analysis should be made of the operating loss incurred by the grain trade as compared with the operating loss of the farmers based on capital investment and inventory of fixed assets that it would show that the grain trade have suffered as heavily as the farmers.

Reduced volume and irregular marketing

is unfavorable to the successful operation of commercial distribution of grain under a competitive or any other system that may be devised.

While it is true that the present competitive system of commercial distribution of grain is well organized as to established rules and regulations it must be admitted that the ethical conscience of the grain trade is at a low ebb. Ethics in business is the science of right conduct and character which treats of the nature and grounds of moral obligations and the rules which ought to determine conduct in accordance with such obligations, the doctrine of man's duty which briefly stated is the basis of ethical rules of business now being adopted by many trade organizations and vigorously promulgated by the Chamber of Commerce of the United States.

The grain trade organizations in my opinion should emphasize the importance of ethical rules of conduct. Cut-throat competition is ruinous and is not in the end of advantage to the business. Service should be maintained and reasonable profits are necessary for the maintenance of such service.

Ethical conduct implies loyalty to the Grain Trade Rules and thereby maintains the broad principle that the Grain Trade is in fact a law unto itself. Your competitor has a right to expect that you will deal fairly and give moral support to the idea of ethical conduct. His conscience should be his guide in his dealings with you and you in turn should maintain the same principle and the same moral obligation.

Jay A. King of the Western Grain Dealers Mutual Fire Insurance Co., in an address on the business of the corporation, said:

My subject, as stated in the program, is the Western Grain Dealers' Mutual Fire Insurance Company. Of course you are interested in your Insurance Company. You depend upon it to reimburse you in case of loss by fire, and many of you in case of loss by windstorm also. You want to feel confident that in case you are so unfortunate, as to sustain a loss or damage to your property, the loss or damage will be promptly adjusted on a fair basis, without resort to technicalities for the purpose of avoiding payment, of all or any part of the obligation, and that the loss will be promptly paid as soon as the amount due is determined. You also want to feel, that the cost of your insurance is fair and reasonable. You are warranted in a favorable conclusion on each of these questions, as regards your insurance in this Company.

The Western Grain Dealers Insurance Company was organized and began writing insurance in August 1907, and has been in operation nearly eighteen years.

The amount of insurance has increased each year, from a small beginning, until now it has in force twenty-nine millions in risks. During the past several years it has carried the insurance on the greater part of the grain elevators and contents in Iowa, and written considerable of that class of business in adjoining states. The record of this company, in the settlement of losses sustained by grain dealers, can not be excelled. Every such loss was adjusted with as little delay as possible and the loss paid as soon as the amount was determined, excepting only in case a valid reason existed for objection or delay.

During all of the time since this company began writing insurance it has had only one case on trial in court, concerning a loss. That was the case of the Hubbard Grain Co. of Mason City, Iowa. The Hubbard Grain Co. sustained a loss by fire on grain in one of its elevators. At the time of the loss, that company had certificates of insurance issued by this company on grain under an open policy. They also had what purported to be a provisional policy on the grain, issued by the Hartford Insurance Co. The insurance companies and the assured agreed that the loss amounted to \$1,616.31. This insurance company claimed, that the Hartford policy in the form it was written, by the terms was specific insurance, and run concurrently with the insurance written by this company, and that this company was indebted to the assured in the sum of \$806.77 and that the Hartford owed \$809.54 of the loss.

The Hartford claimed that it owed the assured only a little over \$5.00 and refused to pay more. This company immediately paid the assured \$806.77, claiming that amount to be in full satisfaction of its liability. The Hubbard Grain Co. was so well satisfied with the action of this insurance company that they cancelled all of their insurance with the Hartford, on both their buildings and grain, and placed it with this company.

Being unable to otherwise obtain payment from the Hartford, the Hubbard Grain Co. brought an action in court for the balance of \$809.54, and in order to avoid any waiver of their rights, the suit was brought against both companies, jointly. The trial in the District Court resulted in a verdict against the Hartford for \$809.54 and costs, that being the exact amount of the loss which this insurance company had declined to pay. The Hartford appealed the case.

The Supreme Court affirmed the decision of the lower court. The Hartford petitioned for a rehearing which was denied.

The result in the case fully confirmed the position taken by this insurance company in refusing to pay a greater part of the loss.

The Western Grain Dealers Insurance Co. has paid \$1,100,000.00 for losses and has returned to its policy holders over \$600,000.00 in dividends. This has been

done on a basis of premium charges, much less than was formerly paid for such insurance. At the time this company was organized, the grain dealers of Iowa were paying for their insurance, premiums greatly in excess of the gross premiums charged by this company, and were not receiving in return any part of the high rate of premiums so paid.

The amount returned by this insurance company in dividends does not represent all the savings to its policy holders. The grain dealers in the territory covered by this company have been benefited to a greater extent in the reduction in the rate charged for insurance on their property. Previous to the time when this company began writing insurance on grain elevators and contents, the rate charged for such insurance was more than double the gross rate paid on that class of risks to this company. The lower rate paid and the considerable part of the lesser rate returned, constitute a greater saving in the cost of insurance than the grain dealers generally realize. All of this large reduction in insurance cost, has been brought about through mutual insurance, and the credit for most of it, in this locality, can be justly claimed by the Western Grain Dealers Mutual.

Having found that the insurance has been carried at cost, the question may occur: Has the cost been equitably distributed as between the policy holders? The answer is: It has. The rates charged on grain elevators and contents in this company have always been in accordance with a schedule of rates arranged to include the various deficiencies or hazards and the credits applying to the risk, based on construction, equipment, condition, and location. A base rate is increased or decreased, as the case may be, by adding the deficiencies or deducting the credits as they apply according to the schedule to the particular risk, when the rate is fixed.

Whenever any change is made in the condition of the property by the correction or removal of a hazard, or a change that is cause for credit, the rate is revised for such difference in conformity with the schedule of rates.

In applying the schedule to determine the rate on a risk, no variation has intentionally been made from a correct and careful application of the deficiencies and credits named in the schedule.

The fire loss ratio is lower than stock company insurance, because the assured are more largely interested in fire prevention and holding the losses down to the minimum. The company gives more and better attention to the correction of fire hazards, by frequent inspection of the property and has a closer relation with the policy holder. The expense ratio is lower. The dividends are paid to the policy holders instead of to the stock holders.

Insurance in a legal reserve mutual company, having a reasonable surplus, gives to the policy holder as safe protection as in a stock company. A reasonable surplus and the contingent premiums, of a mutual company, are as good guarantee for the payment of losses as is the capital of a stock company.

This Company experienced excessive losses in the years 1922 and 1923, especially in 1922. The accumulated surplus enabled the company to promptly pay those excessive losses, without embarrassing the company or the policy holders. It has been, and now is, the policy of this company, to accumulate and maintain a reasonable surplus; such an amount of surplus as would be sufficient to take care of excessive loss, if, and when, such excess occurs. But it is not deemed wise, or necessary, to accumulate an excessive surplus at the expense of the policy holders.

The officers of the company are apprised of the causes of losses, so far as known, and having knowledge of the reasons for the occurrence of fires in elevators, are in position to advise the policy holders in that regard and suggest the remedy. But in order that the most probable causes of fires shall be corrected or removed; it is necessary for the assured to make an effort to eliminate the hazards, and comply, so far as possible, with the suggestions offered.

Several of the elevator fires that occurred within the past year, and in which this company was interested, were due to carelessness, or more strictly speaking, want of care. The principal causes of elevator fires recently in our experience were: electric motors, lightning, defective chimneys, lubrication neglected, and combustible roofs. All of the fires from these causes could have been avoided. Many electricians contend there is no danger of a three-phase motor causing a fire. Probably some of you have heard such statements made. At any rate, it is not true. During the past year, three fires started in the motor located in the cupola of the elevator. Fortunately, each one of them was enclosed in a fire resisting room, as suggested by us, and the damage done in each case was small. The owners all said they were satisfied that if the motor had been open the building and contents would have been destroyed. The cause of the fire in these cases was difficult to determine. The cause seemed to be either overload or dry bearings.

A fire started in a motor because the knife switch was wrong side up. The handle dropped down and opened the switch. It is an established fact that it is not safe to have the motor located away from the work floor, no matter of what phase, unless it is in a fire resisting enclosure.

Lightning losses can be entirely eliminated by installing lightning rods. Last year an elevator was destroyed and a number of lesser losses occurred because

of lightning striking the buildings. This company allows a liberal credit for lightning rods or grounded metal sides and roof. Lightning rods are 99 per cent protection.

Defective Chimneys. A defective chimney was the cause of an elevator being burned last year and a loss of \$8,000.00. That fire was surely caused by neglect. It is a matter of common knowledge that mortar in a chimney is softened by the heat from the stove or furnace, and falls out leaving holes through the sides of the chimney.

Now, wouldn't you think, that a chimney in an office attached to the elevator, would be inspected each Fall before the time heat is needed, to ascertain whether it is safe, and if not safe, be repaired? Some smaller fires occurred from the same cause.

Lubrication Neglected. Our information leads to the conclusion that neglect to keep the machinery bearings properly lubricated is a prolific cause of fires in elevators. It is so generally known that a dry bearing is almost sure to get hot, and that a red hot box is likely to start a fire, almost sure to with dust around and upon it as in a grain elevator, that it would seem as though any one in charge of an elevator would regard lubrication of the machinery of enough importance to not neglect it.

Several fires have occurred in elevators at night, cause reported unknown. It seems fair to presume that some, probably a large percentage, of such fires, were caused by a hot box. The bearing could be hot enough to start a fire when the machinery stops running, and the fire so started, could smoulder in the dust for some time before breaking out. It is noted that such fires are usually in the upper part of the elevator. An incipient fire in the upper part of the elevator would not be noticed by the operator on the work floor. A fire occurring at such time, in such location, is quite certain to destroy the building.

The importance of keeping all the bearings, including electric motors, well lubricated, needs no argument. It is hoped that feature of the operation of the elevator will not be neglected.

Combustible roofing on elevator buildings, especially the additions that are not high, is a source of danger from fire. The cost of non-combustible roofing is not more than shingles. All new roofs should be of non-combustible material. It would seem to be worth while to cover with non-combustible roofing all low buildings near the track that are shingled now, though the shingles are not entirely worthless, because shingles that have been on some time become curled and fuzzy and are easily ignited by sparks.

There are other special fire hazards pertaining to the construction and operation of grain elevators, and matters regarding fire prevention, which might be named, but they have been talked and written of so that grain dealers are familiar with them. It seems to me that it is not so much the need of added information concerning fire hazards, as it is thought and care to remove or avoid them, as the case may be.

May we have hope that every grain dealer, who has insurance in this company, will use care and make the best effort he can to not permit any fire hazards and to prevent fire occurring in his property. If that is done, elevator fires will be minimized.

The National Board of Fire Underwriters claim that three-fourths of the fires are due to carelessness and could be avoided. I wonder if that ratio obtains regarding fires in grain elevators. Let us all endeavor to make it impossible for such accusation to be truthfully made against the members of this Company.

F. G. Horner, president of the Grain Dealers National Ass'n, delivered an address from which the following is taken:

I feel quite sure that, as a representative of the Grain Dealers National Association, you are expecting me to say something in regard to the relationship of our government and the grain business and it is equally true that this subject has for a long time so engrossed the attention of the National Association that no other topic has even suggested itself for today. The very fact that this is true and that the same condition exists in so many other lines of essential business effort is one of the saddest and most ominous commentaries on the recent trend of the functions of government.

The grain trade has long been peculiarly unfortunate in this respect because their relationship with the large farmer vote has made them particularly inviting to the attack of mercenary politicians and professional propagandists and also because there has been a woeful lack of understanding of our business among the general public. In recent years, however, the increasing tendency for the extension of governmental activities into private enterprise has caused us to share our position with nearly all other lines of business effort until we have reached such a crisis in extravagance, waste, injustice, and inefficiency as to challenge the attention of the entire country, as was very clearly demonstrated in the last general election. For regardless of our political affiliations or our opinions of the propriety of the result, we must all admit that the election clearly demonstrated an attempt of the electorate to record themselves against the wild-eyed theories of governmental powers which had been fed to them for the past few years and which apparently, up to this time, they had been absorbing with an increasing relish.

While rejoicing at this evidence of the reaction against recent ultra-radical tendencies and while having the greatest respect and admiration for President Coolidge, we might wish that his generally sound views on economic subjects might have been fortified by a more intimate knowledge of agricultural and marketing conditions. One of the first important acts of the President, after his election, was to keep faith with his pre-election promise to appoint a committee to investigate the agricultural problem in its broadest sense. This committee, known as the President's Agricultural Commission, was composed of men as representative, as capable, and as reliable as could be expected to be secured for such a purpose. But the very idea that such a commission, or any other body of men, should be considered capable of making, in a few weeks' time, such an investigation of all the ramifications of such a major industry as agriculture as would warrant the formation of an intelligent plan for governmental assistance or control, well represents the absurdity and the futility of all attempts at governmental paternalism. The very magnitude of the subject precluded more than the mere collaboration of the Commission in a composite of ideas which had been previously formed.

The report of the Commission was conspicuous for its lack of radical recommendations and was in marked contrast with what would have been expected from such a body a year ago. But a careful analysis will reveal that, if there be excluded the criticisms which were made of various established governmental agencies, now functioning at the instance of just such demands as resulted in the creation of this commission, itself, then we have eliminated practically all of importance that the report contains. In fact the most valuable conclusion to be drawn from the entire report is its own indictment of paternalism. The report criticizes, in most severe terms, the basic practices of the Interstate Commerce Commission and comments unfavorably on various other permanent governmental bodies by calling attention to the unnecessary and unwise duplications in many of these organizations and to their interdepartmental and interbureau jealousies and frictions and then by inference condemns the entire theory of governmental control of business, by the very fact of proposing another body, which, in the interest of agriculture, would have power to make suggestions to these various other departments and thus add another ornament to the already vicious circle. It would seem to have been so simple, so logical, to have been consistent with their own findings and to have recommended the elimination or the curtailment of some of these offending bureaus and departments, laws and practices, officials and minions, now restraining and blighting every progressive expression of agriculture and every other industry with the single exception of that most thriving industry of public officialdom.

Association's Brief on Marketing.

Your association presented to this commission a brief on the grain marketing system which consisted of thirty-two pages and was one of the most careful, most comprehensive, and most illuminating statements ever prepared on the grain marketing system.

As a result of the report of the President's Agricultural Commission and under their sponsorship and with the influence of the administration behind it, there was introduced into Congress the Capper-Haugen bill, providing for the establishment of a Federal Marketing Board, with an appropriation of \$500,000.00 for the expenses of the first year. The effect of this bill would have been the establishment of this board with the specific purpose of promoting the organization of co-operative marketing associations, registering them, furnishing a free audit of their books and accounts, and various other nurse-maid facilities. No second thought should be necessary to determine the demoralization that would result to the country elevator trade, should such a bill be passed. It was, it is true, less drastic than the McNary-Haugen bill, but was for that very reason far more dangerous. The McNary-Haugen bill would have killed the grain trade. The Capper-Haugen bill would have mortally wounded it. Personally, I prefer death.

But, fortunately, for every one concerned, except a few of the bureaucrats, who would have directly benefited, the provisions of the bill conflicted with the personal interests and the pet schemes of many of the self-appointed leaders of the farmers, and immediately aroused a storm of protest from this source. This bill stole their thunder. What chance would an attorney or a professional propagandist have raising money from the farmer when the government was furnishing the farmer the same service, paid for by general taxation? This was unfair competition and, quite naturally, was not to be tolerated by the band of patriots who had been capitalizing the misfortunes of the farmers.

Must Watch Legislation.

In looking ahead, it would seem that developments under the new administration and knowledge of the personnel of the new Congress are now sufficient to enable us to form some rather definite conclusions. And one would be, that there is very little danger of the enactment of any such legislation as the old McNary-Haugen bill. President Coolidge's record assures his opposition to any such legislation, and, if more were wanting, his appointment of Prof. Jardine as Secretary of Agriculture should be ample security on this score, as Prof. Jardine was last year conspicuous among the farmer leaders for his

opposition to the original McNary-Haugen bill.

But it seems equally certain that we will be confronted by a most formidable attempt to secure from the next Congress some legislation along the lines of the Capper-Haugen bill. The president is definitely committed to such a program and Secretary of Agriculture Jardine may be expected to give it the full support of his department.

The situation is serious but you may be assured that the National Association will do everything in its power in opposition to such legislation and we hope to have the active assistance of every individual member.

Chas. D. Morris, assistant chairman of the Western Railways Committee on Public Relations, of Chicago, spoke on the transportation question. His closing comment was: "If you take away all the short-haul business which is being directed to truck lines the freight rate on long hauls must be increased." We quote further from his address as follows:

"The time has obviously arrived when we must consider the nation's transportation system as a vast business proposition. No business concern, involving the investment of billions of dollars, can continue to operate satisfactorily without the life-giving blood of net returns. Political interference in the management of industry or business has always been disastrous, and will continue to be so. Political regulation of our railroads means legislative rate-making, uneconomic management and ultimate discrimination between communities, if not between individuals, and experience points to the fact that this is the direct road to bankruptcy."

Hon. J. H. Henderson, commerce counsel for the state of Iowa, discussed the important question of rental charges for railroad elevator sites. This subject frequently arises in the proceedings before the state board.

J. M. Mehl, Federal Grain Exchange Supervisor, of Chicago, spoke on the subject, "The Legitimate Use of Trading in Future Contracts." His address will appear next week.

Sec'y Wells commended the character of their work.

W. S. Braudt of the Grain Claims Bureau, Chicago, spoke on the present status of railroad claims. He said:

Losses, arising from freight claims, are the old story of the hole in your pants pocket; your small change slips out and it is lost, usually never found. There are some large individual freight claim losses, but the small losses, about which I have the privilege of talking to you, outnumber the large losses one hundred to one.

From this freight claim cause, as a whole, an individual loss to an individual elevator of say, \$100.00, will not bankrupt the elevator but if you will multiply that \$100.00 loss by a reasonable percentage of the thousands of elevators doing business in the grain trade, the hole in the pants pocket gets big enough to mend, and afterward to watch carefully, to prevent future losses.

What is a legitimate freight claim? First, let me say that a freight claim loss isn't always railroad liability. While the railroads are practically insurers of the freight delivered to them for transportation, there are some causes from which they are exempt, and quite properly so. The grain freight claim is one of the few things that gets tail-end consideration from you and I think this is largely due to the misunderstanding that exists about what you are rightfully due to recover for and that which you cannot charge up to negligence on the carriers' part.

In classifying the losses in the grain trade which are liability items, first we have the ever present loss caused by shortage in weight. Second, the loss from decline in market value due to slow movement or to unreasonable delay in transit. Third, the deterioration in grade and value due to heating in transit that may be caused by slow movement or unreasonable delay in transit coupled by confinement in tight box cars with no chance to turn the grain over to cool it in any way. Fourth, the failure to get cars to load, and fifth, the illegal or erroneous collection of freight charges that are overcharges.

Very briefly, on the first loss items, namely shortage in weight, this is a triangular cause; failure or error in loading at point of shipment; failure or error or deliberate suppression of part of contents unloaded at unloading point; loss of contents by the railroad to whom there has been given 88,000 pounds of grain to transport to destination and only 87,200 pounds delivered at destination, the other 800 pounds having leaked out of a defective car or having been stolen out of said car while in carriers' possession as a common carrier and practically an insurer of the grain given them to transport. The railroad cannot be charged with weighing error or irregularities at loading or unloading points but they are liable for the

third cause mentioned, and one or two of the trunk lines are not backward about invoking causes one and two as a means of evading liability for cause three.

Delay items for decline in market or for deterioration are a proposition of the destination market value of the grain, in the condition it should have been in, on an arrival date after allowing the carrier reasonable time in which to move the grain to its market destination.

Losses from failure to furnish cars is the car supply question all over again. You are entitled to your elevator's individual share of the available cars for loading; you must get them or prove unjust discrimination in favor of some competing shipper.

Losses to you from overcharges are the tariff provisions and constant changes take place in these documents. Read and know your freight tariffs that apply to the particular shipping that you do; you are entitled to suitable notice of change in rates and other tariff provisions; and my respectful recommendation to you is to see that you get such notice.

Shortages in weight are of sufficient importance to justify further comment here. They arise through defective record car movement as leaking cars, evidence of recent repairs (clever work here sometimes removes all evidence of previous leaking conditions en route), bulged or otherwise dangerously unsafe cars, and cars that are not at all times properly protected by seals. A car seal is certainly not an absolute protection of a load of grain; but neither is money always perfectly safe in a steel safe. Disturbed seals, however, do indicate a cause but bear in mind please, that seals must be broken for state and other inspection as well as other causes, but do not overlook the fact that such loads with seals broken for legal reasons must be under proper surveillance while the seals are removed and replaced.

The other angle of the loss by shortage in weight is the hard one to get much satisfaction out of. I refer to the so-called "clear record" movements. In this class of claims the triangular causes I previously spoke to you about, come out stronger than ever. In cases of so-called clear record shortages, the carrier is inclined to throw the burden onto loading and unloading failures or errors. The third point of this triangle applied to clear record shortage claims, is simply a question of an unrecorded, unreported leak in transit. Some railroads not only take every known precaution to get all leak records, but they maintain expensive records of car conditions and when the freight claim officer of that railroad tenders you the result of an investigation that indicates a clear record of handling, he has an argument that is worth something. The trouble with most investigations is that they are superficial, take in the loading point, the unloading point, clear up any change in seals and call it a clear record. This is not a clear record. Conductors and yardmen, inspectors and special agents look over these cars and the only prima facie case of clear record that can be justly so is one where the record of every man handling the car submits his record to make up the whole. One railroad I have in mind investigates these shortages and I would like to tell you about them sometime. This clear record proposition presents extreme difficulties in dealing with some roads. And this condition is unjust and unfair. There is always the question of doubt basis to apply.

Six Months Clause.

One more thing gentlemen, that is costing you money on these small losses and that is the six months clause of the bill lading.

I would like to go into this in the detail that it deserves but time limits must come first. Briefly, no four-sided railroad will invoke this proviso of the bill lading in liability case. I have the citations right here to show any interested shipper or receiver that the decisions of the courts show that failure to file within six months, in a liability case, is not a bar to recovery. This six months clause needs your consideration, gentlemen. It is monumentally unfair to apply it to liability cases filed within two years of the unloading date.

I cannot pass up this opportunity to pay certain respect to the 50 mile per day basis that is getting to be such a lusty child with the railroad freight claim officers. There is nothing to it but a basis and as a basis it is against your interests. A car should receive continuous movement in direction of destination, and if it gets it the "no schedule on bulk grain" alibi falls flat. Move it by local freight service if nothing better offers, but move it continuously and not back track it to let less important revenue traffic have precedence.

A word in closing is due two railroads I have in mind for the open and fair-minded manner in which they handle the grain claims. Of all the carriers the bureau comes in contact with, there is less technical hair splitting and more frank discussion by the Rock Island R. R., the Santa Fe and the C. B. & Q., the Missouri Pacific, St. L. & S. F., and the C. M. & St. P. I must pay due respect to the Rock Island and the Santa Fe in this respect, and at the same time not overlook giving such credit as is due to the other carriers mentioned. It is much easier to boost than to knock, and more pleasurable also, and if you will excuse me I will keep off the subject of the unmentioned carriers' unwillingness to handle your claim matters as consistently as the roads I mention above.

Mr. Wells spoke of the valuable services of Mr. Braudt's bureau.

General discussion on the storage, hedging and carrying charges of grain from the country elevators standpoint brought out the following points:

On last oats crop a profit of 7 cents a bushel over 40 cents purchase price, which was average Iowa price, was safe. Many felt that opportunity for carrying charges will even improve in the future. The range in cash prices in the terminals is explained on off grades, particularly in the fact that industries buying such corn will reduce their bids as soon as their needs are met.

The storage capacity of country elevators should earn a fair return on the investment, and through the employment of hedging facilities, a carrying charge usually makes such earnings possible. It was stated by Mr. Mehl and others that the future markets offer such that is not taken advantage of.

"Jack" Brennan of Chicago said a hedge should be kept on and not speculated with. He believes that too much and random speculation has disturbed the intended protection of hedging. He spoke of the very general practice of hedging in the northwest and that Iowa and states further south should more fully take advantage of the hedging facilities.

The last Federal Trade Commission report of such matters, issued in 1917, showed that through the encouragement of Minneapolis grain houses, who were very largely financing country grain elevators, the latter hedged 90 per cent of their grain; Iowa and Kansas about 50 per cent.

It was the sense of the meeting that the secretary should more fully acquaint the trade with the importance and advantages of hedging. For several years the Western Association conducted scale inspection to the advantage of its members, but in recent years the work has been handled by the Dairy and Food Commission of Iowa. The present arrangement does not include repairing when necessary and the infrequent inspections make the service a political expedient unsatisfactory.

Mr. Payne of the Clements Mfg. Co., 601 Fulton street, Chicago, spoke to the convention on the Cadillac Blower and the importance of keeping motors clean. Many dealers are using Cadillac Blowers and find the small time necessary in cleaning, coupled with careful attention to lubrication, gives them much better power and eliminates the fire risk.

F. A. Holmes, the radio manufacturer of Waterloo, Ia., had a place on the convention program to present this relatively recent but most important business asset to every country grain elevator. Mr. Holmes likened the radio to the practical machinery of the elevator, emphasizing the fact that dependable, prompt markets were as important as other details of elevator operation. It is his opinion that the present receiving sets will be changed little, but that broadcasting stations will continue to show marked improvement. The unquestioned importance of the radio does not effect the country elevator where a receiving set is not installed. Therefore, although referring to good radio sets in general as meeting this need, the equipment sold by F. A. Holmes & Co. as installed in several hundred grain elevators, is particularly suited to their purpose and is a practical asset.

RESOLUTIONS.

Chairman Milligan of the resolutions committee received the support of the convention to the following resolutions:

A vote of thanks to the convention speakers, their hosts and others who had contributed to the occasion.

The careful observation of the best grain trade practices and the advisability of conducting a country grain elevator so that fair profits were secured.

It is recommended to the various groups of elevators throughout the territory covered by the association that occasional meetings be held to discuss trade problems. The need of such group meetings is not however to be left to

the secretary but arranged locally by as many elevators as are concerned in the problems to be discussed.

Endorsement of the activity of President Coolidge and his administration in their program of economy.

Clifford C. Belz, chairman of the auditing committee, reported the accounts of the association in order.

NOMINATIONS.

Lee Davis, chairman of the nominating committee, presented the following officers and directors who were unanimously elected for the year: Clifford C. Belz, of Conrad, Ia., president; O. B. Moorhouse of Glidden, Ia., vice-president.

Five directors: Charles Dozler, Templeton, Ia.; Arthur Moeller, Reinbeck, Ia.; John Mueller, Calamus, Ia.; J. D. Kent, Des Moines, Ia.; George Moulton, Fonda, Ia.

The evening of the first day found the dealers gathered for their regular banquet which was well attended and much enjoyed. Secretary Wells acted as toastmaster and introduced "Hi Power" Royal Hasbrook of the University of Ames, Ia. He is a speaker of reputation throughout the west and a loyal exponent of Iowa's advantages. The balance of the evening was given over to a splendid entertainment.

Taking as a keynote certain outstanding features of various convention addresses, the following subjects were briefly discussed by the delegates: Elevator construction—insurance cost; improvement in elevator fire hazards; non-combustible roofs and siding; lightning protection; lubrication and cleaning of electric motors; cost of operating a country elevator; what is a reasonable buying margin; feed grinding and side lines; use of the radio by country grain dealers; the landlord's lien; uniform rules as to contents car load purchases; the proposed change in the oats grades; shrinkage allowance deductions—railroad claims.

Among the exhibitors of machinery equipment during the convention were Lord's Universal Truck & Wagon Dump Co., 322 Liberty Bldg., Des Moines; Fairbanks Morse & Co. (showing the new fireproof dustproof, enclosed and ventilated motor); F. A. Holmes & Co., Waterloo, Ia.; F. J. Conrad, Cedar Rapids, Ia.

GRAIN REGIONAL RAINFALL.

The following table gives the total average rainfall in inches, in each state in the grain regions beginning April 16 to April 27, inclusive, and the average fall in inches for each station in the state, as reported by the Weather Bureau for the week ending April 27:

Sta-	Total	Total	Total
tions.	season.	for	previous
		week.	week.
Kentucky ... 17	1.10	.56	.54
Ohio 15	.74	.63	.11
W. Virginia.. 1	.68	.62	.06
Michigan 7	1.29	.39	.90
Indiana 16	.63	.37	.26
Illinois 19	1.23	.65	.58
Wisconsin ... 5	1.71	1.06	.65
Minnesota ... 18	1.01	.42	.59
N. Dakota ... 16	1.04	.48	.56
S. Dakota ... 13	.60	.29	.31
Montana 12	1.03	.69	.34
Nebraska 18	.89	.42	.47
Iowa 22	.83	.74	.39
Missouri 24	1.41	.79	.62
Kansas 25	1.11	.94	.17
Oklahoma 11	1.56	1.55	.01

CANADIAN WHEAT EXPORTS.

Canadian exports of wheat and flour in bushels, as reported by the Canadian Bureau of Statistics, have been as follows (final three figures omitted):

	1924-25.	1923-24.	1922-23.	1921-22.	1920-21.
Sept. 14,620	12,369	12,372	8,770	5,336	
Oct. 19,440	34,269	41,442	24,097	19,141	
Nov. 31,056	70,395	60,781	33,106	29,519	
Dec. 33,572	63,634	47,251	37,886	37,500	
Jan. 10,039	17,057	14,354	8,946	14,647	
Feb. 7,901	16,684	10,637	8,595	12,015	
Mar. 19,733	19,736	12,108	10,481	11,220	
April 6,085	5,143	4,067	7,417		
May 45,987	14,833	16,985	10,467		
June 24,978	26,299	15,201	8,743		
July 16,748	13,440	11,674	5,765		
Aug. 11,002	14,375	14,247	6,013		

The Department of Commerce, through Trade Commissioner Watson, advises that South China is a good market for flour.

The Letter Box

Likes Paper.

Price Current-Grain Reporter: The paper is oke and we don't want to miss a single copy.—*Peterson Bros., Ione, Ore.*

Discontinued Business.

Price Current-Grain Reporter: We have found your paper very valuable but on account of the death of our senior member of the firm, Mr. A. H. Bastin, we will discontinue all business.—*A. H. Bastin & Co., L. B. Boone, Lancaster, Ky.*

Michigan Meeting in July.

Price Current-Grain Reporter: This is to advise you that our board of directors have selected Monday, July 27, as the date for holding our annual convention this year, and the meeting will be held at the Hotel Tuller, Detroit.

This will give receivers and shippers from other states an opportunity to attend our convention and leave that night or early the following morning for the National Hay Convention which is to be held at Cedar Point, O., July 28 to 30, inclusive. A boat leaves Detroit daily at 8 a. m., arriving at Cedar Point about 2 p. m., making a delightful daylight trip across Lake Erie. President White is now at work on the program, and I wish you would extend to the trade a general invitation to meet with us on that date.—*T. J. Hubbard, Sec'y and Treasurer, Lansing, Mich.*

New Elevators.

Price Current-Grain Reporter: We would like to have reported in your columns a little more elevator work, which we have recently started. We are building a 10,000 bushel studded iron-clad elevator for the Dodge City Alfalfa, Coal, Grain & Supply Co., at Sears, Kan. This plant will be equipped with engine power, ten-ton wagon scales, truck dump, automatic scales, etc. There will also be a concrete engine room attached to the elevator, and a detached two-room office. All frame buildings iron-clad and roofed with metal roofing.

We are just starting a 25,000-bushel iron-clad elevator of cribbed construction at Weskan, Kan., for the Summit Grain Company at Denver, Colo. This plant will be fully equipped with ten-ton wagon scales, truck dump, large automatic scale, 15 h.p. engine, and all necessary equipment to make it thoroughly modern and up-to-date. Also 1,000-bu. cleaner.

We have just finished installing a Globe Truck Dump for the Farmers' Elevator at Viola, Kan., with the necessary driveway extension.

We have just finished installing a 10-ton truck scale for the Thompson, Wilson Grain Co., at Hunter, Okla.—*The Star Engineering Co., Tom Cullers, Mgr., Wichita, Kan.*

Illinois Corn.

Price Current-Grain Reporter: Showers, which were more or less general, pushed out the fruit blossoms and were a tonic to all growing grains and grasses this week. Thermometer here on Thursday reached 92, highest in the Central West for that day. Such heat, added to high winds, carries off moisture very fast, as per example: Only two weeks ago our box car receipts of shelled corn were mostly grading No. 4, while since that time the moisture content has been reduced very rapidly and our Decatur inspection record shows now a good percentage of No. 2 corn, which will naturally increase from now on. Our subsoil is already deficient in moisture, frequent rains will be necessary to continue the present crop promise.

Some winter shelled corn has shown up at terminals in a heating condition, but we expect such will gradually get out of the way and that central Illinois

grain handlers will soon have a fine article of corn to handle. There is some speculation as to the volume of corn that will leave the farms after corn planting is over. Our guess is that if the new crop shows early promise of a good yield, farmers will sell the usual amount, should they be able to secure around a dollar per bushel for same.

Farmers have prepared an unusually fine seed bed for the corn, only a small acreage of which has as yet been planted. Seed corn of proven worth seems to be generally available.—*H. I. Baldwin & Co., Decatur, Ill., Apr. 25.*

VISIBLE GRAIN SUPPLY.

The following table gives the stocks of grain in bushels in public and private warehouses at the principal ports and in transit by water on the dates named, with comparisons as compiled by the secretary of the Chicago Board of Trade for the week ending April 25 (000 omitted):

FROST DATES.

The average date of first killing frost in the corn belt is as follows:

North Dakota, Sept. 20; South Dakota, Sept. 26; Wisconsin and Minnesota, Sept. 28; Nebraska, Oct. 3; Iowa and Michigan, Oct. 5; Illinois and Kansas, Oct. 12; Indiana, Oct. 13; Ohio and Pennsylvania, Oct. 14; Missouri, Oct. 15.

Legal, Traffic and Arbitration Decisions

COURT DECISIONS.

The Transportation Act 1920 does not of itself release consignor from liability when carrier delivers freight to consignee without payment, or make consignor's liability secondary to that of consignee. Transportation Act 1920, prohibiting the delivery of freight at the point of destination without the payment of tariff charges, except under such rules and regulations as the Interstate Commerce Commission may prescribe, does not of itself operate to release the consignor from liability when the carrier delivers freight to the consignee without payment, or make the consignor's liability secondary to that of the consignee.

Generally consignor making contract with carrier is primarily liable for tariff charges; that carrier delivered interstate freight shipment without collecting tariff charges from consignee held not to release consignor from primary liability for payment of charges. The general rule is that the consignor, who makes the contract with the carrier, is primarily liable for tariff charges. The question is one of contract to be determined from the facts of the case. An interstate shipment was made, with a milling in transit privilege, the consignor making the contract with the carrier, retaining control, and changing the consignee in the course of the transportation. Delivery, as permitted by the rule of the Commission, was made by the carrier to the consignee without payment of freight. The bill of lading provided that the consignee should pay charges. A finding that the consignor remained liable is sustained.—Chicago Jct. Ry. v. Duluth Log Co. (Minn. Sup. Ct. N. W. Rep. 202-24.)

Damages for buyer's breach of flour contract held fixed as of date of buyer's cancellation of order. Damages for buyer's breach of flour contract held fixed as of date of buyer's cancellation of order, and seller could not wait until expiration of 60 days given by contract, when the price of flour had declined, as a basis for claiming damages accordingly.

Seller, not suffering damage on date of buyer's cancellation of flour order held entitled only to agreed cancellation fee. Seller, not suffering damage on date of buyer's cancellation of flour order, in that there had been no decline in price, held entitled only to agreed cancellation fee of 50 cents per barrel.—H. D. Lee Flour Mills Co. v. Broadlick. (App. Ct. Ind. Div. 2. N. E. Rep. 146-848.)

TRANSPORTATION MATTERS.

Case Reopened.

The Interstate Commerce Commission has reopened for further hearing, its proceeding in I. & S. 2228, grain from Kansas City, Mo.-Kan., to C. & N. W. stations in Iowa.

The original finding was that the suspended schedules, which proposed to make an increase of two cents in the proportionals, which were published by the Wabash, did not follow the basis authorized by the C. & N. W.

Recommends Dismissal.

Examiner Cheseldine has recommended to the I. C. C. that the complaint of the Moore-Lawless Grain Company against the C. B. & Q. et al., No. 16368, be dismissed.

The complaint attacked a rate of 57.5 cents charged on a car of wheat shipped from Nebraska City, Neb., to Kansas City and reconsigned to Westwego, La. The examiner said he could find no authority for the 57.5 cent rate but that

the rate actually applicable was not unreasonable. He found, however, that there was an actual overcharge on the shipment as billed, and this the carriers agreed to refund.

Want Reduced Canadian Wheat Rates.

At a meeting of the Dominion Board of Railway Commissioners which was held at Ottawa, Ont., on April 21, the Dominion Millers' Association applied for lower rates on wheat and flour from local points to New York, and on grain milled in transit, to the seaboard. The contention was made that there was a discrimination made in favor of U. S. lake ports amounting to 5 cents a barrel on flour, rates from Ontario points being that much higher than from corresponding U. S. ports.

Ask for Increased Rates.

Sixty-five western railroads cannot continue to maintain adequate transportation service under the present general level of freight rates they declared in a joint brief filed with the Interstate Commerce Commission last week.

Reductions in rates on agricultural products in recent years, the document declared, have already "menaced the maintenance of an adequate system of transportation in the west." The roads ask a general investigation, with special reference to their problems.

Supporting the contentions the brief contained estimates of earnings for 1924 making the return on railroad investment in the west 3.87 per cent, compared with 4.33 in the remainder of the United States. In addition the wage payments of western railroads were given as 193 per cent in excess of their payments in 1916.

DIGEST OF ARBITRATION DECISIONS.

In a decision by the arbitration committee of the Grain Dealers' National Ass'n, the following principles were announced:

Armour Grain Co., Chicago, Ill., vs. E. T. Custerborder & Co., Sidney, Ohio.

The fact that shipment was not delayed by the failure to observe Association Rule No. 5, is not sufficient to warrant setting aside this rule.

Mangelsdorf Seed Co., Atchison, Kan., vs. W. H. Morrison, Stockton, Kans.

This case arises from a contract between the plaintiff and defendant for receiving certain lots of sudan grass seed by the defendant and shipment of the same to the plaintiff at Atchison, Kans. The original agreement contemplated that the seed would be handled in sacks, and that the receiving and loading of the same would be consummated within a few days. This agreement allowed the defendant three cents a hundred. The seed came from seven different producers in amounts ranging from one hundred and eighty pounds to five tons, totaling 41,114 pounds, and a considerable portion was delivered not in bags, but in bulk, necessitating storage in defendant's elevator. This necessity for providing bulk storage proved exceedingly inconvenient to the defendant whose elevator was filled with wheat and required the transfer of contents of some of the bins, and mixing of different grades. An additional remuneration of seven cents per hundred was required by the defendant and approved by the plaintiff's agents.

VAN DUSEN CROP REPORT NO. 3.

Conditions throughout the four North-western grain states during the past week continue to point to a very favorable crop season. General rains are reported over the entire state of North Dakota and portions of Montana, and local rains in Minnesota and South Dakota. There is now ample moisture over the whole territory to germinate and start the crop satisfactorily.

Spring seeding in Minnesota and South Dakota is finished and much of the early sown grain is well above ground, showing good stand and color. Plowing is generally completed and farmers are preparing the ground for

corn. Planting will probably start about the first of May. No scarcity of seed corn is reported and the intended acreage is apparently about the same as that of last year.

Our reports from North Dakota indicate that seeding is practically completed, with the exception of the north-western part of the state. In the central and southern districts some of the grain is already coming through the ground. There is a noticeable increase in the acreage sown to oats and barley, and farmers are anticipating planting more sweet clover and alfalfa than in past seasons.

The early spring and generally favorable conditions, have been particularly beneficial to Montana, and all farm work is much further advanced than is usual at this time of the year. In the eastern part of the state 75 per cent of the seeding is completed, while in the northern areas it varies from 40 to 60 per cent. There will be a large increase in spring wheat in the central and southern districts due to the plowing up and reseeded of abandoned winter wheat acreage.

Most of the fall sown rye in the north-west seems to have come through the winter fairly well, but is rather slow to start, and our present reports show it to be somewhat spotted and uneven in development.

Present indications point to an increase in the flax acreage, both in North and South Dakota, particularly in the districts west of the Missouri river, where much new ground is being broken.

We find our correspondents very optimistic as to the crop situation at this time. Seeding will probably be completed from ten days to two weeks earlier than last year. If conditions for the next few weeks continue as favorable as at present, it is probable that the total acreage cropped in this territory will be the largest for several years.—The Van Dusen Harrington Co., by W. G. Hudson.

Crop Reports

Compiled by GEO. A. WELLS

CROP REPORTS

The soil condition is now reported "favorable" by our correspondents for all of the states except, Iowa and Kansas and portions of Nebraska and South Dakota, some sections of these states being "too dry."

The spring season has been early to normal. The soil favorable to sowing and planting. Precipitation is now the vital factor. In some localities sub-soil moisture is deficient.

The winter wheat crop is exceedingly spotted throughout the entire winter wheat belt. The winter wheat crops of Ohio, Oklahoma and Texas are especially bad. Recent rains in different parts of the wheat belt will no doubt reduce previous estimates on abandonment of acreage. It is impossible to compile percentage reports with accuracy of the growth condition or abandonment at this time.

The abandonment of winter wheat acreage is showing up in an increase of oats and corn acreage. The flat average of reports, by our correspondents would indicate an increase of 3 per cent in oats acreage and 12 per cent in corn acreage as compared with last year.

General Reports

The general reports given below (1) as to the winter wheat crop prospect, (2) as to whether or not there is any surplus corn in farmers' hands to be marketed before new crop is harvested, (3) as to whether the farmers are shipping in cattle or hogs for feeding, are self explanatory:

ILLINOIS.

Wenona, Ill. (4): Winter wheat looks like one-half a stand.

Morris, Ill. (7): Wheat good. No surplus corn. No live stock coming in.

Odell, Ill. (7): About 60 per cent of corn crop of 1924 in farmers' hands. About 10 per cent of oats crop. No wheat.

Ashton, Ill. (4): Winter wheat spotted. Some acreage abandoned. Considerable corn back. Not shipping in cattle or hogs.

Lexington, Ill. (5): Some wheat looks good and some thin. Some surplus corn here. Not many cattle shipped in or hogs either.

Decatur, Ill. (5): Winter wheat has very good prospect. Very little surplus corn here. Some hogs and very little cattle being shipped in for feeding.

Freeport, Ill. (4): Prospect of winter wheat crop is good. Very little surplus of corn in farmers' hands. Some Kansas corn coming in this section for feeders.

Vermont, Ill. (2): Winter wheat looking good, with 95 per cent of a crop. Some corn will move after corn planting. No live stock being shipped in for feed.

Eureka, Ill. (1): Crop of winter wheat is uneven. Some quite good, 90 per cent of the corn in farmers' hands. Not inclined to ship in cattle and hogs for feeding.

Mt. Pulaski, Ill. (5): Wheat is generally doing well. Recent rains and warm weather much improve outlook. Corn in country in strong hands and will not move around present prices. Farmers using more feed.

INDIANA.

Tipton, Ind. (5): Weather good. Soil in good condition.

Winamac, Ind. (1): Wheat prospect is fair. Small corn surplus and no hogs or cattle shipping in.

Winchester, Ind. (8): No corn left to ship out. Shipping in corn. No hogs or cattle being shipped in.

Brook, Ind. (1): No corn here to be shipped out. Feeding reduced and about corn enough left to finish it.

Monticello, Ind. (1): Conditions now very favorable. Wheat and oats are

growing well. Corn land plowing well done.

Decatur, Ind. (7): Winter wheat fields spotted. Few real good fields of wheat. No corn surplus. No stock shipped in.

Rensselaer, Ind. (1): Normal prospect for winter wheat. No corn for sale. Farmers not inclined to feed cattle and hogs.

Lawrenceburg, Ind. (9): Prospects for wheat not good. Very little surplus corn here. No cattle or hogs shipped in to feed.

Kendallville, Ind. (7): Our winter wheat looks good and fine prospects. No surplus corn in this locality. Not shipping in cattle or hogs.

Frankfort, Ind. (2): Winter wheat crop prospects fair on early sown land. Very poor on late. No cattle or hogs being shipped in for feeding.

Marion, Ind. (5): Some very good prospects. Late sown wheat thin on ground. No surplus of corn. No cattle or hogs being shipped in for feeding.

Jasper, Ind. (3): Winter wheat is in very good condition but needs rain in the next few days. Have a surplus of corn here. No cattle shipped in for feeding.

Angola, Ind. (7): Just fair prospect for winter wheat. More rain would help. No corn to be marketed before new crop. No cattle and few hogs shipped in.

Rushville, Ind. (8): Prospect of winter wheat not at all good. But very little corn will be sold before harvest. Farmers are not shipping in cattle and hogs to feed.

Wabash, Ind. (4): Fair prospect for winter wheat as we have a slight improvement in condition recently. No corn for sale. Farmers not shipping in cattle and hogs for feeding purposes.

IOWA.

Williamsburg, Ia. (8): Very dry but all small grain looks good. Some corn is planted.

Jefferson, Ia. (5): No winter wheat raised. We have a small surplus of corn and oats.

Corydon, Ia. (6): No winter wheat here. No surplus corn and no cattle and hogs shipped in.

Indianola, Ia. (6): No surplus corn or oats. No cattle or hogs being shipped in for feeding purposes.

Belmond, Ia. (4): No surplus corn in farmers' hands. Those who have corn will sell to their neighbors.

Whitten, Ia. (4): Considerable corn left but will not be sold for some time. No hogs or cattle coming in.

Moulton, Ia. (6): The outlook for oats and grass crops is good. Farmers are shipping corn in as there is none to ship out.

Wall Lake, Ia. (2): Wheat condition favorable. Some surplus corn in farmers' hands. No hogs or cattle being shipped in.

Arthur, Ia. (2): There is no surplus corn in the farmers' hands to market. Farmers are not shipping in cattle or hogs for feeding.

Lowden, Ia. (8): Farmers report wheat thin stand. There is no corn here. Farmers are not shipping in cattle or hogs for feeding.

Henderson, Ia. (3): Winter wheat looks fine except some is poor on hill land. There is some old corn left. Not shipping in cattle or hogs.

Gilbert, Ia. (5): Some corn that must move this summer is in the farmers' hands. There is no feeding of cattle and hogs in this locality.

Hamlin, Ia. (2): Very little wheat is raised here. There is no corn or oats in farmers' hands for sale. Most of them have to buy corn and oats.

Onawa, Iowa (2): Winter wheat prospect is fair to poor. Practically no surplus corn here. Farmers are not shipping in cattle or hogs for feeding.

Authorized in States of Iowa, South Dakota, Nebraska, Kansas, Illinois, Ohio and Pennsylvania

Western Grain Dealers Mutual Fire Insurance Company

Hubbell Building

Des Moines, Iowa

LIGHTNING PROTECTION

If lightning rod protection could be installed on every grain elevator on which this Company carries insurance, it would not only affect a reduction of ten cents in the rate but also a reduction in fire losses paid by this Company. This would also affect a lower cost of the insurance which would be reflected to the policyholder in an increase in the dividend rates.

New Sharon, Ia. (5): Weather very dry, causing the standing still of wheat. A little corn in the country, but will be used here. No cattle or hogs coming in.

Coburg, Ia. (3): The winter wheat crop prospect is generally good. About 10 per cent of corn to ship after harvest. No cattle or hogs coming in for feeding purposes.

New Hampton, Ia. (7): No winter wheat raised here. Corn is being shipped in here and is being fed. The farmers are shipping cattle and hogs for feeding purposes.

Glidden, Ia. (2): There is some surplus of corn in farmers' hands to be marketed before the new crop is harvested. Farmers are not shipping in cattle or hogs for feeding.

Guthrie Center, Ia. (2): We are calling the prospect for winter wheat 90 per cent. Stand is rather thin, good color and fairly good growth. There is probably 2 per cent of corn crop held for higher prices. This may be sold to feeders. No shipping in of cattle or hogs for feeding.

Marcus, Ia. (1): Weather has been very windy, hot and dry. Ground very loose and dried out. Farmers should use roller packers or floats to prevent winds drying out soils which are exceptionally loose this spring. We are shipping in corn to feed, something that hasn't been done in 20 years. No cattle or hogs being shipped in now as old grains cleaned up.

KANSAS.

Madison, Ks. (9): Winter wheat prospect good. Good surplus of corn on hand.

Uniontown, Ks. (9): Some surplus corn in farmers' hands. Not shipping in any cattle or hogs.

Plainville, Ks. (4): Wheat poor. No surplus corn. Farmers not shipping in cattle and hogs for feeding.

Junction City, Ks. (7): Winter wheat prospect excellent. Corn will be shipped in before next crop harvested.

Waldo, Ks. (5): Wheat crop a complete failure. All ground going into barley and corn. Weather very favorable.

Logan, Ks. (4): We are having light rains but need a good soaking. A few farmers are holding corn. Few cattle and hogs to go out.

WaKeeny, Ks. (2): Acreage standing will need moisture soon. No surplus corn here. Farmers not shipping in cattle or hogs for feeding.

Pittsburg, Ks. (9): Soil conditions favorable. Large acreage of oats; corn acreage will probably increase. Wheat conditions about 80 per cent.

Lyons, Ks. (5): Wheat shows uneven stand. Acreage left for harvest promises yields from 6 to 25 bushels. No cattle or hogs being shipped in.

Minneapolis, Ks. (4): Very few winter wheat fields will make a crop. No surplus corn here. A few cattle and hogs being shipped in to put on grass.

Belleville, Ks. (4): Winter wheat no good. Some corn in farmers' hands. Perhaps 10 per cent of last crop. Some cattle and hogs being shipped in for feeding.

Jetmore, Ks. (2): Wheat prospects fair. Very warm April. Wheat not stood as it should. Some corn to be marketed. No cattle or hogs being shipped in.

Hillsboro, Ks. (5): Winter wheat crop prospect good. About 15 per cent of corn in farmers' hands which will be marketed. No hogs or cattle shipped in for feeding in this vicinity.

Satanta, Ks. (3): Under most favorable conditions we can't raise over 60 per cent of a normal crop of wheat. Very small surplus of corn on farms. Cattle and hogs are already shipped out; no surplus.

Greensburg, Ks. (6): Wheat in bad shape in the boot at 6 to 8 inches high and thin on the ground, and unless it rains soon it will never be cut. With soaking rains we might get 5 to 10 bu. Barley and oats will be a complete failure.

Ashland, Ks. (3): We are placing the abandonment 20 per cent now, but unless general rain comes at once the abandonment will increase very rapidly. We have had just about one inch of rain last few months. With favorable conditions winter wheat will probably have six bushels per acre.

MISSOURI.

Bethany, Mo. (1): Shipping in corn and oats. Few cattle being shipped in.

Harrisonville, Mo. (1): No wheat here. 15 per cent of corn crop on hand.

Lamar, Mo. (3): Winter wheat prospect is good. There is a moderate amount of corn in farmers' hands.

Chillicothe, Mo. (1): Winter wheat looking fine. No corn to market, shipping in. Some cattle being shipped in to put on grass.

HENRY RANG & CO.

Established 1862

Grain Merchants

CHICAGO MILWAUKEE
SIOUX CITY

Marionville, Mo. (3): Winter wheat prospects good. Local trade will require all. More cattle and hogs on hand than usual.

Higginsville, Mo. (2): Prospects are for a large crop of wheat. A small surplus of corn on farms that will be sold. No livestock feeding.

Columbia, Mo. (5): Wheat very rank for time of year and full of chinchbugs. The worst in our history. No corn here. Shipping in. Feeding of cattle and hogs 90 per cent of last year.

Corning, Mo. (1): From all appearances at this time winter wheat looks favorable for a good crop. Some surplus corn still in farmers' hands. No cattle or hogs being shipped in here for feeding at this time.

MINNESOTA.

Donnelly, Minn. (2): Corn is all sold. No cattle or hogs shipped in for feeding.

Grand Meadow, Minn. (9): No corn is being shipped in. There are a few cattle being shipped in.

Eden Prairie, Minn. (6): Winter wheat is all killed out and there is more oat sowing this spring.

Hutchinson, Minn. (6): Winter wheat looks fair but there is not much here. There will not be any corn sold here. No stock shipped in.

Warren, Minn. (1): No winter wheat here. No corn left in farmers' hands. Farmers not shipping in cattle or hogs for feeding purposes.

London, Minn. (6): Prospects for winter wheat is good so far. No corn here for market, not enough for feed. No hogs or cattle are shipped in for feeding.

Albert Lea, Minn. (6): Winter wheat crop fair average. No surplus corn in farmers' hands to be marketed before the new crop is harvested. Farmers are not shipping in cattle or hogs for feeding. Had a nice rain night of April 21st and warm weather. All grain is up and looking perfect.

NEBRASKA.

Oakland, Nebr. (7): No surplus of corn. We are shipping in corn every day. Farmers still feeding cattle.

Winnetoon, Nebr. (7): Very small acreage wheat here. No surplus corn. There is more stock here than feed.

Neligh, Nebr. (7): Prospect is fair for winter wheat. Some corn in farmers' hands holding for \$1.00 per bushel.

Roseland, Nebr. (9): Wheat is spotted and thin in some fields. Some surplus corn on hand. Not shipping in livestock.

Superior, Nebr. (9): This county will not raise seed. Very little corn left in farmers' hands. No cattle or hogs being shipped in now.

Beatrice, Nebr. (9): Winter wheat is thin on ground but stooling good. Farmers are holding quite an amount of corn. Feeding very little.

Harvard, Nebr. (9): Looks like about one-half crop of winter wheat here. Very little corn in farmers' hands. Local feeders will consume all here.

Superior, Nebr. (9): Winter wheat complete failure. A little surplus corn will be held for high price or until new crop is made. No livestock coming in now.

McCook, Nebr. (6): Winter wheat condition is satisfactory. Plenty of corn is held by farmers for higher prices, who are not inclined to feed either hogs or cattle.

Central City, Nebr. (9): Wheat in North Platte territory materially improved since April 1st. Probably 20 per cent of surplus corn still in farmers' hands. A few hogs being shipped in to feed, no cattle.

Nebraska City, Nebr. (9): Wheat is thin and not doing well. It is hard to say how it will come out but some acreage being put to other crops. Some still waiting to see what it will do before plowing it up. There is some corn still out in the country to be sold, about 25 per cent of crop, but is being firmly held for higher prices. Some cattle are being shipped in.

NORTH DAKOTA.

Lakota, N. Dak. (7): No cattle or hogs shipped in for feeding.

Cavalier, N. Dak. (7): Conditions for spring wheat and other grains very favorable.

Monango, N. Dak. (9): No winter wheat raised here. No surplus corn here. No cattle or hogs being shipped in for feed.

Carrington, N. Dak. (5): No winter wheat here. No surplus corn in farmers' hands. No cattle or hogs being shipped in for feed.

OHIO.

Middletown, Ohio (3): Only about 50 per cent of a wheat crop is the prospect now held.

Blanchester, Ohio (3): Wheat no good here. Will not make one-fourth of normal crop.

Sidney, Ohio (2): 60 per cent of winter wheat acreage abandoned. 10 per cent may yield an average crop, the balance from 5 to 10 bushels per acre.

Bucyrus, Ohio (4): The winter wheat crop prospect is fair. There is no surplus corn in the farmers' hands. Neither cattle or hogs are being shipped in for feeding.

Lima, Ohio (1): Farmers do not expect to get more than 40 per cent of normal wheat crop this year. No marketable corn on hand. No shipping in of cattle or hogs for feeding.

Springfield, Ohio (2): Only 25 per cent of a winter wheat crop is the prospect now. No surplus corn in farmers' hands to be marketed before the new crop is harvested. Farmers are not shipping in cattle and hogs to feed.

OKLAHOMA.

Enid, Okla. (4): Wheat prospect poor. No surplus corn to be marketed. No stock shipping in.

El Reno, Okla. (5): Wheat one-half to two-thirds of crop. No surplus corn. No cattle being shipped in.

Geary, Okla. (2): Light rain last night. More moisture needed within a week to hold present condition.

Enid, Okla. (4): Winter wheat not good. Too dry. No surplus corn in farmers' hands. No shipping in of cattle or hogs for feeding.

Driftwood, Okla. (1): Wheat crop will be cut short of normal crop. No surplus corn. No cattle or hogs are being shipped in.

Altus, Okla. (3): Had about 3 inches of rain last night, but too late to help wheat or oats. We figure both practically a total failure.

Marshall, Okla. (5): Since rains the 23rd and 24th the crop will improve. No surplus corn in farmer's hands. No cattle or hogs being shipped in for feeding.

Kingfisher, Okla. (4): Wheat has not improved as expected since rain first of month and is heading very short and crop will be very light. No corn to spare in this vicinity.

SOUTH DAKOTA.

Brookings, S. Dak. (8): Some corn is back but not near normal amount.

Miller, S. Dak. (5): Only a small acreage of winter wheat here. Not shipping in cattle and hogs. A little surplus corn to market yet.

Canton, S. Dak. (9): Winter wheat prospect is good but small acreage. Some corn feed, but not much. Farmers are not shipping in cattle or hogs for feeding.

Bridgewater, So. Dak. (8): Winter wheat acreage practically nothing in this territory. Very little corn left to come to market. Feeding is about normal. No cattle and hogs being shipped in.

How to Keep Perfect Drying Conditions

A POWERS Regulator will keep the temperature of any drying process within one degree of the point for which it is set. This is done by **automatically** controlling the steam used for heating.

By this **unvarying** temperature you avoid parched, shriveled corn, when reducing its moisture content.

In new elevators under construction or old ones being remodeled, this **automatic temperature control** should be installed. It will save man-time and drying-time and prevent costly overheating.

POWERS Regulator is not expensive, and will increase your returns from your present investment.

Make a Month's Free Test

POWERS regulators are simple, accurate, dependable, and easy to install. They are money-savers, every minute your plant operates.

Check the place or process on which you think Automatic Control will save you money. Write your name and address in the margin of this page and mail to us. We will respond with a definite recommendation, and full details of our free trial offer, by which you actually have the regulator in action, in your own plant, with no obligation to buy unless you **first** get the results you want.

Terminal Markets

MEMPHIS.

George Williamson, Correspondent.

R. L. Hall, of the Collins Products Co., Clinton, Ia., was here Friday.

Receipts for the week were 74 cars of corn, 154 of oats, 70 hay and 17 alfalfa meal.

C. B. Rogers, representing the Van Huse-Harrington Co., of Minneapolis, was here during the week and on 'change.

Joseph Meyer, of Meyer Bros., wholesale dealers in grains and feeds at Meridian, Miss., was a visitor at the Merchants' exchange.

Ed H. Winton, Ft. Worth, Texas, and Ed H. Winton, Yukon, Okla., were registered at the Merchants exchange Monday by Lee D. Jones.

Preparations are being made for at least a car load of people to go from here and this territory to the convention of the American Feed Manufacturers' Association in New Orleans, May 7-9.

Harry Mills, from the Chicago office of the Quaker Oats Co., arrived early in the week to succeed Charles S. Kenney as traffic manager and buyer for the feed department of the local branch. Kenney will assume management of John Wade & sons on May 1.

Rain is beginning to be badly needed in much of this territory, although complaints are still in the minor key. Since January 1 the rainfall deficiency from normal at this station is practically 11 inches, and the entire territory is not in any better shape. Much cotton seed has been planted, but will not come up until rains come, while corn planting has also been delayed and that which was up is beginning to suffer.

Announcement has just been made of a deal whereby the Exchange building, the skyscraper in which the Merchants exchange has its quarters, and whose stock is largely owned by members of that organization, becomes the property of New York capitalists. It will not mean any change in the arrangements or plans of the exchange, whose lease has many years to run. The deal involved something like \$1,500,000.

Business continues light, for buyers are taking just as little as they can get by with. The relative steadiness of grain prices has helped confidence to some extent, but conditions are such that consumers are compelled to buy sparingly. Corn continues to sell very slowly, as it is regarded as relatively so much higher than oats. Quotations April 25 were \$1.14 for cash 3 white, \$1.15 for 3 yellow and \$1.06 for 3 mixed. Some day 3 white oats were quotable at 48 to 48½.

FORT WORTH, TEXAS.

G. E. Blewett, Correspondent.

Weather.

Beneficial rains varying from ½ to 4 inches, fell over that section of the state north of the T. & P. railroad and west of a line drawn through Wichita Falls, south. With only slight showers around Ft. Worth and parts south and north, the drought still holds on and especially in central and south Texas where conditions are alarming. Some rains have also been received at Brownwood, Ballinger, and in that section of the state. In the Pandhandle section, rains were received generally but in most cases the amount received was insufficient for needs as the ground absorbed the entire fall and with high winds prevailing, little was left of the moisture the following day.

These rains will, in most cases, prove of some benefit to late wheat and oats, as well as permitting of spring planting of cotton and sorghums, but more will be needed and wheat conditions are far from satisfactory, and the prospects for coming crop hardly justify over five million estimate.

Business.

Business during the past week has been rather quiet, with indifferent attitude shown by mills for wheat, and very little demand for corn, while oats have been in fair demand. Premiums on wheat, corn and oats, have held firm and stocks have been further reduced here the past week.

Mills are mostly on a daylight run, and report rather slow flour demand, with prices unchanged at \$8.40 basis delivered.

Wheat.

Receipts are very light from interior markets, and nothing is being offered from the country for shipment, so what little wheat that is being sold, is coming out of storage stocks here. The demand has been rather dull, but some is being sold every day, and in fact, stocks of ordinary hard wheat are getting very low here, while there remains considerable dark hard of high protein as well as plenty of soft mixed wheat, for which the demand is rather quiet as mills seem inclined to buy only hard wheat. Premiums on all grades have held firm, although some holders of soft mixed indicate a willingness to reduce the basis if business would result. Some sales are being made to California mills of high protein wheat. Today, April 25 values here are as follows, basis, delivered: Texas Common or Texas Group, three points basis, No. 1 dark hard, \$1.70; hard, \$1.68; mixed 75%; soft red, \$1.66.

Corn.

Receipts have been extremely light the past week and also there has been a noticeably light offering from the interior country shipping stations, which heretofore have supplied our needs for corn. Demand has been rather dull for mixed, which is being offered out of storage stocks here at slight discounts under replacement values. Demand for white and yellow has been steady and there remains very little of these in stock here, and supplies are coming from northern terminal and interior markets. Today's values, basis, delivered, Texas Group One (1) points April 25: No. 2 yellow corn, \$1.19; No. 2 white corn, \$1.18; No. 2 mixed corn, \$1.13.

New Crop Corn.

Growing corn is showing the effects of prolonged drought, and while it is in most sections holding up fairly well, still a good rain would help. The acreage is very small.

Oats.

Oats have been in good demand this week with steady receipts and the country buying has been heavy in this market, with premiums holding firm. Some inquiries are being made for quotations on white oats for deferred shipments as far away as September, and some little trading has been put over on them. Red oats are still very tight and hard to obtain, and the premium over white oats still holds firm, and today's No. 3 white oats are worth basis, Group 1, 54c, while No. 3 red oats are worth 62c.

Milo and Kafir.

Receipts have been steady and country offers more liberal since the rains this week, and prices are somewhat lower with weak tone to values. No. 3 yellow milo today is worth \$2.12; No. 3 kafir, \$1.97 delivered.

Appoints Committees.

J. A. Simons, president of Ft. Worth Grain & Cotton Exchange, called a meeting yesterday of the board of directors, consisting of J. W. Hamilton, Kent Barber, Kay Kimbrell, R. Q. Kennedy, Chas. Little, and G. C. Henderson, and the board appointed standing committees to handle the business of the exchange for the ensuing year.

Grain Arbitration Committee—C. M. Carter, chairman; Kent, Barber, Leo Potishman.

Grain Rules, Constitution and Trade Rules Committee—Claude Maer, chairman; C. E. Muchmore, C. W. Wilkins.

Traffic Committee—W. W. Manning, chairman; Frank G. Abbey, R. T. Dorsey.

Grain Inspection Appeals—W. P. Bomar, chairman; W. G. Brackett, C. H. Newman.

Floor and Wire Service—T. E. Ferguson, chairman; D. H. Hamilton, Leslie Jenison.

Publicity and Welfare Committee—G. E. Blewett, chairman; Jule G. Smith, Gaylord Stone.

Grain Inspection and Weighing Supervision Committee—W. W. Manning, chairman; G. D. Henderson, C. D. Ferguson.

Grain Arbitration Appeals—R. I. Merrell, chairman; J. C. Simons, G. E. Blewett, M. C. Rall, G. E. Cranz.

Cash Grain Market Committee—Young Davitte, G. E. Cranz, Harry Johnson.

Cotton Arbitration Committee—R. C. Underwood, chairman; R. Lampe, J. W. Hamilton.

Cotton Rules Committee—R. W. Whitty, chairman; Paul Cruseman, M. E. Bearney.

Spot Cotton Quotations—Chas. Little, chairman; A. Fujita, A. Mayhey.

Cotton Arbitration Committee—Paul Cruseman, chairman; Chas. Little, R. W. Whitty, M. E. Berney.

NEW ORLEANS.

M. L. Davis, Correspondent.

C. B. Rogers, of Van Dusen Harrington, Minneapolis, Minnesota, spent several days in New Orleans this week.

Standard Blackstrap molasses is firm at 13c f. o. b. tank cars New Orleans; medium at 13½c, and light Blackstrap at 14c per gallon.

Stocks in elevator as of today are: Wheat, 1,565,000 bushels; corn, 190,000 bushels; oats, 140,000 bushels; rye, 20,000 bushels; barley, 1,000 bushels. Cars on track: Wheat, 4.

W. B. Fox, of C. B. Fox Co., accompanied by Mrs. Fox, sailed this week from New York on the Holland-American Line S. S. New Amsterdam for a two months' tour of Europe.

The many friends in the grain trade of Geo. B. Harrison, superintendent of the Trans-Mississippi Terminal Co.'s Westwego elevators, will regret to learn of his death.

THE LATE GEO. B. HARRISON
New Orleans, La.

Mr. Harrison was sixty-four years of age and had been connected with the T. & P. Railroad Company and subsidiaries for the past thirty-five years.

The American Feed Manufacturers' Association will hold their 17th Annual Convention in New Orleans May 7th, 8th and 9th. This is the first convention ever held by the Association south of the Mason and Dixon Line and is considered to be indicative of the growing importance of the South as a market for manufactured feeds.

J. H. Walsh, general manager, and Tiley S. McChesney, secretary of the Dock Board, have just returned from New York where they attended a meeting of the Executive Board of the American Association of Port Authorities. Mr. Walsh is president of the Association and Mr. McChesney is the secretary. The annual conference of the Association will be held in New York from September 28th to October 1st.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

Exports of grain for the week ending April 24th were 882,286 bushels of wheat, 20,000 bushels oats and 120,000 bushels rye.

Charles I. Rini, a prominent young grain merchant, has returned from a week's trip to Kenilworth Inn, Ashville, N. C., where he went to play golf.

Receipts for the week ending April 25th were: Flour, 32,494 barrels; wheat, 850,783 bushels; corn, 2,782 bushels; oats, 89,051 bushels; rye, 83,977 bushels.

Mr. Ralph Pickell, formerly connected with a prominent Chicago trade paper, is teaching a class of young people in Ben Franklin Hotel here, how to operate in options on the grain board.

Daylight service will be observed as usual by business houses and financial institutions throughout this section of the country, and which will be in effect on Monday, April 27, and until September 27, closing one hour earlier.

The Flour Club of Philadelphia held its monthly meeting last week at the Ben Franklin Hotel. There was a good attendance and Mr. Stuart Unkles, the president of the Club, presided. Several prominent speakers were present on the occasion. The members all expressed much in-

terest in the coming annual convention of the Federation of Flour Clubs to be held in Baltimore on June 5th and 6th next.

Following out of town visitors were registered at the Commercial Exchange during the week: W. M. Ballinger, Minneapolis, Minn.; Charles Coles, Mount Holly, N. J.; W. B. Swartz, State College, Pa.; Nelson Yoke, Lancaster, Pa.; E. F. Marin, Buffalo, N. Y.; T. L. Guthrey, Kansas City, Mo.; Samuel A. Beck, Townsend, Del.; W. S. Houseman, Wilmington, Del.; W. M. Seely, Haddonfield, N. J.; J. C. Troxwell, Phillipsburgh, N. J.; H. N. Bernheimer, Galveston, Texas.

Philadelphia Flour Market.

Philadelphia, April 25.—Receipts of flour for the week just closed were 32,494 barrels. The market was dull and with no important change to note since last report, buyers purchasing merely enough to satisfy present wants. We quote per 196 lbs. packed in 140-lb. jute sacks: Soft winter straight, western, \$8.25@8.75; soft winter straight, nearby, \$8.00@8.50; hard winter straight, \$8@8.50; hard winter short patent, \$8.50@9.00; spring first clear, \$7.75@8.00; spring patent, \$8.25@8.75; spring short patent, \$9.00@9.50; fancy spring and city mills patent family brands, \$9.75@10.40. Rye flour—\$7.50@8.00 per bbl. in sacks, as to quality. Buckwheat flour—\$4.25@4.50 per 98-lb. sack.

NEW YORK.

J. M. Nugent, Correspondent.

John Kemp is now affiliated with the Grain Union, Inc., and will represent them on the floor of the New York Produce Exchange.

The export demand for wheat during the past week was somewhat disappointing. There was only a small scattered trade in Manitobas and some Duluth Spring wheat and a little hard winters. In all, business amounted to about two million bushels in all positions.

During the past week, the following gentlemen have visited the floor of the New York Produce Exchange: E. G. James, Richard Uhlmann, Charles Delmar; James Nicely, E. B. Berg and J. T. Duval, all of Chicago; also F. A. Meyer of Baltimore, C. F. Sanford of New Orleans; D. H. Campbell of Toronto, and H. P. Werner of Philadelphia.

Flour Situation.

New York, April 25.—Locally, the flour market was extremely quiet but outside milling centers were reporting improvement.

Price fluctuations were narrow here and the market closed net slightly lower.

The feature of the export trade were rumors of a pending business presumably with Russia, although up till the close no confirmation of further large sales occurred. Of the original business, only two ships remain to clear from Atlantic ports.

Spring patents were quoted at \$8.00 to \$8.50; soft winter straights, \$8.15 to \$8.50, and hard winter straights \$8.00 to \$8.50 per 196 lbs.

BUFFALO.

The annual election of officers and banquet of the Buffalo Flour Club was held April 24.

The next dinner of the Washburn Club of the Washburn Crosby Co. will be held on April 28 at the mill's cafeteria.

J. H. Rihelddaffer, manager merchandising department of the Tenney Grain Co., Minneapolis, was a recent visitor in the city.

At the annual election of directors of the Corn Exchange, Henry T. Burns and Frank F. Henry were re-elected and Lloyd Hedrick was also chosen.

Francis J. Henry, aged 87, died April 14. He was in the flour and feed business for many years, being a partner in Henry & Missert, feed dealers.

The suit of the Eastern Grain, Mill & Elevator Corporation against the Buffalo Steamship Co., for alleged damage to a

cargo of oats, was non-suited on April 17, after a hearing in the U. S. district court. Notice of motion for a new trial was given and will be argued June 27.

John H. Peek, manager Percy Kent Bag Co., Inc., who visited the trade in Minneapolis with his local representative, E. B. Murphy, has returned.

Frank J. Schonhart, who has been connected with the Electric Grain Elevator Co. for 19 years, has entered the service of the Cargill Grain Co.

F. S. Elder, formerly manager of the American Linseed Co.'s plant here, has become treasurer and general manager for the Marvo Foods, Inc. His son, Stewart W. Elder, is president.

LOS ANGELES.

C. G. White, Correspondent.

John W. H. Denning, of the Escondido Feed Co., Escondido, Calif., was a recent visitor on the floor of the Exchange.

Al Loebeck, sampler for the inspection department of the Grain Exchange, left last week on his annual vacation, which will be spent at Long Beach, Calif., with relatives.

W. E. "Buddy" Ryan, who for the past 6 years has been in charge of the grain and feed department of the Sperry Flour Co., Los Angeles, has accepted a position as sales manager for the "Old Iron Spoon" Products, manufactured by "California's Greatest Poultryman," W. T. Hadley. This firm will open new offices at 600 I. W. Hellman building, this city, about May 1st. Mr. Ryan is very well known among the grain men throughout the state and we wish him much success in his new venture.

Cash Markets.

The Grain, Hay and Feed market at this terminal has shown a decided increase in activity during the past week. The arrivals of all commodities have been very good and the demand has consumed the supply. No. 2 yellow corn, spot, is being offered at \$2.42 with a bid of \$2.37, while No. 3 for prompt is being offered at \$2.36 with a bid of \$2.31; No. 2 Calif. milo, spot, is being offered at \$2.27½; No. 2 feed barley for prompt shipment is being offered at \$1.82½ with a bid of \$1.77½, while December barley, 100-ton lots, is selling at \$1.50.

The ground feed arrivals for the week amount to 30 cars, the prices firm; Utah-Idaho millrun selling at \$38.00; Kansas bran, \$35.00; alfalfa meal, medium, \$32.00; alfalfa molasses, mixed, \$29.00; cottonseed meal, \$45.00; beet pulp, \$40.65; rolled barley, \$38.00; copra meal, \$31.00.

The hay arrivals for the week amount to 219 cars, the demand very good. No. 1 alfalfa, new crop, selling at \$21.00; No. 2 selling at \$19.00; No. 1 barley hay, new crop, \$21.00; No. 1 oat hay, \$25.00. The tracks are very well cleaned up at the close of the week.

CINCINNATI.

George Mosbacher, Correspondent.

Edward B. Terrill, manager of The Early & Daniel Co., returned Saturday from a brief business trip to Knoxville, Tenn.

Country elevators and farmers, who are seeking an outlet for their low grade grain, will find the Richter Grain Co. especially experienced in obtaining profitable results. The firm is at present making a specialty of marketing ear corn, and is soliciting liberal consignments.

Fire of undetermined origin caused an estimated damage of \$8,500 to the Union Stock Yards at Cincinnati early this week. About 3,000 bales of starw, but no cattle were destroyed.

Operations of business prophets were discredited by Dr. Jacob Viner, Professor of Economics, University of Chicago, in speaking at the banquet of the Appalachian Logging Congress at the Sinton Hotel Saturday night. In discussing the methods of several business prophets, Dr. Viner attempted to prove to his audience that they were unreliable and that one guess is as good as another.

Believing that the public is entitled to complete market news and the official prices of grain, hay and feed and that the local broadcasting stations are desirous of furnishing the country with complete and authentic market news from this terminal, in addition to other commercial information, the members of the Cincinnati Grain and Hay Exchange have authorized President Frank L. Watkins to appoint a committee whose duty it shall be to co-operate with one of the local stations that is desirous of broadcasting such official information. Accordingly Mr. Watkins has appointed D. W. Hopkins, chairman; Robert L. Early, August Ferger, to serve as a committee for that purpose. Up to this time the Cincinnati Grain and Hay Exchange has not participated in the broadcasting of market news and official prices on grain, hay and feed.

Stocks of grain held in local elevators for the week ending April 24, one week previous are as follows:

	Apr. 24, 1925.	Apr. 17, 1925.
Wheat, bus.	141,608	200,178
Corn, bus.	228,245	259,583
Oats, bus.	128,456	91,046
Rye, bus.	3,361	3,561

Cash Markets.

Cash wheat continued independently strong in view of the generally small stocks, and option breaks had less influence, while the advances were fully followed. Prices gained 4 to 6c, but the

PHILIP H. SCHIFFLIN & Co.

49 Board of Trade

CHICAGO

spot quotations were mostly nominal owing to the very light receipts and absence of offerings. The spot demand was urgent and shipments to mills materially increased, with evidences that mills were seeking supplies to tide them over until new wheat is obtainable. As there are more than two months before the new crop, the demand is expected to become more active than other years at this period. Terminal stocks here have been materially reduced the past week.

The corn market was governed by the fluctuating influences of futures, and was stronger and higher early and weaker with a very limited spot demand toward the close. Receipts were very light and likely to continue so owing to the rapidly disappearing country stocks. Shipping was fairly active, but more scattered, and was mostly confined to interior mills. There was little demand for feeding or from industries, and low grades were especially hard to dispose of.

Receipts of oats were materially smaller and the demand good until Friday, when lower option and ample supplies of buyers weakened the market with a 2c loss below last week's prices.

BALTIMORE.

Robert C. Neu, Correspondent.

The receipts of water-borne corn in the Baltimore market so far this season amount to 86,000 bus., compared with 255,000 bus., arrived up to the same time last year.

Thomas Johnston, head of the grain firm of Thomas Johnston & Co., of this market, has about recovered after a complete rest, following the bad fall he met with several weeks ago.

The name of Geo. R. Roys, representing the Canadian Co-Operative Wheat Producers, Limited, with headquarters in New York, is posted on the official bulletin board as an applicant for membership in the Baltimore Chamber of Commerce.

The bulk of the grain and flour cargoes sent out from the port of Baltimore in the last few weeks have been applied to the large purchases made by the Soviet Government, most of the shipments (particularly of rye) having gone to Baltic and Black Sea ports.

The 70th annual report of the Baltimore Chamber of Commerce, containing the latest amendments to the rules, regulations and by-laws, as well as a mass of statistical data and a classified list of the members of this organization, is expected to be ready for distribution in a few days.

Effective May 1, transit privileges of the Pennsylvania Railroad, applicable at Baltimore, Md., both for milling and storage purposes, will be extended to apply on grain originating in Canada moving via Buffalo. The transit charge varies in accordance with the final destination of the shipment.

The death of Joshua Soule Rawlings, president of the Rawlings Implement Co., and in point of years the oldest member of the Baltimore Chamber of Commerce, was announced by President Mears to a general meeting of the members of this organization on April 23, but owing to the fact that Mr. Rawlings' remains were to be buried out-of-town, the usual committee to attend his funeral was not appointed.

MILWAUKEE.

D. K. Steenberg, Correspondent.

Shipments for the week were 148,589 bu. oats, 341,785 corn, 38,880 barley, 50,937 wheat, 17,620 rye; total 586,811 bu., against 801,510 the preceding week and 1,697,464 a year ago.

Receipts for the week were 131 cars barley, 33 corn, 118 oats, 14 wheat, 8 rye, 1 flax, 1 miscellaneous; total 306 cars, against 282 the week before, 345 a year ago and 481 in 1923.

Arthur K. Emerich of Emmetsburg, Ia., traveling representative of the Fraser-Smith Co., Milwaukee and Minneapolis, spent several days at the Milwaukee Chamber of Commerce last week.

The Milwaukee Chamber of Commerce began operating on a summer schedule on Monday, April 27. The market now opens at 8:30 a. m. and closes at 12:15 p. m. except on Saturday when the closing hour is 11 a. m.

Crop conditions are much improved due to general rains of the week with all grains weaker. Barley 1c lower; corn, 5@8c; oats, 1@1½c; rye, 3c while wheat rules at 2@3c better premiums. Movement continues light.

Production of wheat flour at Milwaukee last week was 6,500 bbls. as compared with 6,650 bbls. the previous week and 2,500 in the same week of 1924. Receipts of flour at Milwaukee for the week were 24,900 bbls. as compared with 26,950 bbls. in the same week of last year and shipments were 15,310 bbls. as compared with 19,330 bbls. in the same week of 1924.

The drought which had been threatening Wisconsin's crop was ended during the

past week by heavy rains. Seeding for small grain is mostly complete except in extreme northern counties. Plowing for corn is in progress. Rye looks well. Winter wheat is fair. Meadows and pastures have improved but are still short. Stock is still being fed. Warmer weather is needed.

Wisconsin visitors at the Milwaukee Chamber of Commerce during the past week included: Herman Timm of New Holstein; Lester A. Huebner and Ambrose G. Roedel of Beaver Dam; J. Grimm of Jackson; G. Duvall of Kewaunee; Joseph Straub of Lomira; A. Post of Horicon; K. Lubenstein of Hartford; M. Propokowitz of Pulaski, and F. F. and Herman Munchow and Walter Willard of Cambria.

R. N. Hoople of Minneapolis, Minn.; R. R. Mademann of Spokane, Wash.; George F. G. C. W. and John Winsenberg and A. W. Schmidt, all of Fairmont, Minn.; R. C. Short of Boone, Ia.; J. Riley, Biron Elliott, Joseph Kein, John Adler, C. A. Dunkel and A. Kastner, all of Chicago; G. Clay Shaw of Buffalo, N. Y.; George A. Jones of West Chicago, Ill.; L. H. Wagner of Whittemore, Ia., and H. W. Hensen of Minneapolis, Minn., were among callers at the Milwaukee Chamber of Commerce last week.

The clock in the tower of the Milwaukee Chamber of Commerce building was recently accorded statewide newspaper publicity as being the most reliable of all tower clocks in the Wisconsin metropolis. In forty-seven years the clock is said never to have brought a broker to his office late, nor set the factory whistles blowing too soon. Much credit for the accuracy of the big clock is given to Frank Voekel, caretaker of the building and official clock winder. Mr. Voekel and his family live in the tower apartments directly below the clock and every day when he winds the clock Mr. Voekel gives its working parts a careful inspection.

BOSTON.

Estimated damage to the Ryan Grain Co. plant at Lowell from the fire is \$50,000. The fire practically destroyed the plant.

R. L. Groff, vice-president of the Minneapolis Milling Co., was a recent visitor with Harry S. Leviston, his New England representative.

E. W. Erickson of Minneapolis, manager of the Big Diamond Mills Co., was a visitor, some days ago, on the Grain and Flour Exchange.

The steamer Rafuku Maru sailed April 18 for Hamburg with 48,000 bus. bonded wheat and 261,827 bus. bonded rye. The Gorm also sailed with 58,643 bus. bonded rye. There were also shipped during the week 32,041 bus. bonded wheat and 34,878 bus. bonded oats to London.

Walter J. Buckley, who was connected with J. E. Southworth, in the grain export and forwarding business, for several years, died April 15, at his home in Newton after a brief illness. He was a member of the Grain & Flour Exchange and a former member of the Chamber of Commerce.

PORTLAND, ORE.

Demand from California continues for limited amounts of red wheat, but otherwise there is not much interest in the market.

At least one parcel of new crop wheat, amounting to 1,000 tons for August-September loading, has been booked for United Kingdom delivery.

The marketing department of the Portland Chamber of Commerce has agreed to furnish flax seed for ten experimental plots in the different counties to be planted this year, according to R. H. Kipp, marketing manager of the chamber.

With the dispatch of the Japanese steamer Kongosan Maru, laden with 261,333 bushels of wheat, it was regarded probable she would be the last full cargo offshore wheat carrier to be sent away from Portland for the remainder of the present cereal year.

One million dollars will be expended in the construction of a grain elevator by John T. Shibe, financial backer of the Portland Baseball club. It was announced at the members' forum of the Chamber of Commerce by Thomas L. Turner, president of the club.

Other than a booking reported a few days ago of 1,000 tons of new crop wheat, there has been no additional business recorded as to the coming crop. Freights are said to be unchanged at 35 shillings for parcel space for the early part of the coming cereal year.

Construction of two bulk grain elevators at a cost of \$250,000 will be started for Bal-four, Guthrie & Co., before May 1, it is announced by D. A. Patullo, manager of the Crown Mills, a subsidiary. This will give the firm a bulk storage capacity in Portland of 20,000 tons.

Henry L. Goemann, of Mansfield, O., was an Exchange visitor recently. Mr. Goemann, who is chairman of the transportation committee of the Grain Dealers' Na-

tional Federation, spoke to the members of the Exchange, urging dealers in this territory to join the national association.

Dusting experiments with airplanes on the Oaco orchards near Monroe, will be carried on, by W. J. Chamberlain, assistant professor of entomology and forest entomologist of the Oregon Agricultural College. Dr. Chamberlain, an aviator during the war, believes it practical to dust large orchards with airplanes. Lead arsenate for the "calyx spray" will be used in the experimentation. Other experiments of the kind will be carried on in alfalfa fields in eastern Oregon to control the alfalfa weevil in the latter part of May, according to Dr. Chamberlain.

There is more activity in the grain bag market, though as usual when prices are high country buyers are slow to take hold. The market is firm, particularly in California, where the more favorable crop prospects have made sellers bullish. The San Francisco market has gained 1/2% cent in the past few days. Shipments from Calcutta to the Pacific Coast in January, February and March totaled 11,075,000 bags. The carry over from last year was 6,000,000 bags. Whether enough can be brought over from Calcutta in April and the first half of May to make up the season's requirements remains to be seen.

Grain men and millers are expressing concern over the probable outcome of next

fall's business in view of the large amount of Federation wheat that has been planted this spring. This variety was sown extensively in sections where the winter wheat was killed by the December freeze and they fear that the quantity to be marketed will be out of all proportion to the demand for it, whereas, other kinds necessary for milling or export will be short. In their opinion there may be a repetition of the experience of two years ago when high-grade bluestem had to be sold at a discount of several cents under club wheat.

Terminal receipts in cars were reported by the Merchants' Exchange for the season to April 23 as follows:

DES MOINES.

The Des Moines Elevator & Grain Co. has been selling several round lots of corn recently.

Dodd & Struthers, lightning rod manufacturers at 120 8th street, has recently rodged several elevators.

See convention report on another page covering last week's meeting of the Western Grain Dealers Ass'n.

The Ankeney Linseed Mfg. Co., report more business in oil meal on the books than they can give proper attention to.

T. P. Sharpnack, Sec'y and Mgr. Midwest Mills, 2000 E. Grand avenue, reports an improved business. The equipment of the plant has been somewhat increased and the outlook for summer and fall trade is good.

Fred Pease, commenting on the hay situation and following a recent trip to Oklahoma and Kansas, says: "I believe no hay will come North from this territory although a large tonnage is back on the farms and will be held over. The barns are full. Much of the new hay will not be worth cutting, a condition that has prevailed in earlier years but is particularly serious this year."

OMAHA.

Leigh Leslie, Correspondent.

A report from Grand Island, Nebr., says, "The hail storm which visited Cedar and Loup counties yesterday did extensive damage to crops in the vicinity of Loup City."

Beginning Monday, April 27th, the Omaha Grain Exchange started operating under its summer schedule. The market will open at 8:30 each morning and will close at 12:15 each day except on Saturday, when the closing hour will be 11:00.

A wire from Lincoln, Nebr., says: "Rain is needed to continue growth of wheat and other grains that were given a good start by the rain of two weeks ago. Farm work is well along and a large acreage of corn is indicated. The cash grain business is at a standstill. Wheat in this section needs moisture badly. Stooling is incomplete and the stand is ragged. It looks as if this part of the state cannot raise more than last year's crop of wheat."

There has been awarded a contract for the million dollar live stock exchange building according to an announcement Tuesday by W. J. Coad, in charge of the building committee. Kiewit's bid was \$672,000, exclusive of the foundation and structural work. The Exchange offices will remain in the old building until the new one is ready for occupancy, according to Mr. Coad. Then the old building is to be razed and in its place will be the new hog yards.

In response to a questionnaire sent out to around 350 grain dealers in the Omaha territory, the Black Hawk Grain Company has received very comprehensive reports on the condition of winter wheat in Nebraska, Colorado and Wyoming. The company summarizes these reports as follows: "From the Missouri river west to north and south line through Ord, Nebraska, north of the Platte river, and south of east and west line through Norfolk, Nebraska, the condition of the crop is fair to good, averaging about 75 to 80%. The condition of the crop east of Holdrege and south of the Platte river in Nebraska is poor to fair, averaging around 60%. The abandoned acreage in this territory is large. All territory west of line through Holdrege, Nebraska, and Ord, Nebraska, report the condition of the crop good to excellent, the average being around 95%. The best reports come from west of North Platte. Eastern Colorado and Wyoming and northwestern Kansas report the best crop prospects in the history of those sections."

MINNEAPOLIS.

H. A. Paul, Correspondent.

A. B. Marcy of the Continental Grain Co. spent the past week in Buffalo, N. Y.

William Kellogg of the Delmar Company left for Ft. Worth, Texas, last Thursday.

The Continental Baking Co. have purchased the Occident Baking Co. of this city.

Ed. Judd of the H. H. King Mfg. Co., spent several days in Chicago this past week.

Todd Lewis of the Chas. E. Lewis Co. is on a trip to Boston and other eastern points.

Henry Nelson of the Peavey Company just got back from several months spent in the west.

Chas. E. Lewis of the Chas. E. Lewis Co. returned Wednesday from several weeks spent in Miami, Fla.

Ralph Little of the Union Terminal Elevator Co. has returned from an extensive trip through California.

J. J. Graves, an employee of the Washburn-Crosby Co. for the past forty-two years, died last Saturday.

A. R. Tucker, Scranton, Pa., representative for the Washburn-Crosby Co., was a Minneapolis caller this week.

Everett-Aughenbaugh, the well-known Waseca milling concern, are planning on moving their executive offices to Minneapolis some time this summer.

Among the visitors on 'Change during the week were the following: Paul Leonard of Finland; Frank Cosgrove of New York City; J. E. Stockdale of Easterville, Ia.; S. B. Doyle of Omaha, Neb.; W. A. Hokanson of Milwaukee; C. C. Blair and H. J. Atwood of Duluth; J. H. Caldwell of

St. Louis; L. H. De Lisle of Chicago; H. A. Martin of Portland, Ore.; L. S. Malden of Winnipeg, and C. F. Nolan of New York City.

Cash Markets.

Wheat.—The past week has been characterized by a further falling off in country receipts and more of an inclination on the part of millers to show interest in local elevator offerings. Most days, the stuff coming off the road was so scarce that it was difficult to quote an actual market. Farm selling is of necessity, very light and country elevator stocks are being depleted slowly but surely.

This market also began to receive some attention from Chicago during the past week, in that there were quite a number of bids for large lots of No. 1 northern, to be shipped out immediately. The presumption, is, of course, that they want this wheat for application on their May contracts. There was one lot of 50,000 bushels worked Friday to that market. Shipping sales during the week averaged fair, running from that figure to 100,000 bushels daily.

Local elevator stocks for the week ending today show a total of 11,673,630 bushels vs. 12,254,548 a week ago and 13,336,716 a year ago.

Durum wheat, which was inclined to be slow a week ago, seems to have picked up under the influence of light offerings and mills have advanced their bids compared with last week.

Winter wheat scarce also and good demand maintains for the choice quality. Little doing on the poor stuff.

Based on today's range of prices, No. 1 hard spring sold at 4@47c over May; No. 1 dark northern, 3@46c over; No. 1 northern spring, 2@40c over; No. 1 amber durum, 5@40c over; No. 1 durum, 3c under @ 38c over; No. 1 mixed durum, 8c under @ 38c over; No. 1 dark hard Montana, 2@28c over May.

Corn.—There was a good snappy demand for dry corn during the week but there was very little of that quality to be had. One day there was no corn in at all from the road and on another, at least half of the receipts were either hot or had been out of condition before shipping. Numbers three, four and five, were in fair request but it was hard to dispose of either the No. 6 or the sample grade.

Minneapolis elevator stocks show a total of 676,519 bushels vs. 740,239 a week ago and 1,437,151 a year ago.

Today's range of sales was as follows: Yellow: No. 4, 8@11c under Chicago May; No. 5, 12@16c under; mixed, No. 4, 9@13c under; No. 5, 14@17c under.

Oats.—Demand for this cereal, if choice quality, seemed to hold up fairly well during the week just past. Dirty, thin stuff, however, was in very poor demand and was hard to dispose of. There was a continuation of fair shipping demand; daily sales averaging up nicely for the week. Local stocks depleted to the extent of a little better than one million bushels for the past seven days, totalling 17,453,977 bushels today as compared with 18,503,995 a week ago and 3,161,577 a year ago.

It goes without saying, however, that there will have to be a material pick-up in the matter of shipping sales during the next two months, or this market will be faced with a remarkably heavy carry-over, when the new crop begins to roll in.

Today's range of sales show No. 3 whites bringing 1@1 1/2c over May and No. 4, 1@ 12c less.

TOLEDO.

S. M. Bender, Correspondent.

Toledo grain inspections for the past week were 18 cars of wheat, 29 cars of corn, 30 cars of oats and 2 cars of rye. Total 79 cars.

Flour production of Toledo mills as reported for last week was 26,000 bbls. equal to 54 per cent of capacity. The week before it was 26,500 bbls. and a year ago last week 30,100 bbls.

Colonel Southworth was slow to enthuse about our Mud Hens this year but after seeing eleven runs in two innings scored by the team the other afternoon, he suddenly became interested.

Golfers are looking forward to early quits now that the Toledo market opens and closes an hour earlier and many a golf widder will wonder where hubby has parked for the afternoon she wanted to take a ride in the country.

Radio sets on farms in Ohio have doubled in number during the past year, according to reports received by the State Federal Crop Reporting Bureau from 3,500 farms in all parts of the state. On these farms an average of one set to every eight farms was found while a year ago showed only one set to every thirty.

Message from Ottawa, Ohio this week said: "Very little rain, this week only a small shower, with a trifle more at other points. We are in need of a lot of rain. Oats are coming up unevenly and lots of

**We Buy and Sell
Ear Corn**
RICHTER GRAIN CO.
Cincinnati, Ohio

wheat land was put into oats. Wheat seeded in corn land is practically all abandoned. Corn planting is progressing rapidly.

Fred Mayer of J. F. Zahm & Co., and Dave Anderson of the National Milling Co., are having a great time at French Lick Springs, Indiana, (the home of Pluto). Cards received this week by Kent Keilholtz and others show they have missed nothing as there were pictures of the model dairy, stable and everything but the bull. He was out taking a sun bath when they called on him.

Farm prices in Ohio for all products with the single exception of beef cattle were on the downward trend during the past month and except for veal calves, lambs and hay the price level is above a year ago. The state corn price average was \$1.13 on April 15, as compared with \$1.22 a month ago, and 76c a year ago. Wheat is \$1.61, as compared with \$1.67 in March and \$1.00 a year ago. The average oats price was 49c or practically the same as a year ago. Hay prices are about 50c a ton lower and from \$7 to \$8 below last year at this time.

The contemplated expenditures of the Nickel Plate and Hocking Valley Railroads in Toledo along the waterfront is expected to give great impetus to plans already started by the Exchange to make this one of the principal grain ports on the Great Lakes. The railroad plans call for the building of grain elevators and coal docks where boats can be loaded for the ocean trade. Dealers here believe that these improvements with more favorable rates now asked for, will more than double the amount of grain handled here and bring Toledo back to her old time prominence as a grain center.

G. A. Graham, Lancaster, Ohio, was elected president of the Ohio Millers State Assn., other officers elected were F. W. Kibler, Mt. Orab, vice-president; Frank H. Tanner, secretary and treasurer; H. H. Bringle, Canton; T. H. Harsher, Portsmouth, and O. M. Richards, Courtland, directors. The meeting at Columbus was well attended and a spirit of optimism regarding the coming season was manifest. Those attending from Toledo were J. D. Hurlbut, Toledo Grain and Milling Co.; C. S. Coup, Northwestern Elevator and Mill Co.; Harold Anderson, National Milling Co.; and Mark Mennel, The Mennel Milling Co.

ST. JOSEPH, MO.
N. K. Thomas, Correspondent.

W. B. Lathrop of Kansas City was a visitor April 25th prior to a golf game.

Visitors on the St. Joseph Grain Exchange during the week ending April 25th included: T. Brown, Chicago; V. F. Chandler, Humboldt, Neb.; J. A. Sellars, Lathrop, Mo.; F. F. Gillett, Marceline, Mo.; K. Puckett, Gower, Mo.; D. M. Noblett, Hamburg, Iowa; H. T. Keal, Atchison, Kans.; S. A. Roach, Maryville, Mo.; B. G. Maughermer, Savannah, Mo.; I. Maset, Hanover, Kans.; Frank Hall, Robinson, Kans.; W. Rice, Smithville, Mo.; R. Stanton, King City, Mo.; Otto Schmueller, Harbine, Neb.; J. D. Turney, Kansas City, Mo.; A. B. Wells, Skidmore, Mo.; C. W. Gassett, Bigelow, Mo.

Arrivals of all grains showed an increase for the past week compared to the preceding period. Wheat arrivals were practically all on contract, and tables showed very scant offerings. Demand fair for hard winters and rather good for soft wheat. Hard wheat prices were unchanged for the week, and soft 5c higher. Corn offerings have been principally of the yellow variety; demand fair to good. Yellow corn prices 6c lower for the week, white 4½¢ lower; mixed 3¢ lower. Yellow has lost most of its premium over white, and the two varieties are about even. Oats offerings very light; demand fair to good. Prices 2½¢ lower for the week.

DULUTH.
S. J. Schulte, Correspondent.

Douglas C. Moore, grain buyer with McCabe Bros. & Co., has been elected a member of the Duluth Board of Trade, taking over the membership of H. C. Olson.

Dealers here have been receiving the most optimistic advices lately from over the Northwest regarding seeding operations and the outlook. As the seed has gone into the ground in the best conditions as regards soil moisture the crop promise is thought to be bright.

In consideration of the largest supplies of spring wheat, durum, oats and rye held in store on this market, the opening of lake navigation was the slowest this spring in the memory of any trader here. Under the influence of strong competition between the lake carriers the rate on wheat and rye to Buffalo was cut down to 2 cents.

Elevator men here are looking forward to a fair in-movement of grain this way from the country within the next two or three weeks after farmers are through with their rush of spring seeding and other work. A fair quantity of wheat and other grains was held in interior elevators over the winter and it will be due to come forward to the terminals soon.

What the trade regarded as an interesting incident was the unloading of 98,000 bushels of spring held afloat on in the steamer La Salle and the reloading of the steamer at the Occident elevator with No. 1 northern wheat before she finally cleared for Chicago. The elevator people in explanation said that they desired to make absolutely sure that all the grain in the load was up to contract grade.

WEEKES COMMISSION CO.
SHIPPERS
KAFIR MILO SUNFLOWER SEED
CORN OATS CHICKEN WHEAT
409 Merchants Ex., St. Louis, Mo.

Making allowance for separations of grades, the results of operations during the past winter has shown the storage capacity of Duluth and Superior elevators to be approximately 3,000,000 bushels. The high point in storage reached before the first boats were loaded out at the opening of navigation was around 33,000,000 bushels and 2,000,000 bushels space was estimated to be still available, mainly in the Consolidated Elevator Co.'s houses.

At the bottom of their rapid price drop from a peak of around 58 cents a bushel to 38 cents some of the takers of hedges in that grain have experienced severe losses. The elevators, however, have had their regular carrying charges so that the business was very acceptable to them. Some eastern inquiry for oats developed during the last week, and a fair tonnage was loaded out for delivery down there. Operators here are prepared to go out after their share of the trade in oats again next fall, it being assumed that outlets will be found for the quantities now in store here. An interesting feature in the trade here during the week came in shipments of two cargoes of spring wheat to Chicago to apply on May delivery contracts. The grain was sold at the delivery price in the absence of any tangible eastern demand for it. The Occident Elevator Co. participated in that business.

KANSAS CITY.
T. J. Tanner, Correspondent.

Erwin R. Jessim of the Uhlman Grain Co. was elected to a membership in the Board of Trade Tuesday on a transfer from Eugene J. Gissler, deceased.

J. F. Martinsen, city sales manager for the Ismert-Hincke Milling Co., has resigned and taken a position as sales manager for the Sun Ray Products Co.

The Russell Grain Co. has discontinued its millfeed department, and D. H. Kresky, who was manager, has taken a similar position with B. C. Christopher & Co.

R. Van Evera, a flour broker in Kansas City, has been elected secretary of the American Corn Millers' Federation. The office will be removed to the Victor building, Kansas City.

Nearly 150 members of the Kansas City Board of Trade have signed for tickets to the opening baseball game of the season at Muehlebach park April 29, when the Blues will meet the Toledo team.

W. B. Dalton, state grain inspector for Kansas, has removed C. A. Wollard, in charge of the office in Hutchinson of the state inspection and weighing department. George Douglas, an assistant inspector, is in temporary control of the office.

The park board of Kansas City has accepted from Howard Vanderslice, former president of the Board of Trade, a bronze group statue commemorative of pioneer heroism in the west. It is probable that a site will be selected on the Santa Fe trail.

In the Circuit Court of Jackson County, Mo., Saturday, G. W. Roller of Norton, Kan., secured a judgment for \$19,441 against C. Moritz & Co., the C. Moritz Grain Co., Charles Moritz, Max A. Moritz, Otto F. Moritz and Joseph C. Snively, grain dealers in Kansas City, and Hastings, Neb. The suit was based on an alleged breach of contract in a grain deal.

Negotiations are pending for the sale of the building occupied by the Nelson Grain and Milling Co. at Twenty-ninth street and Southwest boulevard, to the Thompson-Hayward Chemical Co. The consideration is \$85,000. In case the trade goes through, the Nelson company, which manufactures feeds and corn meal, will secure new quarters, which it has long desired.

J. S. Bache & Co.'s new quarters in the Dwight building are rapidly approaching completion and the company probably will remove from the First National Bank building May 3. C. D. Crotchett, present manager of the Kansas City office, will not remain in that position after May 1, though he may hold another position with the company. The new manager has not been chosen.

Plans are being considered for the addition of a room on top of the north wing of the new Board of Trade building to accommodate the laboratories of the Kansas and Missouri grain inspection departments. Just now the Missouri department has no laboratory, but an appropriation for this purpose is said to have been made by the last legislature. The Kansas department has had a laboratory since about 1920 and is fully equipped to make protein and other tests.

May 9 is the date set for a meeting of mill owners, managers, operative millers and grain men to be held in Manhattan, Kan., where Secretary Jardine of the Department of Agriculture will be the principal speaker. The afternoon will be devoted to an examination of 500 experimental wheat fields, planted especially for this meeting. The wheat plots are all under different growing conditions, and those in charge of the experimental division will

illustrate to the millers the various factors influencing their wheat supplies, such as protein content, moisture and other developments.

Applying as an officer of a newly organized subsidiary of the parent body, L. L. Wilson, second vice president of the Kansas Wheat Growers' Association, aspires to become a member of the Kansas City Board of Trade. He has bought the membership of J. F. McElvain of the Moffatt Grain Co. for \$10,000. E. R. Downie, general manager of the growers' organization, has been a member of the exchange for a year or more. The subsidiary of the association is known as the Kansas Co-operative Grain Co. This company will take charge of the million bushel elevator which the Chicago and Alton Railroad is expected to build in Kansas City. J. L. McElvain has not announced his plans for the future. The Moffatt Grain Co. may be discontinued. E. O. Moffatt, the founder, has not been active in the grain business for several years.

Cash Grain Markets.
Wheat.—Receipts for the week, 165 cars, against 246 a week ago and 333 a year ago. Owing much of its activity to the course of futures, the market for hard and dark samples displayed irregularity. There was a fair recovery early in the week from the previous decline, but later a downward tendency developed. It could hardly be said that buying was brisk at any time, though millers wanted protein qualities, often having them bought before arrival. There was an increase in the local flour output to 100,000 bbls., but only to fill old contracts. New flour business was dull. Exporters were confined in their operations to carrying out previous commitments. The lighter arrivals were due to spring work on the farms. Prices at the close were

generally unchanged to 1½¢ lower than a week ago, with No. 1 hard and dark at \$1.45@1.63½, No. 2 at \$1.45@1.63½, No. 3 at \$1.44@1.63 and No. 4 at \$1.51@1.62. Soft wheat arrivals were small. There was a fair demand for milling samples, while others were slow. Closing quotations were unchanged to 3¢ up, as follows: No. 1, \$1.65@1.69; No. 2, \$1.63@1.68½; No. 3, \$1.57@1.65; No. 4, \$1.51@1.61. Elevator stocks decreased 358,000 bus., to 3,938,000, against 8,774,000 last year. Rains during the week were of undoubted benefit to the winter wheat crop from Nebraska to Texas. The spring has been so early that harvest should come a week or two before the usual time.

Corn.—Receipts, 142 cars, against 119 a week ago and 383 a year ago. With yellow

leading the recession, corn declined 1@7c. Trade on most days was slack, with much less inquiry from Texas than might have been expected, in view of the recent drouth in that state. Late in the week the rains reached northern Texas, after moistening the western and southern portions. The rains northward as far as Iowa and Nebraska were fine for the corn territory and seeding made good headway. The crop will have a fine, early start. Elevator men shipped freely from store, though denying that the movement represented new business. Stocks were reduced 358,000 bus. to 4,974,000, against 1,213,000 a year ago. Cash corn closed as follows: No. 2 white, \$1.03@1.05; No. 3, \$1@1.02; No. 2 mixed, \$1.03@1.04; No. 3, \$1@1.02.

Oats.—Receipts, 121 cars, against 105 a week ago and 101 a year ago. With oats coming from several states, including the Northwest, the market was excessively supplied and the result was weakness. Demand was only fair, including some southern business. Prices broke 3½@5c on white and 1@4c on red, closing as follows: No. 2 white, 44@45c; No. 3, 43@43½c; No. 2 red, 44c; No. 3, 43c. Shipments by elevator interests to fill old sales cut the stocks down 31,000 bus. to 931,000, against 237,000 last year. Crop advices were ex-

cellent, owing to the rains, though Texas reports said there had been great damage during the dry spell.

Kafir and Milo.—Receipts, 98 cars, against 69 a week ago and 90 a year ago. Trade in grain sorghums was slow, though shipments on previous sales reduced the stocks 10,000 bus., to 279,000, as compared with 448,000 last year. Most of the buying of carlots was on a hedging basis. Prices of kafir declined 7@9c per cwt., with No. 2 white closing at \$1.66, No. 3 at \$1.64 and No. 4 at \$1.62@1.63. Milo lost 1@3c, ending as follows: No. 2, \$2.02@2.05; No. 3, \$2.02@2.04; No. 3, \$2@2.01.

CHICAGO.

The Continental Grain Co. has increased its capital stock from \$500,000 to \$1,000,000.

M. E. Dickson and William Wardell of this city were recent visitors with the trade in Philadelphia.

Chas. A. Peck, formerly for 20 years with A. J. White & Co., has become connected as a partner with E. Newman & Co.

There is said to be 1,500,000 bu. of wheat bought at Minneapolis and Duluth to come to Chicago for delivery on May contracts.

T. W. Brophy, secretary B. A. Eckhart Milling Co., will sail from New York May 13th on the Mauretania for Europe. He will visit England, France and Scandinavia before returning late in June.

R. M. White, senior member of the White Grain Co. of Duluth, Minn., was a Chicago caller last week on his return home from the South. White has been combining business and pleasure, touring the Southern states, having started South the first of February.

Jack Whiteside has just returned from St. Louis, having made arrangements to handle the salvage grain and seed from the burned elevator and warehouse of the Plant Seed Co. It will be handled at the Midwest Elevator, operated by Frank J. Delany. There will be some 40 to 50 cars

of grain, mostly corn, salvaged from this loss.

Edward J. Dies, a writer and head of an advertising and public relations organization, has been appointed administrative assistant to the president of the Chicago Board of Trade. For several years Mr. Dies has been associated with the exchange in legislative and other public relations matters. He will continue to direct his agency.

Willis McFeely, manager of the Chicago office of the Chase Bag Company, was elected president of the village of Oak Park, Ill., for the third time, at the recent election. One of the side lights showing the high esteem and regard which the residents of the village hold for Mr. McFeely for the excellent service he has rendered, was the presentation to him of a Packard sedan, fully equipped, license plates and all, including full coverage on insurance.

Trade Opinion.

The wheat demand from abroad is very poor—one report says European holders are offering at under cost of replacement. Winnipeg wires say progress in putting in the new crops in the three western provinces is 10 days to two weeks ahead of last year. Selling or changing by May longs contributed to the greater decline in May. It may be that the "speculator" is "selling scenery," but it must be admitted that at this time the "scenery" is very impressive. Recent premiums for the winter varieties are fully maintained. Shippers report some business for domestic distribution, but generally a poor demand for corn. —Pope & Eckhardt Co.

Shipments of wheat from the southern hemisphere continue heavy. The world's supply of wheat is estimated at only some 10 million bushels under what it was a year ago. There has undoubtedly been improvement in the winter wheat crop, due to the beneficial rains during the last few days. The apathy of the foreigner to make purchases of our grain is not encouraging to better prices. The wheat market acts tired and unless strengthening factors become more apparent, we would only make purchases of the new crop futures on decided setbacks. As we have recently noted, we see nothing particular to buy corn on at the present time. A changing market again present in oats. Interest by commission houses is confined to the September future. —J. J. Badenoche Co.

Ideal weather of the moment removes all bullish motive to be derived from crop outlook and Liverpool cables are depressing in tone. Those in touch with the cash situation are pessimistic; they point to the fact that a week ago domestic milling demand was fairly good and importers seemed interested but at the present time there is a complete reversal of that condition. Just now the market is of a liquidating character because there seems no motive for higher prices. The mid-month survey of crops issued by the Department of Agriculture speaks of heavy abandonment of acreage in Ohio, Indiana, Kansas, Nebraska, Texas, Oklahoma and the far northwest, which gives us a clue to the character of the next formal government report, due about the 8th of May. Pending reception of this report, the market is likely to be erratic. —Thomson & McKinnon.

Further rains over the southwest, with cooler weather predicted, effectually removed for the time being one of the principal bull arguments new and with a very slow export demand there was little to attract new buying power. Liquidation seems to be the keynote to the market, and it does not appear to have run its

course. Until this is out of the way no sustained advance can be looked for and only temporary reactions should be expected. Cash corn was again in slow demand and heavy. Primary receipts ran small, but apparently there is little buying power in the cash even under these conditions. Quite general rains over the belt will interfere with country marketings. As in wheat, the market is in a liquidating period and until this is accomplished outside buying power will remain small.—Bartlett-Frazier Co.

Sentiment regarding the future is mixed, neither those bullishly inclined nor those bearishly inclined being strong in their opinions. Available supplies of wheat are decreasing, but not as rapidly as expected by those who were expecting an acute shortage before the new crop. The world visible decreased 8,600,000 bushels in March, compared with a decrease of 15,764,000 in March, 1924, the total of 359,000,000 being practically the same as a year ago. Export clearances have increased some, but export business is not active. Russia was reported to be buying grain in European markets. It is believed by some that the holding off of active foreign buying was caused by the recent instability of the market and with more stability buying should increase. Widespread rains have relieved the drouthy conditions which had prevailed, and conditions in the spring wheat area are very favorable, seeding having been done earlier than usual; the only possibly unfavorable feature of the situation is that very little fall plowing was done and much of the acreage was disked in with the seed bed poorly prepared.—Clement, Curtis & Co.

Reports of generous rains over the southwest with Wichita, Kans., claiming a total fall of 1½ inches in two days, caused a nervous feeling among local brokers and a

further curtailment of outside buying orders. Reports from our northwest spring wheat states and Canada are very optimistic and are being overlooked by the trade at the present time. Export business in all grains was limited, only 100,000 bushels of wheat were sold. We hear of little if any purchases of new crop wheat for July or August shipment by Europe. Crop conditions in Europe, outside of Russia, which is an unknown quantity, are nearly normal and her needs this coming year are likely to be more limited than last season.—Farnum, Winter & Co.

Another sagging market in wheat, with the chief bearish influences the sharp decline in the Liverpool market, more favorable crop reports and the lack of any aggressive cash demand for export. There was a continuance of heavy evening up operations in the May delivery, with a good deal of spreading both ways between May and July and a tendency on the part of the nearby position to lose ground moderately. There is very little selling of the September except by spreaders. Advices from abroad continue to be disappointing, with a very indifferent demand for the cash article and there seems to be an impression that the large amount on ocean passage is acting as a deterrent to new buying. May wheat in the Canadian market shows a tendency to lose ground relative to the July. Confirmation was received of the Indian wheat crop forecast of 322,000,000 bus., which is just about sufficient to cover domestic requirements. Corn planting is making rapid progress under generally favorable conditions. Shipping demand continues decidedly slow and commercial buyers are rather pessimistic as to any immediate improvement, chiefly due to the cheapness of substitutes and sugar selling at such abnormally low prices. This has hurt the industrial de-

mand considerably. Weakness in the hog market has also had a sentimental effect, hog prices showing a drastic decline from recent high levels.—Cross, Roy, Eberhardt & Harris.

ST. LOUIS.

C. W. Wood of the Wood-Crabbe Grain Co., Birmingham, was a recent visitor in St. Louis.

The name of the Flour Trade Association of St. Louis has been changed to the St. Louis Flour Club.

Secretary Ripplin of the Merchants' Exchange is attending the meeting of the National Industrial Traffic League in Indianapolis this week.

James M. Adam of Anheuser-Busch is an applicant for membership in the Merchants' Exchange on transfer from certificate of Ralph Speer.

Charles B. Godfrey, vice-president and general manager of the Beaver Valley Milling Co., Des Moines, called on the Exchange several days ago.

Joseph H. Albrecht of the Annan-Burg Grain Milling Co., is receiving the congratulations of his friends over the arrival at his home of a new daughter.

Edward P. Costello, assistant traffic commissioner of the Merchants' Exchange, was in Atlanta last week to attend a meeting of the Southern Traffic League.

The purchase by the Marshall Hall Grain Co., of the 3,600-bbl. flour mill and the 750,000-bu. elevator of the Kehlor Flour Mills Co., which is located in East St. Louis, has been announced.

The J. H. Teasdale Commission Co. has sold the Central B grain elevator which it had operated for a number of years, to the Ralston Purina Co., which will take over

the plant May 1. The Teasdale Company some time ago took over the management of the elevator erected by the Missouri Pacific Railroad in South St. Louis.

Effective April 27, the St. Louis Merchants' Exchange began operating on daylight saving time to conform with Chicago. The session opens at 8:30 in the morning and closes at 12:15.

L. A. Arneson, vice-president and manager of the Larabee Flour Mills Corporation, was in the city last week at the meeting of the directors of the Millers' Mutual Fire Insurance Co. of Alton, Ill.

The traffic department of the Merchants' Exchange, St. Louis, is paying particular attention to the possible activities of various traffic leagues of the country on the Smith-Hoch resolution, which calls for an investigation of the rate situation on grain and grain products.

A seventy-five fold increase in capital stock has been proposed to the stockholders of Anheuser-Busch, Inc. The application for a new charter stipulates that the company's capital will be \$18,000,000, divided into shares of \$100 par value each. The original charter, whose expiration necessitates the pending renewal, provided that the company should have 480 shares of capital stock of \$500 par value each. Holders of these original shares will receive 375 new shares of \$100 par value for each old \$500 share.

PEORIA.

L. L. Eckard, Correspondent.

Louis Mueller, mayor-elect, who has been in the grain business for 30 years, will make an address here before the Illinois Grain Dealers' Association on the morning of May 5th. He will also become mayor of Peoria the same evening. Grain dealers from all parts of the state are expected at the convention. May 6th a banquet will be held at the Jefferson hotel to which Congressman Rainey of Carrollton will deliver the principal address. J. W. Duvall, Chicago, who is in charge of the administration of grain futures act, will also be a speaker.

Principal discussion at the meetings will center on the general grain situation, dealing in futures and the various co-operative movements which have recently attracted considerable attention.

C. E. Graves, Weston, is president of the state association.

G. M. Miles, president of the Peoria Board of Trade, will act as toastmaster at the banquet.

The committee in charge of general arrangements for the convention consist of B. E. Wrigley, H. H. Dewey and George Brier.

J. J. Badenoch Grain Co., Chicago, will open a wire and cash grain office on the second floor of the Board of Trade building in offices formerly occupied by Murphy-Grier Co. Frank Dalton, associated with The Cole Grain Co. for several years, will be manager of the new office.

Cash grain prices remain very irregular at this market, with 13 cars Saturday. Prices were unchanged to ¼c lower and demand appeared limited. No. 3 yellow, \$1.03½; No. 4 yellow, \$1.02½; No. 6 yellow, \$1; No. 2 mixed, \$1.05½; sample, 83¢@98¢.

Oats—Receipts extremely light, with 2 cars. Market quoted ¼c lower. No. 3 white, 42c, and No. 4 white, 40c.

Grain receipts and shipments at Peoria for week ending April 25, as compared with corresponding week last year, as reported by the secretary of the Peoria Board of Trade:

	1925.	1924.
Receipts—

Sept.	1,955,000	2,054,000	3,671,000
Oct.	5,315,000	1,425,000	2,940,000
Nov.	2,709,000	264,000	1,563,000
Dec.	1,744,000	382,000	762,000
Yr.	17,721,000	11,814,000	18,394,853	

BARLEY MARKETS.

MILWAUKEE.—The Milwaukee barley market continued steady with prices practically unchanged throughout the past week. There was a fair demand from both shippers and maltsters and all offerings were readily absorbed. The market closed 1c lower, with malting at 81@94c and pearling at 93@95c. During the week 133 cars were received as compared with 100 cars the previous week and 90 in the same week of 1924.

DULUTH.—Strength was shown in the barley market during the last week. Commission men were in the market for that grain to complete contracts, but business was curtailed for the lack of offerings. Two lots of barley were loaded out from the elevators during the week. Receipts were only 9 cars, some of them bulkheads. Prices closed 4c to 6c up at from 70 to 84c, the lower grades being the strongest.

MINNEAPOLIS.—Early in the week maltsters were in the market for anything that they could make use of but barley carrying heavy percentages of oats and wheat was hard to sell. Later, the shipping and malting demand fell off, with a consequent narrowing up in the range of prices for current offerings. Elevator stocks showed a small decrease for the week, totalling 1,617,197 bushels vs. 1,809,983 last week and 275,540 last year. Today's range of sales ran from 68@85c.

CHICAGO.—Unchanged. Bulk of receipts applied on previous sales. Good demand. Offerings light. Fair shipping directions continue to be received here from the East, with export clearances 50,000 bus. Clearances for the week were 654,000 bu.; last year, 267,000 bu. Visible decreased 518,000 bu.; last year, decreased 95,000 bu.; total, 2,783,000 bu.; last year, 1,037,000 bu. Local stocks increased 24,000 bu.; total, 268,000 bu.; last year, 179,000 bu. Malting quotably 85@90c; feeding and mixing, 75@88c; screenings, 40@65c. Local inspection, 19 cars.

KANSAS CITY.—Barley was almost a negligible factor in the local grain mar-

ket this week. Only 2 cars arrived from the country. There were a few orders from feed manufacturers. Prices were practically unchanged, closing with No. 3 at 87@90c per bushel and No. 4 at 85@88c. Stocks decreased 1,500 bus. to 4,500. A year ago the elevators contained 64,000 bus. Advices concerning the coming crop continue favorable. In view of the acreage, there should be plenty of barley in the Southwest next season.

RYE MARKETS

CHICAGO RYE FUTURES.

Following is the range of future prices for rye for the week ending April 25:

	Apr.	May.	July.	Sept.
20 1.05	@1.09½	1.04	@1.08	.97 @1.01
21 1.07½	@1.09½	1.06	@1.08½	.99 @1.01½
22 1.08½	@1.12½	1.07½	@1.12½	.99½ @1.03½
23 1.10½	@1.11½	1.09½	@1.11	1.01 @1.03½
24 1.07½	@1.10½	1.06½	@1.09½	.983½ @1.01½
25 1.06½	@1.08	1.05½	@1.08	.98½ @1.00

Receipts of rye at Chicago for the week of Apr. 25, 1925, were 516,000 bus. vs. 12,000 bus. same week of 1924; shipments were 2,000 bus. vs. 6,000 bus. same week of 1924.

RYE SPOT QUOTATIONS.

Closing outside prices for rye of No. 2 quality cash for the week ending Apr. 25, were:

	Mpls.	Dul.	Chi.	Win.	Mil.
Apr. 20.	\$1.05½	\$1.06	\$1.09	\$1.10½	\$1.06½
Apr. 21.	1.04½	1.06	1.08	1.08½	1.07
Apr. 22.	1.08½	1.10	1.12½	1.13½	1.10
Apr. 23.	1.06½	1.08½	1.12	1.13	1.10
Apr. 24.	1.04½	1.06½	1.09½	1.12½	1.09
Apr. 25.	1.02½	1.04½	1.08	1.09	1.05

RECEIPTS OF RYE.

Carload receipts of rye at the principal primary markets in the Central West for the week ending April 25:

	Mpls.	Dul.	Chi.	Win.	Mil.
April 20.....	14	39	3	2	2
April 21.....	4	26	53	11	2

Total	42	197	115	35	7

EXPORTS OF RYE.

The exports of rye from all United States ports, as reported by the Chief of the Bureau of Statistics of the Department of Commerce for each month, for years named, were as follows, not including rye flour:

	Mos. 1925.	1924.	1923.	1922.
Jan.	1,187,000	200,000	3,449,000	1,129,000
Feb.	912,000	137,000	5,974,000	1,194,249
Mar.	2,391,000	299,000	1,361,000	903,000
Apr.	2,077,000	2,219,000	3,898,000
May	1,924,000	4,611,000	5,483,000
June	3,708,000	3,877,000	4,953,000
July	1,306,000	3,328,000	2,789,000
Aug.	1,469,000	1,741,000	4,610,000
Sept.	11,563,000	2,558,000	11,130,000
Oct.	10,852,000	455,000	2,197,000
Nov.	1,297,000	755,000	5,431,000
Dec.	832,000	522,000	3,763,000
Yr.	35,664,000	30,850,000	46,460,249	

RYE MARKETS.

CHICAGO.—Closed ¼@5½c lower for futures and 2¾c off on car lots. Trade was fair and the market quite active. Heavy liquidation by prominent local "longs" that was influenced by the weakness in wheat, broke prices sharply. Demand only moderate. Seaboard reported export demand quiet and nothing worked. Visible supply decreased 3,505,000 bu. for the past week and total is 13,856,000 bu.; last year, 20,992,000 bu. Local stocks increased 358,000 bu. to 2,646,000 bu. Exports for the past week 2,385,000 bu.; last year, 447,000 bu. Seaboard clearances, 56,000 bu. Car lots were in a fair demand at May price for No. 2. Offerings moderate. Local inspection, 14 cars. No. 3 sold at \$1.02. No. 4 sold at \$1.01½.

MILWAUKEE.—Shippers were fairly active in the Milwaukee rye market last week and the scant offerings were quickly absorbed at prices which advanced 3c in the period. Receipts were mostly of grain offgrade with high moisture content and discounts were liberal. Futures were more active than usual and considerable Wisconsin sold on a forward shipping basis. Dry was scarce and wanted. Car receipts were 8 last

week as compared with 8 the previous week and 8 in the same period of 1924. Market closed at \$1.09@1.10 for No. 2, inside for Wisconsin, ranging at 1@2c under May price.

NEW YORK.—Export business in rye for the past week was estimated around 1 to 1½ million bushels in all positions.

MINNEAPOLIS.—Offerings of country run rye, like all other grains, have been very light during the past week and that which was of milling quality, brought good premiums but other than this, was in poor request. Late in the week, the elevators jumped into the field, offering from their stocks and as a result, country run rye received less attention and there was a little falling off in the premiums.

Minneapolis elevator stocks today show a total of 981,039 bushels vs. 949,146 bushels a week ago and 7,823,282 bushels a year ago.

Range of sales today shows No. 1 quoted at 3@4c over May and No. 2, 2@3½c over May.

DULUTH.—Market in rye rose and fell at times during the last week and up till Saturday longs had the better of the contest. Commission men and elevators had a good eastern inquiry for rye and contracts were made for the loading out of several lots by boat for deliveries at Buffalo, Georgian ports and Montreal. Holders are more bullish regarding the outlook in the rye market now that cargoes held all winter at Baltimore and Buffalo have been disposed of. Spot No. 1 rye closed ¼c up at \$1.04½.

BIG BUYING RESULTS FROM DECLINE.

The indebtedness of the farmer to the much reviled "speculator" is partly measured by the tremendous decline that has occurred in cereal values.

Instead of dictating, as he had expected, the "speculator" has pocketed his losses and is now permitting the foreign buyer to fix the price.

As the result, last week's rye exports broke the crop year record, and exceed seven million bushels for the past three weeks, reducing terminal stocks to a little over seventeen million. This represents about all of the rye that is left, for high prices long since reduced first hand stocks almost to the vanishing point.

The drastic decline makes current prices very attractive.—Frank H. Blodgett, Inc., Janesville, Wis.

Beans and Potatoes

BEANS AND POTATOES.

Quotations follow for bids of good quality condition beans and potatoes sacked, per cwt., unless otherwise specified, as of week of Apr. 25:

Beans—Chicago—Remainder of old crop selling moderately at steady prices. Per 100 lbs.—Spot navy beans, Mich., fancy, \$6.25; red kidney, fair stock, \$10; large, dark, extra quality, \$10.50.

St. Louis—Quote choice hand-picked Michigan white beans at \$6.75 and prime machine-picked at \$6.50 per 100 lbs. Scotch peas 7¼c, green split peas 9c and yellow 7c per lb. Lima beans, \$2.82 per bbl.

Boston—Car lots, per 100 lbs., N. Y. and Mich.: Choice hand-picked pea beans, \$6.50@6.75; fair to good, \$6.25@6.40; California small white, \$8.35@8.50; yellow eye, extra, \$6.50@6.75; red kidneys, choice, \$10.50; fair to good, \$9@9.50; California limas, \$14.50@15; native green peas, \$7@7.50; Canada, \$5.25@5.50; split, \$5.50@5.75; jobbing prices, 25 to 50 cents above car lots.

San Francisco—Whites, small, 8¼c; do. large, 7c; pinks, 9c; limas, 15c; cranberry 8¼c; kidney, 12c; Mexican garbanzas, 11½c; lentils, large, 9c; do. small, 8c; black eye, 11c; Mexican reds, \$8.85 per cwt.; speckled bayos, 8½c; bayos, 8c. Peas (per lb.)—Split peas, yellow, 7½c; green peas, 8¼c.

New York—Very quiet trade Friday and general feeling barely steady, with no material price changes noted. Pea beans held mostly at \$6.25, though that price reported shaded. Red kidneys sold mostly at \$10, though trade small. White kidneys dull and weak and pressed for sale at \$8.50. California

limas steady, with most sales making at \$15. Black eye peas unchanged at \$10.75@11. Domestic—Marrow, \$9.25@9.75; pea, choice, hand-picked, \$6.15@6.25; pea, screened and prime, \$5.75@6; red kidney, \$10.00; white kidney, \$8.50; lima, Cal., \$15. Imported, 100 lbs.—Marrow, \$8.75@9; white kidney, \$8.00@8.25; lima, Mad., 1924-25, \$12.50; 1923-24, \$11.50@11.75; 1922-23, \$9@9.50; lima, Europe, large, \$11.75; medium, \$11.25; small, \$10.50. Peas—Domestic—Black eye, \$10.75@11; yel. split, \$6.25@6.50; gr. split, \$7.50@7.75. Imported—100 lbs.—Green, Japan, \$6.50@6.75; Holland, \$5.75@6.00; yellow split, \$5.50@6; gr. split, \$7.75@8; chick, Mex., imperial, \$11.75; monster, \$11.50; large, \$9.50; small, \$7@7.50.

Potatoes—

Chicago—Market quiet and prices unchanged to 5c lower. Trade was slow and the volume of business transacted light. Buyers were not very anxious to purchase, as they were apparently well supplied at the moment and in most cases reductions in prices were necessary. Offerings were liberal and were largely of ordinary and poorer quality. Receipts were 77 cars and cars on track were increased to 220. Sales reported today were: Per 100 lbs.—Round white, Wisconsin, bulk, 1 car at 70c; sacks, 1 car at 60c, 6 cars at 65c, 7 cars at 70c, 3 cars at 75c, 1 car at 80c, 1 car at 90c, 1 car extra fancy at \$1.00; Minnesota, 1 car at 60c, 1 car at 65c; Idaho russets, 1 car at \$2.75; Red Rivers, 1 car sprouted at 70c, 1 car at 85c. Bulk, per 100 lbs., Wis., dustys, \$1.00; ordinary and poor, 70@85c; round white, sacks, Wisconsin, 80@90c; ordinary and poor, 60@75c; Idaho russets, \$2.40@2.85; Ohios, Red Rivers, 70@85c. New potatoes—Are increasing; receipts, 5 cars; demand is fair. Bbls., Florida, Spaulding rose, \$6.25; No. 2, \$5.25; boxes, No. 1, \$1.75@2; No. 2, \$1.50@1.75; sacks, Texas triumphs, 100 lbs., \$3.25@3.50; hampers, Texas, \$2. Old—Boxes, Idaho, repacked, \$2.25@2.50.

New York—Receipts yesterday included at Pennsylvania Railroad pier 29: 30 cars Florida barrel potatoes, 1 car Delaware basket sweets and 1 car Delaware basket yams. New potatoes—Fla., bbl., No. 1, \$5@6; No. 2, \$2.25@3.50; Bermuda, bbls., No. 1, \$7.50@8; No. 2, \$4@4.50. Old potatoes—Me., bulk, 180 lbs., \$1.80@2.25; car lots, cwt., \$1@1.10; 165-lb. sk., \$1.75@2.10; 150-lb. sk., \$1.50@1.90; state, bulk, 180-lb. sk., \$1.65@2.15; L. sk., \$1.60@1.80; 150-lb. sk., \$1.25@1.65; S. L. bulk, 180 lbs., \$3.25@3.50; 165 lbs., \$3.10@3.30; 150-lb. sk., \$2.75@3.15; Jy., bskt., 75c@\$1.

NEW ENGLAND STOCKS LIGHT.

BOSTON.—Our opinion is that stocks in New England are light—what we call a hand-to-mouth buying stock.

The demand seems to be very limited. It appears to us more so than other years at this time. There appears to be lack of confidence. The market will go up 25 cents to 50 cents, then it will sag back.

Our opinion from reports we get is that country stocks are not heavy. You probably know more about Michigan stock than we do. We get reports from Michigan that there is not any more stock there than what would carry us through three months. Then we get reports that there is plenty of beans to carry us through.

We have an opinion that beans will do better later—very much so before the new crop. We understand that the bean canners have not bought any heavy stocks. If they should we think that would have a tendency to advance prices.

There are no imported beans coming to Boston at the present time, although we understand there are quite a few coming to New York.—Fowler, Hibbard Co., C. A. Greenleaf.

NO BEANS LEFT.

COLOMA, Wis.—There are practically no beans left in the farmers' hands in this locality. Dealers are holding a few but no large stocks. Inquiries from grocers have been exceedingly light during the past month.—The Follett Company, April 21.

BUCKWHEAT MARKETS.

CHICAGO.—Fancy Jap, mixed and silver hulled buckwheat, \$1.90@2.00. Dirty seed quotably less.

BUFFALO.—Mixed, per 100 lbs., \$2.25; silver hull, \$2.10.

ST. LOUIS.—Quote nominally at \$2.05 per 100 lbs.

MILWAUKEE.—Prices, per 100 lbs., continue unchanged with silver hull quoted at \$2.10@2.15 and Japanese at \$2.20@2.25.

News of the Country Grain Trade

ARKANSAS.

Little Rock, Ark.—The Little Rock Grain Exchange elected the following officers for 1925: Guy Cameron, Sec'y-Treas. of the Hayes Grain & Commission Co., North Little Rock, President; Lane Satterwhite, Vice President; August Probst, re-elected Secretary and Treasurer; M. W. Martin, Traffic Manager; J. F. Mueller, re-elected Chief Inspector and Weigher.

CALIFORNIA.

Van Nuys, Calif.—W. R. Welton has purchased the feed business of C. S. Pike. The new firm will be known as the Van Nuys Grain & Feed Co. Mr. Welton will improve the present business and enlarge the territory.

Turlock, Calif.—Frank C. Belier and T. E. Wilson, prominent grain and bean men of Stanislaus county, have gained control of the T. M. and G. Warehouse and the new firm will be known as the Belier-Wilson Grain Warehouse Co. A general warehouse, grain, bean, seed, storage and retail feed business will be conducted. C. C. Steel will manage the business.

IDAHO.

Craigmont, Ida.—A 75,000-bu. grain elevator will be erected by the Union Warehouse & Mercantile Co. on the site of the one which burned last spring.

ILLINOIS.

Rockford, Ill.—Fire damaged the Condon Bros. Seed Company building causing a loss of \$3,000.

Arlington Heights, Ill.—Fire slightly damaged the warehouse of the Arlington Elevator & Coal Co.

Camp Point, Ill.—W. H. Callahan has closed the local Feed Mill, which will stand idle until sold. Mr. Callahan will devote his entire time to his Sinclair oil business.

Goldconda, Ill.—The J. F. Humm Milling Co. has incorporated with a capital stock of \$30,000, to deal in flour, cereals, grain and feeds, manufacturing and shipping. Incorporators: J. F. Humm, J. C. Humm, and M. M. Humm.

Quincy, Ill.—It is reported that Grover Jones has acquired the control of the Knollinberg mill by the purchase of a block of stock. He is president of the company, which in addition to the mill, owns a number of elevators and does a large cash grain business.

INDIANA.

West Lebanon, Ind.—The Seeger and Betts elevator near here is being torn down and will soon be rebuilt at another location.

Whitley, Ind.—The City Flour mills has been sold by Geo. Sutton to a lady named Knowels from Van Buren, who will soon take over the business.

North Manchester, Ind.—Syler & Syler, a partnership composed of Clay Syler and H. L. Syler, has dissolved, and H. L. Syler will continue to operate the elevator at Nappanee and Clay Syler will operate the elevator here.

IOWA.

Plainfield, Ia.—Fred Stickman has purchased the interest of Galen Mellinger in the feed mill.

Lake View, Ia.—The Farmers Union Grain Company was not sold as planned, the bids being rejected. A new company will probably be organized.

Irvington, Ia.—Lightning struck the elevator of the Farmers Co-op. Assn. on April 20 and completely destroyed the building and the office. Loss was covered by insurance.

Portsmouth, Ia.—G. S. Bendon, manager of the elevator here, reports 30,000 bushels of oats and 16,000 bushels of corn on hand, in spite of large shipments of corn all winter.

KANSAS.

Dighton, Kans.—The Farmers' Elevator is adding another room to its office.

DeSoto, Kans.—The DeSoto Elevator Co. has installed a Bowsher Mill in their elevator.

Paxico, Kans.—The Paxico Farmers Union Co-operative Ass'n. has been organized, no capital.

Caldwell, Kans.—Fire destroyed the Caldwell Milling Co., causing a loss of \$75,000. Little grain was in the elevator.

Great Bend, Kans.—Sidney Brenner of Enterprise, Kans., has taken up his duties as assistant manager of the Moses Mill here.

Russell, Kans.—Wm. A. Chenoweth has purchased the coal, grain and feed business of J. A. Hehler Mercantile Co., and will take possession June 1st.

Stockton, Kans.—The Farmers Elevator has installed a grinder of modern type for custom grinding. A blower will be put in and an elevator installed to convey the ground grain from the basement to the upper floor.

Solomon, Kans.—The Hoffmans of Enterprise have leased the Farmers Elevator and will take charge in a short time. Geo. W. Lank has resigned as manager of the elevator and at present, the business is being looked after by Joe W. Neil.

Salina, Kans.—The board of directors of the Shellabarger mill company has planned an extensive building program which includes the erection of a new two-story warehouse and the building of a concrete mixing and tempering plant for wheat on the site of the original mill building, which recently burned. The plant will be of fireproof construction and cost between \$80,000 and \$100,000.

MICHIGAN.

Jamestown, Mich.—The Farmers Co-operative Elevator was destroyed by fire, presumably from a bolt of lightning. The loss was estimated at \$20,000, and included about 1,000 bushels of wheat and other grain.

MISSOURI.

Palmyra, Mo.—Yeager Bros. purchased the Peoples' Mill at public auction for a consideration of \$3,575.

Kansas City, Mo.—A big growth in grain elevator storage capacity is seen here this year involving an outlay of \$4,500,000.

Boonville, Mo.—A modern grain elevator will probably be erected by the shareholders of the Boonville Farmers Elevator Co. on the site of one recently destroyed by fire.

Auxvasse, Mo.—G. M. Fowler succeeds F. G. Wallace in operating the Auxvasse Mill and will take full charge. Mr. Fowler has been in charge of the milling operations of the mill since its purchase by A. Frank Stephens.

Crane, Mo.—Walter Alleger who recently closed down the Crane Mill, has purchased the interest of his partner,

KANSAS CITY, MO.

Kansas City Board of Trade.

KANSAS CITY, MO.

D. W. Waymire, in the business. He expects to reopen the mill in a short time and will replace the old steam boiler with electric motors or a large gasoline engine.

MINNESOTA.

Cloquet, Minn.—The Cloquet mill which has been shut down all winter has opened for business.

Northfield, Minn.—E. G. Farrankop was elected manager of the Farmers elevator, effective July 1st.

New Ulm, Minn.—The grain elevator, recently purchased by the Eagle Roller Mill Co., has been remodeled. A man lift and new motors have been installed.

St. Paul, Minn.—The Farmers Co-operative Terminal Ass'n. is the new name for the Equity Union Marketing Ass'n. James Manahan is Vice Pres.; Geo. C. Lambert, Sec'y.

Waseca, Minn.—Everett Aughenbaugh & Co. have decided to incorporate and will move the general offices to Minneapolis. The company does an annual business of \$500,000.

Faribault, Minn.—The Farmers Elevator Co., managed by Joe Coughlin, has completed a contract for the distribution of Gold Medal Flour and Feed products for this territory.

DeSoto, Minn.—With the closing of the Farmers Mill & Elevator Co., the Farmers & Citizens State Bank took over the assets of the company on notes due the bank. The machinery has been disposed of and the building will probably be sold within a short time.

Jackson, Minn.—Fire, supposed to have originated from the motor located in the cupola, came close to destroying the Fleischmann Malting Company's elevator containing about 50,000 bushels of grain. The damage is estimated at around \$5,000 largely from water that was poured into the building.

Lake City, Minn.—The Norton Flour Mill is being remodeled for the manufacture of rye and buckwheat flour, also cereal products such as breakfast food, corn meal, gluten, flour, etc. Machinery will be installed for making high class feeds for poultry, dairy, swine and livestock in general.

Glencoe, Minn.—Al G. Kroeger, son of Wm. Kroeger, purchased the Glencoe Farmers Elevator at auction for \$2,500, which bid becomes bona fide only in case there is an agreeable settlement in regard to the Live Stock Shipping Ass'n. which has in the past been a part of the elevator business, but of late handled by the Farmers & Merchants Milling Co. There is a difference in opinion as to whether the elevator sale includes the Shipping Association or not.

Simonds-Shields-Lonsdale Grain Co.

QUALITY and SERVICE
Kansas City, Missouri

NEBRASKA.

Stromsburg, Neb.—J. C. Welch of Milford will take charge of the Farmers Elevator here.

Blair, Neb.—The Rivett Lumber Co. of Omaha, has purchased the holdings of the Crowell Lumber and Grain Co.

Tilden, Neb.—The elevator and grain business of the Tilden Grain Co. has been purchased by H. C. Leurs of Ithaca, who will take possession May 10th.

Atlanta, Neb.—The elevator of the Farmers Equity caught fire, possibly from a passing freight train. The flames were checked before much damage was done.

Schuyler, Neb.—At the annual meeting of the Farmers Grain Co., the following officers were re-elected for the ensuing year: President, Oscar Ernst; Vice-President, J. C. Jonas; Secretary, J. E. Higgins; Treasurer, Ed De Bower; Director, Joe Mares. A five per cent dividend was voted.

NEW YORK.

Penn Yan, N. Y.—Fire slightly damaged the elevator of G. W. Haxton & Son.

Williamson, N. Y.—The Northern Feed Co. has been incorporated to deal in cereals, with a capital of \$60,000, by F. M. Kenyon, M. O. Leengleson. (Attorney, W. S. Garber, Rochester).

NORTH DAKOTA.

Stanley, N. D.—A farmers elevator has been organized here.

Bismarck, N. D.—The North Dakota's grain exchange will begin operations by May 1st.

Grand Forks, N. D.—The 1926 convention of the North Dakota Farmers Grain Dealers Ass'n. will be held here in March, 1926.

Minot, N. D.—The Interstate Seed & Grain Co. will open a branch house here to operate on a wholesale basis. It will serve northwestern North Dakota and parts of Montana. J. W. Cohen will manage the branch.

OHIO.

Jackson, O.—Fire destroyed the mill buildings, machinery and stock of the Peters Milling Co. on April 22nd.

Chillicothe, O.—Segal & Sons has purchased the plant of the Snyder Milling Co.

Cincinnati, O.—The Early & Daniel Co. are soon to build an elevator and warehouse with a million bushels capacity at a cost of a half million dollars.

Chillicothe, O.—The Standard Elevator & Supply Co. has been organized with a capital of \$25,000, by William H.

Herrnstein, Al. E. Herrnstein, Lillian F. Snyder, W. R. Snyder and Sallie Snyder Herrnstein.

OKLAHOMA.

Headrick, Okla.—The Farmers & Merchants Gin Mill & Trading Co. has been granted a charter, capital stock \$20,000. Incorporators: F. M. Ford, J. F. Knox and J. W. Askill, all of Headrick.

Altus, Okla.—J. H. Bailey of Duke has purchased the Henry interest in the firm of Cox-Henry Grain Co. The name will be changed to the J. H. Bailey Grain Co. No changes will be made in the management.

OREGON.

Astoria, Ore.—The Astoria Flouring Mills Co. will suspend operations for an indefinite time, due to the high price of wheat.

Portland, Ore.—The officials of Balfour, Guthrie & Co. are considering plans for the erection of two grain elevators here, representing an expenditure of approximately \$250,000. A definite decision will be reached within the next week or 10 days.

PENNSYLVANIA.

Belleville, Pa.—Fire totally destroyed the mill of the Belleville Flour Mills Co.

SOUTH CAROLINA.

Lancaster, S. C.—R. L. Usher has installed a new corn mill at his home and grinds on Wednesdays and Saturdays. This is a sideline to his farming interests.

SOUTH DAKOTA.

Turton, S. Dak.—The Farmers Elev. Co. are improving their plant and will install new machinery.

Watertown, S. D.—The Watertown Grain & Fuel Co. elevator was destroyed by lightning on April 23rd.

TENNESSEE.

Dandridge, Tenn.—The J. H. Rimmer mill, together with a small tract of land, was bid in at the public auction by H. B. Farnagin, cashier of the Jefferson County bank for \$1,500, but it is expected the bid will be raised.

TEXAS.

Longview, Tex.—Fire completely destroyed the warehouse of the Heid Bros. Grain Co., Inc., a galvanized iron building 100x200 feet, together with a large quantity of feedstuffs. Loss estimated at about \$50,000, partially covered by insurance.

Shreveport, Tex.—The Shreveport Grain & Elevator Co. has been incorporated with a capital stock of \$250,000

with the following officers: Frank Davis, Marshall, president; S. J. Harmon, Shreveport, vice president; and L. B. Finley, Shreveport, secretary and treasurer.

VIRGINIA.

Roanoke, Va.—Fire, from a burning barn across the street, slightly damaged the concrete tanks of the Roanoke City Mills.

WASHINGTON.

Bremerton, Wash.—Oscar M. Hendricks has opened The Hendricks Company here and will handle a full line of seeds and grains.

Olympia, Wash.—About 800 grain growers of Southwestern Washington are receiving checks by mail from the department of public works. They are entitled to refunds from warehouse charges obtained by the Pacific Coast Elevator Co.

Odessa, Wash.—The Odessa Union Warehouse company has purchased the mill property which it has rented for several years. It consists of a large mill building, an elevator and warehouse. The owners will use it as one of its six grain stations.

Spokane, Wash.—On April 1, work will start on the tearing down of the present structure of the Douglas County Flour Mills and the erection of a two-story concrete building. The flour mill will be improved and the capacity of the feed mill increased.

Pomeroy, Wash.—J. M. Robinson has purchased the stock of Frank M. Robinson in the Pomeroy Flour Mill Co. This reduces the number of stockholders to five besides Mr. Robinson. Grain sacks, twine and coal will be handled in addition to the regular mill supplies.

WISCONSIN.

Drummond, Wis.—Fire destroyed a large elevator here.

Washburn, Wis.—Fire broke out in the engine house of the elevator belonging to the Rust-Owen Lumber Co., and destroyed building and contents. The fire evidently started from an overheated exhaust pipe on the gasoline engine.

U. S. EXPORTS.

The Department of Commerce reports the following domestic exports of principal food products for February, with comparisons, (final 000 omitted):

	February 1924.	1925.	1923-24	1924-25
Total grains	\$17,004	\$28,190	\$183,054	\$392,398

PROGRAM, ILLINOIS GRAIN DEALERS' ASSOCIATION.

Hotel Jefferson, Headquarters.
PEORIA, ILLINOIS, MAY 5-6, 1925.
Tuesday, 10:30 A. M.
The Gold Room—Hotel Jefferson.

Reception and Community Singing.
Invocation—Dr. B. C. Carpenter, Pastor Universalist Church.
Address of Welcome—Hon. Louis Mueller, Mayor of Peoria.
President's Address—C. E. Graves, Weston.
Secretary's Report—W. E. Culbertson, Champaign.
Treasurer's Report—M. J. Porterfield, Murdock.
Report of Finance Committee—T. E. Hamman, Arcola.
Report of Executive Committee—E. M. Wayne, Delavan.
Appointment of Committees.

Tuesday, 2:00 P. M.

Community Singing.
The Grain Dealers' National Association—Charles Quinn, Secretary, Toledo, Ohio.

Taxes—Discussion of any phase of the Income Tax Law that may be applicable to any grain dealer.

The Legitimate Use of Trading in Future Contracts—Dr. J. W. T. Duvel, Acting in Charge, Grain Futures Administration, Chicago, Ill.

General Discussion of Storage, Hedging and Carrying Charges from the Country Elevator Standpoint.
New Business.

Tuesday, 6:30 P. M.

Banquet—Hotel Jefferson. The ladies are cordially invited.

Menu—Shrimp cocktail, radishes, mixed olives, mignon beef tenderloin, bordelaise, French fried potatoes, new string beans, lettuce and grapefruit salad, frozen nesselrode pudding, cake, coffee.
Music and Entertainment.

Address—Hon. Henry T. Rainey, Member of Congress, Carrollton, Ill.

Wednesday, 9:00 A. M.

The Transportation Question—Chas. D. Morris, Assistant Chairman Western Railways Committee on Public Relations, Chicago, Ill.

Subjects Suggested for General Discussion:

1. Improvement in elevator construction and lightning protection.
 2. Cost of operating a country elevator.
 3. Reasonable buying margin.
 4. Side lines.
 5. The proposed change in oats grades.
 6. Loss and damage claims.
 7. Scale inspection.
- Reports of Committees.
Election of Officers and Directors.
New Business.
Adjournment.
Registration will open at 8:30 a. m., Tuesday, on the mezzanine floor, in charge of the Grain Dealers' National Mutual Fire Insurance Company.

When you have something on your mind—a query or news or a suggestion—of interest to the grain trade, write it out and send it to THE PRICE CURRENT-GRAIN REPORTER.

*Range on October to date.

ST. LOUIS SEED MARKET.

Quote timothy—fair to good country seed at \$5.50 to \$6.00; low-grade, weedy and dark, \$2.00 to \$4.50. Clover—fairly clean to high grade clean seed at \$15.00 to \$20.00 and heavily weedy lots at \$2.00 to \$11.00; German millet at \$4.00; common millet at \$3.00; hog millet at \$2.05 bulk basis; Sudan grass at \$4.10.

Stock Peas—Quote whippoorwill at \$3.60 to \$4.00 and new era and mixed at \$3.25 to \$3.30 per bu. on basis of latest sales.

Sorghum Cane Seed—Quote black amber at \$1.50 per 100 lbs.

Sunflower Seed—Quote at \$3.15 to \$3.50 per 100 lbs.

SITUATION IN THE SOUTH.

MEMPHIS, TENN., Apr. 25.—Dry weather, gripping the South from Texas as far north as Kentucky, has paralyzed the seed trade, and unless rain arrives in abundant quantities in the next few weeks prospects for Southern farmers will be bluer than a winter sky. At present movement in all field seed has been halted and the unusually heavy cotton acreage is threatened with stunt growth to say nothing of a concerted

Field and Grass Seeds

attack by a horde of hungry weevils.

Weevils breed under ideal weather conditions and the mild winter, just completed, has enabled the pest to multiply in alarming quantities. At the proper moment the weevil is expected to pop up and from that time on calcium arsenate will be the principal topic of discussion in the Southern states.

Sales are light on corn; sorghum and sudan are ignored and nobody seems to care a rap about lespedeza. Just what amounts of cowpeas and soybeans will be planted remains to be seen, but, generally speaking, business in field seed has been duller than in many years and the profit attached has been too small to reduce to a percentage.

Despite this condition Southern seedsmen are sitting steadily in the boat waiting for the rains that are overdue. They figure that much replanting will be done and when the call is sounded they will have the stocks for immediate delivery.—M. Coyle Shea, Vice-President Otto Schwill & Co.

STOCKS REDUCED.

ALBANY, ORE.—Red clover stock reduced to local requirements. New crop prospect at this time indicates very small acreage, nearly all young clover seed drying out last season, and we do not look for much if any for export. Alsike practically sold up. Some little local demand; will clean up what little balance held in valley. Vetch seed sold out; fair prospect for new crop.—M. Senders & Co.

LOOK FOR DRY SUMMER.

OLNEY, ILL.—Wish to advise that we have had very little rainfall this year, since the first of August. The soil is very dry, and oats are needing moisture. The moisture in the soil only reaches down about twelve inches, and below that the soil is dry. Many wells are drying up. If the present drought continues, there will be very little red top produced this year, although the red top meadows are looking fairly well at this time. It is our impression that we are going to have a very dry summer.—Schultz Seed Co.

STOCKS WELL CLEANED UP.

MARYSVILLE, O.—The seeding season is practically over with clovers and grass seed. The demand generally has not been as satisfactory as we expected but owing to the long continued favorable weather the seedsmen have pretty well cleaned up their stock.

Trade on soy beans has been less than last year and owing to the large production of a number of varieties there will be a great deal of trading among producers and buyers.

There is a lively trade in seed corn. With fair prospects for clover seed we believe that this market is high enough.—O. M. Scott & Sons Co., D. G. Scott.

TOLEDO SEED MARKET.

TOLEDO, Apr. 25.—The seed season has just about completed its run and dealers are preparing to fold their tents and steal away until another day. Trade was very light this week and clover sold lower without much opposition. Stocks to be carried over are not large and should not be much of a factor in the price trend. Foreign crops were larger than expected and their surplus was the big factor in our clover price. Imports were larger than anyone anticipated and were mostly of good quality. October clover, the new crop future, was lower because of increased offerings. The support was too small to have any effect and prices eased off without any check. The crop reports are mixed and it is still too early to make predic-

tions. The dry spring has been none too favorable for clover in many sections and may affect the seed crop later. Any severe damage should be quickly reflected in the October as there is a good trade around the \$13.00 level.

Alsike was also lower and August sold down to \$12.90. The cash demand was a surprise to most dealers, but considering the discount under clover it was to be expected.

Timothy dropped in sympathy with other seeds and the trade was very small. Cash holders have been the principal seller. The September has met with good buying support in declines. Exports of timothy have been fairly large this year and stocks will not be as large in the carryover as at first thought.

CHICAGO SEED MOVEMENT.

Following is a statement of receipts and shipments of grass seeds at Chicago for the week ending Apr. 25, previous week, same week of 1924 and for the season to date, starting July 1 of the years indicated (amounts stated in pounds, 000 omitted):

	Timothy.		Clover.		Other.	
	Rcts.	Shts.	Rcts.	Shts.	Rcts.	Shts.
Week ..	449	345	7	6	122	181
Prev. wk.	387	746	73	93	205	43
1924	403	591	267	398	457	628
1924-25..	35,320	26,222	10,616	5,364	16,185	15,675
1923-24..	31,167	19,996	10,489	7,832	23,529	13,723
1922-23..	31,210	29,355	10,419	8,533	22,835	6,278

Timothy—Held unchanged and steady. Fair inquiry at quotations. No fancy seed here. Fair country run \$5.70@5.90 per 100 lbs., good country run about \$6.00@6.15, high grade \$6.20@6.30 and choice \$6.35@6.45.

Alfalfa Seed—Quiet, unchanged. Recleaned country lots at \$22.00@23.00 per 100 lbs.

Alsike—In small supply and good demand at firm prices. Fair country lots \$16.00@17.00 per 100 lbs. Good seed \$17.50@19.00, choice \$20.00@21.00.

Flax Seed—Easier. No. 1 Northwestern closed at \$2.80@2.83 per bu. of 56 lbs.

Clover Seed—Market steady; good inquiry. Country lots \$19.00@21.75 for 100 lbs., good \$22.50@23.50, choice \$24.00@25.00, fancy \$26.00@27.00 and Mammoth \$22.00@27.00, according to quality.

DULUTH FLAXSEED MARKET.

DULUTH, April 25.—While trading was slow in the flaxseed market during the last week firmness was shown with the price movement narrow. The trend was generally upward and on the net result of the six days' business spot and May seed gained 5/8 cents, and the other futures from unchanged to 3 cents.

The new September future was traded in for the first time on Wednesday, sales being put through at from \$2.50 to \$2.52 1/2. That trade was regarded with satisfaction as an indication that operators are disposed to hold bullish views regarding the outlook for business in new seed.

Receipts of seed were so light that they were not sufficient to make a spot market on some days. Crushers continued to offer premiums at 6 cents over the May price.

Specialists in the flaxseed are pursuing a conservative policy as regards increasing their commitments in view of the agitation for a reduction in the duty on linseed oil and the recommendation of the tariff commission that such action be taken. In view of the possibility of a duty cut, the linseed oil interests are taking steps to impress their views upon President Coolidge, pointing that any letting down of the tariff bars would result in a flood of cheap European oil into this country, and the dislocation of the domestic industry, thus hitting farmers who have been in-

creasing their flax acreages during the last two years on urgings that domestic seed should be grown in sufficient amount to take care of the home market and avoid heavy imports of Argentine seed, as has been the case up to the present. The present promise is for a larger acreage being seeded to flax over the Northwest this spring.

Receipts on this market during the week aggregated 14,034 bushels and with shipments of 65,408 bushels, stocks in elevators were brought down to 270,000 bushels. Supplies of Canadian seed in the elevators were practically cleaned out with a shipment of 41,000 bushels to Milwaukee early in the week. Remaining supplies of seed in the elevators are scheduled to be gradually fed out to crushing plants over this territory. Canadian seed is expected to be shipped down to Buffalo shortly to help to supply mills in that territory, its market being now upon a working basis.

Closing prices of flaxseed on the Duluth market on Saturday, as compared with the previous Saturday and the same period last year:

	Saturday.	Wk ago.	Yr. ago.
On track.	\$2.70%-76%	\$2.70-76	2.39%-49%
To arrive	2.70%	2.70	2.39%
April	2.70%	2.70
May	2.70%	2.70	2.39%
July	2.73	2.71	2.37½
Sept.	2.50	2.50	2.20

WEEKLY LINSEED REVIEW.

NEW YORK, April 27.—United Kingdom: The linseed situation in the United Kingdom during the past week has remained about steady. There has been a fair good business passing in both Plata and Indian seed.

Linseed oil remains dull with trade rather quiet.

The market for cotton oil rules steady with a good business being transacted in crude.

India: Shipments of linseed this week amount to 188,000 bushels compared with 384,000 bushels last week.

Argentina: Markets for seed in this country are slightly easier toward the close of the week. There have been freer country offers, but exporters have been absorbing fair quantities recently. Clearances of linseed are being maintained around three-quarters million bushels weekly. Port stocks are increasing and now aggregate 4,400,000 bushels compared with 4,000,000 bushels the week previous and 4,000,000 bushels at this time last year. Weather conditions fine. New crop preparations are making satisfactory progress.

KANSAS CITY SEED MARKET.

KANSAS CITY, April 25.—Hopes of local seed dealers were raised this week by rains in Texas. It was assumed that, in view of the crop losses effected by the long drouth in that state, there would be a big demand for forage seeds, especially cane and millet. Sales of forage seeds in other directions were moderate, but the market was slightly firmer. Trade in Sudan seed was fair, but supplies are so liberal that prices remained low. Alfalfa seed shipments were mainly to northern territory and moderate in volume. Inquiry for cow-

peas and soy beans showed improvement. Grass seed trade is practically over for the season.

Seeds are quoted in a wholesale way as follows, per cwt., sacked: Blue grass, \$20@30; timothy, \$5.50@7; red clover, \$25@34; sweet clover, \$10@14; alsike, \$17@23; alfalfa, \$17@23.50; red top cane, \$1.85; orange cane, \$1.85; black amber cane, \$1.70@1.80; red amber cane, \$1.80@1.85; German millet, \$4@4.50; common millet, \$3@3.50; Siberian millet, \$2.25@2.75; hog millet, \$2.25@2.50; Sudan, \$3.50@4.50; cowpeas, per bushel, \$4.50@5; soy beans, \$2.15@3.25.

WORLD'S BREADSTUFF SUPPLY.

The following table, compiled by the *Daily Trade Bulletin*, Minneapolis *Market Record* and Liverpool *Corn Trade News*, shows supplies of breadstuffs afloat for Europe, in store in the United Kingdom, large number of points in America, in Argentina and Australia on the dates named:

	Apr. 1, 1925. Bus.	Mar. 1, 1925. Bus.	Apr. 1, 1924. Bus.
Afloat for			
Europe	84,090,000	85,850,000	65,850,000
In store in			
U. K.	11,760,000	10,960,000	8,480,000
Arg.	11,110,000	9,250,000	10,730,000
Aus.	63,000,000	52,000,000	40,000,000
U. S.	108,769,000	124,971,000	111,282,000
Canada	80,026,000	84,333,000	23,320,000
Total	358,755,000	367,364,000	359,662,000

The decrease reported during March was equal to 8,609,000 bus., compared with 7,871,000 bus. decrease in February and 15,764,000 bus. decrease during March, 1924.

COAST GRAIN PRICES.

Quotations on grain, reported by grain exchanges on the Pacific Coast as of April 23, are as follows:

Feedstuffs

The Imperial Mills, Cambridge City, Ind., has installed a complete and up-to-date grinding department, known as the Greundler, Whirlbeater, which will grind ear corn, shell corn, oats, barley, wheat, rye, hay or any combination into a powder, if desired.

REMOVAL NOTICE.

Reynier Van Evera has been elected secretary of the American Corn Millers' Federation, effective May 1, and the headquarters of the federation will be removed to Victor building, Kansas City, Mo. All communications for the Federation should be directed to the Kansas City headquarters, T. M. Chivington, whom Mr. Van Evera succeeds, has resigned to take the position of secretary of the Southeastern Millers' Association, with headquarters, 1527 Broadway, Nashville, Tenn.

NEW PLANT RUNNING.

The new feed and corn meal mill and warehouse of the Acme-Evans Co. at Indianapolis, Ind., is now in full operation. The new plant takes the place of the one which was destroyed by fire late in 1923. The plant is being used solely for the manufacture of corn meal and of dairy cattle and chicken feed, and has a capacity of two hundred tons of chick feed daily.

OIL MEAL MARKET.

The oil meal situation is about unchanged. It is difficult to get immediate shipment and there is very little being offered for forward months. Prices are holding about steady in the northwest but are considerably higher in the east, this being primarily a reflection of improvement in export cake prices. We understand the demand for export has been very good during the week and values are up from \$1.50 to \$2.00 per ton.—*Bertley Bulletin, Chicago, April 25.*

BUYS FEED PLANT.

The Eastern States Farmers' Exchange has bought the Buffalo plant of the Arcady Farms Milling Company, and will use it commencing May 1 for the manufacture of its line of dairy, poultry and horse feeds. The mill is now being placed in condition to handle the large volume of feed and grain sold by the Exchange in increasing quantity each year and operations will be started at an early date.

Charles B. Lee has resigned as general manager of the Armour Grain Company to become general manager of the Eastern States Cooperative Milling Corporation, the subsidiary through which the Eastern States Farmers' Exchange will operate its Buffalo plant.

The Eastern States' Farmers' Exchange was founded in 1917, and is now owned by some 14,000 farmers in the New England States and Delaware. In 1923 the exchange distributed 88,442 tons of feed and grain among its members which it purchased for them from private manufacturers. In 1924, 103,000 tons of feed and grain were so distributed, and 1925 is showing a healthy increase over the preceding year.

All Eastern states manufactured feeds are put out on the open formula basis, the formulas for the exchange's dairy rations and horse feeds having been

made by the New England Committee of the College Feed Conference Board, while the formulas for their poultry feeds are those recommended by the poultry specialists at the New England colleges.—*Quentin Reynolds, Field Organization Mgr., Springfield, Mass.*

FEED DEALERS TO MEET AT NEW ORLEANS.

The seventeenth annual convention of the American Feed Manufacturers' Association will be held at the Roosevelt Hotel, New Orleans, on May 7, 8 and 9, at which time the following program will be carried out.

Thursday, 9:30 A. M.

Registration.
Meeting Called to Order at 10:00 o'clock.

Address of Welcome—Hon. Harry D. Wilson, Commissioner of Agriculture, Baton Rouge, La.

Response.
Annual Address of President—Mr. E. W. Elmore.

Annual Address, Chairman Executive Committee—Mr. W. E. Suits.

Annual Report of Secretary—Mr. L. F. Brown.

Annual Report of Traffic Manager—Mr. R. M. Field.

Annual Report of Treasurer—Mr. W. R. Anderson.

Address—Dr. G. L. Bidwell, President, Association of Feed Control Officials of the U. S., Washington, D. C. Subject: "The Food and Drugs Act and the Feed Industry."

Appointment of Committees—The President.

Announcements by Local Committee—Mr. B. T. Manard.

Miscellaneous Business.
Adjournment.

Thursday, 2:00 P. M.

Address—Mr. J. J. Donohue, General Claims Attorney, Louisville & Nashville Railroad Co., Louisville, Ky. Subject: "Are the Railroads Entitled to a Legislative Holiday?"

Address—Prof. Harry R. Lewis, Davisville, R. I. Subject: "The National Poultry Council."

The balance of the afternoon will be devoted to a general discussion of matters relating to the industry.

Friday, 10:00 A. M.

Address—Dr. W. F. Hand, State Chemist, A. & M. College, Mississippi. Subject: "A New Period in Feed Control Work."

Address—Mr. David Thibault, Editor, Modern Farming, New Orleans, La. Subject: "Educational Obligations of the Feed Manufacturer."

Address—Mr. A. F. Seay, Vice President Ralston Purina Company, St. Louis, Mo. Subject: "Ethics in Advertising."

No Afternoon Session.

Saturday, 10:00 A. M.

A business session concluding with the election of officers and meetings of newly elected board of directors and executive committee for organization.

Ample plans have been made for entertaining the ladies, with several functions for both the ladies and gentlemen.

Chicago and vicinity members and guests will leave in private cars over the Illinois Central railroad Tuesday evening, May 5, at 6:15 p. m. If you can join the party and have not already made reservations, do so at once.

COTTONSEED MEAL.

KANSAS CITY, April 25.—The new feature in the cottonseed meal trade this week was an invasion of Oklahoma by Galveston exporters. An advance of 50c to \$1 a ton was the result. Oklahoma mills asked \$36.50 for carlots. Holders in Arkansas also felt the bullish urge, though their reason was not made clear. They asked \$37.50@38.50, as against

\$35.50@36 a week ago. Texas made no tenders northward on account of the export demand and local buying accostioned by the drouth in that state. Kansas City dealers admitted no improvement in their feeding sales, which have been moderate for some time. The carlot price here was raised 50c a ton, to \$41.80, while ton lots sold for \$41 more.

Despite lower priced oil, the linseed meal market ruled stronger. Curtailed production was the cause assigned. Mills in Minneapolis advanced their prices \$1 a ton, to \$40.50, with pea size at \$41.50. Kansas City handlers reported a continued slow trade, but they raised the carlot price \$1, to \$44.80. Ton lots here were held at \$48.80.

Tankage and meat scrap were unchanged. In each product the carlot price was \$55 a ton, while ton lots sold at \$60. There was a light demand for tankage, attributed to small hog feeding. Poultry interests were fair buyers of meat scrap.

NEW YORK OATS MARKET.

Oats receipts 288,000 bushels bonded, 108,000 bushels domestic. There was but little change in values at any time, prices fluctuating in sympathy with the other grains, and the market was without independent action. The primary movement is small and probably will remain so for an indefinite period. This is causing a heavier demand upon store stocks throughout the country at the expense of the visible supply, which this week showed a decrease of about 4 million bushels, with the prospect of another liberal decrease again on Monday. The opening of lake navigation will cause Northwestern oats for Eastern distribution to be more freely offered and they doubtless will receive a preference over Western rail oats at prevailing discounts. Export sales of Canadian oats are daily reported, there being no demand worth noting for American oats. —L. W. Forbell & Co.

MINNEAPOLIS FLAXSEED LETTER.

MINNEAPOLIS, Apr. 25.—Weather in the Northwest the past week and the condition of the soil are very favorable for the seeding of flax. The Van Dusen Harrington Company's crop report of April 22 says:

"Present indications point to an increase in the flax acreage, both in North and South Dakota, particularly in the districts west of the Missouri River, where much new ground is being broken."

Of late, receipts of flax in Minneapolis are just about what one of the three larger mills would consume if running at capacity, and of the three smaller mills one is closed for the season. We know that after May 1st several of the larger mills west of New York harbor will have no stock of oil except what is daily produced, and oil is being quoted at cost or less if produced from present price seed. Another interesting condition is that seed is quoted highest in countries that have the largest stocks—Canada and Argentina. Lake shipments have begun from Canada. There is a slight increase in port stocks in Argentina and shipments for the week were 732,000 bushels (120,000 to the U. S.) as compared with 836,000 bushels last year.

Interested parties in Washington have urged newspaper correspondents to claim that the paint, varnish and other industries have petitioned the tariff commission that the rates on linseed oil can be reduced. The facts are that only three or four small paint manufacturers signed the petition and one or two of

these recalled their signatures, indicating it was given under misrepresentation. On page 172, official stenographer's minutes before the U. S. Tariff Commission, Mr. Henry M. Calman, president of the National Varnish Manufacturers' Association, states:

"What I particularly want the commission to understand is that in view of the fact that the petition was presented here by Mr. Gordon in behalf of the varnish industry, the paint industry and the linoleum industry, and that I understand that the paint industry has not been represented at all in this hearing, and that only a fraction of the linoleum industry has expressed itself as willing to be made a party to the petition, the varnish industry never intended that the petition should be presented on its behalf."—Archer-Daniels-Midland Company.

PRO-LAC BUTTERMILK FEEDS.

A particularly nice product is being turned out of the mills of the Pro-Lac Milling Co., Des Moines, Ia., in buttermilk feeds. Quality is the dominant

factor in their operations covering the full line of starting, growing mashers, laying mashers, poultry fattener, pig meal, and hog feed vitalizer. Carefully selected ingredients are the back bone of the success enjoyed by the feed milling company in their central state and eastern state distribution. Among the pig meal ingredients used are: Dried flake buttermilk, blood flour, oat flour, bone meal, ground peanut kernels, oil meal, wheat middlings and salt. Pro-Lac Pig Meal is a most unusual feed in that it contains no fillers. Everything in Pro-Lac Pig Meal is there for a purpose and all ingredients are almost wholly digestible. Buttermilk contains lactic acid which acts as a stimulator of digestion, aids in complete assimilation of the other feeding elements.

Buttermilk mashers and other chicken feeds are similarly milled from high grade materials and put up under Pro-Lac brand. Several official tests have endorsed these feeds throughout the United States and a particularly interesting one is reported from W. G. Dunsmore of the Central Experimental Farms, Ottawa, Canada. It showed average daily gains in hogs of 1.4 pounds at a feed cost of 6.16 cents per pound. The manufacturers during extended tests in 1923 produced pork at less than 4 cents per pound.

Samples of their feed and prices will be submitted on request.

FEED MARKETS.

CINCINNATI.

Cincinnati, April 24.—Scarcity of offerings and difficulty of securing enough bran and middlings to meet the improved demand caused an additionally stronger mill feed market here the past week and further advances of \$1 to \$1.50 for bran and 50c to \$2 for middlings. The oversold condition of many mills and firmness with which surplus supplies are being held, together with a smaller production due to the closing down of several nearby mills was the reported contributing influence of the strengthened market. Quotations represent 100-lb. sacks: Soft winter wheat bran, \$31.50@32; hard winter wheat bran, \$31.50@32; spring wheat bran, \$29.50@30; standard middlings, \$30@30.50; soft wheat middlings, \$38@38.50; gray hard middlings, \$38@38.50; mixed feed, \$34@35; No. 1 alfalfa meal, \$29; hominy feed, \$39.50@40.

BOSTON.

Boston, April 25.—Prompt shipment, per ton: Spring bran, \$31@31.50; winter bran, \$33@33.50; middlings, \$31.50@33; mixed feed, \$34.50@41; red dog, \$46; hominy feed, \$43.50; stock feed, \$44; oat hulls, reground, \$45; cottonseed meal, \$44.50@49.50; linseed meal, \$45.25. MILWAUKEE.

Milwaukee, April 25.—Mill feed prices were materially strengthened in the Milwaukee market during the past week. Quotations advanced for practically all items and the general tone of the market was firm and strong. Receipts were light and all offerings were readily absorbed. Demand for future as well as prompt shipment was comparatively good and future bookings were at prices from 50c to \$1 higher than current quotations. Prices now are: Winter bran, \$26.70@28; spring bran, \$26.50@27; standard middlings, \$27@28; flour middlings, \$32@33; red dog, \$39.50@40; rye feed, \$25.50@26.50; linseed oil meal, \$41.50@42; cottonseed meal, \$40.50@45; hominy feed, \$35@35.50; oat feed, \$6@6.50; gluten feed, 30 days, \$32.80; all in 100-lb. sacks, carlots, f. o. b. Milwaukee.

MILWAUKEE.

Memphis, April 25.—Mixed feed people report slight improvement in shipments, but buying still of hand-to-mouth sort. Alfalfa meal is very dull but slightly higher to buy, No. 1 quotable at \$26.50@27.50. Mill feed is firm and higher but buyers taking just as little as possible. Wheat bran quoted as low as \$30 for hard wheat variety and as high as \$31 for soft, while hard wheat gray shorts quoted at \$36@36.50 and some mills asking as high as \$37.50@38 for soft for immediate shipment. Cottonseed meal firm and higher to sell, mills believing in higher prices. Spot or immediate, 41 per cent, quotable at \$38.25, while 43 quoted from \$40.50 to as high as \$41.

DULUTH.

Duluth, April 25.—Advances extending from 50c to \$1.25 were staged in feeds during the last week. Some improvement was shown in demand and the mills reported fair bookings. Closing prices per ton follow: Bran, \$25; shorts, \$26; Boston mixed, \$26; red dog, \$38; flour middlings, \$30.50; ground oats, \$28.75; No. 1 ground feed, \$36.75; No. 2 ground feed, \$34.75; No. 3 ground feed, \$32.75; cracked corn, \$40.50; coarse cornmeal, \$40.50.

NEW YORK.

New York, April 25.—The feature in the feed situation during the past week was the scarcity of western grades and the generally higher market at all points. Some of the leading mills were not offering at all and stocks here have reached small proportions.

City feed was stronger in sympathy with this movement, but actually price changes were narrow.

City bran was quoted at \$31.50; middlings \$32.50, and red dog \$45, while western bran ruled at \$32.60, standard middlings \$33.60, and red dog \$46.50@47 per ton.

BALTIMORE.

Baltimore, April 25.—The spot market is steady to firm on spring wheat bran and western middlings, for which there is a fair jobbing inquiry. Hominy feed is in ample supply and dull. Gluten feed is being offered by re-sellers at somewhat under mill limits but is moving slowly. Alfalfa meal quiet. Dried beet pulp getting harder to sell as we go into the season for pastures. Quotations follow: Spring wheat bran, per ton, 100-lb. sacks, \$29.50@30; western middlings, per ton, 100-lb. sacks, \$30@30.50; hominy feed, per ton, \$40@41; gluten feed, per ton, \$38.75@39; per ton, \$37@37.50.

MINNEAPOLIS.

Minneapolis, April 25.—The Minneapolis feed market during the past week showed more real pep than it has at any time since the turn of the year. Old heads in the game seem surprised to find the outside interested in the futures at this time of the year, saying that it is almost unprecedented for inquiry for shipment as far ahead as July, during April. But it must be

remembered also that the output from Minneapolis mills has been the smallest in years and without any doubt the same condition has maintained among the winter wheat mills as well.

During the past week there was heavy buying from sources that are usually taken care of by Kansas City and St. Louis. Bran held more than firm while the heavy feeds all showed fair increases in asking prices for the past seven days.

Based on today's quotations, standard bran brings \$24; pure bran, \$24.50; shorts, \$25.50@26; red dog, \$38.50@41; flour middlings, \$29@30.

Oil meal is holding firm, crushers and jobbers asking \$40@40.50 for current offerings.

Weekly shipments of feed from this market totaled 11,230 tons this week vs. 9,904 tons last week and 11,299 tons a year ago.

Season shipments were as follows: Since Jan. 1, this year, 191,181 tons vs. 237,675 last year; since Sept. 1, this year, 438,494 tons vs. 508,579 tons last year.

PHILADELPHIA.

Philadelphia, April 25.—The market for feedstuffs is firm under very light offerings and a good demand. Quotations are for carlots in 100-lb. sacks at cost per ton: Winter bran, \$35@35.50; winter middlings, \$33@34; spring bran, \$32.50@33; standard wheat middlings, \$33@33.50; flour middlings, \$38.50@42; red dog, \$46@47; rye middlings, \$32@33; reground oats feed, \$13; fine yellow hominy, \$42@43; fine white hominy, \$42.50@43.50; cotton seed meal, 36% protein, \$43.75@44; cotton seed meal, 41% protein, \$46.25@46.50.

FEEDSTUFF SITUATION.

The demand for immediate prompt is very good with some slight interest for May at present quotable prices. There is considerable sellers interest for shipment May to August inclusive at slight discounts under present prices for prompt 30-day shipment. However, the demand for this shipment is spotted and very little actual buying and buyers interest. Standard middlings are commanding a premium for immediate and transit shipment.

MINNEAPOLIS.—Bran, \$23.50 to \$24; standard middlings, \$24.50 to \$25; flour middlings, \$30.50 to \$31; red dog, \$38 to \$39.

CHICAGO.—Bran, \$26.10 to \$26.60; standard middlings, \$27.10 to \$27.60; flour middlings, \$33.10 to \$33.60; red dog, \$40.60 to \$41.60.

KANSAS CITY.—Bran, \$26; gray shorts, \$32.50 to \$33.

St. Louis.—Bran, \$28.40; gray shorts, \$34.90 to \$35.40.

ALFALFA MEAL.

Demand for immediate quick and prompt is sufficient to take care of the supply. In fact, the demand has advanced prices a little. Hay is more easily obtained at old prices as farmers are working in the fields and they must be offered a little higher price for hay in order to induce them to haul it to

KANSAS CITY, MO.

the alfalfa mills at this time of the year. Nominally quoted second-hand bag basis, choice, \$23.50; No. 1, \$26.50; No. 2, \$21.50. Fine ground grades \$3 to \$4 a ton premium.

REGROUND OAT FEED.—Nominally quoted \$7.50 to \$8; unground, \$9 to \$10. The curtailed production of rolled oats results in a falling off of the accumulation of the by-products and with a little additional demand for this by-product, slight advances have been in order with a number of the mills willing to sell much beyond May shipment at present prices.

LINSEED OIL MEAL.—A fair demand at present prices, though it appears that production is increasing slightly as new stocks of flaxseed are arriving at crushing points which will enable the mills to run more full to capacity than heretofore during the recent weeks.

HOMINY FEED.—The demand is ample to take care of the present supply. Various prices quoted depend upon the fat content which the hominy feed carries. Nominally quoted white, \$37 to \$39; yellow, \$36 to \$38. In bulk where available, \$1.50 to \$2 a ton less.

DRIED BUTTERMILK.—Demand is strong and has been for the past few weeks, the result being that the market is well cleaned up. There has been no change in prices, which are as follows: Creamery in carlots, 6% c per lb. and L. C. L. up to 7% c.

COTTONSEED MEAL.—There has been some improvement in the market, the demand being somewhat stronger. With indications pointing to a smaller cotton crop this year, and consequently higher prices a clean-up is looked for before the new crop. Meal is nominally quoted for 43 per cent protein, Chicago basis, at \$45.00.

PACKERS' PRODUCTS.—Demand is slackening somewhat, and as producers are in the midst of their fertilizer business, no special effort is being made to dispose of feed products. Today's quotations are as follows: Meat scraps in carlots f. o. b. Chicago, \$55@60 a ton; 60 per cent protein digester tankage, \$50@55, with some manufacturers quoting \$50, while others have not yet

changed their prices, which remain at \$50; raw bone meal, \$50.

GLUTEN FEED.—Conditions in the market just now are rather unusual, the entire output of some of the manufacturers being all contracted for. Today's quotations are: Gluten feed in bulk, \$35 a ton; sacked, \$37.80. Gluten meal of 40 per cent protein, \$45 in bulk and \$47.80 in sacks.

CHARCOAL.—Seasonable demand at a price basis f. o. b. Chicago; Milwaukee carlots, \$33@38 per ton, depending upon size of charcoal. Less than carlots, \$35 @50 per ton, standard units of 50-lb. burlap bags (for the finest grades, paper lined) in 13-ton minimum cars.

FARMER'S TAX INCREASED.

House Bill 489 of the Illinois legislature was recently favorably reported out of the committee at Springfield. It requires the purchase of tax stamps by feed manufacturers who shall affix them to feed packages at the rate of 16c per ton. The bill is wrong in principle and the tax is entirely too heavy, even if the details of the measure justified its passage. The present Illinois law requires registry of all feed brands at \$25 annually, which is absorbed by the mill. The new scheme, however, could be passed along to the consumer, presumably as a separate item on the bill of sale covering each lot of feed, and if Mr. Farmer Feeder or Dairyman is posted he will, and should, make himself known in opposition to the bill.

The Philadelphia & Reading Railroad is reported to have awarded the engineering contract this week for substantial changes in their terminal elevator at Philadelphia. This is relatively a small house and the contract is in addition to other news of the last month or so concerning the large contract for an entirely new elevator to be erected by the same railroad shortly.

When you have something on your mind—a query or news or a suggestion—of interest to the grain trade, write it out and send it to THE PRICE CURRENT-GRAIN REPORTER.

RANGE OF CONTRACT GRAIN PRICES.

Following is the daily and weekly range of quotations for contract grain prices at Chicago in April, the March range and the range previous to March 1 of the deliveries indicated:

Alfalfa Department

TOO MUCH DRY WEATHER.

LA JUNTA, COLO.—An extremely dry winter and no moisture yet this spring. Spring is two weeks earlier than normal. Less alfalfa seeding than usual on account of dry weather.

Stocks cleaned up well and practically no carryover. With seasonable moisture within the next three weeks would insure the largest acreage of all kinds of crops ever planted in the Arkansas Valley. Farmers are feeling more optimistic about general conditions and another year of good crops at prevailing prices would help us all mightily.—*La Junta Trading Co., R. C. Todd.*

ALFALFA IN CALIFORNIA.

LOS ANGELES, CAL.—With regard to the alfalfa situation in California at this time, would say that just at present old hay is practically cleaned up. The first cutting Arizona hay has practically all been marketed. Therefore, the hay market at the present time is very firm owing to light arrivals.

There will be little first cutting San Joaquin Valley hay coming on this market owing to the fact that late heavy rains throughout that section has brought up the weeds and fowl grasses, making the hay unsuitable for our market.

Prices the last few weeks have been very firm at \$24 to \$26 per ton, f. o. b. cars Los Angeles. We do not look for any lower price until the second cutting is on the market which will be in approximately three weeks. Indications are that there will be a heavy tonnage of alfalfa cut throughout the state during this season, therefore do not look for the high prices which have prevailed during the past year.—*Nicholls Grain & Milling Co., A. M. Thayer, Purchasing Dept., April 17.*

ALFALFA MEAL MARKET.

KANSAS CITY, April 25.—Demand for alfalfa meal is reviving in accordance with expectations of manufacturers, who patiently awaited a turn from the dead condition of the last two or three months. Apparently the mixed feed interests have recovered from their overbought position. There is buying for both April and May shipment. The market has a higher tendency, owing to stronger hay prices. It is difficult to secure desirable hay for less than \$14 a ton. No. 1 meal was unchanged this week, but choice and the two lower grades were marked up 50c a ton. Carlot quotations were: Choice, \$25.50@26.50; No. 1, \$22.50@23.50; No. 2, \$18.50@19; No. 3 or brown, \$17.50@18.

Unimportant changes were reported in the grain-molasses price list. Orders for horse and mule feeds and for both scratch and mash poultry feeds were good. There were moderate sales of dairy, hog and cattle feeds. Carlot quotations, per ton, are: Dairy feeds, \$36.46; cattle, \$39.44; hog, \$45.51; pig, \$68; horse and mule, \$33.43; alfalfa-molasses, \$26.33.50; scratch poultry, \$48@53.50; mash poultry, \$49@75.

CHICAGO GRAIN STOCKS.

Wheat stocks in all positions decreased 593,000 bus. last week, corn 106,000 bus., and oats 2,445,000 bus., while rye increased 358,000 bus. and barley 4,000 bus. Details follow, last three ciphers omitted, except in the totals:

	Public.	Private.	*Total.	Last yr.
Wheat	352	2,779	3,139,000	13,542,000
Corn	4,438	7,851	12,289,000	4,488,000
Oats	4,013	9,751	13,764,000	3,335,000
Rye	2,506	142	2,648,000	1,889,000
Barley	2	266	268,000	178,000

*Includes 58,000 bu. of wheat afloat.

THE WHEAT MARKET OUT-LOOK.

In their "Wheat Market Outlook," Bulletin No. 1, dated April 27, Charles Sincere & Co., in summing up the situation, say: "If domestic disappearance in the United States were to be abnormally light and an extremely small amount should be carried over, it is possible that this country could still export 30 to 40 million bushels of old wheat. Some new wheat can be cleared in July. The records show that our July exports in the last 15 years have ranged from as low as 3 million bushels to as high as 34.6 million bushels. Perhaps 25 million bushels could be furnished this year if prices were made attractive enough. In short, the United States could furnish the 60 million bushels required, if necessary. But, this quantity would hardly be forthcoming without a very decided rise in prices. Instead of such an extreme strain on the supply in the United States the necessary amount is more likely to come in part by a closer cleanup than indicated for Canada and the Southern hemisphere. But, it seems that furnishing the amount needed, as estimated by Broomhall, is quite likely to result in considerable stimulation of prices eventually.

"The fact that the new winter wheat crop in the United States is unpromising and that India's crop is so short that it may be an importer later on, adds to the significance of the close adjustment in the old crop. The new spring wheat has gotten away to an unusually fine start, but it is to be remembered that the yield per acre last year was 30 per cent above the ten-year average and it will take a fine season to equal that record. European crop prospects are said to be better than last year, which is one reason for the lack of aggressive export demand. The United States Department of Agriculture points out that with average abandonment and average yield per acre, the European yield on the acreage reported to date would be less than 1 per cent greater than last year.

"Of course, the season may develop unusually favorably the world over. If that be true, it can hardly help but have a weakening effect on the wheat situation, but it will not eliminate the narrow margin of supplies of old crop wheat for the balance of the season."

BROOM CORN MARKETS.

Nothing outstanding has transpired on the market the past week. Sales have been effected, however, the movement has not compared with the amount sold and shipped during the earlier weeks of the month. All in all, warehouses consider that trade is moving along as well as could be expected in view of the supply that has been available for the past two years.

The tendency is to trade on the market and await future developments. While it is conceded that manufacturers in many instances have protected themselves for the future, it is also believed that the cutup of broom corn the past year has been above the average. Manufacturers are now drawing on their storage corn on this market, while other factories who carry a conservative stock state that they are making replacements and keeping their stocks to a normal basis. This factor is expected to move corn continually from time to time, as well as the buys of factories who have adopted the "buy as you need it policy."

No change can be noted in the tone of the market, prices remain on the same average level as heretofore. Dwarf being held from around \$65 on a limited amount of low grade, upwards to \$125

HUGE FIRE IN CHICAGO.

Chicago's worst elevator fire in 20 years on April 22 gutted two huge structures under lease by the Grain Marketing company and doing damages estimated at \$2,250,000. Spontaneous combustion caused the fire, it is believed.

Nearly half of the fire apparatus of the city was summoned in the fight to stop the threatened destruction of surrounding lumber yards, packing plants, other grain elevators, coal yards and the flimsy homes of hundreds of poor families.

Fire boats aided in the fight. The boats edged up the river near the Halsted street bridge, two miles south of the loop, and poured huge streams of water onto the burning structures. Nearly a score of fires started by flying brands were extinguished.

The heat was so intense that at times firemen were unable to come within three blocks of the burning area. Many firemen narrowly escaped injury or death when the wall of one structure collapsed.

Both were full of grain, with about 2,000,000 bushels equally divided between corn and oats. They were insured in the Underwriters' Grain Association, which carried \$145,000 on the buildings and \$1,006,000 on the grain. The loss is total on buildings, but considerable salvage is expected on the grain.

Both plants were operated by the Grain Marketing Company, the cooperative farmers' organization. The Grain Marketing Company had a small amount of grain in the houses, the bulk of it being for various individual holders.

The construction of a new harbor elevator is under way at Halifax, Nova Scotia, and it will be in operation by the opening of the winter season in Oc-

RELIABLE Standard Blue Flame HOVER

"Foolproof and Safe"

Has newest improvements. Saves time, money and trouble. Nothing to wear out. Chicks grow faster and stronger. Built of galvanized steel. Special burners give steady flow of oil and even flame. Our 1923 style is perfection itself.

Reliable Coal Burning Brooder

Built of strongly bolted, heavy gray cast iron. Will last a lifetime. Greater coal capacity. Burns hard or soft coal. Has two double disc wafers which control heat regulation. Has self-ventilating canopy. Specially designed fire bowl keeps grate clean. Used by largest poultrymen.

Reliable Standard Incubators

50 to 1100 Eggs
THE LEADER OF THEM ALL! Every Incubator proves Reliable reputation. There is a Reliable incubator built especially for your needs.

Write us your requirements, and ask for Poultryman's Guide; it's Free.

Reliable Because Right

tober. The projected capacity is at least 1,000,000 bushels, and the foundations put down would carry an even larger quantity.

WINNIPEG.

Geo. H. Meacham, Correspondent.

The week has been notable for a decline in the volume of trading in futures, narrowing fluctuations and a stagnating cash wheat market. The market is undoubtedly nervous and switches up and down on influences seemingly of small importance, but it is quieting down to something like normal conditions. Public interest has been reduced to small proportions. Brokers report that the volume of open accounts is at present small.

New crop conditions are coming to the front. The U. S. government May report will be waited with much interest and spring wheat conditions are now becoming an important factor. Seeding south of the line is complete. In the Canadian west most of the land that was ready for seeding has been planted. There is, however, a very large acreage of spring plowing to be done and it is generally believed that there will be little if any increase in acreage in any grain.

Fred J. Anderson of the British Empire Grain Co. in a summary of the wheat situation places the wheat in the west at 8,000,000 in country elevators, 6,000,000 in transit and 5,000,000 bushels on the farms yet to market after allowing for seed and feed. With May at a premium over July, elevator companies will not be inclined to hold wheat and it is expected that they will lose no time in shipping out their stocks. It looks as though wheat will be very scarce in July.

The flour trade is stagnant and the milling demand for wheat for the present nonexistent. Several of the larger Canadian mills are shut down for lack of export orders. Domestic buyers have not come in on recent declines to the extent expected. They seem to be looking for yet lower prices. The early spring has adversely affected the market for mill feed, but a moderate trade is passing.

The coarse grain markets have shown great activity during the week. There has been a big export business in oats and barley. All grades of oats but No. 1 feed have been in good demand. The demand for barley has been for the tops, but the week end saw more interest shown in the low grades. Rye is a drag. Flax futures are inclined to drag, but there has been considerable business passing in cash flax and a good inquiry from both U. S. and Canadian crushers.

Hay Department

J. VINING TAYLOR, RESIGNED.

Sec'y-Treas. J. Vining Taylor of the National Hay Association, Winchester, Ind., has resigned. His long experience and universal satisfaction will make it difficult indeed to fill his position. The change will not be an entire loss to the hay trade, however, although geographically his Central state friends may not see him often, for he is now secretary and treasurer of the Star Hay Co., 335 Central Ave., Los Angeles, Calif. It is our understanding, however, that he continues the hay association work until after the Cedar Point convention in July, but the publishers of THE PRICE CURRENT-GRAIN REPORTER wish him the best of success in his new work and the continuance of the qualities which made him such a popular secretary will do much to build up the alfalfa shipping business of the Star Hay Co.

KANSAS CITY HAY NOTES.

T. J. Tanner, Correspondent.
C. S. Scott of Scott & Co. was admitted to membership in the Kansas City Hay Dealers' Association Tuesday.

Between 60 and 80 persons are expected to attend the banquet of the Kansas City Hay Dealers' Association April 30, at the Hotel Savoy. Each member will be permitted to bring a non-member, who may be a lady or a gentleman. The affair will be entirely informal. It is intended to be a friendship-promoting enterprise and a general good time, with speeches restricted to local talent.

Extremely low prices ruling on prairie hay are interfering with sales of timothy in the South. Timothy is unable to compete, and is salable only where especially desired.

Assuming that prairie hay is selling below cost in many instances, some local dealers are fearful that producers will be so discouraged that little of that variety will be harvested this year. However, as Stewart Brubaker figures it, the weather and crop situation may change so that farmers will see the necessity of saving all kinds of feed next summer.

In his weekly crop summary, J. C. Mohler, secretary of the Kansas State Board of Agriculture, says pastures and alfalfa in Kansas are far ahead of the season. Mr. Mohler's correspondents

predict that cutting of alfalfa will begin in the southeastern counties before May 15 if conditions continue favorable.

Dairy qualities of alfalfa hay are in good demand, with scarcity of offerings. Orders are both local and for scattered shipment. Mills are better buyers of the lower grades since the meal demand improved. While the country may still have a liberal reserve of hay, the farmers are too busy with spring work to bale and market much hay.

In response to a suggestion from J. C. Suttie, chairman of the transportation committee of the National Hay Association, President N. C. Campbell and D. B. Tilson of the Kansas City Hay Dealers' Association will attend the Western Trunk Line committee meeting in Chicago April 28, when the request of Colorado hay and alfalfa meal interests for a readjustment of the milling-in-transit freight rates on eastbound hay will be considered. The Kansas City men are in favor of maintaining the present arrangement. If the railroads yield to the demand for a change, the matter will be taken before the Interstate Commerce Commission.

HAY CONTRACTS INVALID.

Contracts of the Northwest Hay Association, a cooperative enterprise, with 1,200 members in Yakima, Kittitas, Benton, Franklin and Walla Walla counties, Washington, were held invalid last week in a ruling handed down by Superior Judge A. W. Hawkins. He dismissed an action filed by the association against George M. Chase, Grandview, to collect damages for alleged failure to deliver his hay crop under contract.

When the association was formed, its promoters wrote contracts with farmers which stipulated that the contract should not be binding unless 75 per cent of the hay in the district covered by the association was signed up. Judge Hawkins ruled that members of the committee which determined the 75 per cent had erred in that they used only the railroad shipping figures.

Counsel for the association announced that an appeal would be taken from the decision of Judge Hawkins.

HAY SITUATION UNSATISFACTORY.

MORAVIA, N. Y.—The hay situation is about as unsatisfactory as it has been in a good many years. There is a large surplus of hay back on the farms, in fact a much larger percentage of the crop is back than there has been at this time of the year for a long time. A large percentage of this hay is just fair quality, and is the kind of hay which there is very little or no demand for

North & Company

Receivers—Shippers

Hay, Grain, Millfeed, Alfalfa Meal
Live Stock Exchange Kansas City, Mo.

from the trade. There is quite a prospect that most of this fair stuff will have to be carried over by the farmers. There is not a lot of real good hay back, but on account of the large tonnage of low grade, it is hard to get what the good stuff is worth.

It is too early to tell anything as yet about the new crop, and of course if there should be any conditions to affect the new crop, that would perhaps help the marketing of the old crop for the balance of the season. But present indications are for market to continue dull for the next few months.—C. S. Mead & Co., Inc., by F. A. Wheat, April 22.

HAY CONDITION IN NEBRASKA.

James C. Suttie, chairman transportation committee of the National Hay Association, and a close student of market conditions, has this to say about the western crop in northeastern Nebraska around Blair and Tekamah: It is his opinion that more than 50 per cent of the alfalfa crop was winter killed. Further west in central Nebraska, east of Grand Island, he believes 40 per cent has been winter killed, and west of Grand Island, a spotted condition prevails.

HAY MARKET REVIEW.

The hay market was unchanged to dull during the week April 20-25 with only a few markets displaying firmness, according to the Weekly Hay Market Review of the U. S. Department of Agriculture. Offerings of top grades continued light and this hay moved readily, but inferior hay was slow sale and low grades were practically unsalable in some markets. Buyers were taking ordinary hay for immediate needs only, expecting that there will be an ample supply of this quality for the rest of the season. Pastures generally were in satisfactory conditions except in the southwest where drought persisted.

Timothy held steady. The Boston market was practically unchanged and light receipts at New York resulted in higher prices while only the better grades were wanted at Pittsburgh. Receipts were liberal at Cincinnati and some hay was carried over from day to day while top grades were easier and common grades were almost unsalable. The demand at this market was light with slackened feeding while dullness in the coal market reduced the shipments to West Virginia and Kentucky mines. Arrivals at Chicago continued light and all sound hay sold readily while timothy held steady at St. Louis and Kansas City.

Alfalfa ruled steady with light receipts and reduced demand. Good hay sold readily at Omaha but damaged and grassy alfalfa was slow sale while low grades were not wanted at Kansas City. Dairy hay was wanted at this market and the mills bought sparingly while the movement to the south and southeast continued small. Alfalfa was quiet in California markets with abundant pasturage reducing the local demand. Some alfalfa had been shipped from Kansas City to Atlantic coast ports but the prices received for these shipments were unsatisfactory.

Prairie was easier. There was practically no demand for feeding prairie at Chicago but the market held steady for good quality hay at St. Louis and at Minneapolis and St. Paul. Receipts were light at Omaha and prices were slightly higher on the higher grades but the arrivals at Kansas City exceeded the limited demand and the offerings were moving slowly at the bottom of the quotations. The stock yards were not active in the market and the shipping trade was light.

HAY MARKETS.

CINCINNATI.

April 27.—There was little change in values of hay since last week's review of the market, but a depressed condition and a lack of interest was at all times present. Receipts were fairly liberal with a very noticeably light demand for any kind below the No. 2 grade, which necessitated a larger carry-over of cars of the undesirable quality from day to day. The abundance of grass in the meadow lands and pleasant weather for outside feeding, affected buying to a large extent from interior points, while the extremely dull conditions at present existing in the coal producing sections of the south was also a very weakening influence of the market. As a whole, prices averaged lower with top grades of timothy also affected. Good light mixtures held fairly steady and choice clover was unchanged, but common of all kinds was unsalable. The country movement shows no abatement and because of this, large surplus on farms is expected to continue liberal.

No. 1 timothy, \$17.00@18.00; No. 2 timothy, \$16.00@16.50; No. 3 timothy, \$13.00@14.00; threshed timothy, \$8.50@10.50; no grade timothy, \$8.00@10.00; No. 1 heavy clover mixed, \$14.50@15.50; No. 1 light clover mixed, \$15.50@16.50; No. 1 clover mixed, \$15.00@16.00; No. 2 clover mixed, \$12.00@14.00; no grade clover mixed, \$10.00@11.00; No. 1 clover, \$15.50@16.50; No. 2 clover, \$11.00@13.00; no grade clover, \$8.00@9.00; No. 1 second cut alfalfa, \$21.50@23.50; No. 2 second cut alfalfa, \$17.50@19.50; No. 1 first cut alfalfa, \$15.50@16.50; No. 2 first cut alfalfa, \$13.00@15.00; sound sample grassy hay, \$9.50@11.00; wheat straw, \$9.50@10.50; oats straw, \$9.00@10.00; rye straw, \$13.00@14.00.

MILWAUKEE.

April 25.—Both receipts and shipments were light in the Milwaukee hay market the past week. Quotations, which are largely nominal, were unchanged as follows: No. 1 timothy, \$14@15; No. 2 timothy, \$12@13; No. 1 mixed, \$13@15.50; No. 2 clover mixed, \$11@12; sample hay, \$6@8; marsh feeding, \$10; packing, \$9; rye straw, \$9@10; oat straw, \$9@10.

TOLEDO.

April 27.—The hay market remains dull and featureless with dealers anticipating but little activity until more is known of the coming crop. Quite a large amount of hay is being held on farms with owners not inclined to sell at present levels. The new crop will decide the future trend and much can happen before harvest.

Prices last week were unchanged with No. 1 timothy, \$14; No. 2 timothy, \$12; No. 1 light clover mixed, \$13.50; No. 1 heavy clover mixed, \$12.50; No. 1 red clover, \$11; No. 1 first cutting alfalfa, \$15; No. 1 second cutting alfalfa, \$20; sound dry wheat straw, \$8.50; sound dry oat straw, \$8; f. o. b. Toledo.

BALTIMORE.

April 25.—There is more than sufficient hay on sale here to take care of the limited carlot demand prevailing which is centered entirely on the better qualities of timothy and choice light clover mixed. Prices on these types are fairly steady as quoted, but low grade and inferior hay is hard to move and of uncertain value.

Straw of the different kinds remains steady as heretofore quoted, with demand principally of a jobbing nature. Quotations follow, hay, per ton: Timothy—No. 2, \$18@18.50; No. 3, \$15@16.50. Light clover mixed—No. 1, \$17@17.50. Clover mixed—No. 1, \$16.50@17; No. 2, \$15@16. Straw—No. 1 straight rye, \$18.50@19; No. 1 wheat, \$15@15.50; No. 1 oat, \$15.50@16.

KANSAS CITY.

April 25.—Moves on the chessboard of hay receipts this week took away the temporary leadership of prairie and restored it to alfalfa. In the aggregate 402 cars of hay arrived, or 30 less than a week ago. In all varieties there were much fewer offerings than a year ago, when the total was 580 cars.

It was fortunate that the prairie receipts dropped to 111 cars, or 106 less than a week ago. Even with this small supply the market was almost demoralized. Prices broke 50c to \$1 a ton at the outset. The sheer cheapness of the product aroused some shipping demand southward and the stockyards interest was a moderate buyer. At no time, however, was the demand satisfactory and the close showed no recovery from the decline. Low grades of this hay are on such a basis that farmers get practically no returns after meeting the expense of baling, shipping and commission charges.

Despite rains the movement of alfalfa to market increased 72 cars, to a total of 237. The market held steady until Thursday when it declined 50c a ton. There was a weak tone in the latter part of the week. Dairy qualities were well taken in the early days and there was a fair scattered request for fair to good hay. The approach of the new harvest was a bear factor. Accounts of crop growth are generally favorable.

Taken in combination, the receipts of timothy, clover mixed and clover were 54 cars, or 4 more than a week previous. Timothy led, as usual. It was weakened by the cheapness of prairie and sales were slow. Prices fell 50c to \$1 a ton. Clover mixed also receded about \$1 and found few buyers. Pure clover exhibited no price changes, but nobody wanted much.

Straw, of which 3 cars arrived, was nominally steady. Most of the receipts

were applied on contracts, going to the stockyards and packers.

Carlots of hay and straw are quoted as follows per ton, f. o. b. Kansas City:

Alfalfa—Select dairy, \$23.50@26.50; choice, \$21@23; No. 1, \$18.50@20.50; standard, \$15@18; No. 2, \$11@14.50; No. 3, \$7@10.50.

Prairie—No. 1, \$9@10; No. 2, \$7@9; No. 3, \$5@7; packing, \$4@5.

Timothy—No. 1, \$14.50@15; standard, \$13@14; No. 2, \$11.50@12.50; No. 3, \$9@11.

Clover mixed—Light, \$14@15; No. 1, \$12.50@13.50; No. 2, \$9@12.

Clover—No. 1, \$9.50@12; No. 2, \$7@9.

Straw—Wheat, \$8@8.50.

MEMPHIS.

April 25.—Receipts picked up a little during the week but demand if anything was not quite so good, the result being slightly easier tone and shading of prices 50c to \$1. Receipts were 70 cars, including more alfalfa. Quote: Alfalfa—No. 1, \$27@27.50; standard, \$24@24.50; No. 2, \$21@21.50. Timothy—No. 1, \$21.50@22; standard, \$20.50@21; No. 2, \$19@19.50.

DULUTH.

April 25.—Business in hay was quiet during the last week with green pasturages becoming available for cattle. Receipts from the country were light and the demand was mainly for best grades. Closing prices per ton are unchanged as follows: Timothy—No. 1, \$15; No. 2, \$13. Mixed timothy—No. 1, \$15; No. 2, \$12. Prairie—No. 1, \$15; No. 2, \$12; No. 3, \$12. Midland—No. 1, \$10; No. 2, \$8. Straw—Rye, \$9; oat, \$8.

PITTSBURGH.

April 25.—Hay—There is no surplus in this market at present of the better grades of timothy, standard or better, also strictly No. 1 clover mixed hay. The demand for these grades is more active than for some time and prices have advanced slightly. The lower grades, while not as plentiful as they have been, are still dull and prices remain unsatisfactory. Quotations: Timothy—No. 1, \$20.50@21; standard, \$18@18.50; No. 2, \$15@16; No. 3, \$12.50@13.50. Clover mixed—No. 1 heavy, \$16@16.50; No. 1 light, \$16@16.50; No. 1 mixed, \$16.50@17; No. 2 mixed, \$10@13. Clover—No. 1, \$16@16.50; No. 2, \$10@13.

Straw receipts have increased the last few days and there is some surplus in the yards. The outlet for straw is very limited and market today is dull. Quotations: No. 1 wheat straw, \$12@12.50; No. 2 wheat straw, \$11.50@12; No. 1 oat straw, \$11.50@12; No. 2 oat straw, \$11@11.50; No. 1 rye straw, \$12.50@13; No. 2 rye straw, \$11.50@12.

Receipts of hay, 99; receipts of straw, 14.

OMAHA.

April 23.—Prairie hay receipts light. Demand fair to good on better grades. Prices some higher on better grades. Alfalfa hay receipts light. Better demand for all grades if sound, but out of condition and grassy hay hard to move. Prices steady to strong.

Prices below are for carload lots: Upland prairie—No. 1, \$11@11.50; No. 2, \$8@10; No. 3, \$6.50@8. Midland prairie—No. 1, \$10@11; No. 2, \$8@9; No. 3, \$5.50@7. Lowland prairie—No. 1, \$6.50@7.50; No. 2, \$5@6. Alfalfa—Choice, \$18.50; No. 1, \$16@17; standard, \$12@15; No. 2, \$9@11; No. 3, \$7@8. Straw—Oat, \$7@8; wheat, \$6@7.

PHILADELPHIA.

April 25.—Baled hay and straw: The receipts of hay are small but offerings are fully ample for trade requirements and prices are steadily maintained. Straw is in limited supply and steady but fully equal for present wants. Federal grades: Timothy—No. 1, nominal; No. 2, \$18@19; No. 3, \$16@17; sample, \$10@15. Light clover mixed—No. 1, \$17@18; No. 2, \$15@16; No. 3, \$12@14. Medium clover mixed—No. 1, \$15@16; No. 2, \$13@14. Heavy clover mixed—No. 1, \$14@15. Light grass mixed—No. 1, \$17@17.50. Straw—Straight rye, \$15@15.50; wheat, \$15@15.50; oat, \$14@14.50.

BOSTON.

April 25.—No. 1 timothy, \$25.50@26; No. 2 timothy, \$22@24; No. 3 timothy, \$17@19; eastern, \$16@22; clover mixed, \$21@24. Straw—Rye straw, \$21@22; oat straw, \$13@15.

PORTLAND, ORE.

April 23.—The winter freeze caused heavy damage to alfalfa hay in eastern Oregon and Washington, according to latest reports. Many sections of alfalfa were completely frozen out in Baker county and in the Hermiston district. The Yakima district in Washington also suffered quite severely. Locally, the hay season is about over. Some little business is going on but the volume is limited to a few cars now and then. Buying prices, f. o. b. Portland: Alfalfa, \$20@21 ton; valley timothy, \$20@21; eastern Oregon timothy, \$23@24; clover, \$16.50@17; oats, \$19@20; oats and vetch hay, \$19.50@20.50; straw, \$8@8.50.

CHICAGO.

April 27.—Good to choice hay firm. Demand good. Offerings fair. Low grades slow sale. Choice timothy at \$23@24; No. 1, \$21@23; No. 2, \$17@19; No. 3, \$12@15. Timothy and clover, light mixed—No. 1, \$19@21; No. 2, \$15@18. Heavy mixed—No. 1, \$15@17; No. 2, \$12@14. Timothy and grass, light mixed—No. 1, \$18@20; No. 2, \$14@16. Heavy mixed—No. 1, \$15@16; No. 2, \$12@14. Clover—No. 1, \$14@15; No. 2, \$10@12. Mixed grass—No. 1, \$12@14; No. 2, \$11@12. Oklahoma, Kansas, Nebraska and South Dakota prairie hay, \$12@15. Marsh hay—Feeding, \$10@12. Marsh hay—Packing, \$10@12.

NEW YORK.

April 23.—The New York Hay Exchange

DANNEN HAY & GRAIN COMPANY
Shippers of Choice Quality Grain & Hay Write or Wire us for Delivered Prices
St. Joseph, Mo.

Ass'n has issued the following weekly report, with latest quotations:

	Hay	Straw
Receipts for week, tons.....	755	20
Receipts last week, tons.....	575	50
Receipts from Sept. 1, tons, 40,680	886	

An entirely different market has developed during the week. The extremely light rail receipts and reduced offerings have afforded an opportunity to work off the accumulation, and even the low grade mixed common stock, which has been so distressing to the market for the past several weeks, is well disposed of and as a result prices have advanced from one to two dollars per ton.

Two river barges have been discharging at Manhattan during the week and have tended to relieve the shortage at rail stations. At this writing these barges are well sold out.

There is a very active call for top quality timothy in both large and small bales, in fact all classes of timothy of a fair to good quality find a ready outlet at quotations. Mixtures of heavy grass or clover are not so desirable.

Throughout the week the demand has been slow at the advanced prices but toward the end, with rail receipts showing no increase and barges cleaning up, the apparent indifference of buyers is changing and the general situation at the close appears to be very strong.

New invoices light. Rye straw rather quiet, finding slow outlet at quotations, with state straw preferred.

Federal grade quotations for large bales follow: Timothy—No. 1, \$26; No. 2, \$23@25; No. 3, \$20@21. Light clover mixed—No. 1, \$23@25; No. 2, \$20@21; No. 3, \$17@18. Medium clover mixed—No. 1, \$20@21; No. 2, \$15@16. Light grass mixed—No. 1, \$23@25; No. 2, \$20@21; No. 3, \$17@18. Heavy grass mixed—No. 1, \$15@16. Straw—Rye, \$15@16.

ST. LOUIS, MO.

April 27.—The receipts of hay on both sides of the river were moderate. The market remains steady for the best qualities of timothy hay as well as light clover mixed. All medium and low grades plentiful and still hard to place at reasonable figures.

Clover—Very little demand, even for the best grades and poor qualities unsalable.

Alfalfa—Light arrivals. Market fair on choice qualities, but very dull on medium and low grades.

Prairie—In fair demand for best qualities. All medium and lower grades still difficult to place.

Straw steady. No. 1 timothy, \$21@22; standard, \$19@20; No. 2, \$15@16; No. 3 and sample, \$10@12; No. 1 clover mixed, \$17@18; No. 2, \$13@14; heavy mixed, \$14@16; No. 1 clover, \$16@17; No. 2, \$12@13; threshed hay, \$9@10; choice alfalfa, \$24@26; No. 1, \$22@24; standard, \$16@18; No. 2, \$13@15; No. 1 prairie, \$14@15; No. 2, \$11@13; rye straw, \$9@10; wheat straw, \$8.50@9.50.

CHICAGO HAY NOTES.

The light arrivals should put some snap in the buying, but it does not have this effect excepting on the good grades, that is, No. 2 or better. The No. 2 grassy or the heavy clover mixed and the lower grades are neglected. Prairie hay very dull. Soft packing in urgent demand.—Walters Brothers.

Market is steady, demand being particularly for No. 1 and No. 2 timothy and No. 1 and No. 2 light clover mixed hay. Other grades are quiet. Country loading is hardly up to normal. Prairie and marsh packing hay wanted. All kinds straw in urgent demand.—Bridge & Leonard.

Best grades timothy and light mixed selling higher. We urgently advise marketing a portion of your holdings of hay now as we believe as good prices will be secured as any time again this season and possibly better. All kinds of straw are wanted.—Albert Miller & Co.

CANADIAN VISIBLE.

Canadian visible supply of wheat decreased 4,244,000 bus. and oats, 2,850,000 bus. last week. These statistics represent terminal stocks only:

	Apr. 25, 1925.	Apr. 18, 1925.	Apr. 26, 1924.
Wheat	36,245,000	40,489,000	43,758,000
Corn	15,790,000	18,640,000	8,255,000
Rye	2,368,000	1,711,000	
Barley	5,075,000	7,513,000	2,107,000

According to estimates of the Illinois Agricultural Association, farm losses in Illinois caused by the tornado, amount to \$1,338,698, the average per farm with insurance reclamations deducted, being \$2,336.

FUTURE TRANSACTIONS AT CHICAGO.

The volume of sales for future delivery on the Chicago Board of Trade for the days indicated, subject to corrections of minor importance, as reported by J. W. T. Duvel, Grain Exchange Supervisor, were as follows (last three 000 omitted):

1925—	Wheat.	Corn.	Oats.	Rye.	Total.
Apr. 1...	49,271	23,100	7,078	2,958	82,407
Apr. 2...	62,204	34,497	13,956	3,032	113,689
Apr. 3...	66,146	45,689	22,290	4,734	141,859

American
Bale Ties

To conform with the rules of the National Hay Association, hay must be well baled. The use of American Bale Ties accomplishes this. A broken wire on a bale of hay condemns the hay. Broken bales cost more than Bale Ties.

OTHER USES

For baling Excelsior, Shavings, Rags, and Paper. For bundling Barrel Heading and Staves.

No other form of wire has to stand more strain and abuse. Bale Tie Wire must be made in the highest perfection possible. American Bale Ties meet every requirement for which they are intended.

1923..	3,890,000	14,629,000	4,435,000	22,954,000
1922..	3,648,000	10,930,000	4,091,000	18,669,000

CHICAGO PROVISION REVIEW.

CHICAGO, April 27.—Highest prices for hog products were made around the opening of the week and the lowest in most instances at the close. There was liquidation by speculative holders, with packers taking offerings as prices declined. New buying is not coming into the market to any extent as hog supplies within the last few weeks have increased unexpectedly and the consumptive trade on domestic and export accounts, has fallen below expectations. Supplies are liberal and while the belief exists that hogs are to be scarce later in the season, the farmers have shown an increased disposition to market all live stock in a liberal way, forcing prices of hogs down 75 to 95c for the week, and to the lowest level since early in February. Closing sales on lard were within a fraction of the low point of the week with losses of 60 to 62½c. Short ribs were off 57½ to 90c and closed flat at the bottom, while bellies

rallied 15 to 40c from the low point after a loss of 80c to \$1.45 from the close of the previous week and finished with net declines of 65c to \$1.15. As compared with a year ago, prices are around 8c a pound higher on bellies; lard is up over 4c a pound, and short ribs 6½c on May delivery.

Shipments of lard and meats for the week were disappointingly small and materially under last year's. Foreign markets were unsettled. Prices for the week follow:

	Close	Apr. 25.	Apr. 18.	Apr. 26.
	High.	Low.	1925.	1924.
Lard—				
Mar. ring.	\$16.97½	\$15.65

Cudahy's Puritan Hams and Bacon

PURITAN Hams and Bacon have a finer flavor, a smoother texture, and greater tenderness. These superior Puritan qualities are due to the careful selection of meats and to the fact that they are

ripened naturally

The rich juices of the meats are retained and properly diffused by this special Cudahy mild-cure which produces a sweeter and more delicious flavor because it is a natural process and not artificially hastened. Try Puritan today.

CARRY-OVER OF WHEAT.

The following table gives the approximate supplies of flour and wheat remaining in first and second hands on July 1 in U. S.:

Year.	Bushels.	Year.	Bushels.
1909	43,000,000	1917	43,000,000
1910	38,000,000	1918	17,000,000
1911	92,000,000	1919	43,000,000
1912	78,000,000	1920	151,000,000
1913	90,000,000	1921	107,000,000
1914	76,000,000	1922	81,457,000
1915	55,000,000	1923	101,495,000
1916	163,000,000	1924	100,032,000

MOVEMENT OF WHEAT.

Following is a statement of the receipts and shipments of wheat at the thirteen primary markets of the West for the weeks named:

Week of—	Receipts.		Shipments.	
	Final 1924.	1923.	Final 1924.	1923.
May 3....	2,921.0	4,389.0	3,955.0	4,849.0

WHERE THE WHEAT IS HELD.

The wheat supply of the United States at any time may be regarded as made up of stocks on farms, visible stocks, and invisible stocks, the latter mostly in country mills and elevators. It is assumed that the total production is on farms on July 1, the beginning of the crop year; although not all harvested it is potentially on farms, except the small amount marketed before July 1. The figures given, compiled by Nat. C. Murray, late chief statistician, U. S. Agricultural Department, below are based upon the five-year average ending July 1, 1922. Wheat used on farms as seed and feed are not included in farm holding, as not comprising a part of the commercial supply.

	Stocks—Quantities in million of bushels.				Percentages.			
	Commercial.		On Vis-Invis-arms. ible. Invis-arms. ible.		On Vis-Invis-arms. ible. Invis-arms. ible.		On Vis-Invis-arms. ible. Invis-arms. ible.

MILL AND ELEVATOR STOCKS OF WHEAT, MARCH 1.

Following are estimates of wheat held by interior mills and elevators (as distinguished from primary markets of large accumulation) on March 1 of the past 5 years, compiled by the Bureau of Agricultural Economics (000 omitted):

State.	1921.	1922.	1923.	1924.	1925.
New York	1,122	923	986	816	684
Penn.	2,270	2,337	2,719	2,434	2,603
Maryland	1,220	710			
Virginia	1,226	905			
Ohio	2,130	3,018	4,245	4,705	3,731
Indiana	1,997	2,298	2,893	3,425	2,515
Illinois	2,730	3,746	3,326	3,750	2,503
Michigan	1,384	1,261	1,719	2,321	2,202
Wisconsin	464	231	511	236	282
Minnesota	2,535	2,041	3,819	3,274	3,651
Iowa	429	796	1,974	949	518

UNITED STATES VISIBLE SUPPLY OF GRAINS

The following table exhibits the visible supply of Wheat, Corn, Oats, Rye and Barley in the United States; also the visible supply of Wheat in Canada weekly, as reported by the Winnipeg Grain Exchange, with totals, final 000 omitted:

CANADIAN.

This table exhibits the visible supply of Canadian grain as reported by Bradstreet's:

An accepted meeting place for buyer and seller is The Price Current-Grain Reporter. You get quick results when you place your "want ad" in the grain trade's only weekly. Classified Rates: 25 cents per printed line each insertion.

STATE AVERAGES AND RECORDS OF CORN CROPS FOR 55 YEARS.

In fifty-five years of Government crop reporting, there have been twenty-two years in which the country's crop was below the average yield, and only six fall within the character of poor crops—yields insufficient to maintain the supply of food animals to normal proportions. The average by years since the first report by the Government furnishes a perspective of the relative importance of the years that fell under the average, the results being given in average yield in bushels per acre:

U. S. CORN YIELD PER ACRE.

Year	Yield (bushels per acre)	Year	Yield (bushels per acre)

YEARLY RANGES OF VISIBLE CORN IN U. S.

Following are the low and high stocks of corn on the first day of the months indicated and months of low and high quantities, compiled by The Price Current-Grain Reporter:

	Lowest.	Month.	Highest.	Month.
1889	6,204,000	Dec.	16,839,000	Apr.
1890	3,144,000	Dec.	20,204,000	Apr.
1891	2,568,000	Jan.	8,587,000	Oct.
1892	3,724,000	June	13,290,000	Nov.
1893	5,546,000	Sept.	15,315,000	Apr.
1894	2,759,000	Nov.	18,538,000	Apr.
1895	4,805,000	Nov.	13,407,000	Apr.
1896	5,817,000	Jan.	19,340,000	Nov.
1897	12,494,000	June	45,958,000	Nov.
1898	16,530,000	Sept.	42,647,000	Apr.
1899	6,735,000	Sept.	32,737,000	Apr.
1900	5,313,000	Sept.	21,918,000	May
1901	9,053,000	Jan.	22,287,000	Apr.
1902	2,584,000	Nov.	11,632,000	Feb.
1903	4,886,000	June	10,219,000	Mar.
1904	1,853,000	Dec.	10,950,000	Apr.
1905	2,517,000	Dec.	11,395,000	Feb.
1906	2,258,000	Sept.	16,208,000	Mar.
1907	2,535,000	Dec.	11,977,000	Apr.
1908	1,221,000	Nov.	8,756,000	Mar.
1909	707,000	Sept.	7,165,000	Jan.
1910	1,545,000	Dec.	14,357,000	Mar.
1911	1,703,000	Nov.	11,794,000	Mar.
1912	1,525,000	Dec.	15,914,000	Apr.
1913	2,026,000	Dec.	19,726,000	Apr.
1914	5,897,000	Sept.	26,311,000	Jan.
1915	1,710,000	Sept.	41,246,000	Feb.
1916	1,289,000	Nov.	28,191,000	Mar.

	Lowest.	Month.	Highest.	Month.
1917	1,163,000	Sept.	12,931,000	Mar.
1918	3,097,000	Jan.	19,016,000	Apr.
1919	1,477,000	Dec.	9,466,000	Aug.
1920	2,740,000	June	10,085,000	Nov.
1921	5,409,000	Jan.	32,896,000	Apr.
1922	7,314,000	Sept.	46,889,000	Apr.
1923	1,100,000	Nov.	28,742,000	Apr.
1924	4,887,000	Aug.	26,074,000	Apr.

STOCKS OF CORN ON FARMS.

The Department of Agriculture reported the following estimates of the supply of corn in farmers' hands on March 1 and Nov. 1 for a series of years, with March 1 percentage of the crop of previous year:

Year.	Bushels.	% of Nov. 1.	Crop.	Bushels.
1925	801,609,000	32.9		
1924	1,153,175,000	37.8		101,934,000
1923	1,093,306,000	37.6		83,856,000
1922	1,305,559,000	42.6		177,979,000
1921	1,564,832,000	48.8		279,647,000
1920	1,045,575,000	37.2		137,754,000
1919	855,269,000	34.2		69,835,000
1918	1,253,290,000	40.9		118,400,000
1917	782,303,000	30.5		34,448,000
1916	1,116,559,000	37.3		87,908,000
1915	910,894,000	34.1		96,009,000
1914	866,392,000	35.4		80,046,000
1913	1,229,655,000	41.3		137,972,000
1912	884,069,000	34.9		64,764,000
1911	1,165,378,000	40.4		101,212,000
1910	966,208,000	37.9		109,738,000
1909	1,047,763,000	39.8		79,779,000
1908	962,429,000	37.1		71,124,000

WHITE, YELLOW, AND MIXED CORN.

Detailed estimates of production of varieties, by states, are given below: The separate indications were not worked out for crops since 1918:

RATIO OF HOG PRICES TO CORN PRICES.

The normal ratio of hog prices to corn prices is generally highest in the surplus hog-producing States; that is, in the corn belt, and lowest in New England, the South, and far West. This is shown in the following figure of ratios, by States, being the average for 10 years.

Average price of 100 pounds of live hogs divided by average price of 1 bushel of corn:

Maine	8.3	North Dakota ...	10.4
New Hampshire ..	8.9	South Dakota	12.1
Vermont	8.4	Nebraska	11.6
Massachusetts	9.6	Kansas	10.6
Rhode Island	7.8	Kentucky	9.7
Connecticut	9.6	Tennessee	9.3
New York	8.7	Alabama	8.1
New Jersey	10.0	Mississippi	8.0
Pennsylvania	10.0	Louisiana	7.8
Delaware	10.6	Texas	6.9
Maryland	10.3	Oklahoma	9.9
Virginia	8.8	Arkansas	7.5
West Virginia	8.4	Montana	8.8
North Carolina ...	8.6	Wyoming	9.5
South Carolina ...	7.6	Colorado	10.7
Georgia	8.0	New Mexico	7.6
Florida	8.1	Arizona	7.0
Ohio	10.9	Utah	7.7
Indiana	11.5	Nevada	6.9
Illinois	11.5	Idaho	9.2
Michigan	9.6	Washington	8.7
Wisconsin	10.6	Oregon	9.5
Minnesota	11.9	California	7.7
Iowa	11.8		
Missouri	10.3	United States.....	10.21

PORK VALUE OF CORN.

A bushel of corn will make slightly more than 10 lbs. of pork, but the trade for convenience sake in quick figuring uses the figure 10 lbs. Therefore, to determine whether it is more profitable to sell your corn than to feed it, consult the following table:

When corn costs—		Pork costs you—	
\$1.20 per bushel.....	12c	per pound	
\$1.30 per bushel.....	13c	per pound	
\$1.40 per bushel.....	14c	per pound	
\$1.50 per bushel.....	15c	per pound	
\$1.60 per bushel.....	16c	per pound	
\$1.70 per bushel.....	17c	per pound	
\$1.80 per bushel.....	18c	per pound	
\$1.90 per bushel.....	19c	per pound	
\$2.00 per bushel.....	20c	per pound	

And so on ad libitum.

*On and after Feb. 3, 1912, this shows only amount of American grain. †After Aug. 1, 1911, this statement includes Omaha and private elevator stocks at Chicago, St. Louis and Buffalo. ‡After 1908 this statement shows U. S. stocks exclusively.

MARKETINGS OF OATS.*

Following is an estimate by the Department of Agriculture of the percentages of oats marketed by farmers monthly of the crops grown in the years named:

	1916.	1917.	1918.	1919.	1920.	1921.
July	8.3	4.7	8.0	14.4	8.3	15.1
Aug.	23.3	16.4	19.6	18.4	18.7	16.5
Sept.	13.5	13.5	11.9	10.1	13.8	11.8
Oct.	10.7	11.1	9.9	9.2	9.5	7.9
Nov.	8.0	7.7	7.2	5.8	5.5	5.3
Dec.	5.7	7.3	6.7	8.3	5.8	6.1
Jan.	7.5	8.3	6.7	8.2	6.6	7.3
Feb.	5.3	8.0	4.5	6.6	6.6	6.9
Mar.	5.2	7.1	5.5	4.9	6.0	5.6
Apr.	3.8	6.5	6.3	4.3	4.6	4.3
May	4.4	4.0	7.0	5.2	6.8	7.2
June	4.3	4.9	6.7	4.6	7.8	6.0

*No figures available since 1921.

MONTHLY PRICES OF OATS.

The following table gives the estimated monthly average price, for United States, in cents per bushel, to producers of oats:

	1925.	1924.	1923.	1922.	1921.	1920.	1919.
Jan.	54.0	43.4	41.2	31.0	45.6	78.2	70.8
Feb.	53.4	45.4	41.8	32.8	41.8	82.7	64.3
Mar.	46.2	43.1	36.6	41.9	84.5	62.6	
Apr.	46.5	43.9	36.5	39.3	90.7	65.8	
May	46.3	45.7	37.9	36.8	98.3	70.9	
June	46.8	44.9	38.4	37.9	102.9	71.2	
July	49.4	42.5	37.3	35.6	104.5	70.9	
Aug.	49.1	37.8	35.0	33.8	81.9	75.3	
Sept.	47.1	37.3	32.2	30.1	70.2	71.7	
Oct.	48.9	38.6	34.5	31.0	60.7	68.4	
Nov.	47.4	40.2	38.2	29.2	54.5	68.7	
Dec.	48.0	41.5	39.4	30.3	47.2	71.5	
Year	47.0	41.5	36.3	34.7	74.0	69.4	

Average for ten years, 1912-21, 52.1c.

‡Since Jan. 1, 1924, prices are based on the 15th of the month.

STOCKS OF OATS ON FARMS.

The Department of Agriculture reported the following estimates of the supply of oats in farmers' hands on March 1, and August 1, for a series of years, with the March 1 percentage of the previous year's crop:

Years.	Mar. 1.	%	Aug. 1.	Crop.
1925..	550,342,000	35.7
1924..	444,810,000	37.8	65,256,000	1,541,900,000
1923..	421,118,000	34.6	70,082,000	1,305,883,000
1922..	411,934,000	38.2	74,406	1,215,803,000
1921..	683,759,000	45.7	161,199	1,078,341,000
1920..	409,730,000	34.6	56,128	1,469,281,000
1919..	590,251,000	38.4	93,045,000	1,184,030,000
1918..	599,208,000	35.9	81,424,000	1,538,124,000
1917..	394,211,000	31.5	47,834,000	1,592,740,000
1916..	598,148,000	38.6	113,728,000	1,251,837,000
1915..	379,369,000	32.6	55,607,000	1,549,030,000
1914..	419,481,000	37.4	62,467,000	1,141,060,000
1913..	604,200,000	42.6	103,900,000	1,121,768,000

U. S. EXPORTS OF OATS.

The exports of oats from principal United States ports, as reported by the Chief of the Bureau of Statistics of the Department of Commerce for each month for four years were as follows:

	1925.	1924.	1923.	1922.
Mos.	41,170	212,374	113,432
Jan.	724,000	24,179	588,884	239,370
Feb.	1,286,000	33,127	369,280	2,209,942
Mar.	488,000	13,844	484,222	1,724,517
Apr.	14,926	508,459	2,686,355
May	58,183	100,208	6,507,350
June	18,719	142,848	4,180,573
July	50,634	147,626	1,776,012
Aug.	430,956	272,078	4,378,527
Sept.	2,052,000	257,721	3,042,160
Oct.	726,000	87,000	2,613,754
Nov.	518,000	56,064	331,645
Dec.
Year	3,981,738	3,226,764	30,011,133

The Price Current-Grain Reporter is a weekly exponent of trade interests in grain, seeds, feedstuffs, alfalfa, beans, hay and provisions; a weekly reporter of the movement of these products and of livestock at sixteen markets; a weekly review and epi-

logue of the movement and prices for grain and provisions; a record of exports and imports of all these products; and the only organized independent, unofficial crop reporter published that has its own private corps of reporters in surplus states.

No. of bushels of corn by states not given by Bureau of Agricultural Economics for 1923.

CROP END FARM RESERVES.

The reserves of grain at the close of the crop seasons, held on the farm, with percentage of crop of the previous year, adjusted to census returns.

FARM RESERVES BY STATES.

The Bureau of Agricultural Economics makes the following estimate of grains in farmers' hands on March 1, 1925, and previous years:

	1925		1924		1923	
Wheat	113,928,000	13.0	133,871,000	17.0	155,474,000	17.9
Corn	801,609,000	32.9	1,153,175,000	37.8	1,093,306,000	37.6
Oats	559,342,000	35.6	444,810,000	34.2	421,118,000	34.6

Following are the estimates of reserves of each kind of grain named as rated by important states (final 000 omitted from bushel columns):

State.	WHEAT					CORN					OATS				
	10-yr. av. Pct.	Quantity		10-yr. av. Pct.	1925. Bus.	10-yr. av. Pct.	Quantity		10-yr. av. Pct.	1925. Bus.	10-yr. av. Pct.	Quantity		1925. Bus.

Abandoned Winter Wheat Acreage.

The following table gives the acreage of winter wheat planted in fall previous to crop season indicated and acres abandoned in the spring of the years named and the percentage of the total acreage, revised acreage after season of 1908 to 1920, inclusive, acreage planted for 1921 crop not revised. Figures revised to census reports:

Season.	Planted. Prev. Fall.	%	Abandoned. Acres.
1925.....	42,317,000
1924.....	39,749,000	8.3	3,311,000
1923.....	46,379,000	14.4	6,629,000
1922.....	47,611,000	14.5	5,484,000
1921.....	44,847,000	4.6	2,037,000
1920.....	41,757,000	11.9	4,969,000
1919.....	50,489,000	1.1	555,379
1918.....	42,301,000	13.7	5,909,000
1917.....	40,090,000	31.0	12,437,000
1916.....	39,203,000	11.4	4,236,000
1915.....	42,457,000	2.1	1,149,000
1914.....	37,128,000	3.1	1,119,000
1913.....	33,618,000	4.5	1,449,000
1912.....	33,215,000	20.1	6,469,000
1911.....	32,648,000	9.0	3,118,000
1910.....	31,656,000	13.3	4,540,000

Season.	Planted. Prev. Fall.	%	Abandoned. Acres.
1909.....	29,301,000	7.2	2,110,000
1908.....	31,069,000	4.2	1,318,000
1907.....	31,665,000	11.2	3,533,000
1906.....	31,341,000	5.5	1,649,000
1905.....	31,156,000	4.6	1,436,000
1904.....	32,016,000	15.4	4,899,000

1901.....	30,288,000	6.7	2,247,000
1900.....	30,883,000	11.8	2,842,000

Winter Wheat Crop Summary.

Following is a summarized statement of the acreage planted and harvested and yield of winter wheat for series of years (000 omitted except in column "Yield per Acre") (black face indicates record years and italics the 10-year average):

Year.	Sown (previ- ous fall).	Aban- doned (winter killed).	Har- vested.	Yield per acre.	Total produc- tion.
1913...	33,618	1,919	31,699	16.5	523,561
1914...	37,128	1,120	36,008	19.0	684,990
1910-14	33,653	3,499	30,154	16.4	494,654
1915...	42,831	1,573	41,308	16.3	673,947
1916...	39,203	4,494	34,709	13.8	480,553
1917...	40,534	13,277	27,257	15.1	412,901
1918...	42,301	5,171	37,130	15.2	565,099
1919...	50,489	584	50,494	15.1	760,377
1920...	41,757	3,984	40,016	15.3	610,597
1921...	44,847	2,037	42,702	13.7	587,032
1922...	47,611	5,484	42,127	13.8	586,878
1923...	46,379	6,629	39,750	14.5	572,340
1924...	39,749	3,811	36,438	16.2	779,510
1925...	42,317

Condition of Spring Wheat.

Condition of spring wheat, and equivalent of 100 in bushels in final yield compared with September condition since 1904 when spring wheat was reported separately from winter wheat for that month, and with August condition prior to 1904, as compiled from Government reports by The Price Current-Grain Reporter:

	June.	July.	Aug.	Sept.	Yield.	100.
1924...	82.3	81.9	79.7	82.3	15.9
1923...	90.2	82.4	69.6	65.1	11.4	17.51
1922...	90.7	83.7	80.4	80.1	14.1	17.60
1921...	93.4	80.8	66.6	62.5	10.6	16.96
1920...	89.1	88.0	73.4	64.1	10.5	16.39

¹The periods relate to years ended June 30. ²Including corn meal reduced to corn at rate of 4 bushels to barrel. ³The figures include for years prior to 1910 net imports of corn and imports of corn meal for consumption; for 1910 to and including 1921 all figures represent imports for consumption. Small amounts of burnt or roasted corn in 1898, 1899, and 1900 are omitted. ⁴Figures include wheat flour reduced to wheat prior to 1880 at the rate of 5, and subsequently at the rate of 4½ bushels to the barrel. ⁵Includes wheat for seeding. ⁶Average for the period. ⁷Data relate to U. S. as a whole; production (if any) for non-contiguous territory is lacking and no account is taken in the table of varying stocks carried over from one year to another.

U. S. IMPORTS OF WHEAT, CORN AND OATS.

Following is a statement of the imports of wheat, corn and oats by months for past four years (000 omitted):

	Wheat ¹				Oats				Corn

1918-19.....	29,890,000	1923-24.....	58,560,000
1919-20.....	57,060,000	1924-25.....	51,000,000

SEEDING AND HARVEST.

Wheat is sown in May and June; corn in October.

Harvesting of wheat in Argentina commences in some of the earlier districts the last of November. Harvesting of corn continues from the middle of March to June 1. The harvesting of flax seed is general the first fortnight of December.

The yield of flax seed for the years named was as follows (in bus.):

1913-14.....	42,188,000	1919-20.....	41,000,000
1914-15.....	44,500,000	1920-21.....	50,470,000
1915-16.....	42,000,000	1921-22.....	32,232,000
1916-17.....	5,280,000	1922-23.....	47,577,000
1917-18.....	22,474,000	1923-24.....	63,241,250
1918-19.....	31,269,000	1924-25.....	51,600,000

EXPORTS FROM ARGENTINE RE-PUBLIC.

In Farmers' Hands.....	39,225,000	148,533,000	18,969,000	1,118,000	1,722,400
TOTAL.....	121,083,956	183,485,638	30,330,600	6,306,676	5,322,583

Note—Fort William and Port Arthur elevators include afloat.

Public elevators in the east include afloat.

GRAIN FOR ALCOHOL.

The following statement from the Report of the Commissioner of Internal Revenue shows the quantities of grain and other materials used during the fiscal years ended June 30, 1923 and 1924, for the production of distilled liquors:

The estimated average yield per bu. of grain used for the production of spirits was 4.44+ vs. 3.77+ in 1921. The estimated average yield per gal. of commercial molasses used for the production of rum was 0.796+ of a gal. vs. 0.797+ in 1921. No figures are available for the year 1923.

GRAIN AND OTHER MATERIALS USED FOR THE PRODUCTION OF ALCOHOL.

	1923.	1924.
Corn, bus.....	3,105,963	4,835,139
Rye, bus.....	5,108	91,065
Malt, bus.....	443,845	1,059,985
Other materials, ¹ bus.....	2387,598	2,691,070
Molasses, gals.....	148,711,458	155,001,162
Other liquids, gals.....	32,542,885	35,524,539

¹Includes malt sprouts, kafir and barley.

²Includes 46,912 bus. malt sprouts.

PRODUCTION OF DISTILLED SPIRITS, EXCEPT ALCOHOL.

Kind.	1923.
Whiskey, gals.....	805,322.1
Rum, gals.....	1,417,461.8
Brandy, gals.....	1,417,461.8

Total, 1923.....2,222,783.9

Total, 1922.....2,257,195.4

MATERIALS USED FOR PRODUCTION OF CEREAL BEVERAGES.¹

The following statement in pounds of materials used by brewers in the production of fermented liquors in the United States during the fiscal years ended June 30, compiled from the report of the Commissioner of Internal Revenue, Treasury Department:

PAR OF EXCHANGE.

The par of exchange in Europe, based on U. S. Mint valuation of intrinsic worth of standard coins in terms of U. S. currency:

Austria Crown 20.3 cts.
Denmark Krone 28.8 cts.
England Sovereign \$4.86½
France Franc 5.18½ fr. = \$1.00
Germany Mark 4 m = 95.2 cts.
Holland Florin 40.2 cts.
India Rupee 32.44 cts.
Russia Ruble 51.2 cts.
Spain Peseta 19.3 cts.
Italy Lire 19.3 cts.
Switzerland Franc 19.3 cts.
Norway and Sweden	same as Denmark.	

CHICAGO CONTRACT GRADES.

CONTRACT GRADES OF WHEAT.—No. 1 Hard Winter Wheat, No. 1 Dark Hard Winter Wheat, No. 1 Yellow Hard Winter Wheat, No. 2 Hard Winter Wheat, No. 2 Dark Hard Winter Wheat, No. 2 Yellow Hard Winter Wheat, No. 1 Red Winter Wheat, No. 1 Northern Spring Wheat, No. 1 Dark Northern Spring Wheat, No. 1 Velvet Chaff Wheat, No. 2 Red Winter Wheat, No. 2 Northern Spring Wheat, No. 2 Dark Northern Spring Wheat, No. 2 Red Spring Wheat, and No. 1 Red Spring Wheat are deliverable at contract price.

No. 3 Dark Hard Winter Wheat, No. 3 Hard Winter Wheat, No. 3 Yellow Hard Winter Wheat, No. 3 Red Winter Wheat, No. 1 Hard White Wheat, No. 2 Hard White Wheat, are deliverable at 5 cents per bushel under contract price. No. 3 Dark Northern Spring Wheat and No. 3 Northern Spring Wheat are deliverable at 8 cents per bushel under contract price.

CONTRACT GRADES OF CORN.—No. 1 White Corn, No. 2 White Corn, No. 1 Yellow Corn and No. 2 Yellow Corn are deliverable at ½ cent per bushel over contract price.

No. 1 Mixed Corn and No. 2 Mixed Corn are deliverable at contract price.

No. 3 White Corn and No. 3 Yellow Corn are deliverable at 2 cents per bushel under contract price.

No. 3 Mixed Corn is deliverable at 2½ cents per bushel under contract price.

No. 4 White Corn and No. 4 Yellow Corn are deliverable at 4 1/3 cents per bushel under contract price.

No. 4 Mixed Corn is deliverable at 5 cents per bushel under contract price, provided that it can be delivered only during the months November to February, inclusive.

CONTRACT GRADES OF OATS.—No. 1 White Oats are deliverable at ½ cent per bushel over contract price.

No. 2 White Oats are deliverable at contract price.

No. 3 White Oats are deliverable at 1½ cents per bushel under contract price.

RUSSIAN WHEAT CROPS: EXPORTS INCLUDING FLOUR.

MILLING AND OTHER USES OF CORN.

Bushels of corn ground by the wet process:

1906	..36,408,128	1916	..63,306,933
1907	..39,221,321	1917	..59,423,595
1908	..34,774,000	1918	..73,703,176
1909	..38,861,877	1919	..64,934,394
1910	..47,887,377	1920	..54,167,994
1911	..46,084,854	1921	..58,440,656
1912	..47,542,157	1922	..66,854,435
1913	..50,340,735	1923	..66,212,516
1914	..45,801,978	1924	..75,349,181
1915	..55,969,456		

The above tonnage figures are furnished by the Associated Corn Products Manufacturers. Dry corn milling process for mixed feeds, corn meal, grits, etc., does not have available the tonnage of corn consumed. Department of Agriculture Bulletin 872 for the year 1921 estimates for a ten-year average that 40 per cent of corn was fed to hogs on farms; 20 per cent to horses and mules on farms; 15 per cent to cattle on farms; 4 per cent to poultry on farms; 1 per cent to sheep on farms.

FEDERAL STANDARD WHEAT GRADES.

Following is a consolidated statement of the Federal Grain Standards for Wheat, as compiled from "Service and Regulatory Announcements" No. 33, Bureau of Markets, as amended May 16, 1921, and April 17, 1922. New grades and amendments have been added which are effective Aug. 15, 1924. The numbered footnotes below must be read in connection with the tabulation.

Minimum limits of test weight per bushel.

Sample*

*Sample Grade.—Shall be wheat of the appropriate subclass which does not come within the requirements of any of the grades from No. 1 to No. 5, inclusive, or which has any commercially objectionable foreign odor, except of smut, garlic, or wild onions, or is very sour, or is heating, hot, or is otherwise of distinctly low quality, or contains small, inseparable stones or cinders. †New No. 1 Hard Red Spring may contain not more than 5% other than hard red spring, of which not more than 2% may include durum.

(1) The wheat in grades Nos. 1 to 4, inclusive, shall be cool and sweet. (2) The wheat in grade No. 5 shall be cool, but may be musty or slightly sour. (3) The wheat in grade No. 1 Dark Northern Spring and grade No. 1 Northern Spring may contain not more than 5 per cent of the hard red spring wheat variety Humpback, and not more than 5 per cent of wheat other than hard red spring, which 5 per cent may include not more than 2 per cent of durum wheat; grade No. 2 may not contain more than 5 per cent of durum wheat. (4) The wheat in grade No. 1 Amber Durum and grade No. 1 Durum may contain not more than 5 per cent of the durum wheat variety Red Durum. (5) For each of the subclasses of the class Durum, grade No. 1 and grade No. 2, may contain not more than 2 per cent and 5 per cent, respectively, of soft red winter and white wheat, either singly or combined. (6) For each of the subclasses of the classes Hard Winter, grade No. 1 and grade No. 2, may contain not more than 2 per cent and 5 per cent, respectively, of durum wheat. (7) For each of the subclasses of the classes Soft Red Winter and White, grade No. 1 and grade No. 2, may contain not more than 2 per cent and 3 per cent, respectively, of durum wheat.

Note.—For grades for Mixed wheat, Treated wheat, Garlicky wheat, and Smutty wheat see sections pertaining thereto, of the official grain standards of the United States for wheat.

The above tabulation does not constitute in whole the official grain standards of the United States for wheat.

OFFICIAL GRAIN STANDARDS OF THE UNITED STATES FOR WHEAT.

For the purposes of the Official Grain Standards of the United States for wheat:

Sec. 1. Wheat.—Any grain which, before the removal of dockage, consists of 50 per centum or more of wheat, and when free from dockage contains not more than 10 per centum of cereal grain of a kind or kinds other than wheat. The term wheat in these standards shall not include emmer, spelt, einkorn, Polish and poulard wheat.

Sec. 2. Basis of determinations.—Each determination of dockage, moisture, temperature, odor, onions, garlic, and live weevils or other insects injurious to stored grain shall be upon the basis of the grain including dockage. All other determinations shall be upon the basis of the grain when free from dockage.

Sec. 3. Percentages.—Percentages, except in the case of moisture, shall be percentages ascertained by weight.

Sec. 4. Percentage of moisture.—Percentage of moisture in wheat shall be that ascertained by the moisture tester and the method of use thereof described in Circular No. 72, and supplement thereto, issued by the United States Department of Agriculture, Bureau of Plant Industry, or ascertained by any device and method giving equivalent results.

Sec. 5. Test weight per bushel.—Test weight per bushel shall be the weight per Winchester bushel as determined by the testing apparatus and the method of use thereof described in Bulletin No. 472, dated October 30, 1916, issued by the United States Department of Agriculture, or as determined

by any device and method giving equivalent results.

Sec. 6. Dockage.—Dockage includes sand, dirt, weed seeds, weed stems, chaff, straw, grain other than wheat, and any other foreign material, which can be removed readily from wheat by the use of appropriate sieves, cleaning devices, or other practical means suited to separate the foreign material present; also undeveloped, shriveled, and small pieces of wheat kernels removed in properly separating the foreign material, and which cannot be recovered by properly rescreening or recleaning. The quantity of dockage shall be calculated in terms of percentage based on the total weight of the grain including the dockage. The percentage of dockage so calculated, when equal to one per centum or more, shall be stated in terms of whole per centum; and when less than one per centum shall not be stated. A fraction of a per centum shall be disregarded. The percentage of dockage, so determined and stated, shall be added to the grade designation.

Sec. 7. Foreign material other than dockage.—Foreign material other than dockage shall include all matter other than wheat which is not separated from the wheat in the proper determination of dockage, except as provided in the case of smutty wheat.

Sec. 8. Cereal grains.—Cereal grains shall include rye, barley, emmer, spelt, einkorn, Polish wheat, poulard wheat, corn, grain sorghums, oats, and rice, only, and shall not include buckwheat, flaxseed, and wild oats.

Sec. 9. Heat damaged kernels.—Heat damaged kernels shall be kernels and pieces of kernels of wheat which have been distinctly discolored by external heat or as a result of heating caused by fermentation.

*Same applies on all grades.

Sec. 10. Treated wheat.—Treated wheat shall be wheat which has been scoured, limed, washed, sulphured or treated in any such manner that its true quality is not reflected by the numerical grade designation, including Sample Grade, alone.

Sec. 11. Garlicky wheat.—Garlicky wheat shall be all wheat which has an unmistakable odor of garlic or wild onions, or which contains garlic or wild onion bulblets in a quantity equal to one or more bulblets in one thousand grams of wheat.

Sec. 12. Smutty wheat.—Smutty wheat shall be all wheat which has an unmistakable odor of smut, or which contains spores, balls, or portions of balls, of smut, in excess of a quantity equal to two balls of average size in fifty grams of wheat.

CLASSES AND SUBCLASSES OF WHEAT.

Sec. 13. Classes and subclasses.—Wheat shall be divided into classes and subclasses as follows:

CLASS I.—Hard Red Spring.—Shall include all varieties of hard red spring wheat, and may include not more than 10 per cent of other wheat or wheats. This class shall be divided into three subclasses as follows:

No. 1 Hard Spring.—Shall include wheat of the class Hard Red Spring consisting of 85 per centum or more of dark, hard, and vitreous kernels.

Dark Northern Spring.—Shall include wheat of the class Hard Red Spring consisting of 75 per cent or more of dark, hard, and vitreous kernels; shall not include more than 10 per cent of wheat of the variety Humpback.

Northern Spring.—Shall include wheat of the class Hard Red Spring consisting of less than 75 per cent and more than 25 per cent of dark, hard, and vitreous kernels; shall not include more than 10 per cent of wheat of the variety Humpback.

Red Spring.—This subclass shall include wheat of the class Hard Red Spring consisting of not more than 25 per cent of dark, hard, and vitreous kernels; shall also include wheat of the class Hard Red Spring consisting of more than 10 per cent of the variety Humpback.

CLASS II.—Durum.—Shall include all varieties of durum wheat, and may include not more than 10 per cent of other wheat or wheats. This class shall be divided into three subclasses as follows:

Amber Durum.—Shall include wheat of the class Durum consisting of 75 per cent or more of hard and vitreous kernels of amber color. This subclass shall not include more than 10 per cent of wheat of the variety Red Durum.

Durum.—Shall include wheat of the class Durum consisting of less than 75 per cent of hard and vitreous kernels of amber color; shall not include more than 10 per centum of wheat of the variety Red Durum.

Red Durum.—This subclass shall include wheat of the class Durum consisting of more than 10 per cent of the variety Red Durum.

Mixed Durum.—Shall be mixed wheat consisting of 70 per cent or more of Durum wheat other than the variety Red Durum any may contain not more than 5 per centum of soft red winter and white wheat, singly or combined. Mixed Durum shall be graded according to the requirements of the grades for Mixed Wheat. The grade designation of mixed durum wheat shall be Mixed class shall be divided into three subclasses Durum, preceded by the number of the grade, or the words "Sample Grade," as the case may be.

CLASS III.—Hard Red Winter.—Shall include all varieties of Hard Red Winter Wheat, and may include not more than 5 per centum of other wheat or wheats. This as follows:

Dark Hard Winter.—Shall include wheat of the class Hard Red Winter consisting of 80 per cent or more of dark, hard, and vitreous kernels.

Hard Winter.—Shall include wheat of the class Hard Red Winter consisting of less than 80 per cent and more than 25 per cent

of dark, hard, and vitreous kernels.

Yellow Hard Winter.—Shall include wheat of the class Hard Red Winter consisting of not more than 25 per cent of dark, hard, and vitreous kernels.

CLASS IV.—SOFT RED WINTER.—Shall include all varieties of Soft Red Winter Wheat, and may include not more than 10 per cent of other wheat or wheats. This class shall be divided into two subclasses as follows:

Red Winter.—Shall include wheat of the class Soft Red Winter consisting of both light and dark colored kernels; shall not include more than 10 per cent of soft Red Winter Wheats possessing the characteristics of this class as grown west of the Great Plains area of the United States.

Western Red.—Shall include wheat of the class Soft Red Winter consisting of more than 10 per cent of this class grown west of the Great Plains area of the United States or any wheat of this class possessing the characteristics of soft red winter wheat as grown west of the Great Plains area of the United States.

CLASS V.—WHITE. This class shall include all varieties of white wheat, whether winter or spring grown, and may include not more than ten per centum of other wheat or wheats. This class shall be divided into three subclasses as follows:

Hard White.—This subclass shall include wheat of the class White, consisting of seventy-five per centum or more of hard (not soft and chalky) kernels. This subclass shall not include more than ten per centum of wheat of the varieties Sonora and White Club, either singly or in any combination.

Soft White.—This subclass shall include wheat of the class White consisting of less than seventy-five per centum of hard (not soft and chalky) kernels. This subclass shall not include more than ten per centum of wheat of the varieties Sonora and White Club, either singly or in any combination.

Western White.—This subclass shall include wheat of the class White consisting of more than ten per centum of the varieties White Club and Sonora, either singly or in any combination.

MIXED WHEAT.—Mixed wheat shall be any mixture of wheat not provided for in the classes from I to V, inclusive, defined in section 13.

MIXED WHEAT.

Grades for Mixed Wheat. — Mixed wheat shall be graded according to each of the grade requirements common to all of the subclasses of the class of the wheat which predominates over each other class in the mixture, except that all of the grade requirements in any subclass as to the maximum percentage of other wheat or other varieties of wheat shall be disregarded. The grade designation of mixed wheat shall include, successively, in the order named, the number of the grade or the words "Sample Grade," as the case may be, the word "Mixed," and, in the order of its predominance, the name and approximate percentage of each class of wheat which constitutes 10 per cent or more of the mixture, but if only one class exceeds 10 per cent of the mixture, the name and approximate percentage of that class shall be added to the grade designation followed by the name and approximate percentage of at least one other class.

TREATED WHEAT.

Grades for Treated Wheat. — Treated wheat shall be graded and designated according to the grade requirements of the standard applicable to such wheat if it were not treated, and there shall be added to, and made a part of, its grade designation a statement indicating the kind of treatment.

GARLICKY WHEAT.

Grades for Garlicky Wheat. — Garlicky wheat shall be graded and designated according to the grade requirements of the standard applicable to such wheat if

it were not garlicky, and there shall be added to, and made a part of, its grade designation the word "Garlicky."

SMUTTY WHEAT.

Grades for Smutty Wheat. — Smutty wheat shall be graded and designated according to the method described either in paragraph (a) or paragraph (b) of this section.

(a) Before the determination of smut dockage as provided in this paragraph, the wheat shall be graded and designated according to the grade requirements of the standard applicable to such wheat if it were not smutty, except that smut balls shall not be considered as foreign material other than dockage. The loss in weight caused by the removal of smut from the wheat shall be ascertained by scouring, washing, or otherwise, and shall be calculated in terms of percentage based on the total weight of the grain free from dockage. The percentage so calculated shall be stated in terms of whole per centum and half per centum. A fraction of a per centum when equal to, or greater than, a half shall be treated as a half, and when less than a half shall be disregarded. The percentage of the "smut

dockage," so calculated and stated, shall be added to the grade designation preceding the statement of dockage, if any.

(b) Smutty wheat shall be graded and designated according to the grade requirements of the standard applicable to such wheat if it were not smutty, except that (1) smut balls shall not be considered as foreign material other than dockage, and (2) when the amount of smut present is so great that any one or more of the grade requirements of the grades from No. 1 to No. 5, inclusive, can not be applied accurately, the wheat shall be classified as Sample Grade. For all grades there shall be added to and made a part of the grade designation, preceding the statement of dockage, if any, the word "smutty."

WEEVILY WHEAT.

Weevily wheat shall be all wheat which is infested with live weevils or other insects injurious to stored grain. It shall be graded and designated according to the grade requirements of the standards applicable to such wheat if it were not weevily, and there shall be added to, and made a part of, the grade designation the word "Weevily."

SHELLED CORN GRADES.

By virtue of the authority vested in the Secretary of Agriculture by the Acts of Congress, approved Aug. 11, 1916, the following grades for corn are fixed and promulgated, to take effect on July 15, 1918, as amended Oct. 3, 1921.

TABULATED SUMMARY.

Damaged kernels
(by weight)
not to exceed

Grade Classification: White Corn, Yellow Corn, Mixed Corn.	Moisture content not to exceed.	Total.	Heat damaged.	Foreign material and cracked corn not to exceed	chester bushel, per measured Win- Minimum test weight
	Pct.	Pct.	Pct.	Pct. (by weight)	Lbs.
No. 1....	14.0	2	0	2	55
No. 2....	15.5	4	0.1	3	53
No. 3....	17.5	6	0.3	4	51
No. 4....	19.5	8	0.5	5	49
No. 5....	21.5	10	1.0	6	47
No. 6....	23.0	15	3.0	7	44

Sample not good enough for above grades, see note 3.

EXPLANATORY NOTES.

(1) The corn in grades No. 1 to No. 5 shall be cool and sweet.

(2) No. 6 Corn shall be cool but may be musty or sour.

(3) "Sample Grade" shall be white corn, or yellow corn, or mixed corn, respectively, which does not come within the requirements of any of the grades from No. 1 to No. 6, inclusive, or which has any commercially objectionable foreign odor, or is heating or otherwise of distinctly low quality.

For the purposes of the official grain standards of the United States for shelled corn (maize):

Section 1. Corn.—Corn shall be shell corn of the flint or dent varieties.

Sec. 2. Basis of Determinations.—Each determination of color, damage, and heat damage shall be upon the basis of the grain after the removal of foreign material and cracked corn as provided in section 6. All other determinations shall be upon the basis of the grain including such foreign material and cracked corn.

Sec. 6. Foreign Material and Cracked Corn.—Foreign material and cracked corn shall be kernels and pieces of kernels of

corn, and all matter other than corn, which will pass through a metal sieve perforated with round holes twelve sixty-fourths of an inch in diameter, and all matter other than corn remaining on such sieve after screening.

Sec. 7. Heat Damaged Kernels.—Heat damaged kernels shall be kernels and pieces of kernels of corn which have been distinctly discolored by external heat or as a result of heating caused by fermentation.

CLASSES OF SHELLED CORN.

Sec. 8. Classes.—Shelled corn shall be divided into three classes as follows:

White Corn.

This class shall consist of corn of which at least ninety-eight per cent by weight of the kernels are white. A slight tinge of light straw color or of pink on kernels of corn otherwise white shall not affect their classification as white corn.

Yellow Corn.

This class shall consist of corn of which at least ninety-five per cent by weight of the kernels are yellow. A slight tinge of red on kernels of corn otherwise yellow shall not affect their classification as yellow corn.

Mixed Corn.

This class shall consist of corn of various colors not coming within the limits for color as provided in the definitions of white corn and yellow corn. White capped yellow kernels shall be classified as mixed corn.

Sec. 10. Weevily Corn. — Weevily corn shall be all corn that is infested with live weevils or other insects injurious to stored grain. Weevily corn shall be graded and designated according to the grade requirements of the standards applicable to such corn if it were not weevily, and there shall be added to, and made a part of, the grade designation the word "weevily."

GRADE STANDARDS FOR OATS.

TABULATION OF GRADE REQUIREMENTS FOR WHITE, RED, GRAY, BLACK, MIXED, BLEACHED, AND CLIPPED OATS.

(Section 13 tabulated and abridged.)

Grade.	Condition and general appearance. ¹	Minimum test weight per bushel.	Sound oats not less than	Heat damaged (oats grains).	Foreign material.	Wild oats.	Other colors, cultivated & wild oats.
		Pounds.	Per cent.	Per cent.	Per cent.	Per cent.	Per cent.
1	Shall be cool and sweet, and of good color	32	98	0.1	2	2	2
2	Shall be cool and sweet, and may be slightly stained	29	95	.3	2	3	4
3	Shall be cool and sweet, and may be stained or slightly weathered	26	90	1	3	5	10
4	Shall be cool, and may be musty, weathered, or badly stained	23	80	6	5	10	10

Sample Grade. Shall be white, red, gray, black, mixed, bleached, or clipped oats, respectively, which do not come within the requirements of any of the grades from No. 1 to No. 4, inclusive, or which have any commercially objectionable foreign odor, or are heating, hot, sour, or are otherwise of distinctly low quality.

¹The percentage of moisture in grades Nos. 1, 2 and 3 shall not exceed 14½, and in grade No. 4 shall not exceed 16.

²In the case of white oats, No. 1 shall be cool and sweet and of good white or creamy white color.

³4 per cent of other colors allowed in No. 1 red, gray, or black oats. This column does not apply to mixed oats.

⁴10 per cent of other colors allowed in No. 2 red, gray, or black oats.

For the purposes of the official grain standards of the United States for oats:

SECTION 1. *Oats*.—Oats shall be any grain which consists of cultivated oats and not more than twenty-five per centum of foreign

material, other grains, and wild oats, either singly or in any combination.

SEC. 2. *Basis of determinations*.—All determinations shall be upon the basis of the lot of grain as a whole, including foreign material, other grains, and wild oats.

OFFICIAL RYE GRADES.

The Secretary of Agriculture has promulgated, effective July, 1923, the following official grain standards of the United States for rye:

Sec. 1. *Rye*.—Rye shall be any grain which before the removal of dockage consists of 50 per cent or more of rye, and when free from dockage contains not more than 10 per cent of cereal grain of a kind or kinds other than rye.

Sec. 2. *Basis of determination*.—[Same as for wheat.]

Sec. 3. *Percentages*.—[Same as for wheat.]

Sec. 4. *Percentage of moisture*.—[Same as for wheat.]

Sec. 5. *Test weight per bushel*.—[Same as for wheat.]

Note.—Under regulations pursuant to the United States Grain Standards Act, licensed inspectors are required to state under "Remarks" in all certificates issued by them for rye, unless issued for an export shipment, the test weight per bushel in whole pounds and tenths of a pound.

Sec. 6. *Cereal grains*.—[Same as for wheat.]

Sec. 7. *Damaged kernels*.—Damaged kernels shall be all grains and pieces of grains of rye and other grains which are heat damaged, sprouted, frosted, badly ground dam-

aged, badly weather damaged, or otherwise distinctly damaged.

Sec. 8. *Heat-damaged kernels*.—[See wheat.]

Sec. 9. *Dockage*.—[See wheat.]

Sec. 10. *Foreign material other than dockage*.—[See wheat.]

Sec. 11. *Garlicky rye*.—[See wheat.] Garlicky rye shall be graded and designated according to the grade requirements of the standards applicable to such rye if it were not garlicky, and there shall be added to, and made a part of, the grade designation the word "garlicky."

Sec. 12. *Weevily rye*.—Weevily rye shall be all rye which is infested with live weevils or other insects injurious to stored grain. Weevily rye shall be graded, etc. [See garlicky rye.]

Sec. 13. *Ergoty rye*.—Ergoty rye shall be all rye which, after the removal of dockage, contains ergot in excess of 0.3 per cent. Ergoty rye shall be graded, etc. [See "garlicky rye."]

Sec. 14. *Smutty rye*.—[See wheat.] Smutty rye shall be graded, etc. [See "garlicky rye."]

Sec. 15. *Grades*.—All rye shall be graded and designated No. 1, No. 2, No. 3, No. 4, or Sample Grade, as the case may be, according to the respective requirement thereof as specified in these standards.

[Tabulation of grade requirements for rye, garlicky, weevily, ergoty and smutty rye. Section 15, tabulated and abridged.]

Grade.	Condition.	Minimum test weight per bushel.	Moisture.	Maximum limits of			
				Damaged kernels (rye and other grains.)	Foreign material other than dockage.	Foreign matter other than wheat.	
		Lbs.	Pct.	Total.	Total.	Total.	Pct.
1	Shall be cool and of natural odor	56	13.5	2	0.1	3	1
2		54	14.5	4	.2	6	3
3		52	15.5	7	.5	10	5
4	Shall be cool and may be musty or sour	49	16.5	15	3.0	10	7

Sample Grade.—Sample grade rye shall be all rye which does not come within any of the grades from Nos. 1 to 4 inclusive, or which has any commercially objectionable foreign odor, except of smut, garlicky, or wild onions, or is heating, hot, or otherwise of distinctly low quality, or contains small, inseparable stones or clinders.

FOREIGN WEIGHTS AND MEASURES.*

UNITED KINGDOM.

Quarter.—In the United Kingdom the quarter comprises among others the following conventional weights:

	Lbs.
Wheat and corn from the Atlantic and Gulf ports of America, from Argentina, Australia and New Zealand.....	480
American and Canadian oats.....	320
Wheat from Pacific Coast of U. S. A.....	500
Californian and Oregon barley.....	448
Russian wheat from Black Sea and Azoff, always.....	492
Russian wheat from Baltic.....	496
Russian corn from Black Sea.....	492
Russian barley from Black Sea and Azoff.....	400
Russian oats.....	304 and 320
Russian rye.....	480
Danubian wheat.....	480
Danubian corn—large berry.....	480
Danubian corn—small berry.....	492
Danubian barley.....	400
Danubian rye.....	180
German wheat—from Dantzic, 500 lbs.; all others.....	504
Chilian barley.....	448
Chilian wheat.....	500
New Zealand oats cif. 320 lbs.; on Mark Lane.....	320 and 336
Argentine oats.....	304
Linseed, American.....	424
Linseed, Russian.....	424
Linseed, Argentine.....	416
Linseed, Bombay.....	416
Linseed, Calcutta.....	410
*If shipped from Poti, 480 lbs.	

THE METRIC SYSTEM.

Weights.—A kilogramme (or kilo) is equal to 2 lbs. 3 oz., or 2.2046 lbs.
A quintal (100 kilos) is equal to 220.4622 lbs. avoirdupois.

A French tonne (10 quintals or 1000 kilos) is equal to 2204.622 lbs. avoirdupois.

Dry Measure.—A hectoliter is equal to 2.537 Winchester bushels; 2.338 Imperial bushels.

Surface Measure.—A hectare is equal to 2.47105 English statute acres.

Long Measure.—A meter is equal to 1 yard 3.37011 inches.

A kilometer is equal to 1,093 yards, 1 foot, 10.11 inches.

ROUMANIA.

Wagon load, 10 tons (long).

RUSSIA.

Pood.—A pood is equal to 36.112 lbs. avoirdupois.

Tchetvert.—A tchetvert is equal to 5.77 Imperial bushels or 5.95 Winchester bushels.

Dessiatine.—A dessiatine is equal to 2.6997 acres.

JAPAN.

Koku.—I koku = 4.96 bu. 1 kin = 1.3221 lbs.

*From Annual Report of Chicago Board of Trade; materials furnished that body by the Board's special foreign correspondent, George J. S. Broomhall, Fellow of the Royal Statistical Society.

APPROXIMATE AMERICAN EQUIVALENTS.

For a quintal of grain by metric system:

Wheat at 60 lbs.....	3.67 bus.
Rye and corn at 56 lbs.....	3.94 bus.
Barley at 50 lbs.....	4.41 bus.
Barley at 43 lbs.....	4.59 bus.
Oats at 39 lbs.....	5.65 bus.
Oats at 34 lbs.....	6.48 bus.
Oats at 32 lbs.....	6.89 bus.
Linseed at 52 lbs.....	4.24 bus.
Linseed at 56 lbs.....	3.94 bus.
Franc =	19.31 cts.
Peso (Argentine), gold.....	96.5 cts.
Shilling =	24.3 cts.

LEGAL WEIGHTS.

Following is a statement of legal weights in pounds per bushel of various commodities from a circular of the Bureau of Standards of the Department of Commerce:

Barley.—U. S. Standard, 48 lbs.; same in all states except as follows: Ala., 47; Ariz., 45; Calif., 50; Ga., 47; Ky., 47; Ore., 46; Pa., 47.

Beans.—Rule is 60 lbs., except as follows: Ariz., 55 (small white beans, 60 lbs.); Fla., velvet beans, 78 lbs.; Ga., same; Mass., soya beans, 58 lbs.; N. H., same; N. C., soya beans, 60 lbs.

Buckwheat.—U. S., N. D., Ore., S. D., Tex., Wash., 42 lbs.; Calif., 40; Ark., Colo., Ga., Ill., Ia., Mo., Mont., Nebr., Okla., Va., W. Va., 52; Ind., Kan., Minn., Nev., N. J., N. C., Ohio, Tenn., Wis., 50 lbs.; Ky., 56; Conn., Me., Mass., Mich., Miss., N. H., N. Y., Pa., R. I., Vt., 48 lbs.

Corn, Shelled.—U. S., 56 lbs.; same elsewhere except as follows: Ariz., 54; Calif., 52; Iowa, sweet corn, 50; H. H., cracked corn, 50; Pa., 58 lbs.; Mass., cracked corn, 50.

Corn, Ear.—Generally 70 lbs., except as follows: Ind., until Dec. 1, thereafter 68 lbs.; Miss., 72; Ohio, 68. Unshucked—Ala., 75; Ark., 74; Fla., 70; Iowa, 75; Okla., 72; Tenn., 74, except green unshelled, 100 lbs.

Oats.—U. S., 32 lbs.; same elsewhere except as follows: Ky., strike measure; N. J., 30; Va., 30.

Peas.—Fla., 60; Mass., 58; Mo., 48; Mont., 45; N. H., 58; Okla., 48; Ore., 45; Tenn., dried, 26.

Potatoes.—U. S., 60 lbs.; same in the states except as follows: Mich., Mo., N. C., Pa., Va., 56.

Sweet Potatoes.—Fla., Md., Miss., 60 lbs.; Mich., Mo., N. C., Va., 56; Ala., Ga., Ind., Ky., Minn., Okla., Texas, 55; Conn., Mass.; N. H., N. J., N. Y., R. I., Wis., 54; Ark., Ill., Kan., Nebr., Nev., Ohio, Tenn., 50; Iowa, N. D., S. D., 46.

Rye.—U. S., 56 lbs.; same in states except as follows: Calif., 54; Me., 50.

Wheat.—U. S., 60 lbs.; all states the same.

SEED WEIGHTS PER BUSHEL.

Alfalfa.—Bu., 60 lbs.

Blue Grass.—Bu., 14 lbs., except Kans. and Nev., English blue grass 22 lbs.

Broom Corn Seed.—Ark., 42 lbs.; Iowa, 50 Minn., 57; N. C., 46; N. D., Okla., S. D., 30, Tenn., 42.

Clover Seed.—Bu., 60 lbs., except N. J., 64.

Flaxseed.—U. S., 56 lbs.; states same except Conn., Mass., N. J., N. Y., N. C., 55.

Kafir.—Bu. 56 lbs., except N. C., 50.

Millet.—Bu., 50 lbs., except Minn., 48.

Orchard Grass.—Bu., 14 lbs.

^aFigures include the crops harvested during the calendar year in the northern hemisphere and the succeeding harvest in the southern hemisphere except where otherwise noted.

^bHarvest year beginning about August 1.

^cUnofficial estimates place the China crop at 70,219 million pounds in 1917; 52,788 million in 1920 and 50,056 million in 1923.

^dThese figures are a revision of the estimated world total as prepared by the U. S. Dept. of Agriculture, Bureau of Economics. The change is caused by a revision of the Java and Madura figures based on official information recently received to the percentage of cleaned rice obtained from a certain amount of rough rice or "paddy" in that country.

BASIS FOR INTERPRETING CROP CONDITION REPORTS.

The equivalent of 100 per cent of a normal condition in terms of prospective yield per acre, for the chief grain crops in the United States, is estimated as follows, the figures being based primarily on averages of the last five years, with modification where such averages are unduly influenced by abnormal years. The approximate yield per acre indicated by the condition report of any month is obtained by multiplying the equivalent of 100 as given below by the condition percentage. For example, if the condition of corn on July 1 be reported 75 per cent of normal, the indicated yield per acre would be $32.0 \times 0.75 = 24.0$ bushels. A brief statement relating to the interpretation of crop condition figures was published in the Crop Reporter for July, 1911:

Crop—	Estimated equivalent in prospective yield of a condition of 100 (normal) on—						Average yield per acre, 1908-1912
	May 1.	June 1.	July 1.	Aug. 1.	Sept. 1.	Oct. 1.
